

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

REPORT.

THE Colonial Office, in Downing Street, has received annually for a series of years a "Blue Book" in manuscript from each Colony, containing a variety of commercial, financial, ecclesiastical, and general information for the use of Government. The "Blue Books" were commenced about the year 1828. Three blank books, with ruled columns and printed headings, are sent to each Colony every year; the blank columns are filled in by returns from the different departments, under the authority of the Colonial Secretary in each settlement; these returns are then sent in duplicate to Downing Street, and one of the three copies is retained in the Colony for the use of the Governor. In 1836-7, a Committee of the House of Commons, then sitting to inquire into the financial condition of the Colonies, examined witnesses with reference to the feasibility and expense of reducing these "Blue Books" into a form adapted for publication. perhaps of the time and expenditure, which the arrangement and publication of a vast mass of documents would occasion (about £10,000), nothing was done by Government; and, in pursuance of an object which has occupied a third of my life at home and abroad (namely, to make the condition of the Colonies of the Empire fully known to, and their importance appreciated by, the British public), I solicited permission from the Secretary of State to prepare, with my own assistants, and at my own expense, such a work as the Committee of the House of Commons was desirous of possessing. His Lordship's reply to my application was as follows:-

From Sir George Grey, M.P., Under-Secretary of State for the Colonies.

"Colonial Office, Downing Street.
7th February, 1838.

"Sir,

"I am directed by Lord Glenelg to acknowledge the receipt of your letter of the 2nd instant, and to acquaint you in reply that his Lordship has much pleasure in complying with your request for access to the information in this office, comprised in the "Blue Books" annually transmitted from the respective Colonies. Mr. Meyer, the librarian, has received his Lordship's directions to submit them to your inspection, on your application to him for that purpose. Lord Glenelg will also be happy to afford you access to any other statistical information in this office respecting the Colonies.

"I am, Sir, your most obedient servant,

"To Robert Montgomery Martin, Esq., &c. &c."

"GEORGE GREY.

An office was assigned for my use in Downing Street, and, by the courtesy of Mr. Meyer, I was supplied with upwards of two hundred and fifty volumes of "Blue Books," and with various documents of a public nature. The materials which these books contained were carefully examined, and the facts which I deemed it useful to publish were collated and arranged in a tabular form, together with an immense mass of facts collected from every public department, and from every quarter deemed authentic, so as to present consecutive views of the progress or decline of each Colony in population, education, religion, crime, commerce, shipping, staple products, finances, and in every thing which can portray the physical, moral, and intellectual condition of so large a part of the British Empire.

At the East India House also an apartment was assigned me, and the commercial returns from Bengal, Madras, and Bombay for forty years, were, by the urbanity of Mr. Peacock, placed before me. Mr. Melville, Secretary to the East India Company; Mr. Irving, Inspector-General at the Custom House; Mr. Woodhouse, of the Plantation Office; Mr. Covey, Registrar-General of Shipping; Mr. Brown, Registrar-General of Merchant Seamen; Mr. Porter, of the Board of Trade; and the Courts of Directors and Secretaries of

the different public Companies connected with our transmarine possessions, all granted me their invaluable aid towards the preparation of this work.

The Colonies are arranged geographically, and divided into Books, thus :-

BOOK I.—Possessions in the West Indies.—Jamaica, Trinidad, Tobago, Grenada, St. Vincent, Barbadoes, Antigua, Dominica, St. Lucia, St. Christopher, Montserrat, Nevis, Tortola and the Virgin Isles, New Providence, and the Bahamas, the Bermudas, &c.

BOOK II.—Possessions in South America.—Demerara, Essequibo, Berbice, Honduras, and the Falkland Islands.

BOOK III.—Possessions in North America.—Canada (Upper and Lower), New Brunswick, Nova Scotia, Cape Breton, Prince Edward Isle, Newfoundland, Labrador, and the Hudson Bay Territories.

Book IV.—Possessions in Asia.—Bengal, Madras, Bombay, Ceylon, Penang, Malacca, and Sincapore.

BOOK V.—Possessions in Austral-Asia.—New South Wales, Van Diemen's Island, Swan River, and Southern Australia, &c.

BOOK VI.—Possessions in Africa.—Cape of Good Hope, Mauritius and Seychelles, St. Helena, Ascension, Sierra Leone, the Gambia, Accra, Cape Coast Castle, &c.

BOOK VII.—Possessions in Europe.—Gibraltar, Malta and Gozo, Corfu, Cephalonia, Santa Maura, Ithaca, Zante, Paxo, Cerigo, and Heligoland.

Each Colony forms a separate chapter, which is again subdivided into numbered sections, according to a system which will shew at a glance under each head of Population, Commerce, Finances, &c. all the information which could be obtained relative to these subjects. In the Appendix a similar plan has been adopted, the documents belonging to each Book being classified according to their respective geographical arrangement.

In the West India Appendix will be found the general trade of the West Indies in the aggregate, and of each island for a series of years as regards the exports to England, and the duties levied there on sugar, coffee, rum, &c. Full details of the recent reports relative to education among the emancipated negroes, of sickness in the West Indies, of the prices of tropical produce, &c., will also be found in this Appendix. The Appendix to the book on North America contains several important statements relative to the lands granted in Canada, aggregate statements of the trade of the Northern Colonies, the value of Spanish dollars, &c. The Asiatic Appendix supplies a great variety of information, some of which was obtained at the East India House after the text was printed. The documents respecting the British feudatory, stipendiary, and dependent chiefs—the classified population of different districts—the rates of pay and regulations of the army—the commerce, coins, weights and measures, &c. of the Anglo-Eastern Empire, are all of the highest value. There will be found in the Austral-Asian Appendix copious details relative to population. crime, the treatment of convicts, secondary punishments, &c., in addition to the abundant facts given in Book V. The judicial, mercantile, and banking charters are given in the Appendix of the book to which the Colonies belong possessing such charters. Thus the Colonial Bank charter is in the West India Appendix, the British Guyana Bank charter under South America, the Hudson Bay charter under North America, the East India Company charter under Asia, and the Ionian Islands charter under the Europe Appendix. Emigration Appendix, with a variety of data as to emigrants, rates of wages, regulations, &c., has been added, and at the conclusion is given a General Appendix of several documents relating to shipping, finances, &c. not applying specifically to any one Colony.

In order to render the work more complete for reference, a brief view of the manner in which each Colony has been acquired by Great Britain, and of its chief physical features,

has been prefixed to the vital statistics. A full account of the history, geography, &c. of each settlement will be found in my "History of the British Colonies," in five large octavo volumes, and in my "Colonial Library," in ten smaller volumes. A large statistical chart shews, in an aggregate form and in round numbers, as being more easily retained by the memory, the condition of the Colonies in 1836, the latest year in which the "Blue Books" are complete, and as accurate as existing documents will permit. In some of the columns, viz. those of religion and property, estimates have been obliged to be resorted to, in place of actual returns to Government.

A map of the world coloured, to shew the geographical position of our Colonies, has been appended by Mr. Wyld, geographer to the Queen.

The seals of each Colony, chastely designed by Mr. Wyon, chief engraver of the Royal Mint, are now, for the first time, laid before the public. The centre of the colonial seal is alone given: it is surrounded by the royal arms, as observed in the engraving of the Upper Canada seal, plate 1. I am indebted to Mr. Freebairn's skill with the patent analyptograph for the beautiful engraving with which this branch of the work is illustrated. My principal assistant, Mr. Frederick Medley, bestowed great care on a work which required unremitting industry, attention, and zeal—qualities which were rendered more useful by his personal knowledge and appreciation of the value of the Colonies. While adverting to the different individuals who have contributed towards the preparation of this work, I should not omit to mention the excellent typographer, Mr. Nicol, of the Shakspeare Press, Pall Mall.

A tabular Index, after a new and compendious plan, will enable the inquirer to find in a moment the pages in the Book and in the Appendix relating to any subject on which he may desire information.

With respect to the numerous tables and data, which the following pages present, they may be relied on as the nearest approximation to truth yet attainable. The "Blue Books" are, of late years, more perfect than when they were first established; and great credit is due to the gentleman in the Colonial Office with whom the statesman-like idea originated, and to those also who, undeterred by difficulties or disappointments, have succeeded in reducing the plan to a system, which every future return will bring to a greater degree of accuracy. It may be observed, perhaps, that the gaol returns from several Colonies shew sometimes a great and sudden change in the annual number of prisoners. This can only be accounted for by supposing that occasionally the whole of the gaols in the Colony are included in the return, and in some years, only those prisoners confined in the chief town.

There are about three million figures in the volume, and a nearly equal number was required to form the additions, subtractions, &c. In order to get as much information as possible into a given tabular space, shillings, pence, and fractional parts, have been excluded, which will account for any slight apparent discrepancy in the summing up of the totals, and which it did not appear advisable to alter.

As the work may be deemed an official record, I have considered it right to abstain from all comment on the multiplicity of facts now collected and printed, and to suppress even an introduction which I had prepared on ancient and modern colonization, and on the political and commercial importance of Colonies to England.

The statements contained in the following pages speak for themselves: they constitute the most extraordinary record of a Colonial Empire that man ever witnessed—an empire which has been the growth of ages, yet is still in its infancy, and on whose extension and improvement, so far as human judgment can predict, depends the happiness of the world.

THE COLONIES, &c.

BOOK I.—POSSESSIONS IN THE WEST INDIES.

CHAPTER I.—JAMAICA.

SECTION I.—The Island of Jamaica is situated between the parallels of 17° 35′ to 18° 30′ north latitude, and 76° to 78° 40′ west longitude, 4000 miles southwest of England, 90 west of St. Domingo, the same distance south of Cuba, and 435 north of Carthagena on the South American continent. It is 150 miles long, 55 broad, and contains about 4,000,000 acres.

II. Jamaica was discovered by Cristopher Columbus, on the 2nd May, 1494, during his second expedition. It was called *Xaymaca* in the Florida language, signifying abundance of wood and water; and St. Jago, alias St. James, by Columbus, in honor of the patron saint of Spain. Columbus took formal possession of Jamaica for his sovereign; but owing probably to the apparent hostility of the aborigines, by whom it was then densely peopled, the Spaniards formed no settlement. In 1503 the Spaniards first hegan to colonize Jamaica. In 1558 the aborigines had entirely perished, and slaves were then intro-duced. In 1605 Sir Anthony Shirley made some predatory incursions on the Spanish settlers then scattered in various parts of the island, and in 1638 Col. or Capt. William Jackson made a descent on Jamaica, beat the Spaniards at Passage Fort, and compelled them to pay a large sum of money for the preservation of their capital. The island remained in the possession of the Spaniards until the 3rd May, 1655, when Jamaica was conquered from the Spaniards by a large armament, fitted out by Oliver Cromwell. and commanded by Gen. Venables and Admiral Penn. From thence to the present period Jamaica has remained in the possession of Great Britain.

The following is a list of the slave insurrections in the island: 1678. Rebellion caused by the prolongation of martial law. 1684. Ditto—first serious one. 1686. Ditto—sanguinary at Clarendon. 1702. Ditto.

Eastern districts. 1717. Ditto—causing great alarm. Not to mention districts or particular events, it may be sufficient to name the years in which the insurrections occurred:—In 1722, 1734, 1736, 1739, 1740, 1745, 1758, 1760, 1765, 1766, 1769, 1771, 1777, 1782, 1795, 1796, 1798, 1803, 1807, 1809, 1824, 1832. During the latter rebellion 200 were killed in the field, and about 500 executed. The expense of putting down the rebellion of 1760, was £100,000. It is estimated that the expense of 1832, (exclusive of the value of the property destroyed, viz. £1,154,583) was £161,596. The British parliament granted a loan of £500,000 to assist the almost ruined planters.

The following are the names of the Governors, Lieut.-Governors, &c., of Jamaica, with the years when they commenced their administrations: Gov. Col. D'Oyley, 1660; Gov. Lord Windsor, 1662; Lieut.-Gov. Sir C. Lyttleton, Knt., 1662; Pres. Col. Thomas Lynch, 1664; Gov. Sir T. Modyford, Knt., 1664; Lieut. Gov. Sir T. Lynch, Knt., 1671; Lieut. Gov. Sir H. Morgan, Knt., 1675; Gov. Lord Vaughan, 1675; Lieut.-Gov. Sir H. Morgan, Knt., 1678; Gov.

Charles Earl of Carlisle, 1678; Lieut.-Gov. Sir. H. Morgan, Knt. 1680; Gov. Sir Thomas Lynch, Knt. 1682; Lieut.-Gov. Col. Hender Molesworth, 1684; Gov. Christopher Duke of Albemarle, 1687; Pres. Sir Francis Watson, 1688; Gov. William Earl of Inchiquin, 1690; Pres. John White, Esq., 1692; Pres. John Bourden, Esq., 1692; Licut.-Gov. Sir W. Beeston, Knt., 1693; Gov. William Selwyn, Esq., 1702; Lieut.-Gov. P. Beckford, Esq. 1702; Lieut.-Gov. T. Handasyd, Esq. 1702; Gov. Lord Archibald Hamilton, 1711; Gov. Peter Heywood, Esq., 1716; Gov. Sir Nicholas Lawes, Knt., 1718; Gov. Henry Duke of Portland, 1722; Pres. John Ayscough, Esq., 1722; Gov. Major-Gen. Robert Hunter, 1728; Pres. John Ayscough, Esq., 1734; Pres. John Gregory, Esq., 1735. Henry Cunningham, Esq. was appointed Governor in 1735, but Pres. Gregory was succeeded by Gov. Edward Trelawny, Esq. 1738; Gov. Charles Knowles, Esq 1752; Lieut.-Gov. Henry Moore, Esq. 1756; Gov. George Haldane, Esq. 1758; Lieut.-Gov. Henry Moore, Esq. 1759; Gov. W. H. Lyttleton, Esq. 1762; Lieut.-Gov. R. H. Elletson, Esq. 1766; Gov. Sir William Trelawny, Bart., 1767; Lieut.-Gov. Lieut.-Col. J. Dalling, 1773; Gov. Sir Basil Keith, Knt., 1773; Gov. Major-Gen. J. Dalling, 1777; Gov. Maj. Gen. Archibald Campbell, 1782; Lieut. Gov. Brigadier-Gen. Alured Clarke, 1784; Gov. Thomas Earl of Effingham, 1790; Lieut. Gov. Major-Gen. Williamson, 1791; Lieut.-Gov. Earl of Balcarras, 1795; Lieut.-Gov. Lieut. Gen. G. Nugent, 1801; Lieut. Gov. Lieut. Gen. Sir E. Coote, 1806; Gov. Duke of Manchester, 1808; Lieut.-Gov. Lieut.-Gen. E. Morrison, 1811; Gov. Duke of Manchester, 1813; Lieut. Gov. Major-Gen. H. Conran, 1821; Gov. Duke of Manchester, 1822; Lieut. Gov, Major-Gen. Sir John Keane, 1827; Gov. Earl of Belmore, 1829; Pres. G. Cuthbert, Esq., 1832; Gov. C. H. Earl of Mulgrave, 1832; Gov. Marquis of Sligo, Dec. 1833; Lieut. Gen. Sir Lionel Smith, 1836.

III. Jamaica is somewhat of an oval shape, with an elevated ridge called the "Blue Mountains," (towering in some places to nearly 8,000 feet above the level of the sea,) running longitudinally through the isle E. and W., and occasionally intersected by other high ridges, traversing from N. to S.; approaching the sca on the S. coast in gigantic spines, of sharp ascentdifficult of access, and clothed with dense and sombre forests; -on the N. declining into lovely mounds and round-topped hills, covered with groves of pimento, and all the exquisite verdure of the tropics,—the coup d'ail presenting a splendid panorama of high mountains, embosomed in clouds, and vast savannahs or plains, hills and vales, rivers, bays, and creeks. The middle part, called Pedro's Cockpit, lying between Clarendon and St. Ann's Parishes, is spread for an extent of many miles, with an infinite number of round-topped hills, whose surface, covered with loose lime-stone, or honey-comb rock, is clothed with fine

cedar and other trees, of enormous bulk; the dales | or cockpits meandering between these hummocks contain a rich soil, of great depth, where the suc-culent Guinea grass forms a perfect carpet of eververdant beauty.

From Fort Morant (conspicuous under a steep hill,) to Port Royal, there is a narrow spit of land, called the palisades, composed of sand, overgrown with mangroves; behind this is the harbour of the chief commercial town. St. Jago de la Vega, or Spanish Town, Co. Middlesex, on the S.W. side of the island, about 16 miles from the sea, and 16 from Kingston, is the seat of Government, but Kingston is in reality the capital of the island. Kingston is situated on a gentle slope of about one mile in length, which is bounded on the S. by a spacious basin, through which all vessels must advance beneath the commanding batteries of Port Royal. The extended inclined plane, on the verge of which Kingston stands, is enclosed on the N. by the loftiest ridge of the Blue Mountain chain, termed Liguana, which, forming a semi-circle, terminates in the E. at the narrow defile of Rock Fort,-from thence a long neck of land stretches far away to Port Royal, forming the S. barrier of a beautiful haven; in the W. the semicircle terminates at a contracted pass upon the edge of an impracticable lagoon, from thence the main land sweeping round to Port Henderson, and the projecting saltpond hills secure an harbour, in which the navies of Europe may safely ride. The entrance is defended on the E. point of the delta of Fort Royal by the formidable ramparts of Fort Charles, thickly studded with heavy ordnance; on the W. side, by the cannon of Rock Fort, while the low raking shot from the long level lines of Fort Augusta, which face the narrow channel, would sweep a hostile navy off the ocean. For nine miles around Kingston is an alluvial plain, surrounded by a series of irregular mountains, some of which to the E. and N.E. are of considerable elevation,-constantly cloud-capped, and appearing as if made up of several hills piled one upon another, with various elevations, picturesque valleys and chasms, impressing the mind with an idea of volcanic origin, or that some convulsion of nature had caused the strange irregularity displayed.

The streets in Lower Kingston are long and straight, with a mathematical regularity like the new town of Edinburgh, the houses in general two stories, with verandahs above and below. The English and Scotch churches are really elegant structures, particularly the former, which is built on a picturesque spot, commanding a splendid view of the city, the plains around it, the amphitheatre of mountains, and the noble harbour of Port Royal.

On a plain at the top of the declivity on which Kingston is built are the fine barracks, called Up Park Camp, and not far hence on a still more conspicuous spot, is the residence of the naval commander-in-chief on the station, called the Admiral's Pen. The heights of the principal places above the level of the sea, are thus computed:—Blue Mountain Peak, 7,770 feet; Ridge of ditto, 7,163; Portland Gap ridge, 6,501; Portland Gap, 5,640; Catherine's Peak, 4,970; Abbey Green House, s.D. 4,233; Clifton House, s.a. 4,228; Flamsted House, 3,800; Sheldon House, 3,417; Middleton House 2,340; Stoney Hill, Bucks, 1,360; Green Castle, 1,328; Hope Tavern, 699.

It is asserted, however, that the three very remarkable peaks on the grand ridge of Blue Monntains at the eastern part of the island called the Coldridge, have their respective summits 8,184, 7,656, and 7,576

above the level of the sea, and there are other mountains in this ridge exceeding a mile in height. Catherine's Peak, about seven miles and a half N. of Kingston, is stated to be 5,075 feet, and Hardwar Hill to the westward of it nearly of equal elevation. forming the summits of another grand ridge which crosses the island diagonally. The mountains to the W. in the counties of Middlesex and Cornwall do not reach to the height of a mile, rarely exceed half a mile; Leman's mountain, in the county of Middlesex, six miles N. of Spanish Town is 2,282 feet high, and the Bull's Head, in Clarendon, near the centre of the island on the meridian of Carlisle Bay, is 3,140 feet. In the W. the Dolphin's Head, S. of Luces is 3.450 feet. On the S. E. coast Yallah's Hill, which is within the point of the same name, is only 2,706 feet. The greater proportion of the mountains are of conical form, with steep declivities, approaching very near the shore on the N. coast, and leaving plains of about 12 miles wide on the S.; the dark and deep ravines between the lofty mountains, denominated Cockpits, are closely shut in by dense woods, and offer a marked contrast to the lower mountains, which are cultivated with coffee, pimento, cotton, capsicums, &c., in all their variety, affording delightful country retreats from the coast.

The beauty of the island is further enhanced by its numerous rivers, upwards of 200 of which have been enumerated; few, however (owing to the mountainous and hill and dale nature of the country), are navigable for vessels of any burthen, although they might be made so by means of locks, &c. In St. Elizabeth parish, Black River, which flows for the most part through a flat country, is the deepest and least rapid, and is navigable for flat-bottomed boats and canoes for about 30 miles. The other chief rivers on the S. side are the Rio Cobre and Rio Minho, and on the N., Marthabræ, White, Ginger, and Great River, &c .-The precipitate current of the streams renders them the better adapted for mechanical purposes, their quick agitation over the falls preserves their zest and sprightliness for animal drink, and prevents the too great evaporation and formation of damps and mists, which would otherwise be occasioned.

Springs are extremely numerous, even in the highest mountains; about Kingston, and on the N. side, they are generally impregnated with calcareous earth, and in the latter stalactites are met with. Several are of a medicinal nature in Vere and Portland; the most celebrated is one of a sulphureous nature in the E. parish of St. Thomas, giving name to a village called Bath. There is a cold and a hot spring; the latter runs by many rills out of the side of a rocky cleft that confines the middle part of the sulphur river to the E., as it flows towards the S.; it is very hot at its source, naturally light, and plentifully charged with volatile particles of mineral acid, combined with sulphureous steam, slightly engaged in a calcareous base. The cold spring differs only in being more abundantly charged with sulphur; the use of both is exceedingly beneficial in cutaneous disorders, obstructions of the viscera, &c.

Of the harbours it may be sufficient to state, that the Jamaica shore has 16 principal secure havens, besides 30 bays, roads, or shipping stations, which afford good anchorage.

The island is divided into three counties-Middlesex, Surrey, and Cornwall, each of which is subdivided into parishes, nine, seven, and five. Cornwall, contains 1,305,235 acres,3 towns, 5 parishes, 6 villages; Middlesex, 672,616 acres, 1 town, 9 parishes, 13 vilvillages. Total, 3,500,000 acres, 6 towns, 21 parishes, 27 villages.

Middlesex contains St. Jago de la Vega, or Spanish Town, situate in a noble plain, and adorned with many fine buildings in the Castilian style; Surry contains Kingston and Port Royal, and likewise the villages of Port Morant and Morant Bay, the latter of considerable importance on account of its shipping; Portland parish, in this county, contains Port Antonio, one of the most commodious and secure in the island; St. George Parish contains Annotto Bay; Cornwall county has Montego Bay on the N. W. coast, on which coast Falmouth, 20 miles east of Montego Bay, is also situate. The other places worth notice are Carlisle and Bluefield Bays on the S. and Marthabræ and Lucea harbours on the N. coast. The chief headlands of the island are Port Morant, at the east end of Jamaica, and two promontories on the W. end, the coast along which is bold and high.

The roads through the island are in general narrow but good. By the old laws the width of the roads was ordered as follows:-Width in standing wood, 60 feet; width of wood in one side, 40 feet; width of open ground, 24 feet. The making of some roads in the island have cost £ 700 per mile.

It may be necessary to say a few words respecting the position of the military stations, &c. in Jamaica, especially on the south side of the island, where four out of five regiments are stationed. To begin with-

FORT AUGUSTA.—This strong fortress is built upon a low neck of land, or peninsula, joined to the hills at Port Henderson by a narrow isthmus of sand, having a coral formation for its base. The buildings of the fort occupy the whole area of the point of the peninsula, which is surrounded by the sea, except to the west, the south face of the port being washed by the deep water of the ship channel, while the east and north fronts are environed by the shallow waters of a lagoon. The fort is considered healthy, owing to the prevalence of the wind from the S. and S. E. The barracks are two stories high, well ventilated, and contain generally four service companies.

UP-PARK CAMP contains the only government barracks in Jamaica, and they are indeed highly creditable to the island. They are situate about two miles north of Kingston, at the extremity of the plain of Liguana, which gradually rises above the level of the sea, is well cultivated, extremely fertile, about one mile and a half south of the Long Mountain, with an elevation of 800 feet, covered with brush wood, and exceedingly steep towards Kingston. The height of the camp above the sea shore is about 200 feet, and it covers an irregular square of between 200 and 300 acres, sloping towards Kingston. The barracks consist of two long parallel lines of buildings, extending from E. to W. (that to the S., or seaward, comprising the officers' quarters), two stories high, and six-feet basement, an excellent hospital, a splendid bath of 40 feet clear and four deep, containing 70,000 gallons of running water. This fine bath is supplied with water from Papine estate, four miles and a half distant; the pipe conveying it is six inches in diameter, with a velocity of 12 inches, and discharging 4,500 gallons per hour. plentiful supply of so indispensable an element enables the soldiers to irrigate their neat gardens, which are laid out in the camp, and which furnish the garrison with a constant supply of vegetables. The whole cantonment, at 60 feet distance, is surrounded by a wall of six feet high, surmounted by an iron palisading: 1,284 European soldiers are encamped with com-

lages; Surrey, 1,522,149 acres, 2 towns, 7 parishes, 8 | fort, and the attached offices are spacious, lofty, and commodious.

Stoney Hill garrison, capable of holding 500 menis situate 2000 feet above the level of the sea, on the ridges of a chain of mountains (in a depression between a more elevated chain), running in a curved direction from E. to W., and enjoying a most beautiful and picturesque view of the inclined alluvial plain of Liguana, of the city of Kingston, of Port Royal, of Fort Augusta, and of the adjacent country. barracks, hospitals, &c. are, generally speaking, situate on small detached eminences, and are nine miles north of Kingston, seven of which cross the plain of Liguana; the remainder of the road is rather an abrupt ascent to the garrison, but practicable for wheeled carriages of every description. This post commands the grand pass, which intersects the island from N. to S., and is therefore justly considered of great importance. The government ground at the station amounts to 83 acres.

Port Antonio, situate at the extremity of the island, 80 miles from Kingston, is nearly insulated; -its fort exhibiting a half-moon battery, with a magazine in the rear, 144 feet long, by 21 wide. The barracks are placed upon a kind of peninsula, forming on either side a bay, and capable of containing upwards of 50 men. The buildings are new and elevated, commodious, and commanding a fine view of the sea.

Falmouth, or Marthabræ, 15 miles E. of Montego Bay, has a small fort at Point Palmetto, with a good set of artillery barracks, and an hospital, stores and quarters, open to the sea breeze. It is a bar harbour; channel very narrow, intricate, not more than 16 or 17 feet deep, but within a regular depth of from five to ten fathoms. The town of Falmouth is built on the W. side of the harbour.

Maroon Town is situate in the interior, between the parishes of Westmoreland and St. James, on a very high mountain, affording a most desirable station, in a military as well as in a sanatory point of view. The barracks, delightfully placed in the midst of verdant mountains and springs of the most deli-cious water, are capable of accommodating upwards of 200 men, with an excellent hospital for 20 patients.

Montego Bay is situate at the foot of a range of mountains which nearly surround the town, except on the sea side. The barracks for 100 men, and an hospital for 40 patients, are complete and comfortable. The N. point is in Lat. 18.30 N. It is a good bay, sheltered from all winds, from the N.N.E. round to E. and W. and open to those from N. and W. It is distant 15 miles from-

Lucea, or Fort Charlotte; which is built on the N. E. extremity of a peninsula, bounded on one side by the beautiful bay and secure harbour of Lucea, and on the other by the sea. The mountains of Hanover and Westmoreland rise abruptly and majestically high immediately behind the town of Lucea, about one mile from the garrison. The highest peak, termed the Dolphin's Head, serves as a good land-mark to the mariner.

Savannah Le Mar. This is a fine station, in the midst of a highly-cultivated country. From the seashore the ground springs a little towards the N. pretty level, and intersected by several fine rivers; towards the E., at the distance of 12 miles, the mountains begin to rise near the coast, running nearly northerly upwards of 16 miles, when they turn to the W. and incline, after running several miles further, towards the S., where they terminate not far from the

and highly-cultivated amphitheatre. The town of Savannah le Mar is situated on the beach, from which a low alluvial flat extends for several miles; in this plain, about one mile from the town, is an excellent range of barracks. The station is now healthy, and the harbour good; but requiring a pilot, on account of its intricate entrance.

Apostles' Battery is a small fort, erected on a high rock, on the shore opposite to Port Royal.

Port Royal, situate nearly at the extremity of a tongue of land, which forms the boundary of the har-bours of Kingston and of Port Royal. Towards the sea, the tongue is composed of coral rocks, covered with sand, which the tide frequently inundates, as a great part of the town of Port Royal is only a few feet above the sea level. The royal naval yard lies to the N., the naval hospital to the S. W., and the works of Fort Charles, and the soldiers' barracks, to the southward. The fortifications are extremely strong, and the situation (though low) healthy from its openness to the sea-breeze. The harbour is capable of containing 1000 large ships with convenience. The European reader will remember that it was on this spot the former Port Royal stood ere it was overwhelmed by the earthquake of 1692, and with 2000 houses buried eight fathoms under water.

Spanish Town. The capital of Jamaica is situate at the extremity of an extensive plain, extending far to the S., S.E., and W., but with the mountains closely approaching the town on the N. and N. W., and distant from the sea at Port Royal Harbour six miles. The Cobre, a river of considerable depth, passes the city at the distance of about a quarter of a mile on the N. E. The barracks are good, well situate, and capable of holding 317 men; the hospital, however, will not accommodate more than 36 patients. The buildings of the capital, as before observed, are in the magnificent style of Spanish architecture, and the city has an imposing appearance. The population is about 5000. The King's House is one of the most splendid buildings in any of our colonies; it was erected and furnished by the British Colonists at a cost of £50,000. It is situated in the S. of the great square, facing an immense pile of buildings, containing under one roof the House of Assembly, the Supreme Court, and almost all the Government offices of the island.

IV. Jamaica presents every indication of volcanic origin, but there is no volcano in action; a small lake of blackish water, about 3000 feet above the sea, and entirely encircled with hills, has the appearance of an extinct crater. The precipitous cones, conical tumuli, abrupt declivities, and irregular masses of enormous rocks scattered over the island, sufficiently denote the powerful operation of fire. The soil is generally deep and fertile; on the north of a chocolate colour, in other parts a bright yellow, and everywhere remarkable for a shining surface when first turned up, and for staining the skin like paint when wetted; it appears to be a chalky marl, containing a large proportion of calcareous matter. There is a soil in the island termed "Brick Mould," which is deep and mellow, on a retentive under strata; this, next to the ash mould of St. Christophers, is considered the best soil in the W. Indies for the sugar cane. A red earth abounds most in the hilly lands, and a purple loam sometimes mixed with a sandy soil in the savannahs and low-lands; but the highest mountains are remarkable for having on their summits a deep black rich soil. The principal soils on the interior

ocean, and embrace within their border a beautiful | hills and mountains of Jamaica may be enumerated thus:-A red clay on a white marl; a ditto on a grit; a reddish brown ditto, on marl; a yellowish clay mixed with common mould; a red grit; a loose conchaceous mould; a black mould on a clay or other substrate; a loose black vegetable mould on rock; a fine sand; and the varieties of all the foregoing. The mountain land in general, when first cleared of its wood, possesses more or less a deep surface of rich black mould, mixed with shell, a soil which will grow any thing.

The brick mould soil of Jamaica (which is a compound of very fine particles of clay, sand, and black mould,) is of very great depth, and is considered by far the best for cultivation; it is always easily laboured, so inexhaustible as to require no manure, in very dry seasons it retains a moisture sufficient to preserve the cane root from perishing, and in very wet it suffers the superfluous waters to penetrate, so that the roots are never in danger of being rotted. Next in fecundity is the black shell mould, previously mentioned, which owes its fertility to the mineral salts and exuviæ intermingled with it. The soil about Kingston on the alluvial plain, consists of a layer of deep mould, chiefly composed of decayed vegetable matter, with a portion of marl and some carbonate of lime, entirely free from gravel, and highly absorbent of water: the substratum varies, being sometimes of a compact aluminous earth alone, in other places mixed with gravel; in sinking a shaft, layers of aluminous earth and gravel are found, running horizontally, approaching to pure clay at the bottom, and at four feet from the surface a strata of finely divided silica. About Stony-hill garrison, the surface is similar to what is frequently met with in elevated situations in Jamaica, namely, a superstratum of rich dark mould, varying in depth from two to 20 inches, with a substratum of argillaceous and red earth, evidently containing a mixture of carbonate of iron; and in many parts the surface of the ground studded with lime stones of a very large size. Silver and gold mica is frequent, especially among the hills between St. Catherine's and Sixteen Mile-Walk, and when washed down with the floods mistaken for gold sand:-near Spanish Town it is found incorporated with Potter's clay. Mixed and purplish schistus are common in the mountains of St. John's, and about Bull Bay, and the hard lamellated amianthus is found in large detached masses, having all the appearance of petrified wood. The lower mountains E. of Kingston are principally composed of a whitish bastard marble, with a smooth even grain, taking a good polish, and frequently used in Jamaica for lime stone. Long Mountain, near Kingston, is entirely composed of carbonate of lime. White free stone, quartz of different species, and lime stone are abundant,-subcrystalline spar is found in small detached masses, and rock spar, very clear, may be seen formed into rocks of prodigious size in the mountains of St. Ann's, where it is observed to constitute whole strata. When exposed any time to the weather the surface grows opaque, and of a milky white. Friable white marl and clammy marl, or aboo earth, (of an apparently smooth, greasy, and cohesive nature,) are found, and the latter sometimes eaten by the negroes when they are diseased, to the great detriment of health.

The lead ore of Jamaica is extremely rich and heavily impregnated with silver; several varieties have been found, and indeed, worked at Liguana, where also striated antimony is obtainable; in the lower mountains of Liguana every variety of copper ore (14 different species) is in profusion, in particular the green and livid, and the shining dark copper ores; in the more mellow matrices, yellow mundick (marchasites), is largely mixed. In the mountains above Bull Bay, a dark iron sand, attracted by the magnet, is found: neither gold nor silver ore has yet been discovered, though it is certain the natives possessed those metals in abundance when first visited by Columbus and the early Spanish settlers. In the river Minho in Clarendon particles of gold have been found after heavy rains. Brown states that gold and silver ores have been discovered at Liguana; and Gage speaks (in 1655) of the mines producing "some gold, though drossie."

V. The heat of Jamaica is by no means so fearful as has been represented; even on the coast it is tem-perate, the medium at Kingston throughout the year being 80 F. and the minimum 70. As the country is ascended the temperature of course decreases; eight miles from Kingston the maximum is 70, and at the distance of fourteen miles, where the elevation is 4,200 feet, the average range is from 55 to 65 F. the minimum in winter 44, and a fire in the evening not only agreeable but necessary. On the summits of the mountains the range in summer is from 47 at sunrise to 58 at noon, the minimum in winter 42. The heat of a tropical climate is materially mitigated by unremitted breezes from sea or land, and by vast masses of clouds, which, interposing between the sun's rays and the earth, prevent any great inconvenience therefrom. The air is remarkably light and enlivening, producing great cheerfulness even in old age, and so equal in its pressure that it rarely varies more than an inch at any time of the year. Although the temperature alternates eight or ten degrees on the south side of the mountains, and more so on the north, it is not subject to the sudden and detrimental transitions experienced in South Carolina, and other parts of the United States. From July to October is the hurricane season, but severe storms at the Windward Caribbee isles are not felt at Jamaica. The quantity of rain falling in the year is nearly 50 inches. For two or three months preceeding the May rains, lightning and thunder are prevalent, but not very mischievous; and from November to March, when the sea-breeze is irregular northerly winds blows, becoming colder as they recede towards the west; during this season the air is delicious, resembling the finest English vernal weather. The seasons are divided into four,-viz. vernal or moderate rains, in April and May, lasting six weeks; the second, hot and dry, including June, July, and August; the third, hurricane and rainy moths, embracing September, October, and November; and the fourth, serene and cool, comprising December, January, February and March.

There is, however, considerable difference of climate on either side of the island; on the south it may be said that spring ranges through the months from November to April; summer from May to August, and winter from September to October; while on the north side winter ranges from October to March; the north has a larger supply of rain than the south, but distributed in smaller and more frequent showers, and it is cooler, and with a vegetation of greater bulk and height. At Stony Hill garrison, nine miles from Kingston, and 2000 feet above the sea, the thermometer ranges during the hot months from 7.4° to 82°, and during the cold months from 66° to 73°. The following Meteorological Register for Up-Park Camp is from Sir J. Mc. Gregor's office.—Military Med. Dept.

100

On the southern side of the island, the sea breeze from the south-eastward comes on in the morning, and gradually increases till noon, when it is strongest; at two or three in the afternoon its force diminishes, and in general it entirely ceases by five o'clock. About eight in the evening the land breeze begins; this breeze extends to the distance of four leagues to the southward of the island. It increases until midnight, and ceases about four in the morning.

The sea and land breeze are pretty regular from the latter end of January until May. In the middle of May the sea-breeze generally prevails for several days and nights, especially about the times of full and change of the moon, and thus they continue throughout June and part of July: from that time the seabreeze diminishes, and veers round to S. by W. or S. S.W., with frequent calms. August, September, and October, have generally strong gales of wind, with much rain.

In December, January, and February, when the north winds predominate, their force checks the seabreeze. The southern coast is that, which, of course, is least exposed to these winds, being sheltered in a great measure by the mountains. When combined with the land breeze they render the air very cold and unhealthy.

On the northern side of the island, during the greatest part of July, and the whole of August, the southerly or sea-breeze, generally blows hard off the land, with frequent squalls; but in October northerly winds prevail, and frequently extend over all the Bahamas and Cuba; and for some time on the north side of Jamaica, where the current of air is forced upwards by the mountains, and its strength spent in the heights; but it occasionally reaches the southern coast, particularly in the neighbourhood of Kingston, and has been known to continue for some days.

During the winter season the land-breeze is more | ending in 1822, is thus shown :general off the shore than in summer; and it sometimes continues through the day as well as night. Westerly winds prevail also all over the whole space between Jamaica and Cuba, and even so far as the Island of Hayti.

On the south side of the island, during the month of November, southerly winds generally blow, and have been known to extend from the Mosquito shore. These winds are usually faint; nor do they reach the land until it be heated by the sun, and soon after mid-day are often expelled by a fresh land-breeze, which also abates in a few hours.

The return of the sea-breeze in autumn is gradual: it first approaches the east end, then advances a little, not unfrequently reaching Morant Point a fortnight or more before it is felt above Kingston. It also continues to blow a week or two later on the east end of the island than at Kingston; and has been known in some years to prevail there in the day-time, during the whole time it was unfelt at the former place.

That the climate of Jamaica has undergone great change since the cultivation of the isle is most true. From Mr. Needham's journal, kept at Mount Olive, in the parish of St. Thomas in the Vale, I find that the thermometer is noted January 5th at 500-" whole day cold." Governor Modyford, in a letter to Lord Arlington, then, in 1665, Secretary of State, observes, with regard to the healthiness of the island, that "the officers of the old army, from strict saints, are turned debosht devils;" and, "really, my Lord," he adds, " no man hath died but an account hath been given—y' e gott his decease either by surfeitts or travelling at high noone in a hott day—or being wett with rain, and not changing in season. The Spaniards, at their first coming, (I mean those who trade with the Royall Company) wondered much at the sickness of some of our people; but when they understood of the strength of their drinks, and the great quantity they charged themselves with, and the little observation of time and seasons, they told me they wondered more they were not all dead. Their health and cheerfulness depending upon their temperance, which being my natural disposition, I doubt not, but will continue me capable to serve his Majestie," &c. &c. Of late years the yellow fever has almost, if not quite, disappeared from Jamaica and the other West India Islands.

That the climate is not inimical to the human constitution is evident from the long lives and good health which Europeans and negroes enjoy who live temperately,—and indeed intemperance, which in more temperate climates would be punished with death, here too often and too long escapes with impunity. A negro and a negress recently died at Jamaica, aged each 140 years!

At Trelawney-Maroon Town, which is situate on a very high mountain in the interior of the island, be-tween the parishes of Westmoreland and St. James the thermometer seldom or ever rises higher than 71 or 72 at noon, falling during the night and early part of the morning as low as 50 and 52. The troops stationed here have for several years enjoyed as good if not indeed a better state of health than they would perhaps have experienced in any other part of the world; and, in 1795, when the yellow fever was at its acme in Jamaica, the men and officers of a newly-raised regiment (83rd) did not lose a man by fever at this station. That there have been periods of great sickness and mortality in Jamaica is too true. The comparative health of the different Military stations at a period of unusual sickness-namely, for six years

The following detail shows the strength of the Ruropean troops employed in Jamaica, the number of deaths, and the annual ratio of decrement by death per cent. per annum, from the year 1818 to 1828 inclusive; by which it will be observed that, in 1828, the ratio of loss was small, owing to the judicious arrangements of Sir James M'Gregor, seconded by the Medical Staff.

			Ratio of	1			Ratio of

VI. We have no authentic accounts of the Indian population on the island when first visited by Columbus; all accounts agree in representing it as densely peopled-within half a century they had all ceased to exist! Las Casas says-"They hanged these unfortunates by 13, in honour of the 13 Apostles ;-I have beheld them throw the Indian infants to their dogs,-I have heard the Spaniards borrow the limb of an human being to feed their dogs, and next day return a quarter to the lender !" The original Spanish colony consisted of 70 persons, whose numbers were rapidly increased by emigration, until the riches of the main land caused Jamaica to be comparatively neglected, and the incursions of freebooters rendering property insecure checked population. It would appear that the Spaniards began early to import negro slaves, but on the capture of the island by the British in 1655, Venables stated the whole population to be, not more than 1,500 Spaniards and Portuguese, and an equal number of negroes and mulattoes, although Spain had been 146 years in possession of the island. The troubles in England during the commonwealth and the early years of the restoration, contributed materially to people our western colonies, and the following is a census of the whole island about seven years after the conquest :-

In the year 1658, whites, 4,500; slaves, 1,400. 1670, whites, 7,500; slaves, 8,000. 1698, whites, 7365; slaves, 40,000. 1734, whites, 7,644; slaves, 86,146. 1746, whites, 10,000; slaves, 112,428. 1768, whites, 17,947; slaves, 176,914. 1775, whites, 12,737; free coloured, 4093; slaves, 192,787. 1788, whites, 23,000; free coloured, 4,093; slaves, 256,000.

From the year 1702 (when the importation was 800, to 1774, when the importation was 18,000) the number of slaves imported into Jamaica was half a million, of which 130,000 were re-exported, and of those retained in the island not more than 19,000 were alive in 1775. For at least 50 years it was computed that Jamaica required an annual supply of 10,000 slaves to provide against the wear and tear of life that went on.

The number of slaves in Jamaica at the expiration of each year, from 1800 to 1817 was—1800, 300,939; 1801, 307,094; 1802, 307,199; 1803, 308,668; 1804, 308,542; 1805, 308,775; 1806, 312,341; 1807, 119,351; 1808, 323,827; 1809, 323,704; 1810, 313,683; 1811, 326,830; 1812, 319,912; 1813, 317,424; 1814, 315,385; 1815, 313,814; 1816, 314,038; 1817, 346,150.

From 1817 to 1829, the Slave Population was-

The B.B. (blue books) at the Colonial Office afford no details of the present state of the population. The only return given is the following, in which the births are out of all proportion to the burials, particularly if the above table of the increase by birth and decrease by death of the slave population be examined; where the deaths (especially of the males) preponderated so much over the births. A complete census of Jamaica, made yearly, is much to be desired.

Number of claims having reference to each division. Prædial attached, 5562; Prædial unattached, 1798: Non-prædial, 9075. The average value of each slave sold from 1822 to 1830 was 444. 15s. 2½d.; and the average compensation awarded was 191. 15s. 4¾d. on each slave.

It is impossible to state with accuracy the actual population of Jamaica; no recent census has been completed; the number of whites is estimated at 35,000; of maroons, about 1,200; of free coloured, 70,000; and the apprentices, olim slaves, as above. Half a million of mouths, would give seventy-eight persons to the square mile, a remarkably small proportion, particularly in comparison with Barbadoes, where there are six hundred to the square mile.

VII. The efforts for the extension of religion have been great: the outlay by the colonial government for the purpose is considerable, viz., nearly 25,0001. per annum. The Bishop of Jamaica (whose see extends over the Bahamas and Honduras) has 4,000%. sterling per annum, and the Archdeacon 2,000l. ditto. There are 21 rectors, and altogether of clergymen of the established church, 57. The Scots Presbyterian clergymen are in number four, the Wesleyan ditto, about 24, the Baptist ditto 16, and the Moravian 8. The crown livings in Jamaica were in the gift of the governor, in virtue of his station as such. They are now in the gift of the hishop. Pluralities are not permitted. The apprentice is entitled to demand the gratuitous services of the clergy.

No return in the Colonial Office of the Dissenting Missions; the following relates to the Established

Church alone :-

Return of the number of Churches, Livings, &c. of Jamaica in 1836. [B. B.]

Note. The value of the Livings are expressed in Jamaica currency, and include the fixed salaries, fees, value of parsonage houses and glebes, or the allowances made for the same by the Parochial Vestries. The letter L. indicates that the place is only licensed for Divine Worship, and not a consecrated chapel. In some cases the congregations far exceed the accommodation, vide Portland.

The Church Expenditure amounted, in 1832, to 41,9281.; 1833, 37,9981.; 1834, 40,0091.; 1835, 37,6161.; 1836, 59,8591. Total, 217,4101.

VIII. Education is rapidly extending under the aid of the home and local government, as well as with the assistance of private individuals. In the expenditure budget of the island for 1831, there is nearly 10,000l. allotted for free schools. In 1821, the public or free schools and scholars were, Schools, 23; Male Scholars, 1,125; Female, 912; Total, 2,037. In 1827, the number of Scholars was 3,500.

The Expenditure for the Schools, in 1832, was 9,034l.; 1833, 9,595l.; 1834, 9,592l.; 1835, 9,776l.; 1836, 10,692l. Total, 48,689l.

A detailed report of the state of Education in Jamaica in 1837, was made to Government in 1838 by J. C. Latrobe, Esq. who was sent out by the secretary of State to enquire into the subject. From this report the two following tables are derived. The number of persons receiving instruction stated in the first table—"gives rather too favourable an impression of the state of education"—(Rept. p. 15).

Three-fourths of the scholars in attendance upon day schools, are free childen of apprentices—and one-fourth children of poor free coloured people and of Maroons. Mr. Latrobe remarked universally throughout his tour of the entire island, that the children of the coloured classes of every shade, evinced a remarkable facility for the attainment of the rudiments of such branches of instruction as are taught them—particularly in writing and arithmetic—their progress in these being "truly extraordinary"—[p. 11 Rept.] Many of the country schools are carried on almost entirely through the agency of the more advanced day scholars.

The great majority of the Sunday and Evening schools are attended by young or adult apprentices. The want of private schools of a superior order, in which the higher classes of the island could receive a liberal education, is much dwelt on by Mr. Latrobe, and the absence of a college, or some institution sanctioned by the legislature, deplored. The private seminaries are little better than the dame schools in England.

Number of Scholars receiving Instruction in the various Schools throughout the Island of Jamaica, and the Amount of Apprentices attending the Day Schools in 1837. (Mr. Latrobe's Report to Lord Gleneig, House of Commons, February 5, 1838.)

• For these years the returns are not given for all the gaols.—R. M. M.

Note - There are three Gaols in Jamaica, viz. County Gaol of Middlesex, at St. Jago de la Vega; the County Gaol of Surry, at Kingston; and the County Goal of Cornwall, at Montego Bay. The hours of labour are from 6 to 10 A. M., and from 12 to 4 P. M. Debtors are allowed 2s. 6d. per day. Free Criminals 1s. 3d. per day, and apprentice criminals 5s. per week. There is also a workhouse in each parish.

X. A Governor, or Captain-General, (appointed of the Council from sitting, voting, or assisting thereby the Crown), aided by an Executive and Legislative in, if he find just cause for so doing; but he must, council of 12, and a House of Assembly answering to the home House of Commons, (first convened in 1664,) form the government of the island. The Council is appointed by the King, from among the most respectable colonists. The Licutenant-Governor, Chief Justice, Attorney-General, and the Bishop, are all ex-officio Members of the Council, each member of which is removable at the pleasure of his Majesty. The Assembly consists of 45 members, each of the parishes sending two representatives; and Spanish Town, Kingston, and Port Royal. one additional member each; a representative should possess a freehold of £300. per annum in any part of the island, or a personal estate of £3000; an elector must be of age, and possessed of a freehold of £10. per annum in the parish for which he votes. Persons of colour are now admitted to all the privileges of white persons, and there are no civil disabilities from religious differences. The Governor has the title of his Excellency, and is invested with the chief civil and military authority; he is also Chancellor, Ordinary, and Vice-Admiral. On his death or absence, the government devolves on the Deputy or Lieutenant-Governor, if there be any; otherwise on the senior Councillor, who rises in rotation to the presidency, and has a salary of £1000, per annum. The Governor whose salary is about £4,200 per annum, has the disposal of such appointments as his Majesty does not reserve to himself or his Ministers; and as to such offices so reserved, whenever a vacancy occurs by death or removal, the Governor may appoint to them till they are filled up from home, and his appointee, till superseded, takes all the emoluments.

The Council, who are by courtesy severally addressed in the colonies by the title of Honourable, consists of 12 members. They are appointed by mandamus from the King, and hold their offices during his Majesty's pleasure; but if at any time by death, absence from the island, or suspension, the Council should be reduced to less than the number limited by the instructions to the Governor, he may appoint as many persons out of the principal freeholders, inhabitants of the island, to be Members of the Council, as will make up such number; which persons so appointed may act as Councillors until they are disapproved, or others are appointed by his Majesty. The Governor may, however, suspend any of the Members

by the first opportunity, signify to the English Government any vacancy in the Council, from whatever cause it may arise.

The duty of the Council is to give advice to the Governor or Commander-in-Chief for the time being, when required; it stands in the same relation to the Governor in the colony as the Privy Council in England does to his Majesty; it is also a constituent part of the Legislature of the colony, corresponding with the British House of Peers; and it sits as a Court of Error or Appeal.

The General Assembly are the Representatives of, and chosen by, the people, and correspond with the British House of Commons; its utmost duration is seven years. The laws and statutes of England passed previously to the settlement, unless they are from their enactments inapplicable to the local circumstances of Jamaica, apply to the colony. Statutes passed in England since 1728, unless they relate to trade and navigation, are not in force there. The Assembly have all the privileges of the House of Commons in England; they have the sole power of levying taxes, and the distribution thereof, with the exception of an annual permanent revenue to the Crown of £10,000.; the salary of the Speaker of the Assembly is £ 1000. per annum.

The Governor, with the advice and consent of the

Council, may, from time to time, as occasion requires, summon the General Assembly together, and may, of his own authority, adjourn, prorogue, and dis-

The Council and General Assembly, with the concurrence of the King, or his representative the Governor, may make laws, statutes, and ordinances for the public peace, welfare, and good government of the colony, so that they be not repugnant, but as near as conveniently may be agreeable to the laws and statutes of Great Britain.

By an order in Council, dated 15th January, 1800, it is declared, that in all cases when his Majesty's confirmation is necessary to give validity and effect to any act passed by the legislature of any of his Majesty's colonies or plantations, unless his Majesty's confirmation thereof be obtained within three years from the passing of such act in any of the said colonies or plantations, such act shall be considered dis-

By the English statute, 6 Geo. III. c. 12, all the British colonies are declared to be dependent upon the Imperial Crown and Parliament of Great Britain, who have full power to make laws to bind such colonies in all cases whatsoever. But by the 18 Geo. III. c. 12, the King and Parliament declared, that thenceforth they would not impose any duty payable in the colonies, except for the regulation of commerce, the produce whereof should always be applied to the use of the colony in which it is levied. Kingston is a corporate town, since 1802, having a mayor, 12 aldermen, and 12 common councilmen, chosen on the second Wednesday in January. The following is a description of the city seal:-On one side, the arms, crest, supporters and mottos, legend -" Sigillum commune civitatis de Kingston, in Jamaica." Reverse-Britannia, in the dress of Minerya. holding in one hand the trident, and in the other a mirror reflecting the rays of the benign influence of Heaven on the produce of the island; behind her the British lion supporting her shield; a conche shell at her feet, and at a distance a ship under sail; legend -" Hos fovet, hos curat servatque Britannia mater." Britain, the mother country, cherishes and protects these fruits.

The jurisdiction, both civil and criminal, of the Supreme Court is co-extensive with those of the Courts of King's Bench, Common Pleas, and Exchequer, (and Insolvent Debtors), in England, taken collectively, and it has also the power of hearing and deciding on informations for the breach of any act of Parliament or Assembly relating to trade and navigation, or for laying any duties or customs on the import of goods, wares, and merchandizes into, or on the exportation thereof from the island; also on informations for land under the quit rent acts, and all escheats. It is likewise a court of appeal from the inferior Courts of Common Pleas.

This Court sits in the capital of St. Jago de la Vega, or Spanish Town, three times in the year, for three consecutive weeks each time, commencing respectively on the second Monday in February, the first Monday in June, and the first Monday in October in each year.

The Chief Justice is nominated by the Government in England, and has a patent of office under the great scal of the island; and the Assistant Judges are appointed either by his Majesty's Ministers or by the Governor of the island. There are eight or ten Assistant Judges, who sit in rotation with the Chief Justice; they have each a salary of £500. per annum West Indian currency. All the judges hold their offices during his Majesty's pleasure, and are removable by the sign-manual only; but they may, upon sufficient cause, be suspended by the Governor, with the consent of a majority of a board of the Council, till his Majesty's pleasure be known. There is an Attorney and Solicitor-General, Clerk of the Crown, Clerk of the Court, and Solicitor for the Crown, attached to the Court; and from eight to ten or twelve barristers in practice. A Provost Marshal, and seven Deputies, act in the like number of districts.

The jurisdiction of the Assize Courts is limited to their respective counties of Surry and Cornwall; and the Justices in the Courts to be held respectively before them have the same power, authority, and jurisdiction that the Justices of Assize and Nisi Prius, Justices of Oyer and Terminer, and Justices of Gaol Delivery have in England.

The Justices of Assize receive no salary, are ap-

pointed by the Governor, by a commission under the broad seal of the island. They, like the Judges of the Supreme Court of Judicature, hold their places during his Majesty's pleasure (quamdiu se bene gesserunt), and can be removed by his sign manual only; but, upon sufficient cause, may be suspended by the Governor, with the consent of the majority of a Board of Council, till his Majesty's pleasure be known.

The several inferior Courts of Common Pleas in the island of Jamaica have jurisdiction over all causes (wherein any freehold is not concerned) to the value of £20, with costs and no more, but by the aid of a justicias from the Chancellor, who is the Governor, they may hold Pleas to any amount. They are, however, absolutely restricted from intermeddling with or determining actions where the title to land is concerned. These Courts are held at the same time, and in the same place of the respective precincts, as the Justices of the Peace hold the Quarter-Sessions, once in every three months; some of them have the privilege of sitting oftener. The appointment and removal of the Judges of these Courts are under the control of the Governor, and an appeal lies against their decision to the Supreme Court of Judicature.

Every precinct has a Court of Sessions, held quarterly. All manner of debts, trespasses, and other matters, not exceeding the value of 40s. wherein the titles of land are not concerned, may be heard and determined by any Justice of the Peace of the island within their respective precincts, without appeal; and after judgment, the Justice may grant a warrant of distress, and, for want of sufficient distress, may imprison the defendant in the common gaol of the precincts till he pay the debt and charges.

The Governor holds a Court, with the same powers of judicature that the Lord High Chancellor has in England, and the proceedings of the Court are similar to those of the English Court of Chancery. The Court is held about three times a-year.

The Court of Error is held by the Governor and Council for hearing Appeals, in the nature of Writs of Error, from the Supreme and Assize Courts. These Appeals, or Writs of Error, are allowed and regulated by his Majesty's instructions to the Governor. An appeal also lies from the judgment of the Court of Chancery, to his Majesty in his Privy Council. On an appeal to the King in Council, the proceedings must be transmitted, and the party appealing must proceed, within a year after the pronouncing of the decree or order appealed against.

The Court of Vice-Admiralty has two distinct jurisdictions; by one of which it is an Instance Court for deciding all maritime causes, and by the other a Prize Court: its practice is similar to that of the High Court of Admiralty in England, to which Court, or to the King in Council, an appeal lies from its decision. The Judge is appointed by the Government in England, and holds his office during his Majesty's pleasure; but may be suspended by the Governor for good cause, with the consent of a majority of a board of Council, till his Majesty's pleasure be known.

The Court of Ordinary is for determining ecclesiastical matters and probates of wills, and the Governor alone presides in it as judge.

The English Bankruptcy Laws are not in force in Jamaica, but there is an *Insolvent Debtors' Act*, by which a debtor, on making oath that he is possessed of no property above bare necessaries, and delivering his books, if he has any, into the hands of the Deputy

Marshal, is exonerated from all demands against him in the island after suffering three months' imprisonment. Any person leaving the island must give three weeks' notice on account of creditors. The parishes, which are more like counties as to their extent, are under the supervision or government of a chief magistrate (termed the Custos Rotulorum) and bench of justices, who hold sessions of the peace every month, and Courts of Common Pleas, for trying actions to the extent of 201.; debts not exceeding 40s. are determined by a single justice. Each parish has a rector and church officers, according to the number of churches or chapels in the parish; the vestries consist of the Custos, two magistrates, ten vestrymen, and the rector (the vestrymen are elected annually by the freeholders); the vestries have the power of assessing and appropriating local taxes, allot labourers for repairing the highways, appoint way-wardens, nominate persons called constables for the collection of public and parochial rates, and regulate the police of their several parishes. Their powers correspond with the civil duties of Lord Lieutenant and Custos Rotulorum of an English county. There is a Board of Forts and Fortifications, a Board of Public Accounts, and a Board of Public Works, all managed by commissioners. The Council and Assembly are ex-officio Commissioners of Correspondence. There is a Coroner for each parish, elected by the freeholders.

The laws of the Colony may be judged of generally by the preceding remarks.—On occasions of pressing emergency the Commander-in-Chief may summons a general Council preceding remarks.—On occasions of pressing emergency the Commander-in-Chief may summons a general Council of War, in which the Members of the House of Assembly sit and have votes, and with their consent proclaim Martial law: his power is then dictatorial, and all the inhabitants are subject during the exercise of this power to martial law. The Governor has no power of staying execution or suspending proceedings in civil cases; he can pardon all criminal offences but those of murder and high treason; his power herein consists in respiting until the pleasure of the King is made known. In criminal proceedings—the learned Queen's Counsel, Wm. Burge, Eqq., late Attorney-General, and now Agent for Jamaica, says that the Governor, as representative of his Sovereign, may direct the Attorney-General to enter a Noil Prosequi, or by virtue of Her Majesty's prerogative he may suspend the execution of any sentence. The writ of Habeas Corpus is granted under the same circumstances as in England, excepting in cases of alliens, who must in the first instance appeal for redress to the Governor in Council, and if remaining unheard for 14 days. Governor in Council, and if remaining unheard for 14 days, the Writ of *Habeas Corpus* may then be applied for. All free-born subjects in Jamaica are from their birth free-born denizens of England. Aliens may receive letters of naturalization from the Governor under the provision of 35, Chap. II, c 3. The law of descent and the law governing the distribution of personal property in cases of intestacles are in unison with those of England.

Lands in the hands of the heir or devisee are assets for the payment of all classes of debt owing by the ancestor or testator by means of a suit in the Court of Chancery: and they also stand charged with specialty and simple contract debts when the latter have been put on judgment, and notice of a writ of extent has been served pursuant to the 24 Geo. II, c. 19. Personal assets, unless specially exempted, are always applied in the first instance in the exoneration of the real estate. A judgment recovered in England or resident in the colony is received as evidence in the colony without going into the merits on which it was pronounced: which the one of impeaching the Judgment devolves on the de-fendant. There is no outlawry in the colony. The foreign appointment of Guardians to Minors, and Committees or appointment of Guardians to Minors, and Committees or Curators to Idiots or Lunatics gives no control over property in the colony, as the Colonial Court of Chancery exercises original jurisdiction in such cases. The Colonial Courts give no effect to an assignment and certificate under an English or Foreign Commission of Bankruptcy against a creditor not claiming under the commission,—and they would prevent the creditor claiming under it from pursuing the bankrupt personally. An English certificate is held to bear the recovery of a debt owing in respect of a consignment made by a plaintiff to a defendant resident in England:

and it is supposed that a similar effect would be given to a certificate when the debt was contracted in England. A foreign certificate is no bar to the suit of any colonial creditor desirous of proceeding personally against the bankrupt (then in the colony) for debts proveable bal net present under the foreign commission. With respect to the claims of foreign and colonial creditors, if the bankrupt were resident in the island or represented there, the colonial creditors would obtain preference both as to the personal and real under the foreign commission. With respect to the claims of foreign and colonial creditors, if the bankrupt were resident in the island or represented there, the colonialcreditors would obtain preference both as to the personal and real property, by putting the demand in suit; but if the bankrupt be absent and unrepresented by Attorney, then preference would be obtained by attachment under 25 Car. If. c 23. The notice of an insolvent debtor that he intended to take the benefit of the Insolvent act not sufficient for the protection of foreign creditors. There is no law in force in the colony similar to 21 James I. which makes personal property left in the possession and apparent ownership of a commercial person or trader (not the real owner) liable to the creditor of such person in case of insolvency: neither is the above statute ever acted upon in the colony. Arrests on Mesne Process in all actions upon civil contract or intent, are authorized, except upon Members of the Legislature: persons possessing a freehold of five acres planted or a house worth £10 per Answam, and generally such as are exempted by the law of England. Special ball required in all cases of arrest on Mesne Process. No proceeding can be sustained in the Colonial courts upon process issued by them, but served upon the party out of the Colony.

Persons having property in the island, who have once resided in the colony, and are unrepresented, may be proceeded against by foreign attachment under the 53d. Car. II. c. 23—but no remedy lies if they have never been in the island and are unrepresented. The British statutes of frauds and limitations extend to the colony. The island Acts 10 Ann, c. 12 and 39, Geo. III. c. 13, s. 4, declare, that bonds, judgments, bills, mortgages and other writings obligatory, to be void if no payment: Infants, persons under form the last day of payment: Infants, persons under form the last day of payment: Infants, persons under form the case as a fer the removal of their disability.

Mortgages are conventional;—an est

to the laws of that county. There is no jurisdiction in the colony competent to pronounce a sentence of divorce. Counsel must previously have been called to the bar in England before entitled to plead in the island. The public laws are collected and printed under the authority of Commissioners appointed by the Colonial Legislature: Private Acts remain in manuscript. The originals of all acts are recorded in the island Secretary's office, and copies are sent to the Secretary of State for the Colonies in England.

XI. The military establishment of the island generally comprises the head-quarters of four European regiments of the line; one West India regiment, com-posed of Caffres or W. Coast African negroes; a strong detachment of Artillery, altogether comprising about 3000 men; and of colonial militia, from 10 to 12,000 men at arms, comprising in Middlesex County, a regiment of horse of 11 troops, well equipped and mounted, and nine infantry regiments; in Surry County, a regiment of horse of eight troops, and six regiments of infantry, with artillery; in Cornwall County, a regiment of horse of six troops, and six regiments of infantry; and to each regiment are attached two field-pieces and a company of artillery with a major-commandant of artillery to each county the whole well appointed, and proving a most efficier force in case of internal insurrection or foreign aggresion. All white males, from the age of 15 to 16, as obliged by law to provide themselves with suitab clothing, and to enlist in either the cavalry or in fantry of the militia. Substitutes are not allowe When on permanent duty (which occurs on the r clamation of martial law) the militia receive 2s. 6d. a day and rations; arms and ammunition found by the government.

There is a City Guard for Kingston, which was instituted 28th July, 1783. It consists of two Lieutenants, two Serjeants, and 44 privates, all well paid. An extensive police-force is now organized for the whole island. The police-force consisted in 1836, of 59 Serjeants at 1s. 6d. a day—5s. for weekly rations, and 2l. 2s. annually for clothing.—698 Privates at 1s. a day—5s weekly for rations, and 1l. 9s. annually for clothing. These services, together with Officer's pay, contingencies, &., cost for 1836, 51,107l. currency, or 30,610l. Sterling.

XII. The annual income or ways and means of the island, on an average of 10 years, ending 1831, was as follows:—Poll Tax (at 5s. 10d. per head on Slaves, and 2s. per head on stock, exempting Working Stock on Plantations), Rents at 1s. 8d., in the £. and Wheat at 20s. 105,000l. Tax on Transient Traders, 150. Arrears of former Years' Taxes, 3,000. Land Tax, 23,400. Deficiency Tax, 14,000. Rum Duty, 24,000. ditional Duty on Wines and Spirits, 15,000. Ad-Tea Duty, 1,400. Goods from Foreign Ports, 4,800. Goods from United States, 31,000. Surplus of Revenue, 8,300. Stamp Duty, 19,000 For Arms and venue, 8,300. Stamp Duty, 19,000 Gunpowder, 900. Balance of Cash 30th September. 1830, 147,945. Duty on Cattle imported, 1,000. Tonnage Duty on Ships, to pay Custom House Salaries, 25,000. Loan to be raised 50,000. Debts due to Public on Judgments, 500. Double Duties received by Officers of Customs and refunded, 15,048.

Taxes Internal—A Schedule (in currency) of all

Taxes, Duties, Fees, and all other sources of Revenue, payable into the Public Treasury of Jamaica during the Year 1836, and the several Laws and Authorities under which they are derived. Quit Rents-Upon every Acre of Land, 3d. Tax on Public Officers: Registrar in Chancery; Island Secretary; Provost-Marshal; Clerk of the Supreme Court-each 601. Masters in Chancery: -An Admission to practise as such, each 500l. Poll Tax :—On all and every Head of Stock of Horse kind, 10d. On all and every Bull, Cow, Calf, Heifer, and follower, 10d. Upon every Wheel, (such as are made for the carriage of goods only, excepted,) 20s. Upon the value of all Goods imported, not bona fide consigned at or from the place of shipment, by hill of lading and invoice then signed to a Merchant paying Taxes, 5 per cent. Additional Duty. Excluding the shillings and pence (as given in the Parliamentary Return) the total ways and means thus given for Jamaica in 1831, is 489,743l.

Jamaica Expenditure (as laid before Parliament in the return whence the foregoing statement is derived) defrayed by the Island in 1831:-Governor, 5,5001.; Chief Justice, 4,000; Assistant Judges, 3,400; Speaker of Assembly, 1,400; Governor's Secretary, 3,000; Officers of His Majesty's Customs, 23,390; Clergy of Established Church-Curates' stipends, 8,000; Rectors' ditto, 11,718; Registrar and Appositor to the Diocese, 475; Annuitants, being widows and orphans of the Clergy, 2,000; Expenses of building Chapels, 1,400; Total, 23,593l. Ditto Presbyterian; Presbyterian Institutions, 301; Support of Kirk in Kingston, 700; Presbyterian Charity Schools, 200; Total, Ditto Roman Catholic, 200; Charitable Institutions, 14,656; Army Expenses, 157,032; Clerk of Supreme Court and Provost Marshal, 1,160; Secretary of Commissioners of Public Accounts, 1,000; Secretary of Ditto Correspondents, 300; Clerk of Board of Works, 400; Commissioners of Stamps, 1550; Deputy Receiver General and Secretary at the Outports, 1,560; Marshals of Militia Regiments, 1,050:—Pay, 14000; Contingent Accounts, 20,645; Rations, 72,000; ditto to 1st April, 1831, 35,700; Repairs of Barracks, 10,483; Lodgings for Officers, 2,090; Island Pay, ditto, 997; Sundry Wharfage, Water, &c. for Troops, 1,115; Total, 157,0321. Alien and Bonding Office, 600; Island Agent, 2,542; Captains of Forts, 669; Officers of Assembly, 6,146; Island Botanist, 560; Engineer and Surveyor of the Public Works, 740; Storekeeper, 500; Receiver General, 7,000; Law Expenses and Gaols, 14,874; Roads, Bridges, and Public Buildings, 25,850; Printing, 7,159; Militia Arms, and Gunpowder, 8,594; Board of Works, 8890; Premium on Increase Slaves, 8120; Registry and Vestry Returns, 5,378; Maroons and Superintendent of Maroon Towns, 2,300; Miscellaneous, 10,000; Interest on Public Loans, 16,900; Total, 370,000.

The Jamaica Budget for 1832 gives the Taxes and Internal Duties at 207,367l.; Duties on vessels and cargoes, 95,970; the certificates in circulation were 399,205l.; and the loan certificates, including 64,415l. loan deposits was 250,035l. Of the expenditure, the military amounts to 184,143l. besides 222,729l. for the general defence of the Island, of which 176,691l. was incurred for martial law in 1832. The civil expenditure was 85,078l., of which 15,544l. was for interest. Mr, Burge says,—"The annual expenditure of Jamaica is 489,849l.; to this must be added 10,000l. whis is annually raised, and is a perpetual revenue granted to the Crown, and made applicable to the orders of the Governor in Council, and over which the House of Assembly exercises no superintending

control.' It was given in evidence before Parliament in 1832, by the same authority, that "the Island of Jamaica sustains the whole burden of its Government, with the exception of the salary of the Bishop; every other species of its expenditure, including its ecclesiastical, military and civil establishments, are defrayed by the island iself."

Commissariat, 1836. Provisions and Forage, 49, 1921.; Fuel and Light, 2,6641.; Miscellaneous Purchases, 1351.; Transport, 1,2701.; Pay of extra Staff, 5261.; Military Allowances, 6,1331.; Special Services, 30,8921.; Contingencies, 2,2401.; Ordinary Pay of His Majesty's Land Forces, 62,4541.; Pay of Commissariat Officers, 2,1241.; Advances to the Navy, 16,2371.; sterling, 173,8721.

Ordnance, 1836. Agents to the Military Corps, 5,000l.; Engineer Department, 703l.; Artillery Department, 455l.; Storekeeper's Department, 1,470; Hired Buildings, 1,376l.; King's Barracks, 2,078l.; Transferred Barracks, 5,661l.—16,753l. Deduct Sum granted by the Colony in aid of Repairs to Barracks, transferred additional, 4s. 4d., 6,500l.; Sterling, 10,253l.

A Return of the Pecuniary Allowances granted to the King's Troops in the Islands, during the Year 1836. Allowance to Officers in lieu of Rations, viz.:—General and Staff, 1,3911.; Royal Engineers, 1981.; Royal Artillery, 1,3251.; 8th Regiment, 18521.; 22nd ditto, 2,4131.; 37th ditto, 2,7591.; 56th ditto, 2,2501.; 64th

ditto, 2,287*l*.; 84th ditto, 2,264—16,743*l*. Allowance for Lodgings in lieu of Quarters:—General Staff, 1 201*l*.; 8th Regiment, 151*l*.; 37th ditto, 14*l*.; 56th ditto, 553*l*.; 64th ditto, 38*l*.; 84th ditto, 554*l*.;—2,512*l*.; Currency, 19,255*l*., or Sterling, 11,553*l*.

Recapitulation of the Establishment, 1836.—Paid by the Colony in sterling Money:—Civil Establishment, 33,2301.; Contingent Expenditure, 20,8001.; Judicial Establishment, 4,3461.; Contingent Expenditure, 7,6131.; Ecclesiastical Establishment, 14,2201.; Military Expenditure, (Regular and Colonial) 72,0091.; Miscellaneous Expenditure, including Re-payment of Loans, Public Institutions &c., 55,4821.; Pensions, 17661.: Grand Total. 207.4681.

1766l.; Grand Total, 207,468l.

Local Revenues.—St. Catherine's, 7,335l.; Kingston, (by Corporation) 33,400l.; St. Thomas-in-the-Vale, 3,637l.; ditto, (Road Tax,) 3464l.—7,103l.; Vere, 5600l.; Portland, 2,723l.; Hanover, 7,483l.; Manchester, 3,801l.; St. Thomas in the East, Parochial, 7,866l., Road Tax, 5,187l.—13,053; St. John's, 2,500l.; St. Ann's, Parochial, 7,513l., Road Tax, 4,910l.—12,423l.; Westmoreland, 11,075l.; Total, Local Revenues in Jamaica, 196,496l.

This Amount is expended in each Parish, in Parochial Affairs, for the Support of the Poor, Payment of Officers of the Parish, Repairing Buildings, &c.

XI. The trade of this important island is very considerable.

[The Blue Books for Jamaica are the worst returns in the Colonial Office; there is a slovenliness, a total want of decorum to the home authorities manifested in every document; almost invariably there is no summing up of the totals. This conduct is not confined to the Colonial Office returns: the Registrar General of Shipping has stated a similar negligence prevails in his returns. The foregoing table must

therefore, I fear, be considered only as an approximation to correctness. Some of the years are derived from the Custom House documents, or parliamentary papers; others from the Blue Books at the Colonial Office, and others from the Board of Trade returns. It is to be hoped that the authorities of Jamaica will in future pay more attention to the important subject of statistics.—R. M. M.]

JAMAICA.—COMMERCE.

A General Return of Exports from the Island of Jamaica for 55 Years, ending 31st December, 1836. (Appendix to Slavery Papers in 1838.)

Custom House, Kingston, Jamaica, December 30, 1837.

XII. The monetary system in the West Indies is . very irregular. In no two islands are the denomination and value of the coins alike; and these, again, vary in proportion to the sterling money-thus:

	Sterling.		Doll.	Cur.
Jamaica	1001.=	=140 <i>l</i> .	1=	=6s. 8d.
Barbadoes	100l.	135 <i>l</i> .	1	$6s. \ 3d.$
Windward Isles, ex-				
cept Barbadoes	100%.	175 <i>l</i> .	1	8s. 3d.
Leeward Isles .	10 0 1.	2001.	1	9s. 0d.
Windward Isles, ex- cept Barbadoes	100%.	1751.	1	8s. 3d.

As regards Jamaica this is the nominal par of exchange. In real transactions of buying or selling ling, 4s. 2d.; two bits piece, 1s. 3d. tenpenny piece-

bills, the exchange is thus adjusted: If bills bear a premium, say 20 per cent, then a bill for 1001. sterling is said to be equal to 1201. sterling; this latter sum, turned into Jamaica currency at 40 per cent. makes a bill for 100l. sterling require about 168l. currency. Gold-Doubloons, equal to 16 dollars; half doubloons, 8 dollars; pistole, 4 dollars; Joe, 164 dollars; half joe, 8½ dollars; dollar, 1 dollar; sovereign, 5 dollars; half sovereign, 2½ dollars; half pistole, 2 dollars. Silver—Dollar equal to 6s. 8d. currency; half dollar, 3s. 4d.; maccaroni, 1s. 8d.; shilling sterling, 1s. 8d.; sixpence sterling, 10d.; half crown ster-

circulation in this island, silver and gold alone. Paper currency.-Amount in circulation bearing interest, none. Amount in circulation not bearing interest, 239,518l. stg. Metallic currency estimated at 100,000l.

The distribution of the certificates in circulation, from 1822 to the year 1832, is as follows: -Of 1822, 6451.; 1825, 65351.; 1826, 41,2031.; 1827, 79,9281.; 1828, 61,7411.; 1829, 39,9651.; 1830, 96,4991.; 1831, 10,825l.; 1832, 12,000l.; and of 1832, comprising 1l. 21. and 31. certificates in circulation, was 49,8641.

Amount of paper money in circulation in 1833 :-Certificates not bearing interest (A.) (checks for circulation of various denominations as low as 11. currency, purporting to be payable in cash to bearer on demand at the public treasury of the island. There is, however, no specie in the chest to cover any part of the sum.), 285,713l. 11s. 5d.; certificates bearing interest (B.) (certificates of 501. currency each, issued under the authority of commissioners. They bear interest at 6 per cent., but have no time specified for payment.), 32,7001.6s.9d.; certificates bearing interest (C.) (certificates of loans which have fallen due, and are payable to bearer on demand at the public treasury.) 24,8571. 2s. 10d.; total, 343,271l. 1s. sterling. The legal rate of interest is six percent.; the Government borrow at five.

Course of Exchange paid on Merchants drafts on London, at 90 days, during the year 1836. In January, 16 per cent. premium; February, 15 to 16; March, 14 to 15; April, 14; May, 13½; June, 13½; July, 12 to 13; August, 12 to 13; September, 16; October, 16½; November, 16½ to 17; December, 19.
The Colonial Bank for the West Indies, which has

its head quarters in Jamaica, was incorporated by charter on the 31st May, 1836, with a capital of 2,000,000l. sterling, in 20,000 shares of 100l. each, 25 per cent. paid up before commencing business. Its management is confided to a chairman, vice-chairman, thirteen other directors, and three auditors.

Five directors and one auditor retire in rotation annually, each however being eligible to be re-elected. Five shares give one vote; ten shares two votes; twenty shares three votes; forty shares and upwards four votes, for a director, &c.; and twenty shares form the qualification for a director.

All the business and proceedings of the bank managed and directed under the immediate orders of these directors, at yearly stated meetings, and at public general meetings of the proprietors, called by at least twenty days' notice in the public newspapers in London. Special general meetings may be called in a similar manner by any ten subscribers, each possessing 1000l. stock or upwards. Subscribers entitled to vote may vote by proxy, but which proxy must be a subscriber, and produce a written authority to the secretary for that purpose. The practical banking operations of the Colonial Bank are confined to the British West Indies, and its capital can only be applied to the legitimate and defined system of banking. The words of the charter itself, which are-

"To carry on the business of bankers, by dealing generally in bullion, money, and bills of exchange, and lending money on commercial paper and government securities, and in such other lawful ways and means as are usually practised among bankers; but it shall not be lawful for the said corporation to lend or advance money on the security of lands, houses, or tenements, or upon ships, nor to deal in general wares or merchandise of any nature or kind whatsoever;" moreover, "and further, that the said corporation shall be bound to make up and publish in somenewspaper or newspapers, circulating in each of the colo- | than the other can be allowed.

10d.; fivepence, 5d.; bit, 7td. No copper coins in | nies, where a bank shall be established, and also in the London Gazette, once in every year, an account or statement shewing the whole amount of its debts and assets at the close of the past year, and shewing also the amount of its notes payable on demand, which had been in circulation during such month of every year, together with the amount of specie, distinguishing each kind, and other assets immediately available in every such month for the discharge of such notes; and that the said corporation shall furnish copies of such yearly amount or statement to the respective Governors of such Island or Colony, in which a principal bank or banks shall be established."

According to the terms of the charter, the bank is allowed to possess lands, houses, and tenements, and ships, so far as may be necessary for carrying on the business of the establishment every where, but for that purpose only; and of course it has the power to purchase and to sell the same.

The shares are of course transferable, and the charter lays down simple rules in order to save expense in this operation. Silver, not gold, is taken as the stan-dard of value. The notes of the bank are payable " in silver of acknowledged weight and fineness," and dollars are taken as the foundation and medium of payment, those being the almost universal currency of the whole Western World. The lowest note that the bank can issue is to the value of five dollars. The head quarters of the bank is in London.

The system upon which the bank is established is wholly that which is designated the Scotch system. One peculiar feature of which is lending money at legal interest in what is denominated cash credits, granted on adequate personal security; these credits are not things of a day, a month, or a year, they exist for a life time at the will, or on the life and the solvency of the individual holding them, or of his securities. If a security dies or becomes insolvent another is required and procured, and the credit proceeds. It is gone about thus: the individual in any business or in any station requiring such a credit, comes to the bank and says, I want a cash credit for 1001, for 10001. or for 10,000l., and here with my own personal security, is that of two or more friends to your satisfaction. Satisfied with the security offered, a simple bond is entered into, the credit is granted, and from that moment the individual operates upon it; he draws out as he wants, and he pays in as he is able, and at the end of the year if the balance is against him, he is merely charged the interest for that sum, according to the time in which such balance has arisen.

The rate at which the Colonial Bank discount mercantile bills, and advance money on loans, is five per cent. per annum. Besides this, the bank allow interest on deposit accounts, according to the Scotch system, which is of two kinds-First, money deposited by any one to-day, and which may be drawn out to-morrow, or when the depositor pleases, in order to meet his engagements; Secondly, sums lodged on receipt accounts, which it is generally known will run for a year, when the depositor comes and receives his interest, adds it, and probably more or less to the sum, deposits the whole, and gets another receipt, bearing interest. This system is most extensively followed by the peasantry and labouring population in Scotland, beginning from 51. or 101., and running up to 2001. In 1826 it was ascertained that the amount of money thus deposited in banks by this portion of the population of Scotland was upwards of 13000000l. sterling. On such deposits a higher rate of interest The following are the stations where the Colonial Bank have already established branches: — Head branches, Barbadoes, St. Thomas, Jamaica; Minor branches, Demerara, Tobago, Trinidad, Grenada, St. Vincents, St. Lucia, Dominica, Antigua, St. Kitts, Santa Croix, and Porto Rico. There are four dependent or minor branches in Jamaica, besides the head branch in Kingston, viz. Montego Bay, Falmouth, Savannah la Mar, and St Thomas in the East. It is intended to establish branches in Cuba, at Havannah and St. Jago de Cuba. There are agents in New York, Quebec, Halifax, and St. John's New Brunswick, &c.

This bank is chiefly indebted to Mr. James Mc Queen for its projection, and to James Irving, Esq., for its establishment. It is calculated to effect great good in the West Indies.

There are two local banks in Jamaica.

XIII. At an early period the sugar cane was extensively cultivated by the Spaniards in Jamaica; and in 1671 Traphan speaks of the numerous complicated sugar works, like a town or village, in various parts of the island. In 1788, M. Martin, a French botanist, introduced the Otaheite cane into Cayenne and Martinico, from the Isle of France, whither it had been brought by Bougainville.

Although the Spaniards at first attended to the cultivation of sugar, it was subsequently neglected. In the year 1743, the chief productions of Jamaica were cocoa, indigo, and hides; the cultivation of sugar had just re-commenced. The increase in the growth of this staple article of the island has been as follows:-1722, 11,000 hogsheads were exported; 1739, 33,155; 1744, 35,761; 1768, 55,000; 1774, 78,304; 1790, 105,400; 1802, 140 000; 1832, 1,200,000 cwts. Gov. Knowles's calculation, in 1755, was 2,128,431 acres ungranted, out of which 400,000 are plantable; of these, 100,000 are fit for growing sugar, and the rest for coffee; the remaining 1,728,431 consist of barren mountains, &c. A return was made about the year 1755, of properties in the parish of St. Andrew's, and their produce, to the Board of Trade. In this, an estate called Norbrook, the property of Charles Long, Esq., is thus entered:—"2222 acres, 55 hogsheads of sugar, nine puncheons of rum; five acres in coffee, producing 2972 cwt.; 100 acres in provision ground; 500 in pen and pasture; five servants, 153 negroes, and 86 head of cattle. Indifferent land-some parts rocky and mountainous." This estate, in the return of 1793, is put at sixty hogsheads. The cultivation of Jamaica in 1818, according to Mr. Robertson's survey, was, in sugar plantations, 639,000 acres; in breeding farms or pens, 280,000; and in coffee, pimento, ginger, &c. 181,000. Total, 1,100,000.

The quantity of sugar now made in Jamaica is very great, and the importations into great Britain have for some years averaged 1,400,000 cwts.; which, rated so low as 21s. per cwt., would give nearly one million and a half sterling. The Jamaica sugar is of a very fine quality; and by the improved systems of culture and manufacture coming into operation, there is little doubt but that the quantity and quality may yet be more extended. The quantity of rum made from the sugar is also very great; the annual average exportations to England may be taken at 3,500,000 gallons. which may be estimated in value at 1,000,000l. sterling. The Jamaica rum is an excellent spirit. Of coffee, and that too of excellent quality, the quantity grown in Jamaica is very great; and the importation into Great Britain nearly 20,000,000 lbs. yearly, which, at the low value of 1s. per pound, is another million sterling. The coffee-plant was first introduced into Jamaica by Sir Nicholas Lawes, in 1728, where it was

cultivated on an estate called Temple Hall, in Linguanea. An act of legislature of the island was passed, to encourage its growth; and in 1732, coffec was advertised in a Jamaica paper at a pistole a pound. In 1752, there were exported 60,000 lbs.; and in 1775, 440,000 lbs. Until 1788, little attention was paid to this singular berry. In the four years ending 30th September, 1794, the average exportation of coffee was 1,603,066 lbs.; in 1804, it amounted to 22,000,000 lbs.; and during three years ending 30th of September, 1807, the average exportation was more than 28,500,000 lbs., which, at 6l. per cwt., its cost in Jamaica, produced more than 1,700,000l.

The coffee plant thrives in almost every soil about the mountains of Jamaica, and in the very driest spots has frequently produced very abundant crops. The produce of sugar, coffee, &c., may be seen under the head of exports.

Cotton, indigo, and cocoa were at one time extensively cultivated; but they have principally given place to sugar and coffee. Blome, who published a short account of Jamaica in 1672, mentions the existence of sixty cocoa walks. At present there can scarcely be said to be a plantation in the whole island. Various drugs, dye stuffs, and spices, are of excellent quality. Aloes, cochineal, spikenard, canella, liquorice root, castor oil nut, vanilla, peppers, arrow root, ginger, ipecacuanha, scammony, jalap, cassia, euphorbia, senna, &c., all attest the fruitfulness and capabilities of the soil and climate. The cultivated vegetables of Europe arrive at great perfection. Maize is the principal corn grown, and together with calavances, the yam and sweet potatoe, cassava, &c., form the chief food of the negroes. Various grasses thrive. but Guinea grass abounds; and, in consequence of its indispensable importance in feeding the cattle which supply manure for the sugar plantations, it is considered next in importance to the sugar cane. It was introduced into the island in the early part of the last century by accident, having been forwarded with some Guinea birds that were sent as a present. The birds died, the seed was thrown away, the grass sprung up, and the cattle were observed to devour it Attention was accordingly paid to the eagerly. It now grows all over the island, thriving subject. in the most rocky places, and rendering (like sainf in) lands productive that were heretofore considered barren, and making good hay, if salted or sprinkled with sea-water when being ricked. The native and exotic grasses are excellent for cattle and horses; in particular that called the Scotch grass, which vegetates rapidly, and grows to the height of five or six feet, with long and juicy joints. Five horses may be fed for a year on an acre of this vegetable, allowing each, every day, 56 lbs. of grass.

Of vegetables, potatoes (Irish and sweet), yams, cassava, peas and beans of every variety, artichokes, beet-root, carrots, and parsnips, cucumbers and tomatoes, radishes, celery, choco, ochro, Lima beans, Indian kale, calalue, various salads, cabbage trees (200 feet high!) &c., all flourish in abundance; and indeed, it may be said that autumn is perpetual in Jamaica, for every month presents a fresh collation of fruits and vegetables, and some species are at maturity all the year round. The bread-fruit tree, cocoanut, plantain and banana, alligator pear, the delicious mellow fig, pine, cashew, papaw, and custard apples, orange, lime, lemon, mango, grape, guava, pomegranate, soursop, shaddock, plums, tamarind, melon, wall and chestnut, mulberry, olive, date, citron, and many other delicious fruits, all arrive at perfection.

The following is a summary for 1833 of the number of stock, or horned cattle, and the quantity of land in cultivation and pasture; these returns are given in on oath:—

Prices of Produce in 1836. [B.B.]—Horned cattle, 201. each; sheep, 31.; goats, 21.; swine, 21.; milk, 1s. 3d. per quart; salt butter, 2s. 6d. per lb.; cheese, 1s. 8d.; wheaten bread, $7\frac{1}{2}d$. 17 oz.; beef, 10d. per lb; mutton, 2s. 1d.; pork, 1s.; rice, 10d. per quart; coffee, 1s. 8d. per quart; Aea, 15s. per lb.; sugar, 10d.; salt, 5d.; wine, per bottle, from 3s. 4d. to 6s. 8d.; brandy, 1l. per gallon; beer, 1s. 8d. per bottle; tobacco, 5l. per cwt.

Wages for Labour. [B. B.]—Domestic, per week, 16s 8d.; predial, per day, 2s. 6d. to 3s. 4d.; trades, 5s. It is difficult to form a definite idea of the amount of property in any place. Mr. Colquhoun, in 1812, estimated Jamaica thus:—Negroes, 19,250,000l.; cultivated lands, (809,450 acres) 16,189,000l.; uncultivated, (1,914,812 acres) 1,914,812l.; buildings, utensils, &c., on estates, 12,709,450l.; stock on estates, 4,800,000l.; houses, stores, merchandize and furniture, 2,000,000l.; colonial shipping, 42,000l.; metallic money, 220,000l.; forts, barracks, &c., 1,000,000l.;—total, 58,125,298l. sterling. The same authority estimated the productions annually raised, including cattle, esculents, &c., at 11,169,661l.; exports to the United Kingdom, 6,885,339l.; and to the other places, 384,322l. It will be observed, therefore, that in the following statement I have undervalued the yearly creation and total amount of property in Jamaica.

Nature and value of property annually created, moveable and immoveable, in sterling money (1834). Mr. Bridges estimates the 'internal value and intrinsic cost of Jamaica,' in 1826, thus:—"Slaves, 24,000,000l.; lands, patented, 18,000,000l.; forts and barracks, 1,000,000l.; private buildings, 12,000,000l.; stock, &c., 5,000,000l.; gold and silver coin, 200,000l.; total, 60,200,000l. sterling." There seems to be no calculation for roads, wharfs, bridges and other items.

Property annually created or prepared.—Sugar, 1,500,000 cwt. at 20s. 1,500,000.; rum, 3,000,000 gallons, at 1s. 6d., 225,000l.; molasses, 50,000 gallons, at 10d. 2,083l.; coffee, 20,000,000 lbs., at 7d.. 500,083l.; pimento, 5,000,000 lbs., at 4d., 83,000l.; cotton, 50,000

lbs., at 6d., 1250l.: vegetable food, at 3l. per annum each [I take the total population of Jamaica at 400,000, some say it is nearer 500,000.] 1,200,000l.; animal food and fish, at 5l. per annum each, 2,000,000l.; Domestic manufactures — Carpentering, tailoring, smithing, &c., 2,000,000l.; income and sundries, 1,000,000l.

Property moveable and immoveable.—Land: Acres cultivated or patented [There are 2,235,732 acres of land in Jamaica for which quit rents are paid to the crown. Mr. Burge thinks that at least 2,000,000 acres are cultivated.] 2,240,000, at 10l., 22,400,000l.; acres ungranted, or waste, 2,000,000, at 5s., 500,000l. Public property, viz., forts, barracks, roads, wharfs, hospitals, gaols, buildings, &c., 10,000,000l. Domestic property: dwelling houses, stores, furniture, plate, clothes, equipages, &c., 5,000,000l. Horned cattle, horses, sheep, swine, poultry, &c., 1,000,000l. Machinery, agricultural and manufacturing implements, ships, boats, roads, &c., 5,000,000l. Metallic money in circulation, 100,000l.

Total amount annually created property, 8,581,2831. Total amount of moveable and immoveable property, 44,900,0001. Taking the number of slaves in the island, in round numbers, at 300,000, and valuing them at 301. each, there would be a sum of 9,000,0001. to add to this. Happily, however, it is no longer necessary to make such calculations.

XIV. The Caymans which are a dependency of Jamaica are three small isles, in lat. 19. 20. N.; from thirty to forty leagues N. N. W. from Point Negrill, on the westward of Jamaica, the Grand Cayman being the most remote. Cayman-braque and Little Cayman lie within five miles of each other, and about 34 miles N. from the Grand Cayman, which is about one mile and a half long, and one mile broad, and containing about 1,000 acres. Grand Cayman (the only island inhabited) is so low that it cannot be seen from a ship's quarter-deck more than 12 or 15 miles off, and at some distance the lofty trees on it appear like a grove of masts emerging from the ocean. It has no harbour, but the anchorage on the S.W. coast is moderately good; on the other, or N. E. side, it is fortified with a reef of rocks, between which and the shore, in smooth water, the inhabitants have their craals, or pens, for keeping turtle in. The soil towards the middle of the island is very fertile, producing corn and vegetables in plenty, while hogs and poultry find ample provender.

Columbus discovered these islands on his return from Porto Bello to Hispaniola, and observing the coast swarming with turtle, like ridges of rocks, he called them Las Tortugas.

The Caymans were never occupied by the Spaniards, but became the general resort of adventurers or rovers, (chiefly French,) for the sake of the turtle.

In 1655, when Jamaica was taken by England, the Caymans were still uninhabited. Mr. Long states them to have reckoned in 1774 to the number of 106 white men, women, and children. The bishop of Jamaica in 1827 estimated the inhabitants at 1,600.

The present race of inhabitants are said to be descended from the English Buccaneers, and, being inured to the sea, form excellent pilots and seamen: they have a chief or government officer of their own choosing, and they frame their own regulations; justices of the peace are appointed from Jamaica, but in no other way are the inhabitants interfered with by the authorities in the chief settlement to which they undoubtedly belong.

SECTION I.—Trinidad extends from Lat. 9.30 to 10.51 N. and Long. 60.30 to 61.20 W. separated from the province of Cumana, on the S. American continent, by the gulf of Paria; 90 miles long by 50 broad, with an area of 2400 square miles, or 1536000 acres.

II. Christopher Columbus, was the discoverer of this fertile lale, on the 31st July, 1498, during his third yoyage. According to some, it was named Trinidad by Columbus, while distant 13 leagues S. E. from it, on account of the three mountain tops seen in that position: according to others, in conformity to the piety of the times, in honour of the Holy Trinity. The island was then densely peopled by Caribs of a mild disposition, of much industry, finely formed, and of a lighter colour than the aborigines or inhabitants of the other islands. These people remained unmo-lested until the Spaniards took possession of Trinidad in 1588, when they fell a sacrifice to the cupidity and religious bigotry of the Castilians, who, as in Jamaica, drafted off to the mines those who escaped a more sanguinary death by fire or the sword; but a few, indeed, were saved by the apostle of the New Worldthe benign, the eloquent, the heroic Las Casas. occupying Spaniards forced the Indians to cultivate, as servants, that which they once held as masters, and negroes were brought in from Africa to aid their labours. Sir Walter Raieigh visited Trinidad in 1595. and states that the inhabitants then cultivated excellent tobacco and sugar canes. The Spaniards, to divert his attention, described to him the El-Dorado. where the rivers were full of gold dust; but, on Raleigh's return from exploring the Orinoco, he entered into a treaty with the Indians (then at mortal enmity with the Spaniards), marched with them, attacked and carried by assault the capital of San Josef, and put the garrison of 30 men to the sword: the English Government disowned this action of hostilities. Spain paid little attention to her valuable possession, being then fully occupied with conquests on the contiguous continent. In 1676 Trinidad was captured by the French, but almost immediately restored to Spain. The population and trade of Trinidad were subsequently almost extinguished, and, in 1783, the island contained but a very small number of inhabitants considering its long settlement; viz. whites 126, free coloured 295, slaves 310, and Indians 2,032; while its sole commerce consisted in bartering cocoa and indigo for coarse cloths and agricultural implements with the smugglers from St. Eustatia.

The number of inhabitants, as will be seen under the head of population, rapidly increased; and, as a mixed society, containing the germs of so many evil passions, required vigorous control, a strong government was formed under Don Josef Chacon, a naval captain, one of whose earliest measures was the expulsion of the dissolute monks, the prevention of the demoniacal inquisition, the granting of fertile lands to new colonists, with advances from the royal treasury to purchase cattle and implements of husbandry, and the providing freedom and safety for mercantile speculations. The revolution in France, and the disturbances in her colonies, added numbers and wealth to Trinidad; the whole face of the island was changed; and, in four years, the magnificent capital of Port of Spain usurped the place of a few miserable fishers' palm-leaved huts. Trinidad was then a sixth dependant on the government of Caraccas.

On the 16th of February, 1797, Admiral Harvey, with four sail of the line, appeared off Trinidad; the Spanish Rear Admiral, Apodaca, who then anchored at Chagaramus with three first rate ships of the line and a fine frigate; instead of giving battle to Harvey, burned his ships,—and retreated to Port of Spain. General Sir Ralph Abercrombie, with 4,000 men, marched to Port of Spain, and, after a few discharges of artillery. Trinidad became a British colony.

of artillery, Trinidad became a British colony.

The following is a list of the Governors of Trinidad since its occupation by the British:—1801. General (then Colonel) Sir Thomas Picton. 1802. Three Commissioners for the office of Governor and Commander-in-Chief,—Colonel Fullerton, General Picton, and Commodore Hood. 1803. Major-General Hislop. 1812. Sir R. Woodford, Bart. 1828. Major-General Sir L. Grant. 1833. The Right Hon. Sir G. F. Hill, Bart. [The appointment of three Commissioners in 1802 did not succeed as was expected, for they soon disagreed in the measures necessary to carry on the government.]

III. Trinidad appears, at a distance, like an immense ridge of rocks along its whole N. front: but, on entering the Gulf of Paria, one of the most magnificent, variegated, richly luxuriant panoramas that nature ever formed, is presented to the eye of the voyager; To the E. the waves of the mighty Orinoco dispute for the empire of the ocean with contending billows: the lofty mountains of Cumana rise from the bosom of the horizon in stupendous majesty; and on the W. appear the cape, headlands, mountains, bills, vallies and plains of Trinidad, enamelled with eternal verdure, and presenting a coup d'onil of which the old world affords no parallel. The view from the block-house is magnificent, the deep blue waters of the gulf with the white-sailed light canoes in the distance; to the left the splendid capital of Trinidad, in front the mountains of Cumana; and, on the right, the picturesque valley of Diego Martin, extending across the island to the Atlantic, with its carefully cultivated fields and deep foliaged woods. The bat-teries of Fort George rise in succession from the gulf shores to the barracks, 1,200 feet above the level of the sea,—a range of slightly elevated mountains occupy the N. coast; a group of finely wooded flat or round topped hills the centre; and a chain of fertile evergreen downs the S. coast of the island. The fecundity of the soil, its gigantic and magnificent vegetation, (compared with which the loftiest European trees are like dwarfish shrubs, and our loveliest flowers appear pale and inanimate,) its beautiful rivers, enchanting slopes, forests of palms, groves of citrons, and hedges of spices and perfumes,-its succulent roots, delicious herbs and fruits, abundant and nourishing food on the earth, in the air, and in the water; -in fine its azure skies, deep blue seas, fertile glades, and elastic atmosphere, have each and all combined to crown Trinidad with the appellation of The Indian Paradise.

Puerto D'Espana, or Port of Spain, the capital of Trinidad, embosomed in an amphitheatre of hills, is one of the finest towns in the West Indies. The numerous buildings are of an imposing appearance, and constructed of massive cut stone. No houses are allowed to be erected of wood, or independent of a prescribed form: the streets are wide, long, (shaded with trees), and laid out in parallel lines from the land

to the sea, intersected, but not intercepted by cross atreets, thus catching every breeze that blows; and as in most tropical countries, there is a delightful embowered public walk. Among the principal buildings the Protestant church stands conspicuously and beautifully situate, with a large enclosed lawn in front, surrounded on two sides by the best houses of the capital; the interior of the church is superb, and at the same time elegant, its sweeping roof and aisleless sides being variegated with the various rich woods of the island, tastefully arranged; there is also a splendid Roman Catholic church, and well situate; and an extensive market-place, with market-house and shambles, all built since the burning of the town in 1808, of handsome cut stone.

The Port of Spain is divided into barrios or districts, each under the superintendance of alcaldes or magistrates and offers, who are responsible for the cleanliness of the streets, for the regulating and order of the markets, and for the due execution of the law in their several divisions; hence the policy and good order established in the capital is admirable. The St. James' barracks for the accommodation of 600 men are substantially, and I may add, beautifully erected, on a fine plain, about a mile from the capital.

Fort George commands the pass leading to Diego Martin's valley, and in the event of war, a few judiciously disposed fortifications at the other entrances to the interior of the country would render the island impregnable. The entrenchments are elevated along several ridges and round backed divisions, with a variety of surface: some parts of which are sufficiently flat for the crection of military works, and on the best of these, at the elevation of 1000 feet, is the Blockhouse barracks, calculated for 200 men. Fort George is inaccessible from behind, and not commanded by any hill in its neighbourhood, it is admirably fortified by batteries that are disposed, as it were, along the two sides of an acute angled triangle terminating on a point at the Blockhouse redoubt, each commands the other, according to the situation in which they are placed.

The highest range of land (about 3,000 feet) is to the N. near the sea; in the centre of the isle is a less elevated group of mountains, to the S. a series of lovely hills and mounds appear in delightful contrast to the northern shore; and as on the contiguous coast of Cumana, the chain of mountains in the N. of Trinidad runs E. and W. Las Cuevas has a double summit, with a magnificent platform in the centre, from which there is a view of the ocean E. and W.; four delightful vallies, watered by numerous rivulets, add beauty to this charming landscape.

On the W. coast the principal navigable streams are the Caroni, Chaguanas, Barrancones, Couva, Guaracara, and Sissuria; the first is navigable from its mouth in the gulph, to its junction with the Aripo, (also navigable) a distance of six leagues; the Guanaba, like the Aripo, flows into the Caroni, but has less water; there are many other streams on the W. coast, which being navigable for small trading vessels, afford great facilities for the cultivation of land, and the transport of its produce. The N. and E. coasts are well furnished with rivers and rivulets of pure and crystalline water; the principal on the E. coast are the Rio Grande, Oropuche, and Nariva, (called by the Creoles Mitan, from its flowing through a grove of cocoa trees). This latter has been sailed up seven and a half leagues, and found navigable for a 250 tons ship, at less than a league from its source. Guataro, to windward of the island, is large, but not navigable to any great extent, for more than small boats; further S. is the fine river Moruga, while in every direction limpid brooks run murmuring over pebbly beds to the ocean, through lofty forests and the most picturesque scenery.

The gulf of Paria, formed by the W. shore of Trinidad, and the opposite coast of Cumana (which is 30 leagues long and 15 ditto from N. to S.), may be said to form one vast harbour, as ships may anchor all over the gulf in from three to six fathom water, on gravel and mud soundings. The principal ports are, first, the harbour of Port Royal, Chagaramus, on the N.W. peninsula of the island, at the entrance of the N. mouth, three leagues W. of Port of Spain, and comprehending a space of about seventy square miles; it is esteemed the best and safest port in the island, is capable of receiving the largest ships of war, has from four to 40 fathoms soundings of gravel and mud, or ouze, with bold and steep northern shores.

Port of Spain, on the W. coast, which gives its name to the capital, is the next best harbour, and has one of the most extensive bays in the world; the surrounding fortified heights completely command the town, and a fine stone quay, running several hundred yards into the sea, has a strong battery at its extremity. All the W. coast is a series of bays where vessels may anchor in safety at all times. The Careenage, not having more than from two to four fathoms, is only fit for small vessels; and Gasper Grande is an islet within the mouths, where the Spanish ships of war were wont to anchor under the safeguard of a battery intended for the protection of the passage. The N. and E. coasts are not equally well furnished with harbours and roadsteads, which is the more to be regretted, as the wind blows for threefourths of the year from the E. and N. The principal ports to the N. are the Maqueribe and Las Cuevas, (where fort Abercrombie is situate); to the N. E. are the ports of Rio Grande, Toco, and Cumana; on the E. is Balandra Bay, or Boat Island, where safe anchorage may at all times be found for small vessels; further E. are Guiascreek and Mayaro Bay; the safest port on the E. coast is Guaiguaire, from its being sheltered by a point of land against E. winds, and its entrance to the S. from which the winds are neither frequent nor violent.

Trinidad, as viewed from the Gulf of Paria, presents an alluvial country in an active state of formation; the primitive foundations of the land arranged in a form nearly semilunar, incline as with outstretched arms to receive into their bosoms the greater portion of the alluvies from the mouths of the mighty Orinoco; the currents, deeply charged with this alluvial soil, drive along the cliffy sides of the northern ridge and southern shores, (from which they borrow in their course), to deposit their lading at the bottom of the gulf where the metropolis, at the base of its beau-tiful mountain stands. The tides, (which there rise higher by several feet than in any other part of the West Indies,) flow muddy and foul, and ebb with clear waters, which may be seen at some distance from the shore; each extent of new formation being marked by muddy banks of Mangrove bushes; in this way Port of Spain-like, as Dr. Ferguson says of the ancient Ostia, that was built upon the sea, may become in time an inland city, the metropolis of many other towns erected on the fertile and flourishing country. It has been observed, that the land encroaching on the sea on the coast S. W. of Trinidad increases the territorial extent of the island; and, at

channel for the conveyance of the waters of the Orinoco and Guarapiche to the ocean.

IV. The island (as also Tobago) is evidently a section of the opposite continent, formed either by a volcanic eruption or oceanic eruption—the same strata of earth, the same rocks, fossils, &c. are common to both. The nucleus of the mountains is a very dense argillaceous schistus, becoming laminated and friable when exposed to the atmosphere, and changing to the micaceous schistus in the inferior layers and near the beds of rivers; in the interstices of which latter, particularly to the northward, are found great quantities of sulphureous pyrites in cubic crystals. There is no granite on the island (while the Caribbean chain of mountains are principally composed of that substance); but blocks of milky quartz, of different sizes, are found in every valley, beneath which there is frequently to be found a light layer of sulphate of lime; on the precipitous sides of the mountains, washed by the torrents, may be seen layers of a coarse argile, mixed with ferruginous sand. Thus the absence of calcareous masses in Trinidad, Tobago, and Cumana offers a strong geological contrast to the Antilles, or Caribbean Mountains. Gypsum and limestone are rare in Trinidad. One quarry of calcareous carbonate, situate at the foot of a hill near the Port of Spain, is mixed with veins of silex and heterogeneous substances. Considerable quantities of pulverating feldspar are found on the rising ground, washed by the rains, near the Guapo mouth and on its left banks. The micaceous schistus has sometimes a transition into talcous schistus; thus giving an unctuous appearance to the soil. Near the coast are found rocks of a bluish calcareous nature, veined with white calcareous carbonate, chrystalized, rather hard, and resting on coagulated clay, with pebbles of primitive rocks. The magnetic needle indicates the presence of iron in many rocks; but volcanic convulsions have produced different effects from similar eruptions in Europe: thus gypsum is found abounding in sulphur and pyrites, mingled with granite. No vestiges of organic bodies have been discovered; maritime and land shells (many of unknown and extinct species) are found in the great alluvial plains; and, although madrepore are drifted on the coast, no coral banks exist. On the surface of the soil of the vallies where rivers run, rounded pebbles are observed; but in the plains they disappear: this is particularly the case on the E. and very rare on the W. coast. There are several extensive vallies and plains of a deep and fertile argillaceous vegetative earth, without a rock or even pebble to be seen.

There are several craters in Trinidad. S. of Cape Dela Brea is a submarine volcano, which occasionally boils up, and discharges a quantity of petreolum; in the E. part of the island and Bay of Mayaro is another, which, in March and June, gives several detonations resembling thunder,-these are succeeded by flames and smoke, and, some minutes after, pieces of bitumen, as black and brilliant as jet, are thrown on shore. Near the forest of point Icacos, on the summit of a hill of argillaceous clay, M. Levyasse found a great number of little mounds, about two feet high, whose truncated and open-coned tops exhaled a gas smelling like sulphurated hydrogen; one cone, of six feet high, on the most elevated part of the hill, continually discharged whitish matter, of an aluminous taste; a sound was heard, indicating a fluid in a continual state of agitation, and globules of an elastic gas evaporated continually; the scum at the

some distant day, the Gulf of Paria will be a mere | top was cold; four poles, measuring sixty feet, did not touch bottom, and disappeared on being let go. There is neither stone nor sand within the circumference of a league of the cone; but handsome rounded pebbles were found round the hill, together with small calcareous stones, encrusted with sulphur of a prismatic form. Contiguous to this crater, and encompassed by a marsh of mangroves, which communicate with the sea, is another hillock, with a circular shallow cavity full of a boiling liquid like alum; a dull subterraneous sound was heard, the earth was found to tremble under the feet of the explorers. and two poles pushed into the crater disappeared in an instant; detonations like distant cannon are heard every year in the month of March. It is remarkable that earthquakes, felt violently in the Antilles in 1797, were not perceived at Trinidad or in Cumana, and when the latter province was shortly after desolated by terrible earthquakes, the shocks were slightly felt in Trinidad, but not at all in the Antilles.

> Forty miles S. of the Pitch Lake are several mud volcanoes, in a plain not more than four feet above the general surface; the largest is about 150 feet in diameter, and has boiling mud constantly bubbling, but never overflowing, remaining constantly within the surface of the crater. When the old craters cease to act, new ones invariably appear in the vicinity; thus resembling the mud volcanoes witnessed by Humboldt. Some of the mud volcanoes throw out salt water, heavily loaded with argillaceous earth:during the hottest months of the dry season, cold mud is thrown to the height of thirty feet, and the volcano is unapproachable to within fifty paces.

> The precious metals have not been found in Trinidad, but the magnet discovers iron in the greater part of its rocks and pebbles; a very brilliant white metal, (specific gravity ten), more ductile and malleable than silver has been found, and M. Vauqueline thought it either a new metal or composed of several others; crystals of sulphate of copper have been found encrusted with alum among flints, as also arsenic with sulphurated barytes for a matrix; schistose plumbago has been discovered, and near it a mine of coal, about five miles from the sea-shore; but the most remarkable mineral phenomenon is the Asphaltum, or Pitch Lake, situate on the leeward side of the island, on a small peninsula, jutting into the sea about two miles, (opposite the Parian Mountains on the Continent,) and elevated 80 feet above the level of the ocean. The headland on which it is situate, when seen from the sea, resembles a dark scoriaceous mass; but, when more closely examined, it is found to consist of bituminous scoriæ, vitrified sand, and earth, all cemented together. In some places beds of cinders are found; and a strong sulphureous smell pervades the ground to the distance of eight or ten miles from the lake, and is felt on approaching the shore.

The lake is bounded on the N. W. by the sea, on the S. by a rocky eminence, and on the E. by the usual argillaceous soil of the country; it is nearly circular, and better than half a league in length, and the same in breadth, occupying the highest part of the point of land which shelves into the sea, from which it is separated by a margin of wood; the variety and extrordinary mobility of this phenomenon is very remarkable, groups of beautiful shrubs and flowers, tufts of wild pine apples and aloes, swarms of magnificent butterflies and brilliant humming birds enliven a scene, which would be an earthly representation of Tartarus without them. With regard to mobility,

where a small islet has been seen on an evening, a gulf is found on the following morning, and, on another part of the lake, a pitch islet is sprung up to be in its turn adorned with the most luxuriant vegetation, and then again engulphed.

The usual consistence and appearance of the asphaltum, (except in hot wheather, when it is actually liquid an inch deep,) is that of pit coal, but of a greyish colour, melting like sealing wax; ductile by a gentle heat, and, when mixed with grease, oil, or common pitch, acquiring fluidity, and well adapted for the preserving the bottoms of ships against the destructive effects of the worm termed the teredo navalis. Sometimes the Asphaltum is found jet black and hard, breaking into a dull conchoidal fracture, but, in general, it may be readily cut, when its interior appears oily and vesicular.

Deep crevices or funnels, inclining to a conic form, and sometimes six feet deep, are found in various parts of the asphaltum, (pitch), filled with excellent limpid running water, and often containing a great quantity of mullet and small fish. Alligators are said to have been seen in these extraordinary chasms. The bottom of some of these canals are so liquid that marked poles thrust in disappear, and have been found a few days after on the sea shore. Near Cape La Brea, to the S.W. (the place where this lake is) Capt. Mallet observed a gulf or vortex, which, in stormy weather, gushes out, raising the water five or six feet, and covering the surface, for a considerable space with the bituminous substance. A similar gulf is said to be on the coast, at the bay of Mayaro.

Pieces of what was once wood, are found completely changed into bitumen; and the trunk of a large tree, on being sawn, was entirely impregnated with petreolum; where the petreolum mixes with the earth it tends greatly to fertilize it, and the finest fruits in the colony come from districts bordering on this singular lake; the pine apples, in particular, being less fibrous, larger, more aromatic, and of a deeper golden colour than are to be had any where else. [For a detailed account of the pitch lake, and mud volcanoes see Vol. VI. of my Colonial Library.]

V. The dry and rainy seasons into which the tropical year is distinguished is more marked in Trinidad than in the Antilles. The dry season commences with the month of December, and ends with that of May, the E. N. E. and N. winds then become less cool; the heat increases and it is at its height by the end of June, storms commence and augment in frequency and violence during August and September, and in October they occur almost daily, accompanied by to-rents of rain; there is seldom any fall of rain during the night, but a heavy shower without wind usually precedes sun-rise by half an heur during the scason. Hurricanes are unknown in Trinidad or Tobago.

The hygrometer varies much in different seasons; during the rainy season it is usually between 85 and 90,—in the spring between 36 and 38 in the day, and about 50 at night; on an average there falls about sixty-two inches of water during the winter, and about ten inches (including the heavy dews, which may be estimated at six inches) during the spring. The October rains are very gentle; in November they are less frequent and more slight; and from the end of December to the beginning of June of some years, there does not fall a drop of rain during the day: as the island has become cleared, the quantity of rain falling has diminished.

During even the hot and stormy season the thermometer rarely stands at Port of Spain before sun-

rise, so high as 74 and in the country occasionally as low as 68; from sun-rise to sun-set 84 to 86, falling in the evening to 82 or 80; in August and September when the air is saturated with moisture, the mercury rises sometimes to 90-rarely above that height. When during the winter there is wind with the rain the mornings are less hot, as are also the evenings, when the rain has been preceded by thunder during the day; but the temperature of the whole island varies with the elevation above the sea and the aspect of the place, especially in spring, when the thermometer descends to 60, and sometimes to 50, in places of moderate elevation; on the whole it is less moist than Guyana, and not so dry as Cumana, and being an island, the winds are more constant, and the atmosphere therefore more frequently renovated; the vallies of Santa Anna, of Maraval, Diego Martin, Aricagua, and the heights of St. Joseph, to the N.W., as also the vallies on the N. coast, enjoy a mild temperature, and their inhabitants breathe during nearly the whole year a fresh, pure, and very elastic air, by reason of the simultaneous action of the evaporation of rains, dews, and winds, on the well-known eastern principle, by which liquids are cooled, and even ice formed, by solar evaporation or exposure to a current From the coolness of the night, it is the orof air. dinary custom to have a blanket folded up at the foot of the bed to draw up when necessary, during a residence in the country or in the high lands. beneficial and abundant dews (arising from the numerous rivers of the island and surrounding ocean) cool and invigorate the atmosphere, and give a vigorous luxuriance to the vegetation of an isle, which, were it otherwise, would be nearly barren. The following table affords a Meteorological Register of Port of Spain :-

REGISTER.	OBSERVATIONS.	Cloudy and rainy Ditto, nights dewy Fine, dry and pleasant nvigorating breezes. Strong ditto, some thunder. Close and rainy ditto. Stormy, lightning, rainy. Squally, ditto. Heavy rains, thund. & lightng. Strong breezes. Fine, hot occasionally. Cool, sometimes chilly.

* These natives of the eastern hemisphere were brought to the west for the purpose of cultivating rice, and perhaps with the idea of forming a free labouring population; no Chinese women were induced to accompany them; the men soon became discontented, and there now remain but a few of them as fishermen.

The Slave Population, according to a Parliamentary Return, was in numbers, from 1816 to 1828, as follow:-

				Increa Bir			ase by	Decrea Manu sio	mis-
Years.	Males.	Females.	Total.	Males.	Females.	Males.	Females.	Males.	Females.

IX. Prisoners of Trinidad throughout the Year. [B. B. Colonial Office.]

· No Returns.

X. The administrative functions are vested in a Lieutenant-governor and an executive and legislative committee. The executive council consists of three official members (viz. the Colonial Secretary, the Colonial Treasurer, and Attorney general), selected from the legislative councils; they have no powers, and no other functions than counsellors of the Governor, who may follow their advice or not, as he pleases. The legislative council consists of twelve members, six of whom are styled official, holding offices and salaries at the pleasure of the Crown, viz. the Chief Justice, the Colonial Secretary, Attorney-general, Colonial Treasurer, Public Prosecutor, and Collector of Customs, and six are styled non-official, selected from amongst the inhabitants, the whole removable at the pleasure of the Crown. The Governor presides at the board, has a vote, and a casting vote in addition, and no measure can be introduced or proposed at the board which he objects to.

The Cabildo, in its authority and functions, resembles our municipal corporations; it has power to raise revenues which are derived from licenses to the dealers in spirituous liquors, to hucksters, &c., and from a tax on carts, and on meat and fish sold in the town of Port of Spain, thus realizing about 100001. per annum, with which the streets and market-house are kept in repair, and the salaries of the police officers paid. All other salaries are paid out of the Colonial Treasury. The laws are principally Spanish, executed after the Spanish form, with some modifications; the titles of Alcalde, Alguazil, &c., are always used instead of the corresponding terms in English.

The Cabildo is composed of the Governor, two Alcaldes in Ordinary, the Procurator Syndic, and ten Regidors. Of the latter two are perpetual; the remaining eight serve in succession as the Alcaldes, four going out of office annually. After having (in conjunction with the remainder of the Cabildo, elected four others as their successors, whose names are then submitted to the Governor for his approval. The office of Coroner does not exist. There is no power of arrest in the colony upon mesne process except on the authority of the Roman Law, when a person is suspectua de fuga. Every individual about to leave the island must obtain a pass from the Governor, and advertize his intention to leave: any creditor may then apply to the Colonial Secretary's Officer, and stop the pass.

The Alguacii, Mayor or Provost Marshal, is appointed by the Governor, and removable by him. He gives security in

The Alguacil, Mayor or Provost Marshal, is appointed by the Governor, and removable by him. He gives security in 2000l. He executes processes, &c. by deputies, and receives fees according to a tariff. In each district there are Alculdes de Barrio elected by the Cabildo Board from among the free-holders for one year. They receive no salary or emoluments, entertain civil causes or pleas of debt to the amount of 20

dollars (with an appeal to the Chief Judge if made within five days after sentence), and they are also entrusted with the government of the pulice of their respective districts. There is no jury in the "Court of Criminal trial" which has under its jurisdiction all criminal offences committed in the island with the exception of petty thefts. &c. The Court is composed of the Chief Judge (with a salary of 30001 per annum) as President; of the Assensor of the Governor; of the Alcaldes in ordinary, and the Escribasos (Secretaries) of the civil tribunal (who act in the same capacity herein). The Attorney General prosecutes; counsel is heard for the prisoner, the Chief Judge sums up the evidence, and takes the opinion of each member of the Court individually, beginning with the junior member. The judgment in all cases is final, excepting death sentences, when an appeal lies to the Governor in Council.

Every freeman of the island is enrolled in the militia, which is composed of artillery, cavalry, and infantry, with a very numerous staff. Their appearance on the great plain before St. Anne's is really superb; the muster is about 4500, and a more efficient state of discipline is kept up than perhaps in any of the other islands. The Governor is of course Commander-in-Chief; there are two Brigadiers-Generals, an Adjutant, Commissary, Paymaster, Mustermaster, Provost-Marshal, and Judge Advocate-General, with deputies to each; Physician, Surgeon, and Apothecary General; and of Field Officers, two Colonels, twenty-one Lieutenant-Colonels, twelve Majors, and fifty-seven Captains.

The militia strength for 1835 was as follows [B. B. Colonial Office]: 1st. Division.—Cavalry, 23 staff, 13 officers, 25 non-commissioned officers and privates. Infantry, 85 officers, and 1485 non-commissioned officers and privates. 2nd Division .- Cavalry, 5 staff, 3 officers, 31 non-commissioned officers and privates. Infantry, 40 officers, and 856 non-commissioned officers and privates. 3rd Division.-Cavalry, 4 officers, and 28 non commissioned officers and privates. Infantry, 11 officers and 271 non-commissioned officers and privates. 4th Division.-Cavalry, 10 officers and 36 non-commissioned officers and privates. Infantry, 11 officers and 225 non-commissioned officers and privates. 5th Division.-No Cavalry. Infantry, 3 officers and 61 non-commissioned officers and privates. Total. Cavalry, 28 staff, 30 officers, 120 noncommissioned officers and privates. Infantry, 150 officers, 2898 non-commissioned officers and privates.

The uniforms are various and splendid. The artillery is blue, with red facings and gold lace; the royal Trinidad light dragoons blue, facings buff, and lace silver; mounted chasseurs and light infantry, green

uniform; and the sea fencibles blue, with white facings; and so on through the whole of the other corps. The fines for non-attendance on parade, agreeably to the resolutions for the government of the militia forces of this island are—A Colonel, 80 dollars; Lieut. Colonel, 50 dollars; Major, 40 dollars; Captain, 12 dollars; Lieutenant, Ensign, Surgeon, Adjutant, and Quarter-Master, 8 dollars; Sergeant-Major and Quarter-Master Sergeant, 8 dollars; Sergeant, 6 dollars; Corporal, 5 dollars; Private (first offence) 4 dollars; second, 6 dollars; and for the third renders himself liable to be brought to trial by a general regimental court martial, which court is empowered to pass sentence of fine and imprisonment; not, however, exceeding twenty dollars, and forty-eight hours confinement. And should a fourth offence occur, any private so offending, is liable, on conviction before a court martial, to be removed from the colony, as being inimical to the regulations established for the security and good order thereof. Besides the militia, there are the head quarters of a European regiment of the line, and part of a West India regiment.

XI. Duties, taxes, &c.—3½ per cent. on importations, ad valorem; 3½ per cent. on exportations, ad valorem; 7 per cent. on wines, ad valorem; 3½ per cent. and 1s. 8¾d. per gallon on strong waters, ad valorem. Taxes.—On houses, 5 per cent. on assessed rent; on

slaves, 8s. 8d, sterling each per annum. On transient traders, 21 per cent. ad valorem. Testamentary duty on bequests and inheritances, according to degree. Duties on bequests by will made in Trinidad: In the ascending line, 2 per cent.; collateral line of the first degree, 2½ per cent.; of the second degree, 3½ per cent.; of the third degree, 4½ per cent.; to illegitimate or natural children, 6 per cent.; to all other persons, 7 per cent.; bequests from the fifth, 6 per cent.; and on all legacies, or inheritances paid to persons, residents of a foreign colony or state (except in the descending line) an addition of 2 per cent. On Shipping .- A duty of sixpence sterling per ton, upon vessels entering and clearing with a cargo, and being above 50 tons. An additional duty of 1s. per ton upon vessels above 25 tons; not to be exacted more than twice in one year upon vessels above 25 tons and not exceeding 50 tons. On lands.—A quit rent of 1s. 3d. 6-10 sterling per quarrée (3 1-5 acres) upon lands granted by the crown. Wharfage.--Lumber of all kinds, staves and shooks, bricks and tiles, per 1000 feet, 10d. 4-10 sterling; coals and lime, per hogshead, 10d. 4-10 sterling.

The revenue in 1824 was 36280l., and the expenditure 37587l.; in 1825, revenue 44332l., expenditure 35958l.; in 1826, revenue 54921l., expenditure 44589l.; in 1827, revenue 50080l., expenditure 54015.

XIII. The following are the Spanish Weights and Measures, and the proportion they bear to English. Weights—The Fanega = 112 lbs. English; the Quintal, = 100; 1 Aroba, =25.

Measures.—

Tri Camari C	0	
Varas.	Estadale.	
100	= 1	Solare.
2500	= 25 =	l Suerte.
10000	= 100 =	4 = 1 Fanega.
40000	= 400 =	16 = 4 = 1

The measures used in surveying in Trinidad is the quarrée, containing 185264 varas of Castile, or 3 and 1-5th English acres; consequently 100 quarrée are equal to 320 acres.

The side of a square of a quarrée, or 3 and 1-5th English acres, is equal to 373 8-11ths English feet; 408\frac{2}{3} Spanish ditto; 350 French ditto, or 136 and 1-10th Spanish varas.

XIV. The vegetation of Trinidad is of the same splendid character as that found on the main land. Botanists specify on the island aspen rush, or Cyperus haspan —Commelina hexandra, panax chrysophilla—l'itex capitata, Justicia secunda, solanum hirtum, cestrum latifolium, Allamanda cathartica, Macroeneum coccineum, frælichia paniculata, spathodea corymbosa, robinia rubiginosa lupinis villosis, glycine picta, Bigonia humilis, tabernæmontana undulata, Zapogomea tomentosa, croton gossypifolium, tragia corniculata, tontelea scandens, &c. &c. The forests contain the finest wood for ship building and for ornamental purposes, amongst which the red cedar, and a great variety of palms are conspicuous. The nutmeg, cinnamon and clove, have been introduced into the island and flourish, particularly the former. The cacao, or cocoa, (whence the delicious thea broma, or divine beverage is made) is indigenous to the new world; in Mexico, the beans served, even in Humboldt's time, for small coin, as cowries do in India-six beans being equivalent to one halfpenny English; and the Castilians, whether in America or Spain, soon learned to consider chocolate a necessary of life, -indeed, it was seriously disputed for some time among the churchmen of Rome whether it were lawful to consume so nourishing a beverage on a fast day; but the inclinations of the palate naturally prevailed over scruples of conscience, and it was even finally served to the Creole ladies by their slaves in the chapels of Mexico during divine service. The cocoa tree somewhat resembles that producing the English cherry, fifteen feet in height, delighting in a new and productive soil near the margin of a river, and requiring shelter from strong sunshine or violent winds, for which purpose the plantain trees, Musa Paradisiaca, or coral bean tree, Erythrina, (which the Spaniards call Madre di Cacao) are planted between every second row, giving a most luxuriant appearance to a plantation, the long bare stems of tropical trees being strongly contrasted with the rich green of the cacaos below, and here and there brilliant and burning with the golden foliage of the Bois immortel, a lofty umbrageous tree, which in the flowering season is covered with clusters of scarlet blossoms of exceeding brightness, and shining like brilliant velvet in the sun-rays; while the lovely butterfly plant (so called from its perfect similitude to the insect) fluttering on its almost invisible stalk, adds beauty and variety to the prospect.

As it would be advisable to extend the cultivation of cacao to Ceylon and other of our Eastern settlements, the following description of the cultivation of this nutritious nut is given. Seedling plants should be raised in the dry and sheltered spots of a nursery ground. The seeds are sown in small raised mounds, at regular intervals, two seeds being deposited in each mound, lightly covered with mould, and sheltered

from the scorching sun with plantain leaves, or some other cool and umbrageous canopy. If the season be dry moderate watering should be used, and if both seeds germinate, the weakest plant must be destroyed. When the shrub attains fifteen or eighteen inches in height, (which will be the case in ten or twelve weeks) its transplantation to the fixed location is necessary. The plants must be arranged in straight rows, in a quincunx form, with a distance between each of sixteen feet, should the soil be rich, and of not less than thirteen if less fertile. Transplantation in dry weather, earth removed with the plants and the tap root deep set when replaced. The cacao delights in the shade; a vertical sun destroys it, therefore it is imperatively necessary to plant between every second row either the plantain tree or the coral bean tree, (ervthrina). When the tree is about two years old it usually puts forth from five to seven branches from the top, all beyond five are cut away; in about six months more flowers commonly appear, which must be also destroyed; indeed, it is usual to repeat this abscision annually, until the fifth year, in order that the productive power of the tree may be finally perfected in greater strength. A great number of flowers fall without fructifying; the fruit, while growing, is green, but as it ripens the pod changes to a bluish red, approaching to purple, with pink veins; in some varieties the fruit pod becomes of a delicate yellow or lemon colour. When over ripe the pods sometimes burst, and the seeds fall from their gelatinous pulp. The crop may be said to last throughout the year, but the principal gatherings of the fruit are in June and towards the end of December. No unripe pods must be gathered. The ripe pods are broken with a mallet or cut open, and the seeds separated from the pulp with a wooden spatula; to separate the seeds entirely from the pulp, they are placed in a hole with some dry sand, and left until a very slight fermentation comes on the sand, being frequently stirred and replenished to absorb the moisture from the seeds: when at the end of three or four days the process is completed by spreading out the cacao nuts on rush mats, or upon a platform in the sun to dry, care being taken to prevent rain reaching the seeds. When quite dry and hard the nuts may be lightly packed in bags or boxes, and kept in a dry or airy place for use or exportation.

The following calendar of the fruits of Trinidad for the year, will demonstrate the variety of delicious food which this valuable colony yields. January produces sappidilloes, pomegranates, sour-sops, plantains, bananas, papas, or papaws. The vegetables are okros, capsicums of all kinds, which indeed are common every month in the year; cocoa nuts, which are seldom used but for cakes and puddings, ground down; pigeon or Angola peas, sweet potatoes, yams of different sorts, and tanias. February, the vegetable called chicon, or christophini comesan. March, grenadilloes are added to the former list. April, Java plums, mangoes, mamme sapoetas, pines of several varieties, the Otaheitan gooseberry, Jamaica plums, cerasees, and bread fruit. May, water-melons and cashew apples. June is much the same in her productions; pigeon peas are now nearly out of season. In July, the avocado pear comes in; it is also known by the name of the alligator pear, or subaltern's butter, from its inside resembling very yellow fresh butter both in consistence and colour.

In August, the only new fruit is the yellow hog plum; the other fruits in season are the mamme sapoetas and avocado pears. September produces sugar and custard apples, sea-side grapes, and Portuguese yams. The fruit and vegetables of October are nearly the same as September; and the only difference in November is the bread-fruit being ripe again. December brings in guavas, and that most excellent production, sorrel. This plant has a succulent stalk, and grows from three to four feet high. There is a blossom, not unlike the common English columbine; there are two varieties, white and red; the blossoms, when slightly fermented, produce a delightful beverage, or stewed with sugar, make tarts or jam. All the orange and lemon tribe, shaddocks, and forbidden fruit, plantains, and bananas, may be had every month in the year but they abound most from April to September. Mountain cabbage is always in season, and is a most delicious vegetable.

Previous to 1783 the whole produce of Trinidad was a very small quantity of cocoa, vanilla, indigo, arnotto, cotton and maize, not more than sufficient to employ a small schooner two or three times a year for its conveyance to St. Eustatia. In 1787 the first sugar plantation was formed, and in 1802 the cultivation and produce of some of the principal articles was as follows:- 92 sugar plantations yielding 15461 hogsheads (the hogshead in 1802 weighed 1200 lbs.; it has since been made to contain 1400 to 1500 lbs.) 128 coffee ditto, 358660 lbs 57 cocoa ditto, 97000 lbs.; 101 cotton ditto, 263000 lbs. employing shipping annually to the amount of 15000 tons. In 1807 here were exported to England, British America, and to the United States, 18235 hogsheads of sugar, or 21234600 lbs.; 460000 gallons of rum; and 100000 gallens of syrup; there were made besides in the same year 500000 lbs. of coffee; 355000 lbs. of cocoa, and 800000 lbs. of cotton.

Produce of Trinidad from 1799 to 1837.

The annals of no country present such an extraordinary increase of cultivation, and consequent production of wealth.

The resources of the island are in fact very great; the mountainou portion which cannot be cultivated forms less than one thirtieth of the surface by a measurement in 1799 it was found that there may be formed on the territory 1313 sugar, 945 coffee, 304 cocoa, and 158 cotton—plantations of 100 squares, or 320 acres each.

One four horse power steam engine at Beos Bay, East coast, for turning stone rollers o bruise the pulp of the cocoa nut, and hydra lic press, to extract the oil, 8000 gallons of oil made in 835, value 1560l. A small ile manufactory on the Coroni river 25000 tiles, value 87 Ditto at Barancon 0000 tiles, value 243l. There are nine boats employed in the whale fishery; 30 whales were caught this year, value 1170l.

Situation and extent of the crown lands, in acrcs, in Trinidad in 1827:—Arima, 11439; Carenage and Cuesse, 6221; Caroni, 30858; Cudros, 2135; Chaguanas, 8010; Coura, Savanetta, &c. 22269; Diego Martin, 2427; Erin, 1491; Guanapo, 52317; Hicacos, 3017; Irios, 6474; Labrea and Guapo, 6474; Las Ceuvas, 4502; Maraval, 4021; Maraccas Valley, 1328; Mayaro, 7685; Oropuche, 3175; Point a Pierre, 4527; South Naparima, 5902; Santa Cruz, 406; Savanns Grande, 733; Jacarique and Arauca, 9763; Joco and Cumana, 2765; Valley of Caura, 2955: land in the interior undefined in its boundaries, 881658. Total of crown lands in Trinidad, 1080500 acres.

In 1831 there were in the island 12 water, 8 wind, 209 cattle, and 83 coffee mills; 40 steam engines. 1276 mounted boilers. 134 stills of 35980 gallons. 920 carts and 243 boats. The number of quarrees of land in cultivation in the island were—In Canes, 8921; cocoa, 2972; cocoa trees, 2,464,426; in coffee, 349; cotton, 68; negro grounds, 3151; estates' provisions, 1689; pasture, 3462; total in cultivation, 20,612; not in cultivation, 35,718; Total held by proprietors, 56,330. The crop in 1831 was:—sugar, 39,240,960 lbs.; cocoa, 1,479,568; coffee, 99,373;

2139; bulls and oxen, 2128; sheep, 720; goats, 742 Estimated value of property annually created, and moveable and immoveable, in Trinidad. Property annually created:—Sugar, 357,143 cwts. at 20s. 357,143l; rum, 400,000 gallons at 1s. 6d 30,000l; molasses, 1,000,000 gallons at 10d. 41,666l; cocoa, 1,500,000 lbs. at 6d. 37,500l; coffee, 1,000,000 at 7d. 29,166l; cotton, 25,000 lbs. at 6d. 625l; vezetable food, &c. at 3l. per annum each, 126,000l; animal food and fish, at 51. per annum each, 210,0001; manufacturers, income and sundries, 500,000l. Property moveable and immoveable: -Land, cultivated, 400,000 acres at 10l. 4,000,000l; uncultivated and ungranted, 1.000.000 acres at 5s. 250,000l; public property, roads, buildings, wharfs, cannon, timber, &c. 1,000,0001; private property, dwelling houses, stores, furniture, clothes, &c. 1,800,0001; roads, wharfs, machinery, boats, &c. 500,000l; horses, cattle, mules, goats, &c. 100,000l; Bullion or coin in circulation, 60,000l; total proporty annually created, 1,332,100l; total property moveable and immoveable, 7,710,000l.

CHAPTER III.—TOBAGO.

Section I.—Tobago is situate in 11. 16 N. lat. 60. 30 W. long, the western end distant but six miles from Trinidad, and the eastern 24 leagues from Granada; it is the most southerly of the Caribee islands; in length it is about 32 miles, in an E.N.E. direction; and in its greatest breadth 12 miles, embracing a mountainous area of 44 square miles.

II. Tobago, or Tobacco, was discovered by Columbus in 1496, and thus named after the pipe used by the islanders in smoking the herb now so extensively used in the Old World, and then termed Kohiba .-When first visited it was found to be peopled by a race since well known under the denomination of Caribs, who were continually at war with another nation called Arrawaaks, residing on the main land. The Tobagians sometime after left the island and retired from the pursuit of the Arrawaaks to St. Vincent; where, it is said, they lived in peace with the Indians inhabiting that isle. In 1580, the British flag was planted on the island; in 1608, James the First claimed its sovereignty; no effectual colonization however then took place. A small British Colony is said to have settled on the island from Barbadoes, in 1625; but it was subsequently abandoned. A description of Tobago is said to have suggested the scenery of Crusoe's Island to De Foe. The isle was granted to the Earl of Pembroke in 1628, by Charles the First. Some Dutch navigators visited Tobago on their return voyage from the Brazils, and, struck with its advantageous situation for trade with the continent. as also with the beauty of its climate and the richness of its soil, a company of Flushing traders formed an establishment on the almost deserted isle in 1632, founding the colony with 200 persons, and naming it New Walcheren in honour of their native home; but, in 1634, before the Hollanders had time to fortify themselves, the jealousy of the Spaniards of Trinidad

was roused, and, aided by some native Indians, the Dutch were attacked, and those that escaped the onslaught were conducted as prisoners to Trinidad, the rising walls of the fortress of New Walcheren razed, the cannon and stores carried off, and the plantations utterly destroyed. Eor nearly 20 succeeding years, the island remained untenanted, but occasionally frequented by seamen from Martinique and Guadaloupe to fish for turtle, or by the Indians of St. Vincent and the other Antilles, who touched there on their frequent expeditions against the Arrawaaks of the Orinoco. Some say that the Courlanders arrived on the N. coast of Tobago, in 1648.

In 1654, some merchants at Flushing, named the Lampsins, obtained a charter from the government of the United Provinces, authorising the occupation of Tobago, for their sole use, with the privilege of appointing a Governor and Magistrates, but giving a veto to the Dutch government at home, on the nomination of the former. The spirit of commerce was then at its height in Holland, and Tobago, and New Walcheren, soon became not merely an agricultural colony, but one of the most thriving commercial emporiums in the West Indies. Shortly after the Dutch occupation, a vessel arrived at Tobago with colonists from Courland, James the First of England having previously granted Tobago to his godson the Duke of Courland. Nearly 100 families were thus landed on one of the most beautiful parts of the island termed Courland Bay; in a few days the contending colonists came to blows, but the belligerents at length agreed to leave each other quiet until their respective governments at home should decide to whom the island belonged. The Courlanders were neglected, partly owing to the Duke being imprisoned and deprived of his territories by the King of Sweden, while the Lampsins strongly re-inforced their friends; the result was that, in 1659, the latter forced the Courlanders to relinquish Fort James, which they had built in Courland Bay. The efforts of the Duke of Courland to recover Tobago, on the restitution of his states, were ineffectual, notwithstanding the manifesto of Charles II. in his favour, 17th November, 1664, when declaring war against Holland;—the Lampsins therefore remained in peaceable possession for some years. No mention was made of Tobago at the treaty of Breda; and during the interval of the first and second war between England and Holland, the Governor, Hubert de Beveren, and the colonists, amounting to 1200, placed Forts James and Lampsinberg in a good state of defence, while the commerce and cultivation of the island rapidly increased.

Nevertheless Tobago was shortly afterwards plundered, and sacked by Sir Tobias Bridges, at the head of the Barbadian privateers, and subsequently the Dutch having declared war against the French, the Duke D'Estrées attacked and defeated Admiral Binkes, in Scarborough Bay, and pillaged the island. Four months after D'Estrees again appeared off Fort Lampsins, landed his infantry, and attacked Binkes in the fortress, who, after a gallant defence was, together with a great part of his little garrison, blown up by the explosion of a powder-magazine, and on the 24th Dec. 1677, the Hollanders were compelled to abandon a colony which they had commenced under such favourable auspices, in 1654. In 1678, the Duke of Courland renewed his pretensions, and for many years strenuous, but unavailing efforts were made to induce colonists to settle in the island. In 1737, the house of Kettler, sovereigns of Courland, being extinct by the death of Ferdinand, son of James, England claimed the reversion of Tobago. In 1748, by the treaty of Aix-la-Chapelle, it was stipulated that St. Lucia should belong to France, and that Tobago, Grenada, St. Vincent, and Dominica should be considered as neutral islands, that the subjects of all European powers should have the right to establish themselves, and carry on commerce in and with those islands, but that none of the contracting parties should place garrisons in them. Whether Tobago was then inhabited or not, it is hard to say. The chroniclers of the island assert, that, in 1757 the ship Stirling Castle, touched at Tobago; and on Mr. Thompson, a midshipman, landing, he found an old French hermit on the island. who had been living alone on it for 21 years.

At the peace of 1763, Louis the XV. ceded Tobago in perpetuity to England, and on the 20th of May, 1765, a commission was appointed for granting lands on the island. The prosperity of the island dates from this period, large capitals were invested by enterprising British colonists, and agriculture and commcrce rapidly progressed; but the miseries of war had not yet terminated; during our contest with North America, in 1781, Tobago was captured by the Marquis de Bouille, and ceded to France by the treaty of Versailles, in 1783. While Tobago remained in the possession of France, a few French settlers established themselves in the island, and on the breaking out of hostilities between England and France, General Cuyler, in March, 1793, at the head of 2,000 men, took possession of the island for great Britain, in whose possession it has ever since remained.

III. Tobago has been termed the "Melancholy Isle," because when viewed from the N. it seems to be only a mass of lofty, gloomy, mountains, with black precipices, descending abruptly to the sea; on nearer approach the island exhibits a very irregular aspect; it is principally composed of conical hills of

basaltic formation, and of ridges which descend from the interior, (where they rise in a distinct manner from a common base or dorsal ridge 1,800 feet high, and running 20 miles out of the 32 that the island is long,) toward the sea, terminating sometimes in abrupt precipices; the ravines are deep and narrow, and end generally in small alluvial plains. The N. W. part is the least mountainous, terminating in the N. in abrupt precipices, with the dark island of Little Tobago, and the dangerous rocks called St. Giles's. The S. terminates in broken plains and low lands, the whole aspect, like Trinidad, being calm and magnificent, with occasional beautiful mounds of isolated hills, so close that few levels for marsh or swamps present themselves, the delightful vales everywhere exhibiting the effects of a rotatory and undulating motion of vast currents of water, and forming with the contiguous mountains truly picturesque scenery. The island is well watered by rivulets and streams arising in the interior, and passing over the low lands to the coast, where they are occasionally obstructed, which however a little attention would prevent.

Scarborough, the principal town, is situate on the S. W. side of Tobago along the sea shore, (at the base of Fort George Hill), and extends, with little uniformity, easterly towards the Fort, the distance from the latter place being upwards of half a mile. the S. and S. W. the descent to the sea is gradual, and at the base of the hill approaching the town are several scattered country houses. Fort George Hill, (the road to which is steep and towards the W.) rises to the height of 422 feet, of a conical shape, and crowned by "Fort King George," the chief military station in the island. On the windward side are numerous excellent bays, and on the northward is situate "Man-of-War Bay," capacious, safe, and adapted to the largest ships. At Courland Bay (on the N. side, six miles from Fort King George), which approaches the leeward extremity, the hills, covered with rich forests, are bolder and more abrupt than on the S. side, and consequently, the cultivation more scattered: the "Richmond," a large river, passes through the district. Extending from Courland to Sandy Point, on the S. side, are several estates on the low lands in good cultivation, owing to the number of rivulets watering the shore. Sandy Point district (or as it may be termed Garden), forms the western extremity of the island, and is the only level land of any extent in Tobago. The eastern district is chiefly composed of high mountains, clothed with noble trees, and but thinly cultivated.

Man of War, Courland, Sandy Point and King Bays, are adapted to the largest sized ships; Tyrrells, Bloody, Mangrove, Englishman's, and Castara's Bays, have good anchorage for vessels up to 150 tons bur then; Halifax Bay admits vessels of 250 tons—but a shoal at the entrance requires a pilot.

IV. On a complete view of the island, as compared with the adjacent continent, the observer is impressed with the belief that it formed, at some distant day, a bold promontory of main land, from which it has been violently dissevered. There is, in fact a general physiognomical resemblance between Tobago and Trinidad, except that there are not seen those large blocks of hyaline quartz in the former that are found almost everywhere in the latter, on the summits of mountains as well as on the plains; the rounded pebbles found in the beds of rivers are generally of quartz or freestone, some of hyaline quartz, others of amphiobolic schistus, &c. Neither sulphur nor corbonate of lime have been seen. The hill above Scarborough appeara to be a bed of basalt and schistose rock, with a loose

and heavy super-stratum. The soil is a rich dark mould, and resembles (particularly in the E. part) that of its neighbouring isle, with the advantage of the vegetative earth being deeper on the hills of Tobago.

V. Though moist, by being impregnated with saline particles, Tobago is not unhealthy, particularly if proper attention were paid to preventing the exits of the mountain streams. The rainy season begins in June, and gradually becomes heavy until September, the violence of the rains then abate, showers continuing, at intervals, to the end of December or beginning of January, when the season termed "croptime" begins. The island is out of the usual range of hurricanes-the winds are S.E. and S. during the greater part of the year; in December and January they prevail from the N.—often very strong and cold. So decidedly salubrious are the high lands of the interior, that Dr. Lloyd the principal medical officer, reported to Sir James M'Gregor, in 1827, "that on some of the estates in the interior, no European resident had been buried for upwards of ten years."

The currents round the island are very uncertain, especially in the Trinidad channel. At new and full moon the rise of the tide is four feet. The N.E.

trade blows all the year about the island. The island being seen towards evening, the mariner cautious of approaching, should stand under easy sail to the southward, as the current sets to the N. W.; coming from the E. steer for the S. coast, and keep well to the southward to stem the N.W. current, which always sets round the lesser Tobago. On entering any of the bays to leeward, ships may approach quite close to St. Giles's rock. There is nothing to fear at the S.W. Bay of Courland but rocks above water, except the Chesterfield rock. Tobago is free from hurricanes, though Grenada, the most southward of the Antilles, and only 30 leagues from the continent, is as much under the influence of squalls as the other Antilles.

VI. In 1727, Tobago had it is said a population of 2,300 whites, and 10,000 negroes; in 1776, 2,397 whites, 1,050 free negroes, and 10,752 slaves; in 1787, whites, 1,397, free-coloured, 1050, slaves, 10539, and the import of slaves, in a medium of four years, 1,400; in 1805, whites 900, coloured people 700, slaves, 14,883; in 1830, the whites were estimated at 450, the free coloured, males 477, females 686, slaves 12,556. The following Table shows the numbers, increase and decrease, of the slave population from 1819 to 1832.

The Slave Population, according to a Parliamentary Return, was in numbers, from 1819 to 1832, as follows:—

	No. of	Slaves Reg	gistered.	Incres Bir			se by th.		ease by
Years.	Males.	Females.	Total.	Males.	Females.	Males.	Females.	Males.	Females.
1819	7633	7837	15470

1832	5603	6488	12091	145	161	298	253	13	21

The large proportion of deaths to births throughout the whole or the period is very remarkable.

In 1833,—whites, males, 248; females, 56. Free blacks, males, 506; females, 760. Slaves, males, 5371; females, 6257. Total, males, 6125; females, 7073. Baptisms, 868; marriages, 8; burials, 27. In 1834, the return was, whites, males, 250; females, 30. Free black, males and females, 3000. Apprenticed labourers, males, 5373; females, 6348.

Births, Marriages, and Deaths. — [B. B. 1836]. Established Churches—Blacks, Births 612; Marriages, 49; Deaths, 27. Coloured, Births 39; Marriages 4; Deaths 13. Whites, Births 13; Marriages 3; Deaths 57. Moravian—Births 29; Marriages 9; Deaths 25. Wesleyans—Births 22; Marriages 0; Death 10. Total, Birth 715; Marriages 65; Deaths 132.

A statement of the Number of Slaves for whom Compensation has been claimed, and of the Number of Claims preferred for such compensation, and of the Amount of Compensations awarded in each of the classes of Prædial-attached, Prædial-unattached, and Non-Prædial. [Parliamentary Return to the House of Lords, March, 1838.]

VII. Churches, Livings, &c. of Tobage in 1836.—2 Churches, 1 at Scarborough, in the parish of St. John, having a congregation generally of 300 persons.—1 at St. Paul; valued £400 per annum; having accommodation for about 500 persons.—There are also 2 chapels; 1 at Plymouth, which will contain about 400 persons; of whom 300 generally attend: 1 at Goldsbro; which will contain about 300 persons, 200 generally attend. There are likewise 5 dissenting places of worship. Note.—The congregation varies much at Scarborough, and still more in the country, according to the state of the road and the weather, and the number of children to be baptized; at Scarborough, in absence of the rector, divine service is performed only twice in the month; at Plymouth once, at Goldsborough once; in fine weather the chapel at Plymouth is insufficient for the congregation. [B.B.]

There are besides the above, four private schools, one connected with the Moravians in Sandypoint; one with the Wesleyans in Scarboro'; another with the Wesleyans at Mr. St. George's, and a school at Mr. Pelier's estate, open to all, supported at the expence of the estate.

At Plymouth and Goldsbro', and Sandy Point, the scholars are generally apprenticed labourers on Sundays, and the children of apprenticed labourers on week days, about 15 apprenticed, belonging to Golden Grove Estate attend the school there in the evening; evening school is not yet kept at Plymouth and Goldsbro', for want of lamps; the number at Plymouth varies from 20 to 120 on Sundays. The estates in the neighbourhood have contributed £40 to the enlargement of Plymouth school. [B. B. for 1836.]

X. Tobago is ruled by a Lieut.-Governor, and by a Council of 9, and House of Assembly of 16 members, whose powers and authority are similar to those of

Jamaica. &c.

Militia of Tobago in 1836.—Staff.—1 Colonel; 1 Lt. Colonel; 2 Majors; 1 Adjutant; 1 Quarter Master; 3 Surgeons. Troop of Cavalry.-1 Captain; 1 Lieut. 1 Quarter Master; 2 Sergeants; 14 Rank and File. Artillery.—1 Captain; 2 Lieutenants; 1 Surgeon; 2 Serjeants; 34 Rank and File. St. Andrews Company.-1 Captain; 1 Lieutenant; 1 Ensign; 2 Serjeants; 2 Drummers and Fifers; 27 Rank and File. St. George's Company.-1 Captain; 1 Lieutenant; 1 Sericant: 20 Rank and file. 1st Scarborough Company.-1 Captain; 1 Lieutenant; 1 Ensign; 2 Serjeants; 2 Drummers and Fifers; 44 Rank and File. 2d. ditto ditto-1 Captain; 1 Lieutenant; 1 Ensign; 2 Serjeants; 2 Drummers and Fifers; 40 Rank and File. 3rd. ditto ditto.-1 Captain; 1 Lieutenant; 1 Ensign; 1 Serjeant; 2 Drummers and Fifers; 35 Rank and File. St. David's Company. - 1 Captain; 1 Lieutenant; 1 Serjeant; 26 Rank and File. St. Patrick ditto. 1 Captain; 1 Lieutenant; 1 Serjeant; 26 Rank and File. St. Mary's ditto.-1 Captain; 1 Lieutenant; 1 Serjeant; 1 Drummer and Fifer; 13 Rank and File. St. Paul's ditto.- 1 Captain; 1 Lieutenant; 1 Serjeant: 17 Rank and File. St. John's ditto .l Captain; 1 Lieutenant; 1 Serjeant; 1 Drummer and Fifer; 15 Rank and File. Total, 1 Colonel 1 Lieutenant-Colonel; 12 Captains; 13 Lieutenants; 4 Ensigns; 1 Adjutant; 2 Quarter-Masters 4 Surgeons; 17 Serjeants; 10 Drummers and Fifers; 311 Rank and File. Note.—There are now no military posts or works in the control or charge of the militia of the island, and consequently no expense incurred. The batteries, houses, guns and carriages have gone to decay, from the inability of the colony to defray the expense of keeping them in repair.

XI. Revenue of Tobago, 1828, 57101; 1829, 86851; 1830, 8632l; 1831, 7360l; 1832, 6911l; 1833, 5320l; 1834, 4242l; 1835, 1506l; 1836, Poll Tax 7771l; House Tax 5281; Tonnage Duties 11191; Merchant's Tax 3241; Tippling Act 1001; Police Bill 211; Militia Fines 62l; Court of King's Bench 3l; Porter's Act 4l; Transient Trader's Tax 4ll; Miscellaneous 1734l; Total 11708l.

Expenditure of Tobago, 1828, 56411; 1829, 99971; 1830, 8419l; 1831, 8024l; 1832, 7764l; 1833, 4696l; 1834, 4580l; 1835, 5281l; 1836, Salaries of Public Officers 13501; Civil Services 32341; Judicial Establishment 3211; Total 49051. [B. B.]

Recapitulation of the Establishment, 1836.—Civil Establishment, salaries, sterling money, 5150l., paid by Great Britain. Judicial Establishment 3211., paid by the Colony. Ecclesiastical Establishment 5501., ditto. Miscellaneous Expenditure 7570l., ditto. Pensions 211., ditto. Total 92811., paid by the Colony, and 5150i. paid by Great Britain.

1836	7397	1816	3906
1837		1	

This return of produce is derived from the Exports as the Colonists refused to make any return to the Colonial Office. There are 72 sugar estates worked by steam, water, and wind mills.

Prices of Produce and Merchandize during 1836, ent parts of the islan in Tobago.—Horned Cattle 13l. each; Horses, 30l.; of excellent quality.

Sheep, 1l. 4s.; Goats, 1l.; Swine, 1l. 5s.; Milk, 8d. per quart; Fresh Butter, 4s. per pound; Salt Butter, 2s. 6d.; Cheese, 1s. do.; Wheat Bread, 4d. do.; Beef, 9d. do.; Mutton, 1s. do.; Pork, 8d. do.; Rice, 1l. 12s. per cett.; Coffee, 1s. per pound; Tea, 7s. do.; Sugar, 1l. 5s. per cwt; Salt, 6s. per bushel; Wine, 50l. per pipe; Brandy, 8s. per gallon; Beer, 6l. per hdd.; Tobacco, 2l. 8s. per cwt.

Wages for Labour.—Domestics, 1l. 12s. per month; Prædial, 1s. 4d. per day; Trades, 4s. per day. [B. B.] There is no paper currency, and but little coin in the

island.

Almost every kind of plant that grows on the Antilles, or on Trinidad, flourishes at Tobago. The orange, lemon, and guava, pomegranate, fig, and grape are in perfection; the two latter yield fruit twice a year, (if pruned three weeks after the fruit has been gathered) and all the culinary plants of Europe arrive at perfection. The cinnamon and pimento (some say also the nutmeg) trees grow wild in different parts of the island—and the cotton of Tobago is of excellent quality.

CHAPTER IV.-GRENADA.

Section I. Grenada, the most southerly of the Antilles, is situated between the parallels of 12.20 and 11.58 N. Latitude, and 61.20 and 61.35 W. Long., rearly equi-distant from Tobago (60 miles) and the nearest point of the continent of South America; its greatest length, N. and S. about 25 miles, (and at either extremity norrowing to a point)—in its greatest breadth 12, in circumference 50 miles, and containing about 80.000 acres.

were destroyed may be judged of by a circumstance which Father Du Tertre relates of one expedition. Forty of the Charaibes were massacred on the spot towards a precipice, from whence they cast themselves beautiful girl, of twelve or thirteen years of age, who was taken alive, became the object of dispute between two of our officers, each of them claiming her as his

11. Christopher Columbus, during his third voyage in 1498, discovered Grenada, and found it fully occupied by a warlike race, (the Charibs) among whom the Spaniards never attempted to form a settlement, and who remained for a century after in peaceable possession of their native home. In 1650 the French Governor of Martinique, Du Parquet, collected 200 hardy adventurers, for the purpose of seizing on the island, which from the manly character of the natives, was considered an enterprize of difficulty and danger.

The natives received and entertained the French with the utmost kindness and cordiality, who pretended to open a treaty with the chiefs of the Charibs for the purchase of the country; "some knives and hatchets, and a large quantity of glass beads, besides two bottles of brandy for the chief himself were given to the Charibs; and it was then asserted that the island was fairly ceded to the French nation, by the natives themselves, in lawful purchase!

Du Parquet thus established a colony in Grenada, built a fort for its protection, and left the government of the island to a kinsman, named Le Compte. Within eight months after this period we find a war of extermination carried on by the French against the Charibs. Du Parquet, sent a reinforcement of 300 men from Martinique, with orders to extirpate the natives altogether; but Le Compte seems not to have wanted any incitement to acts of barbarity; for Du Tertre admits that he had already proceeded to murder, without mercy, every Charib that fell into his hands—not sparing even the women and children.

The manner in which the unfortunate aborigines

were destroyed may be judged of by a circumstance which Father Du Tertre relates of one expedition. Forty of the Charaibes were massacred on the spot. About forty others, who had escaped the sword, ran headlong into the sea, and miserably perished. beautiful girl, of twelve or thirteen years of age, who was taken alive, became the object of dispute between two of our officers, each of them claiming her as his prize; a third coming up put an end to the contest, by shooting the girl through the head. The place from which these barbarians threw themselves into the sea, has been called ever since le Morne de Sauteurs, (Leapers' Hill.) Our people, having lost but one man in the expedition, proceeded in the next place to set fire to the cottages, and root up the provisions of the savages-and having destroyed or taken away every thing belonging to them, returned in high spirits. No wonder that the whole native population was soon extirpated. Du Parquet sold the island to Count Cerillac for 30,000 crowns.

It may well be imagined that cultivation made but little progress. So late as 1700 the island contained no more than 251 whites and 525 blacks, who were employed on three plantations of sugar and fifty-two of indigo.

After the peace of Utrecht, the government of France began to turn its attention towards her West India possessions. Grenada, however, for many years, partook less of its care than the rest. By a smuggling intercourse with the Dutch, the Grenadians changed their circumstances for the better—increased their numbers—and a great part of the country was settled. In 1762 Grenada and the Grenadines are said to have yielded annually, in clayed and muscovado sugar, a quantity equal to about 11,000 hogsheads of muscovado of fifteen cwt. each, and about 27,000 pounds of indigo.

Grenada surrendered on capitulation in February, 1762, and, with its dependencies, was finally ceded to Great Britain, by the definitive treaty of Paris, on the 10th of February, 1763—St. Lucia being restored at

the same time to France. The chief stipulations in favour of the inhabitants, as well by the treaty as by the articles of capitulation, were these:—First, That as they would become, by their surrender, subjects of Great Britain, they should enjoy their properties and privileges, and pay taxes, in like manner as the rest of His Majesty's subjects of the other British Leeward Islands. Secondly, With respect to religion, they were put on the same footing as the inhabitants of Canada—viz. liberty was given them to exercise it according to the rites of the Romish Church, as far as the laws of Great Britain permitted. Thirdly, Such of the inhabitants of Grenada as chose to quit the island, should have liberty to do so, and eighteen months allowed them to dispose of their effects.

A Legislative assembly was granted by England, and the Grenadians resisted the imposition of the 4½ per cent. duties. The Crown, however, persisting in its claim, and the inhabitants in opposing it, issue was joined before the judges of the Court of King's Bench in England. The case was elaborately argued in Westminster-hall four several times; and in Michaelmas Term, 1774, Lord Chief Justice Mansfield pronounced judgment against the Crown. The consequence was, that the duty in question was abolished not only in Grenada but also in Dominica, St. Vincent and Tobago.

On the 2nd. of July, 1797, a French armament, consisting of a fleet of twenty-five ships of the line, ten frigates and 5000 troops, under the command of the Count D'Estaing, appeared off the harbour and town of St George: the whole force of the island was composed of 90 men of the 48th regiment, 300 militia of the island, and 150 seamen from the merchant ships; and its fortifications consisted chiefly of an entrenchment, which had been hastily thrown up round the summit of the Hospital-hill. trenchment the Count D'Estaing invested the next day, at the head of 3000 of his best forces, which he led up in three columns, and, after a desperate conflict and the loss of 300 men carried the lines. Never did so small a body of men make a nobler defence against such inequality of numbers. The governor (Lord Macartney) and the remains of his little garrison immediately retired into the old fort at the mouth of the harbour, which, however, was wholly untenable, being commanded by the Hospital-hill battery, the guns of which, having been most unfortunately left unspiked, were now turned against them. At day break the French opened a battery of two twenty-four pounders against the walls of the old fort. In this situation, the governor and the inhabitants had no alternative but an unconditional surrender; and the Count d'Estaing became master of the island.

Grenada and the Grenadines were restored to Great Britain, with all the other captured islands in the West Indies, (Tobago excepted) by the general pacification which took place in 1783. In 1795 an insurrection, fermented it was said by the French Revolutionists, broke out March 1795, which was not finally terminated until July 1796. During the continuance of the disturbance the greatest distress prevailed, and the most horrid murders were perpetrated by the infatuated rebels; wherever they appeared devastation followed them; and from the direful effects of their cruelty and rapine Grenada has never recovered the flourishing state which it had previously enjoyed.

List of Governors, Lieut.-Governors, &c. who have held the Government of Grenada, since the cession of the Colony to Great Britain, in the year 1763:—Brig.-

Gen. Robert Melville, Capt.-Gen. Commander-in-Chief in and over the southern Charibbee Islands of Grenada, Dominica, St. Vincent, and Tobago, 1764; Ulysses Fitzmaurice, Sen. Lieut.-Governor of St. Vincent, 1768; Brig.-Gen. R. Melville, again, 1770; F. Corsar, Esq. President, 1771; U. Fitzmaurice, Lieut.-Gov. of St. Vincent, again, 1771; Brig.-Gen. W. Leybourne, Gov. S. C. Islands, 1771; F. Corsar, Esq. President again, 1775; W. Young, Lieut.-Gov. Tobago, 1775; Sir G. (afterwards Lord) Macartney, K. B. Gov. 1776; Lieut.-Gen. E. Matthew, Gov. 1784; W. Lucas, Fsq. Pres. 1785; S. Williams, Esq. Pres. 1787; J. Campbell, Esq. Pres. 1788; S. Williams, Esq. again Pres. 1789 to 1793; N. Home, Esq. Lieut.-Gov. 1793; K. M'Kenzie, Esq. Pres. 1795; S. Williams, Esq. again Pres. 1795; A. Houston, Esq. Lieu.-Gov. 1796; Col. C. Green, Gov. 1797; S. Mitchell, Esq. Pres. 1798; Rev. S. Dent, Pres. 1801; G. V. Hobart, Esq. Lieut.-Gov. 1802; Rev. S. Dent, again Pres. 1802; Maj.-Gen. W. D. M'Lean Clephane, Lt.-Gov. 1803; Rev. S. Dent, again Pres. 1803; A. C. Adye, Esq. Pres. 1804; Brig.-Gen. F. Maitland, Gov. 1805; J. Harvey, Esq. Pres. 1807; A. C. Adye, Esq. again Pres. 1808 to 1809; Major-Gen. F. Maitland, Gov. 1810; A. C. Adye, Esq. again Pres. 1810 to 1811; Col. G. R. Ainslie, Vice-Gov. 1812; J. Harvey, Esq. Pres. 1813; Maj.-Gen. Sir C. Shipley, Gov. 1813 to 1815; G. Paterson, Esq. Pres. 1815; Maj. Gen. Phineas Riall, Gov. 1816; A. Houstoun, Esq. Pres. 1817 to 1819; Maj.-Gen. P. Riall, (resumed) Gov. 1821; G. Paterson, Esq. Pres. 1821 to 1823; Sir J. Campbell, K.C.B. Gov. 1826 to 1831; A. Houstoun, Esq. Pres. 1829; F. Palmer, Esq. Pres. 1831.

III. The general aspect of Grenada is extremely lovely, but mountainous and picturesque; the interior and N.W. coast consist of successive piles of conical hills or continuous ridges, rounded in their outline, and covered with vast forest trees and brushwood; from N. to S. the island is traversed by one continued though irregular range, rising in some places to a very considerable elevation, often to 3,000 feet above the level of the sea, but everywhere accessible. From this chain, but particularly from one very remarkable and magnificent spot in the centre of the island, N. E. of St. George's called the Grand Etang, numerous small rivers and streamlets have their source irrigating the country in every direction. One of the most prominent features in this wild romantic district is Mount St. Catherine (Morne Michel) which, clothed with a splendid vegetation, towers to an altitude of 3,200 feet above the ocean level. Several mountain ridges extend from the great chain towards the windward or S. E. side, forming rich and picturesque vallies, but nearly the whole of the windward coast from the S. termination of the range of mountains at Point Callevigny, about five miles from St. George, till it reaches the leeward boundary, loses the rugged and precipitous features and deep bold shore (as seen on the leeward side), and consists of a level alluvial plain with numerous coral reefs.

The rivers, as before observed, are numerous, but not large; the principal are those of Great Bucolet, Duguisne, and Antoine on the windward, and St. John's and Beau Sejour, on the leeward. Several hot chalybeate and sulphurous springs exist, the former being the most numerous; one of these, at Annandale in St. George's parish, is very remarkable for its heat and strong metallic impregnation; the mercury rises to 86, and since the earthquake of 1825, both the temperature and impregnation have been very sensibly increased. A hot spring in St. Andrew's

gas, possessing analogous qualities to the famous grotto del cane: it contains iron and lime, and possesses a strong petrifactive quality. Some of the warm sulphurous springs in the hilly parishes of St. Mark and St. John's are hot enough to boil an egg. Near the centre of the island, at an elevation of 1,740 feet, amidst the mountain scenery, is situate the Grand Etang, an almost perfectly circular fresh water lake, two mile and a half in circumference, and fourteen feet deep, with a bottom composed of a superstratum of soft mud, arising from decayed vegetable substances, (especially Loti, which grow in great profusion around the margin, over a light cold argillaceous bed). Around this singular lake is a superb sylvan amphitheatre of mountains, clothed in all the verdant grandeur of a tropical forest. Another lake (Antoine) of nearly similar size, (covering sixty English acres), and form, is situated on the E. coast only half a mile from the sea, and but 43 feet above its level. It is about 50 feet in depth, having no communication with the sea, constantly increasing towards the centre, in the shape of an inverted hollow cone, and increasing in size for the last sixty years: from these circumstances, and the formation of rocks, and the quantity of scorize found near its brink, there is every reason to suppose it the crater of an exhausted volcano. The inhabitants state that there are subterraneous communications between this lake and different parts of the island, and that during the great eruption of the Souffriere in St. Vincent, in 1812, the waters of Lake Antoine were not only in continual agitation and undulation, but that considerable quantities of lava and sulphur were thrown upon the surface of the water from beneath. On the S. shore, near Point Saline, there are extensive salt ponds.

This island is divided into six parishes or districts, Sts. Patrick, Andrew, John, Mark, David and George. The three first named are the least mountainous, and the most productive in sugar, cocoa and coffee. St. John and Mark are mountainous; and the two latter named rather less so. St. George contains the capital of that name, and the fortifications and military posts of Richmond Hill, Fort King George, Hospital Hill. and Cardigan Heights; it is also the chief seaport, the residence of the Governor, and the station of the Courts of Judicature, &c. The district is situate on the S. and W. part of the island embracing 26 square miles, and extending along the King's high-road 11 miles and 28 chains from the river Douce to the river Chemin. It has 28 sugar estates, 20 coffee settlements and eight coffee plantations. The population of the capital and parish is about 10,000. St. David's lies towards the S. E., and forms several points and some bays capable of receiving small craft; it extends from the river Chemin to the river Crochu nine miles and 50 chains along the King's high road, and contains 12 sugar and several provision estates. St. Andrew's, situate on the E. side, extends from the river Crochu to the river Antoine, 11 miles and 66 chains along the high-road, it comprises the town and port of Grenville, formerly called La Baye, and contains 37 sugar plantaions, and eight coffee and cocoa settlements. St. Patrick, situate on the N. E., containing 16 square miles, extends nine miles and 44 chains along the high road, from the river Antoine to the river Duguesne. In this parish is the town of St. Patrick, formerly, and now known by the name of Sauteurs; it contains 26 of the richest sugar plantations in the island.. St. Mark, the smallest and least considerable

parish emits considerable quantities of carbonic acid | in the island, is situate on the N. W. extending four miles and 43 chains along the high-road, from the river Duguesne to the river Maran, which separates it on the S. side, from the parish of St. John. St. John's, on the W. side, extends from the river Maran, to the river Douce, six miles and 36 chains; Charlotte town is situate in this parish, which is the next in magnitude and population to the town of St. George. It contains sixteen sugar estates, and eleven cocoa and coffee settlements. St. George, the capital, is situate within an amphitheatre of hills. Were it not for the military works on Richmond Hill, which are seen at a great distance, it would be difficult to ascertain from the sea where George Town and harbour are placed, but on approaching the base of the fortified hills an opening is discerned into a spacious and excellent harbour. The houses are well and tastefully built of stone or brick, with sashed windows and tiled roofs, with the streets well ventilated, and a spacious handsome square in the centre, and the shops equal to many in London. The town is divided into upper and lower, the latter or carenage, being principally occupied with stores, ship-yards and wharfs. The streets leading from the one to the other are extremely rugged and steep. Constitution Hill, leading to the market-place, is at an angle not far removed from the perpendicular. The carenage of Grenada is one of the best that can be conceived both for the convenience and securing of shipping; it is completely land-locked; there is a sufficient depth of water and good holding-ground; it is protected by the batteries on shore, and it is exempt from hurricanes. The harbour is said to be capable of containing 1,000 ships, of 350 tons each secure from storms. The military posts and works under the controul of the Ordnance Department, consist of Fort George, and its citadel, which protects the anchorage in in the Bay, defends the entrance into the harbour, and commands the Town. Hospital Hill-A position to the N. of the town, fortified by three redoubts which defend the approaches from that direction and overlook Fort St. George. Richmond Hill, a chain of forts to the E. in rear of Fort George, viz., Fort Mathew, Fort Frederick and its citadel, Fort Lucas, Fort Adolphus, and Cardigan Buff, which defend the approaches to the town from the E. and S. and also from the town to Richmond Hill.

The following public work was commenced in 1836: Water Works for supplying the Town of St. George, the water rising in the glebe land commonly called the Priest's Spring, brought in cast iron pipes to town, the shipping to be supplied at Prince's Wharf, and the inhabitants by branch cast iron pipes, street wells, and fountain at the market-square, with a reservoir at the spring heads, and a reserve cistern near the long room. The estimated expense is 4,600*l*. currency, or 1,840*l*. sterling. The amount of expenditure up to the present date is about 600l. sterling. The work is in an advanced state, the main pipe laid, the shipping receiving supply, and wells supply the inhabitants on the carenage side of the town, on 31st December 1836. [B. B. p. 51.]

The population consists of 4,000. of whom 320 are whites, and 2,000 free coloured. The dependencies of Grenada are, the island of Carriacou, and such of the small islands called Grenadines, as lay between it and Grenada. Carriacou constitutes a parish, containing, according to estimate, 6,913 acres of land; it is about 19 miles in circumference. In the town of Hillsborough is a church and rectory. The island is. in general, fertile, and well-cultivated.

Cotton was formerly the chief article of cultiva-

tion, and about 1,000,000 lbs. annually exported. Eight of the principal estates are now cultivated in sugar; and the average produce of that article in a good season, is upwards of 2,000,000 lbs. The island is, however, greatly exposed to suffer from droughts, which mars the best efforts of industry. The chief cause of this calamity is supposed to be the want of wood, which has gradually become exhausted, without proper means having been used to renew it by planting.

IV. The geology of the island, (according to Dr. Simpson in his Report to the Army Medical Board,) is very complicated and irregular: the mountains, and different parts of the low lands, so far as they have been examined, consist of strata, or rather mingled portions of red and grey sandstone, greywacke, irregular alternations of hornblende, hard argillaceous schist, and a variety of gneiss. In various spots (as at Richmond Hill) an imperfect species of granite, or nodules of the same, interbedded in a coarse loose red sandstone are frequently met with, and sometimes in argillaceous schist; a very coarse porphyry is also sometimes seen; immediately behind Richmond Hill, on the estate of Mount Parnassus, limestone is found, and a quarry was at one time worked for agricultural purposes. Basaltic rocks are met with on the N.W. coast, and it is said magnesian limestone also. At Point Salines (the extremity of the island) fuller's earth, of the very finest quality, is procurable in abundance; and at *La Fortune*, in the parish of St. Patrick, numerous specimens of the natural magnet; sulphur in its native state, but not crystallised, is almost everywhere met with. In fine, it may be said that the great mass of mountains consist of sandstone, greywacke, hornblende, and argillaceous schist, but the stratification is so diversified, and the face of the country so rugged and abrupt, as to bid defiance to any regular definition. In one place they are horizontal, in another vertical, and in almost all they are suddenly and abruptly intersected by each other-appearing as if they had been separated and again mingled together by some great convulsion of nature. One remarkable cliff on the river St. John, about one mile and a half from St. George's presents a curious arrangement, which Dr. Simpson is inclined to ascribe to volcanic origin; immediately under the soil is a stratum of pudding-stone—to that succeeds one of iron pyrites, (exhibiting regular prisms), then one of alluvial formation, and lastly one of brown sandstone; in some of the less elevated situations, the strata are extremely thin, numerous, and more regular; in one cliff near Government House, (not more than 25 feet high,) are seen running from S. E. to N. W., at a very obtuse angle with the horizon, at least 60 distinct strata of white, grey, and brown sandstone, alternating with loose sand and gravel, and near the surface mixed with alluvial soil. The bed of the sea on the S. W. point of the island is composed of phosphate of lime or a species of coralline, but its effects are not observable on the surface of the water. No shells are found in any of these formations; but the red sandstone of Grand Mal and Callerigny, in the parish of St. George (which is much used for building), is thickly studded with beautiful chrystals of carburet of iron; and in the Callevigny sandstone vegetable remains, such as the leaves and stalks of trees, are not uncommon. Neither the sandstone, nor the very imperfect species of granite found effervesce with acids. The soil varies with the external features of the country; in the low lands, consisting of rich black mould on a substratum of light-coloured clay, while in the high and central situations the soil is of a dingy red or brick colour.

V. Locality, as may be supposed, influences materially the temperature and health of Grenada; 82 F. may be considered the medium heat throughout the year in the low country; but in the high lands the mercury, which at St. George, stands at 86, will be 10 degrees lower at the Grand Etang at the same moment. The quantity of rain which falls is very considerable, and throughout the year showers are frequent: hurricanes are comparatively mild and unfrequent, but earthquakes, or shocks, are sometimes felt. The climate is much improved in common with the whole of the West Indies of late years.

Note.—The apparent decrease which occurs in the Slave Population Return of 1834, contrasted with that of 1833, is attributed to the children under six years of age, who, under the provisions of the Abolition Act, became emancipated on the 1st August, 1834.

females; St. Mark, 25 males, 10 females; St. Patrick, 205. Coloured males, 1562; females, 2,224.

The white population was, in 1829, town of St. 84 males, 3 females; St. Andrew, 94 males, 8 females; George, 177 males, 107 females; parish of St. George, St. David's, 38 males, 11 females; Carriacou Isle, 90 males, 28 females; St. John's, 38 males, 34 50 males, 4 females. Total, white males, 596; females,

The progressive decrease of the Slave Population was, from 1817 to 1831, as follows:-

					Incre	ase by E	Birth.	Decre	ase by I	Death.	Manu- n.
	Years.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Decrease by mission.

Parish of St. David .	1800 R.C. 11-12ths		900	who consist almost wholly of apprenticed labourers. The hearers

are taught to repeat the Ap. creed, the commandments, and other elementary prayers by heart, before and after the celebration of the liturgy. Then immediately follows a sermon, which is delivered both in English and French, inculcating the moral precepts of the gospel. After the sermon, one hour is devoted to catechetical teaching, in which the pastor is assisted by competent members of the congregation. Finally, the religious duties close by the performance of the baptisms and marriages.

The number of baptisms during the year was 374, the great majority of persons baptized being the children of apprentices. The number of marriages was 37, of which 27 took place amongst the apprentices. With regard to marriages, the R. C. pastor

deems it right to observe that there is no doubt it would tend much to facilitate and encourage the increase of marriages amongst the apprentices, if a law was passed empowering the clergy of the different denominations to administer the marriage rite to the members of their congregations respectively.

Even though Roman catholic priests can now perform this rite legally, still it does not secure civil rights to the parties; and Roman catholics are consequently obliged to have their marriages solemnized both by the rectors of the established church and their own pastors, which operates as no small obstacle to the general reception of this religious rite, which is one of the best promoters and supporters of all moral feeling. [B. B. for 1836.]

There are eight private schools. There are also twelve estate schools, one other private school, and a † At present there are no day schools established in Carriacou. Sunday school.

There are here two private schools. There is regularly a Sunday in the Presbytery open to all classes, and Sunday schools would be opened in every parish if there were some means.

Council and House of Assembly, whose powers are similar to those described under Jamaica, &c. The Council consists of 9 members, and the Assembly of 27. A freehold, or life estate of 50 acres in the country, and of 501. house rent in the capital, qualifies for a representative. An estate of ten acres in fee, or for life, or a rent of 101. in any of the country towns; and a rent of 201. out of any freehold, or life estate in the capital, gives a vote in the election of the representatives. The law courts, besides those of Chancery, in which the Governor presides, are the Court of Grand Session of the Peace, held twice a year, in which the person first named in the commission of the peace presides; the Court of Common Pleas, in which a professional judge, with a salary of 6001. presides; the Court of Exchequer, lately fallen into disuse; the Court of Admiralty, and the Court of Error, composed of the governor and council, for trying appeals. In all cases the common statue law of England is the rule of justice, unless when particular laws of the island interfere.

The Revenue of Grenada for 1836 as regards internal taxes and levies on property, was as follows:-Fixed taxes raised per money bill, viz. on 3750 unattached apprentices at 3s. 4d. = 625l..; 338 saddlehorses and mules at 29s, 4d, = 495l.; 18696l, rents of houses at 21 per cent,=4211. 20,369,805 lbs. sugar, valued at 162,9581.; 733,087 gallons of rum, 32,582l.; 238,183 gallons of molasses, 7939l.; 13,714 lbs. of coffee, 4571.; 215,567 lbs. of cocoa, 2,3951.; 43,84f lbs. of cotton, 731l.; total, 207,062l. at 21 per cent. 4659l. Total out of 7,017l. fixed revenue, 6,200l.

There are seven regiments of Militia, viz:—St. George's consisting of 21 Officers and 389 Non-Commissioned Officers and Privates. St. John's,

X. The people are ruled by a Lieutenant-Governor, | 14 Officers and 108 Non Com. Officers and Privates. St. Patrick, 14 Officers and 70 Non Com. Officers and Privates. St. Andrews, 15 Officers and 94 Non Com. Officers and Privates. St. David, 15 Officers and 68 Non Com. Officers and Privates. Carriacou, 11 Officers and 68 Non Com. Officers and Privates. Troop of Light Dragoons, 7 Officers and 29 Non Com. Officers and Privates; Total 97 Officers and 826 Non Com. Officers and Privates. The Militia meet for exercise once a month. They retain possession of their arms and accoutrements, and in case of attack or alarm, would at once assemble by regiments, in their different parishes, and be available in aid of the regular troops. The Island Treasurer has charge of the ammunition, which is deposited in a magazine, in the principal town. From him Commanding Officers of regiments receive their supplies half yearly, retaining always a sufficient quantity for any emergency. The arms and accoutrements are in good order. [B. B. for 1836.]

XI. Colonial taxes and duties, (payable at the Treasury, by virtue of acts of the legislature), are levied on all wines imported, (wines for the use of her Majesty's service excepted), per pipe, 31. 6s. In bottles per dozen, 2s. 3d. on all brandy and gin, per gallon, 18s.; on each and every saddle horse, or mule, 31. 6s. for every 1001. of actual rent of houses, stores, buildings, and sheds, (not used in the manufacture of produce,) or of the estimated rental thereof, when occupied by the proprietor, 31.; on each and every slave, 18s; on every 100l. value of produce, grown or manufactured in the year 1831, estimated as follows:— Muscovado sugar at 40s. per 100 lbs.; Rum, 2s. per gallon; Molasses, 1s. 6d. do.; Cotton, 6d. per lb.; Coffee, 1s. do.; Cocoa, 4d. do.; 3l. per cent.; Harbour duty on all vessels clearing, per ton, 4d.; canal duty on all vessels clearing, per ton, 2d.

XII. In 1776 the exports from the island and its dependencies were 14,012,157 lbs, of muscovado, and 9,273,607 lbs. of clayed sugar; 818,700 gallons of rum; 1,827,166 lbs. of coffee; 457,719 lbs. of cocoa; 91,943 lbs. of cotton; 27,638 lbs. of indigo; and some smaller articles, the whole of which at a moderate computation was worth at the ports of shipping, 600,000l. sterling. The sugar was the produce of one hundred and six plantations, worked by 18,293 negroes, which gives rather more than a hogshead of muscovado sugar of 16 cwt. from the labour of each negro; a return, which Mr. Edwards affirms to be unequal to any other British island in the West Indies, except St. Christopher's. In 1787 the exports were 175,548 cwts. of sugar; 670,390 gallons of rum; 8,812 cwts. of coffee; 2,062,427 lbs. of cotton, and 2,810 lbs. of indigo. In 1831 the principal articles of export were, sugar, 11,908 hgds.; rum, 6,634 pchs.; molasses, 2,464 phs.; coffee, 6,103 bags. Total value of exports, 118,7611.; of imports, 81,8351. In 1836. exports, 216,125l.; imports, 145,950l.

XIII. Each of our W. I. settlements, it will be observed, has almost a distinct currency, at least few are alike, the following is the standard table for Grenada currency, established (by proclamation) in 1798.

Coin	s.	Wei	ght.	Value in Sterling.			The second	ency.
		dts.	grs.	£.	8.	d.	dols.	bitts.
Joe .		8	12	3	12	-	8	-
Joe .		7	12	3	6	-	7	4
Pistole		4	6	1	16	-	4	-
Moidore		6	-	2	9	6	5	6
Guinea		5	-	2	9 5	-	5	-
Dollar		17	-	-	9	-	-	12
Bitt .		-	-	-	-	9	-	1

A Joe, value 31. 12s., has a G. stamped in the middle of the face side. A Joe, value 3s. 6d., has a G. stamped in three places near the edge of the face side. When a Joe is plugged, the initials of the workman's name are stamped upon the plug.

The British and Colonial currency, established by proclamation in May, 1797, consisting of British half-crown, 6s. 3d.; shilling, 2s. 6d.; sixpence, 1s. 3d.; Colonial Moneta, marked IV, 2s. 6d.; VIII, 1s. 3d.; XVI. 7\frac{1}{2}d. No paper currency. The coin in circulation estimated at 50,000l.

XIV. In 1700, more than twenty years after the sovereignty had been vested in the crown of France, there were found on the whole island only 64 horses, 569 horned cattle, three plantations of sugar, and 52 of indigo. About 14 years afterwards, however, an active commercial intercourse was opened with the island of Martinique, cultivation was rapidly extended, and notwithstanding the interruption which these improvements sustained by the war in 1744, Grenada was found in 1753 to contain 2,298 horses or mules, 2,556 horned cattle, 3,278 sheep, 902 goats, 331 hogs, 83 sugar plantations, &c.; and in 1762, when it surrendered to the British arms, it is said to have yielded annually, together with its dependencies, the Grenadines, a quantity of clay and Muscovado sugar, equal to 11,000 hogsheads, of 15 cwt. each, and 27,000 lbs. of indigo.

Produce made in Grenada and the Grenadines in 1830.

prædial, 11. 5s.; trades, 21. [B. B.]

Commencing with the year antecedent to the abolition of slavery, we have the amount of the chief staple commodity of the colony-sugar-as returned into the Treasurer's office, as follows, viz.—1833. 24,554,638 lbs. 1834. 22,577,543 lbs. 1835. 20, 249,188 lbs. 1336. 19,051,563 lbs. 1837. 18,811,371 1833 and 1837.—Grenada Free Press.

Average prices throughout the year. Horned cattle, | lbs. This diminution has been gradual, and in five years amounts to 5,743,267 lbs., equal to one-fourth nearly of the crop made in 1833. It must be admitted that the previous effects of the cane-fly have had some influence in the falling off; but it must also be borne in mind that in 1833 and 1834, the blast was at its height, and that it was gradually disappearing in 1835 and 1836; yet the reduction continues, for the crop of the latter falls off 1,197,625 lbs. The rum and molasses, made in the same years, we quote from the same source, as follows, viz. - 1833. 814,046 1834 gallons of rum, 491,058 gallons of molasses. 814,299 rum, 392,273 molasses. 1835. 749,735 rum, 226,101 molasses. 1836. 516,958 rum, 160,178 molasses. 1837. 670,761 rum, 223,968 molasses. Ex. hibiting a difference on rum of upwards of one third, and on molasses three-fourths, comparing the years

CHAPTER V.—ST. VINCENT.

SECTION 1. This most beautiful of the Caribbee! Islands, about 181 miles long, and 11 broad, containing 84,286 acres, is situate in 13. 10. 15. N. Lat.; 60. 37. 57. W. Long. nearly equidistant from Grenada and Barbadoes.

II. St. Vincent was discovered by Columbus, during his third voyage, on the 22d day of January, 1498, [St. Vincent's day in the Spanish calendar]; but it does not appear that he took any formal possession of it; the native inhabitants, the Caribs, being very numerous and warlike. In 1672, this island, with Barbadoes, St. Lucia, and Dominica, was included in one government, by King Charles II., although no steps were taken to occupy St. Vincent, unless occasional visits, both by English and French, for the purpose of obtaining wood and water, may be deemed such. About 1675, a ship from Guinea, with a cargo of slaves, was wrecked, either on this island or on Bequia, and a number of the negroes escaped into the woods; these intermingled with the natives, and hence, as it is supposed, originated the black Caribs. In 1719, the French sent over some settlers from Martinico, a few of whom succeeded in establishing themselves in the leeward part of the island. In 1723, George I. granted this island and St. Lucia to the Duke of Montague, who made a feeble attempt to take possession of it, but his expedition failed; and, by the treaty of Aix-la-Chapelle, in 1748, it was declared neutral, and the ancient proprietors left in unmolested possession. The French, however, continued in their settlements until 1762, when it was taken by General Monkton and Admiral Rodney; and in 1763, by the peace of Paris, the island was ceded in perpetuity to Great Britain, without much consideration for the native proprietors. The lands were directed to be sold to defray the expenses of the war, and 20,538 acres produced 162,584l. sterling. 1772, a war with the Caribs commenced, which was terminated by a treaty in 1773, when certain lands were allotted them. In 1779, the island was taken by a small body of troops from Martinico, who were joined by the Caribs, which circumstance, coupled with unfortunate political differences, caused the surrender to be made without a struggle. The con- nous, the other pure and tasteless. At noon, on the

querors, however, made no alteration in the government, probably contemplating only a temporary possession. In 1780 the dreadful hurricane occurred, which destroyed the church, and a great proportion of the buildings in the island, besides occasioning serious loss to the planters. St. Vincent was restored to Great Britain at the general peace in 1783; at which time it contained 61 sugar estates, besides other small plantations of cotton, coffee, and cocoa. In 1795, the doctrines of liberty and equality, which prevailed in France, were disseminated in the West India Islands, through the infernal agency of Victor Hugues, whose emissaries excited the Caribs, and some of the French inhabitants, into an insurrection, which continued for upwards of two years. Many sanguinary contests took place, with various success, which cannot be detailed within the limits of this work; but, ultimately by the judicious measures of Sir Ralph Abercrombie, and General Hunter, the French were subdued, and the Caribs removed to Ruattan, an island in the Bay of Honduras. The devastation occasioned by the enemy, cost the proprietors, at least one-third of the value of their properties; but uninterrupted tranquillity has since prevailed, and the fine tract of land in Charlotte parish, called the Carib country, consisting of 5,000 acres, has been put into cultivation, and greatly increased the prosperity of the island.

In 1812, the island suffered from an eruption of the Souffriere volcanic mountain, which had been tranquil for nearly a century (from 1718.) It was about 3,000 feet high, with a crater half a mile in diameter, and 500 feet in depth; in the centre was a conical hill, 200 feet in diameter, and 300 in height, the lower half skirted with luxuriant vegetation, the upper with pure virgin sulphur; various evergreens, and aromatic shrubs, covered in exuberant fertility, the sides of the capacious crater, the interior of which presented a scene of Alpine seclusion and peacefulness that can scarcely be imagined. From the fissures of the cone, a thin white smoke exuded, occasionally tinged with a light blue flame; at the bear were two small lakes, the one sulphureous and alumi27th of April, 30 days after the destruction of the Carraccas, by an earthquake, and during the commotions in the vallies of the Missisippi and of the Ohio. a severe concussion of the earth took place, and a black column of smoke burst from the crater, which was followed by volumes of favillæ, which continued for three days. [See Col. Lib. West Indies, vol. ii.] The following is a list of the Governors, Lieut .-Governors, &c. who have administered the government of St. Vincent, since the cession of the colony to Great Britain, in 1763:-Brig.-Gen. R. Melville, Capt.-Gen. and Gov.-in-Chief in and over the Southern Charibbee Islands of St. Vincent, Grenada, Dominica, and Tobago, 1763; Brig.-Gen. W. L. Leyborne. Gov. of the Southern Charibbee Islands, as above, 1771; V. Morris, Esq. Gov. 1776; E. Lincoln, Esq. Gov. 1783; J. Seton, Esq. Gov. 1787; W. Bentinck, Esq. Gov. 1798; D. Ottley, Esq. Pres. 1799; H. W. Bentinck, Esq. Pres. 1805; Sir G. Beckwith. K. B. Gov. 1806; R. Paul, Esq. Pres. 1807; Sir C. Brisbane, Knight, Gov. 1812; R. Paul, Esq. Pres. 1816; Sir C. Brisbane, K.C.B.Gov. 1817; Sir W. J. Struth, Knight, Pres. 1829; Right Hon. Sir G. F. Hill, Bart. Gov. 1831; Capt. George Tyler, K.H., R.N., 1834.

III. The mountains of St. Vincent are bold, sharp, and abrupt in their terminations, with deep intervening romantic glens, and bound by a lofty and rocky coast. The connected chain of high mountains runs from N. to S., clothed with immense trees, breaking into subordinate masses towards the sea, of a less elevated description, and intersected by deep ravines in the interior, which gradually widen on the approach to the shore, and become vallies capable of cultivation, as they are generally well supplied with water; this feature is principally descriptive of the north-western side of the island. The delicious Valley of Bucament is five miles long and one wide, entirely open to the sea, with lofty mountains at the upper part and sides—and throughout the vale a clear and rapid river. On the N. E. the surface is more level and less broken, and there is a large tract of land at the base of the Souffriere mountain, gradually declining towards the sea, which forms an extensive plain of upwards of 6,000 acres, and is the most productive land in the colony. The soil in the vallies is a rich tenacious loam, and occasionally a fine black mould; on the higher regions it assumes a more sandy character, and is less fertile; the lands adjoining the Souffriere are also clay at the bottom, but the surface having been covered with the sand ejected by the volcano, in 1812, it presents the feature of a loose porous superficies. The character of this island, Mr. Shephard thinks, is decidedly volcanic, traces of strata which have undergone the action of fire, are visible everywhere, and huge masses of rock, displaced from their original situations, indicate the powerful agency which alone could have effected such a change; there is not a primitive rock in the island, an opinion which is supported by branches of trees and other substances, being frequently discovered in large masses of rock at considerable depths, which must at one time have been in a state of fusion; a remarkable instance is to be seen at the tunnel at Grand Sable.

The famed botanic garden, about a mile from Kingston, occupies 30 acres of ground, in the form of an oblong square, the lower part level, but soon becoming a gradual ascent until it terminates in a steep hill, a beautiful mountain stream forming its northern boundary, near the upper part of the garden, and in the centre stands the Governor's house, commanding a

splendid view—immediately below, the capital of the island—in front of the deep blue sea, and the Grenadine isles—in the distance a magnificent vista, bounded on each side by a long and spacious avenue of lofty forest trees.

The roads on the windward coast are tolerably good for thirty miles, their track in general is near to the sea-side, except in cases of high land, when it is necessary to pass along the indentations of the vallies. On the leeward coast, for a distance of 23 miles, they are much inferior, the hills being much higher, the circuity of the track is proportionally increased; the latter are little frequented, the passage by sea in canoes being more easy and commodious. The highways are kept in repair by the proprietors of the estates who have adjoining portions allotted them by an Act of the Legislature, on which they are required to expend an estimated quantity of labour, and for which they are allowed a certain sum from the treasury, on a certificate from the Way-wardens of the parish, who are nominated by the Justices at the February Sessions in each year.

The island is divided into five parishes, St. George, Charlotte, St. Andrew, St. David, and St. Patrick. Within the first, stands the capital, Kingstown,—which is situated in 13.8 N. Lat. 61.17 W. Long., near the S. W. extremity of the island, about a mile along the shore of a deep and beautiful bay protected by a battery on the S., or Cane Garden Point, and by Fort Charlotte on the N. W. which are the chief defences of the island. The fort (distant one mile from Kingstown, in a direct line, and two miles by the circuitousness of the road), is situated on a rock above the level of the sea, and well fortified, it contains barracks for 600 men, and has 34 pieces of artillery of different descriptions, besides several outworks, for the protection of detached buildings.

The road to Fort Charlotte is very steep-so much so, that in looking from the mess-room windows, the sea is seen perpendicularly below, with the Island of Becquia and the Grenadines in the distance; -Old Woman's Point, forming the opposite horn of the Bay of Kingstown and Dorsetshire Hill, about two miles of gradual ascent to windward from the town of Kingston, which it overlooks with an imposing aspect. The garrison was formerly stationed here, but latterly removed to the opposite promontory, as a more commanding site. Berkshire Hill, on which is placed Fort Charlotte, is a promontory or high projecting neck of land, overhanging the sea, and nearly perpendicular on three of its sides. It completely commands the Town and Bay of Kingston, and can be easily separated from both should it be necessary to cut off the intercourse.

The town, behind which the mountains gradually rise in a semi-circle, terminating at the greatest height in Mount St. Andrew, consists of three streets, intersected by six others. There are about 300 of the larger sized houses, the lower stories of which are in general built with stone or brick, and the upper of wood, with shingled roofs, while the close adjoining sugar plantations form (particularly when viewed from the harbour), a very beautiful prospect. The public buildings are substantial, but not elegant. The church is a large heavy brick building, capable of containing 2,000 persons, it has an excellently toned organ, a splendid chandelier, and very handsome pulpit, and bishop's throne. The expenses of this building, which was opened for divine service in 1820, amounted to upwards of 47,000l. currency, of which Government contributed 5,000l. sterling, out of the

was destroyed by the hurrricane in 1780.

The Court house is built of stone, and contains two rooms on the upper story appropriated for the sittings of the Council and Assembly, with two Committee-rooms; below the Courts of Justice are held. Here also are the Public Offices of the Registrar and the Marshal; this building stands in front of the Market Place, and is inclosed with an iron railing; behind it the Gaol, the Cage, and the Treadmill are placed. In the front, close to the sea-side, stand the Market-House, and the depôt for the Militia Arms. Wesleyan Missionaries have a commodious wooden Chapel, and the Romanists have commenced a brick Church.

St. George's parish extends from Kingstown N. to the river Jambou, and contains 9.337 acres of land in sugar estates; it has seven rivers capable of turning mills. The different ridges in this parish having been cleared of their wood by the earlier settlers, the clouds are attracted by the more lofty mountains in the interior; and it has been deemed prudent to preserve the timber on an elevated situation, called the King's Hill, from future destruction, by an especial Act of the Legislature.

At three miles from Kingstown is the small town of Calliagua, consisting of 59 houses, and 400 inhabitants, its chief attraction is the commodious harbour, and very convenient beach for shipping produce. There is a singularly insulated rock on the northwestern side, 260 feet above the level of the sea, on the top of which, Fort Duvernette is constructed; it ascended by a staircase cut out of the solid stone. On Dorsetshire Hill there are barracks for troops, but in such a dilapidated state, as not to be habitable. Some distance above Calliagua, towards the interior is the Vigie, (or look out) a very commanding situation. The different ridges are here concentrated into one elevation with three conical hills, where the Caribs fixed their camp. Eastward is the very extensive valley of Maniaqua, which has only one singular cleft, or opening, with almost perpendicular sides, through which the river Jambou flows to the sea. Some persons have conjectured that this valley is an exhausted crater, which has been thus drained of its waters; the position is too low to maintain this hypothesis, as the volcanic craters in all the Islands, are situated on the most lofty mountains.

Charlotte Parish is bounded on the S. by Saint George's, and northerly by uncultivable lands, it contains 11,849 acres in cultivation, and that part of it called the Carib country, which was only partially settled in 1804, is the most productive in the island. The southern part consists of a portion of General Monckton's grant of 4000 acres, which he sold for 30,000l. sterling, and which was subsequently disposed of in lots by the speculators. This parish is so well supplied with rivers, notwithstanding several were absorbed at the time of the eruption of the Souffriere, that all the mills are worked by water; and the estates are generally larger than in the other parishes. A tunnel 200 feet long was cut through Mount Young, in 1813, which greatly improved the means of communication with the newly settled country: and a stupendous work was afterwards undertaken by the owner of the Grand Sable estate, in cutting another tunnel through the same mountain, lower down and nearer the sea, for the convenience of shipping the produce. The material to be perforated proved to be stone instead of terrass, as was expected—and 360 feet in length were accordingly blasted by

purchase money of the Carib lands. The old building | drilling in the solid rock, at an expense of about 5.000l. currency.

St. Andrew's Parish is the first on the leeward side adjoining the town, it contains 4,096 acres and the vallies being narrower, the estates are small and more compact, neither is it so well supplied with water, except in Bucament Valley, which is one of the most extensive and fertile in the island. In this parish is the small town of New Edinburgh, where the depôt for the commissariat stores is erected.

St. Patrick is the next in order, on the western coast, containing 5,426 acres, with the two small towns of Layou and Barouallie; here the land becomes much more precipitous and difficult of cultivation. and the fertility decreases.

The last is St. David's, containing 4,198 acres, whose characteristic features are the same as the preceding; in Washilabo Valley, and also at the S. point near to the entrance of Chateaubelair Bay, are some fine specimens of basaltes; the vicinity of the Souffriere and other lofty mountains ensures the planters in this quarter plenty of rain, and the facilities of shipping produce, compared with the bold eastern coast, are very great, and reduce the expense and risk of an estate considerably.

IV. The island stands high in reputation as a healthy station; hills and vallies, wood and water in abundance, are so disposed as to contribute to its salubrity; the hills being of a conical shape, there are no livid surfaces of uncultivated shrubs to harbour miasm, and be swept down occasionally on the inhabitants below with destructive effect. The vallies are not deep or filled with jungle and brushwood, impervious to the sun's rays, but the woods being composed of large trees, and growing from the base to the summit of the mountains, form an agreeable shade, cooling the breeze as it passes through them. Composed as St. Vincent is, with sloping surfaces, and gravelly subsoil, there is hardly any flat ground in the island, and the perpetually flowing streams from the mountains and hills, while they tend to temper the air, make the general scene ever verdant and cheerful. Hurricanes have been severely felt in this island. On the morning of the 11th August, 1831, St. Vincent was visited by a severe gale of wind or hurricane, which did very great injury to the plantations on the N. and W. sides of the island, destroying the greater part of the sugar works, and other buildings in the beautiful vale of the Charaib country, to windward, as well as at Chateaubelair and other places in the leeward quarter. Nineteen vessels were driven on shore in Kingston bay, of which the greater part were got off in a few weeks, and seven others were totally wrecked in different parts of the government. The gale commenced in Kingstown from the N. shortly after daylight and went round to the N.W.: it then shifted to the S.W., and subsided about one o'clock, in the afternoon; but in other parts of the island it commenced much earlier, and its violence was much greater. The estimate of the losses, as taken by the Committees of the Legislature, amounted to 163,4201.

There are at the disposal of the Crown in St. Vincent, of land saleable and fit for immediate culture about 2,500 acres in the N. E. quarter; at the N. end about 500; at the N.W. 600; and in the interior of the parishes of St. George, St. Patrick, St. Andrew. and St. David, 500;—in all 4,100, and as much more remotely situated and difficult of access.

V. The following complete meteorological table, though given for Kingstown in St. Vincent, will enable the European reader to form a general idea of the climate of the Caribbee islands :-

The aborigines of the island were undoubtedly the yellow Caribs, probably emigrants from Guyana. When St. Vincent was visited by Europeans, two distinct races of men were discovered; they were of different origins, and their appearances and manners plainly corresponded with those of different portions of the globe. One of these tribes had evidently descended from the aborigines of the island, those of the other tribe were evidently intruders, and the great difficulty consists in accounting fairly and fully for their introduction. It is supposed that about 1675, a ship from Guinea carrying out negroes from that country for sale, foundered on the coast of Bequia, a small island near to St. Vincent, and that the slaves who escaped from the wreck were received by the inhabitants as brethren. But this was not all, the proprietors of the island gave their daughters in marriage to these strangers, and the race which sprang from this mixture were called Black Caribs, having preserved more of the primitive colour of their fathers, than the lighter hue of their mothers. The yellow Caribs are of a low stature, the black are tall and stout, and this doubly savage race speak with a degree of vehemence which seems like anger.

At length some difference arose between these two classes, of which the French in Martinico resolved to avail themselves, and as is usual to profit by the ruin of both parties; but the smallness of the numbers sent against the Black Caribs, and the defection of the Yellow Caribs, who refused to supply such dangerous allies with any of the succours which they had promised them to act against their rivals, together with the impossibility of coming up with enemies who kept themselves concealed in the woods, were circumstances which combined to disconcert this rash and violent enterprize; the Gallic invaders were therefore forced to reimbark, after losing many valuable lives:-but the triumph of the Black Caribs did not prevent their suing for peace, they even subsequently invited the French to come and live with them, swearing sincere friendship: the proposal was accepted, and in the year 1719 many of the French

inhabitants of Martinico removed to St. Vincent. When the French came, they brought their slaves with them to clear and till the ground; the Black Caribs, shocked at the idea of resembling persons who are degraded by slavery, and fearing that in process of time their own colour, which betrayed their origin, might be made a pretence for enslaving them, took refuge in the thickest part of the woods, and in order to create and perpetuate a visible distinction between their race and the slaves brought into the island, and likewise in imitation of the practice of the Yellow Caribs, they compressed, so as to flatten, the foreheads of all their new born infants, and this was thereafter concluded as a token of their independence. The next generation thus became as it were, a new race, they gradually quitted the woods, erected huts, and formed little communities on the coast; by degrees they claimed a portion of the territory possessed by the Caribs, and having learned the use of fire-arms. which they procured from the French traders, on being refused a friendly participation in the landed property, established themselves as a separate tribe. elected a chief, re-commenced hostilities against the Yellow Caribs, and by force brought their adversaries to terms of accommodation, by which it was agreed to divide equally the lands situated on the leeward coast. It happened, however, after this division, that the Black Caribs experienced a most mortifying disappointment, for most of the new planters from Europe, and from the French settlements in the West Indies, landed and settled near the Yellow Caribs, where the coast is most accessible. This decided preference occasioned a new war, in which the Yellow Caribs were always defeated, and at length obliged to retire to the windward part of the island, some fled to the Continent, and some to Tobago, the few that remained lived separately from the blacks, who became the sole masters of all the lands on the leeward shore, assumed the right of conquerors, and obliged the European planters to re-purchase the lands, for which they had already paid the Yellow Caribs. A Frenchman having produced to a Black Carib Chief a deed of land that he had purchased of a Yellow Carib, was told he did not know what the paper contained, but pointing to his own arrow, said if he did not give him the sum he demanded, he would set fire to, and burn down his house that very night. Shephard's St. Vincent.

While these differences were in progress, and while the French was gradually gaining a footing in the island, George the first granted it to the Duke of Montague, who in 1723, sent out a small armament to take possession, but the English on their arrival found the French influence under the appearance of protection so predominant, and the determination of the natives to admit no Europeans to a permanent settlement there so fixed, that they were glad to abandon their alleged proprietorships; and when the Duke, at a subsequent period endeavoured to establish his claim before the Privy Council it was disallowed.

Notwithstanding the difficulties created by the Caribs,

the French prevailed by means of continual reinforcements of men and money, and superior skill in agriculture and commercial affairs: so that in less than 20 years. 800 whites, and 3,000 black slaves, were employed in the cultivation of the commodities for exportation, which yielded a sum equal to 63,625l. sterling. expedition which was sent against Martinico in 1762, under General Monckton and Admiral Rodney, subsequently captured St. Vincent, and a war between the British and Caribs soon followed. The result of several severe contests was (as stated under the general history of the island) the final subjugation of the Yellow and Black Caribs, and their deportation to the number of 5.080 from the island to Rusttan in Honduras Bay, after costing the colonists in expenses and losses 900,000l. sterling, and a considerable sacrifice of European life.

VI. The following shews the population of St. Vincent and its dependencies at several intervals:—

^{*} This is a return only for one prison, the others not being procurable.

[†] No Returns for 1834 and 1835, and for 1833 only the last four months of the year.

X. The Government of the Island, is in the Governor, Council and Assembly, the former is Chancellor, Ordinary and Vice Admiral. His duties are regulated by instructions from Her Majesty, which are said to have been originally framed in the time of Charles II. for the Island of Jamaica, and have been adopted for the other Islands; to these may be added His Majesty's Proclamation of the 7th of October, 1763, which may be called the foundation of the insular constitution, by this authority the general assemblies are summoned, and the powers of enacting laws, as near as may be to the laws of England, are given, the authority for erecting Courts of Judicature, with the liberty of appeal, is also recognised in this document, which was promulgated after the treaty of Paris.

The Council consists of twelve Members, five or six of whom are usually named in the Governor's Commission, and the remainder supplied by the recommendation of the Governor, or by mandamus; five in number constitute a board, and when the original number is reduced to seven, the Governor has the power of nomination to supply the vacancies.

The council sit in two capacities, Privy and Legislative, in the former the Governor presides, in the latter the senior member, under the title of President, on whom also the temporary Government devolves on the absence, or death of a Governor. Since the appointment of a Bishop, he has been sworn in exofficio a member in Council in all the Islands composing his diocese, and where the date of his appointment has preceded that of a Governor, he is also Ordinary.

The Assembly consist of nineteen members, three for each of the five parishes, two for the town of Kingstown, and the like number for the Grenadines; the qualification of Members for the Parishes and Islands, is 50 acres of land in cultivation, or producing an income of 300l. currency a year, and for the town, a house of the yearly value of 1001.; the titles of the candidates to their property must appear to have been registered in the office twelve months, except in cases of wills, and conveyance of property executed in Great Britain. Electors must have a freehold of ten acres, or a house in Kingstown of twenty pounds yearly value, or of ten pounds elsewhere. registered in like manner. Elections take place under the authority of a writ issuing from the Governor and Council, on an application from the Speaker, to the Provost Marshal General, and the whole regulations, on this subject, are prescribed by an Act of the Legislature, which passed in 1786; these three branches assimilate their proceedings as near as possible to those of Great Britain; their meetings are quarterly, and the Acts that are passed proclaimed by the Marshal, and enrolled in the Registrar's Office. These Acts may be divided into three classes, the first temporary and purely colonial, which take effect immediately on their publication; the second, such as have a clause annexed suspending their operation until Her Majesty's pleasure be known; and the third, the permanent laws, which if not confirmed in two years from their enactment, are to be considered as disallowed. In strictness the Governor is not allowed to pass any law, repealing one which may have received the royal approbation, without a suspending clause; but this in the cases of the old laws, has been frequently overlooked. The Attorney-General has a salary of 5001. currency per annum, which is in part given to him for framing the bills, which may be required, but he is not obliged to introduce them to either house, and a considerable difficulty has fre-

quently occurred from the want of an accredited person, as the organ of Government, who might introduce the measures proposed by the crown through the Colonial Secretary to either house. At present the Governor communicates by letters with the President and Speaker, but no member is intrusted with the charge of carrying any bills through the different stages prescribed by the Legislature.

The supreme court for civil causes is called the Court of Queen's Bench and Common Pleas, where the Chief Justice presides; his salary is 2,0001. currency. There are three other Assistant Justices, who are not professional persons, and act without any This court holds its sittings for the trial of salary. causes once in every month, from March to August, when executions for debt can be obtained in about ten weeks, from the entering day. The proceedings are regulated by a Court Act. The Court of Sessions for the trial of criminal offences is held twice a year. The Chief Justice is President, and the Members of Council and Judges sit according to seniority. The Court of Error for appeals from the Queen's Bench and Common Pleas, is composed of the Governor and Council. The Governor is also sole Chancellor, and from these two last Courts an appeal lies to her Majesty in Council.

The Registration of real property is requisite, and the deeds of conveyance must be acknowledged either personally, or by attorney, before the Registrar. The Provost Marshal General executes an office corresponding to that of Sheriff, and inquests are regularly held by the Coroner in all necessary cases.

The commerce of the Island is regulated by the officers of Her Majesty's Customs; a Collector, Comptroller, and three Waiters constitute the establishment; the regulations of trade have been much simplified, and amended of late years, by the repeal of several hundred Acts, and consolidating their provisions under six or eight distinct heads. The fees on shipping are now abolished, and the salaries of the officers are defrayed from the dutiable articles imported from foreign ports.

The Militia consists of all the free inhabitants between the ages of eighteen and fifty-five, as follows: Southern Regiment - 1 Colonel: 1 Lieut.-Colonel: 1 Major; 8 Captains; 11 Lieutenants; 5 Ensigns; 1 Adjutant; 1 Quarter Master; 1 Surgeon; 8 Staff Sergeants; 28 Sergeants; 7 Drummers; 479 Rank and File. Northern Regiment-1 Colonel; 1 Major; 4 Captains; 3 Lieutenants; 3 Ensigns; 1 Adjutant; 1 Quarter Master; 1 Staff Sergeant; 6 Sergeants; 162 Rank and File. Queen's Company—1 Major; 2 Captains; 2 Lieutenants; 2 Ensigns; 1 Adjutant; 1 Quarter Master; 2 Surgeons; 3 Sergeants; 1 Drummer; 90 Rank and File. Bequia Company—1 Captain; 1 Lieutenant; 1 Ensign; 1 Surgeon; 2 Sergeants; 1 Drummer; 34 Rank and File. Troop of Cavalry-1 Major; 1 Captain; 1 Lieutenant; 1 Ensign; 1 Adjutant; 1 Surgeon; 2 Drummers; 20 Rank and File. Total-2 Colonels; 1 Lieut.-Colonel; 4 Majors; 16 Captains; 18 Lieutenants; 12 Ensigns; 4 Adjutants; 3 Quarter Masters; 5 Surgeons; 9 Staff-Sergeants; 39 Sergeants; 11 Drummers; 785 Rank and File. Grand Total 909. These assemble for exercise once in every month, at the different stations in the island. The legislature has endeavoured to keep up an effective force of white persons by requiring the planters to keep one white person for every fifty slaves, under a penalty of 50% for each deficiency.

The garrison of British regulars for the protection of

the Island, since the peace has been reduced to one | wing of a regiment, with a few artillery men, during the war two regiments were the complement, which the Government undertook to furnish, in consideration of the assistance that was given by the Colony at different periods, towards building the forts and barracks, and of maintaining the roads thereto at the public expense of the colony.

The Police is excellent, especially in the town of Kingstown; it is regulated by three Town Wardens who are annually appointed, and a Chief Constable, with very extensive powers; the tread-mill affords an efficient mode of punishment, heretofore unknown in

St. Vincent.

The dependencies within the Government of St. Vincent, are the islands of Bequia, 3,700 acres, with a very fine harbour, called Admiralty Bay; Union, 2,150 acres; Mustique, 1,203; and Canouan, 1,777 acres. There are also the lesser islands of Balliceaux and Battawia, Myera, Petit St. Vincent, Islet a Quatre, Isle of Wash, Church Island, Petit Nevis, Three Ra-

miers, Pillories, Savan, Petit Bermuda, Petit Canouan, Barbaroux Island, or Petit Curacoa, Two Taffia Quays, Two Baleines, Two Catholics, Prune Island, Four Tobago Quays, Umbrella Quay and Petit Martinique. The cultivation in all these islands is very much reduced, from the woods having been cut down, and the consequent decrease of rain; the seas abound with fish; many whales make their appearance in February and March, and the air is remarkably fine and salubri-

XI. The revenue of the island raised by an annual tax act, by which assessments on all the staple commodities of the island are made, and a proportionate per centage on the incomes of merchants and other persons, which a poll tax on unattached slaves; Commissioners to carry the act into execution, are named for each parish, and the returns are directed to be given in to the Treasurer in January, from whence the rates are calculated according to the estimated expences of the island, and submitted to the Assembly.

To Elsewhere in 1824, 1200/.

money of various articles of merchandize exported from the colony of St. Vincent during the year 1834. Arrow root, 62,160 lbs. value 3,014*l*.; cocoa, colonial, 5,460 lbs., 117*l*.; copper, old, 7,717 lbs., 187*l*.; cotton wool, colonial, 102,000 lbs., 1,868*l*.; fruit, value 31*l*.; hides, number 171, 106*l*.; molasses, 382,880 gallons, 28,023*l*.; spirits, rum, 278,785 gallons, 16,309l.; spirits, shrub, 475 gallons, 43l.; succades, value 2741.; sugar, colonial, 24,661,168 lbs. 256,806l.; tortoiseshell, 12 lbs., 12l.; wine, 263 gallons, 1791.; wood, value 721.; miscellaneous articles, 2101. Total, 307,2511.

In 1834, the value of the imports was 384,3871. stg. The value of the exports, in 1832, was 255,3431., of which sugar was 21,917,056 lbs., value 200,454/,; rum, 369,877 gallons, value 26,698l.; molasses, 391,190 gallons, value 21,594l.

XIII. Current value of coins in circulation within this government. Silver Coins .- Spanish dollar, 10s., half dollar, 5s.; Carolus, 2s.; Pistareen, 1s. 6d.; Quarter Colonial coin, 4 dwts. 9 grains 2s. 6d.; English shilling, 3 dwts. 16 grains 2s. 31.

Gold Coins .- Doubloon 17 dwts. 8 grs. 16 dol. £8 0 0 Half do. 8 — 16 — 8 — 4 0 0 Guinea 5 — 8 — 44 5ths 2 8 0 Sovereign 5 — 3½ — 43 5ths 2 6 1½

Copper Coins .- English penny-piece and stampee, 21d. each; ditto, halfpenny, 11d.; dog, 11d.

The gold coins in circulation are exclusively Spanish and Portuguese, the Doubloon at the value of sixteen dollars with the aliquot parts in proportion; the Johannes pass by weight at 9 shillings the pennyweight; formerly this coin was the most common throughout the islands, each Colony mutilating their own by plugs and various marks, to prevent exportation; from these practices the coin became so deteriorated, that in 1818 it was called in at a considerable loss, and Doubloons came into more general circulation. The silver coins are the dollar which passes at

Statement of the quantity and value in sterling | 10 shillings currency, and Colonial coins of one-fourth, one-eighth and one-sixteenth: the British silver occasionally forms part of the commissariat issues, from which source nearly all the bullion of the country arises, but it is speedily collected by the merchants for remittances to Europe, and is therefore of little benefit as a general circulating medium; the English copper money, and Colonial coin, named Stampees and Black Dogs, complete the catalogue. The sterling value of the dollar being four shillings and four pence, gives 230l. 10-13ths, as the currency value of 100l. The exchange in 1836 was generally 235l. cur. (470 dollars) = 100l. stg. There is no paper currency in the island, and the amount of coin in circulation is not ascertainable.

> The following enumeration of the fruits, esculents, &c. in season throughout the year will demonstrate the great variety of vegetable food which our West Indian islands afford :-

> 'January. — Sappadillos, pomegranates, papaws, sour-sops, plantains, okros, peppers, cocoa-nuts, pigeon or angola peas, sweet potatoes, yams, creole ditto, tanias, cotton. February.—Sappadillos, soursops, chicou. March.-Sappadillos, sour-sops, granadillos, custard apples, guavas, plantains, cerasees, Ceylon ditto, sweet potatoes, yams. April.-Sappadillos, Java plumbs, mangoes, mamme-sapotas, pine-apples, Otaheite gooseberries, Jamaica plumbs, cerasees, Ceylon ditto, bread-fruit, silk cotton, galbaseeds for fences. May.—Sappadillos, mangoes, granadillos, water-Melons, cashews, pine-apples, Otaheite gooseberries, Jamaica plumbs, Ceylon cerasees, silk cotton. June.—Mangoes, Java plumbs, Jamaica ditto, cashews, Ceylon cerasecs, pigeon peas, (nearly out of season) cloves. July.—Mangocs, mamme-sapotas, granadillos, cashews, avocado pears, cerasees. August.-Mangoes, mamme-sapotas, avocado pears, hog plumbs. September. Sugar-apples, sea side grapes, granadillos, hog plumbs, pompions, portuguese yams, tanais. October. - Sugar-apples, guavas, sca-side

grapes, avocado pears, Portuguese yams, coffee. November. — Granadillos, chicou, okros, peppers, bread-fruit, coffee. December.— Sappadillos, soursops, guavas, granadillos, sweet cerasees, pigeon peas, okros, peppers, sorrel, yams, cotton.

XIV. The following shews the quantities of staple produce of St. Vincent and its dependencies from 1801 to 1829, and the number of negroes in the island.

CHAPTER VI.—BARBADOES.

SECTION I. The Island of Barbadoes is situate at | the extremity of the great American Archipelago in Lat. 13. 5 N. Long. 59. 41. W. extending about 22 miles in length and 14 in breadth, with a surface of 106,470 acres.

II. The early discovery of Barbadoes is involved in obscurity; the island remained unknown and unnoticed for a century after the discoveries of Columbus, and the first indication of its existence in the charts of European navigators, was A.D. 1600. It is said to have been first visited by the Portuguese, who, finding it uninhabited, and rude in appearance, named the isle Los Barbados, or as some say in reference to the number of fig trees which from their spreading branches were likened to luxuriant beards. original discoverers left some swine and plants on the isle and abandoned it. In 1605, an English ship, the Olive, returning from Guinea, accidentally touched at Barbadoes, landed a part of the crew on the spot, where the Hole Town was afterwards built, erected a cross, took possession of the island, and inscribed on several trees, 'James, King of England, and of this island.' Finding no refreshments the crew was reimbarked, and the adventurers proceeded to St. Christopher, where an English colony had recently been formed. The island was then neglected for nearly 20 years, when some Dutch men-of-war having visited it, reported favourably of its adaptation for cultivation. These particulars having reached Sir Wm. Courteen, an enterprising London merchant, he endeavoured to effect a settlement on Barbadoes. The beauty and fertility of the island became also much talked of in England in consequence of a ship of Sir Wm. Courteen's having put in there, in stress of weather, and the mariners, in returning home, expatiated on the advantages of the place. The spirit of colonization was at this time exceedingly active in England, and the Earl of Marlborough (afterwards Lord High Treasurer), obtained from James I, a patent for the island to him and his heirs for ever. Sir Wm. Courteen having obtained the sanction of the noble patentee, fitted out two large ships with men, arms, and ammunition, and every thing suited to the establishment of a new colony. One vessel only arrived at Barbadoes, and a town was commenced in February 1625, at the

spot where the Olive had touched twenty years before, and named James's (by some called Hole) town. In 1627, James Hay, Earl of Carlisle, stimulated by the representations of Thos. Warner, who had been engaged in forming a settlement at St. Christopher applied to and obtained from Charles I. (who had then newly ascended the throne), a grant of all the Caribbee islands, to be formed into a palatinate or proprietary government, under the name of Cariola. The Earl of Marlborough strenuously opposed this grant, as affecting his prior right to Barbadoes, and litigation commenced between the two noblemen, which was compromised on Lord Carlisle agreeing to settle on the Earl of Marlborough and his heirs for ever, an annuity of 300l. in lieu of his claim. The Earl of Carlisle's patent passed the great seal the 2nd of June 1627, and the preamble of this singular charter runs as follows :

'Whereas our well-beloved cousin and counceller, James
Lord Hay, Baron of Sauley, Viscount Doncaster, Earl of
Carlisle, endeavouring, with a laudable and plous design, of
propagating the Christian Religion, and also of the enlargement of the territories of our dominions hath humbly petiment of the territories of our dominions hath humbly pettioned us for a certain region of islands in our dominion afternamed lying towards the north part of the world, as yet void and inhabited by savages, who have no knowledge of the divine power, commonly called the Caribbee Islands, containing the islands of St. Christopher, Grenada, St Vincent, Saint Lucia, Barbadoes, Martinique, Dominica, Marigalante, Deseada, Todasantos, Guadaloupe, Antigua, Montserrat, Redondo, Barbuda, Nevis, Eustatia, Naint Bartholomew, Saint Martin, Anguilla, Sombrera, and Antegada, and many other islands, found at his great cost and charges, and now brought to that pass to be inhabited by a large and copious colony of English, with certain privileges and jurisdictions belonging to the said government and state of a colony and region to him, his heirs, and assigns, to be granted.

to the said government and state of a colony and region to him, his heirs, and assigns, to be granted.'

By the succeeding clauses, his Majesty did, by the same grant, for him, his heirs and successors, make, create and constitute the said Earl of Carliele, his heirs and assigns, absolute proprietor and lord of the said region; reserving still the allegiance due to his Majesty, his heirs and suc-cessors. It was then added, 'And because we have made and appointed the said James Earl of Carlisle true lord of all province, or the greater part of them thereunto to be called, and in such form, and when and as often as he or they, in his or their discretion, shall think fit and best. And these laws must all men, for the time being, that do live within the limits of the said province observe; whether they be bound to sea, or from thence returning to England, or any other place appointed, upon such imposition, penalties, imprisorements, or restraint; and if it behoveth, and the quality of the offence requireth, either upon the body or death itself, to be executed by the said James Earl of Carlise, and his heirs; or by his or their deputy, judges, magistrates, officers, and ministers, according to the tenure and true meaning of these presents, in what case soever; and with such power as to him, the said James Earl of Carlisle, or his heirs, shall deem best. And to dispose of all offences or riots whatsoever, either by sea or land, whether before judgment received, or after remitted, freed, pardoned or forgiven. And to do and perform all and every thing or things; which, to the fulfilling of justice, courts, or manner of proceeding, in their tribunals may or doth belong or appertain, although express mention of them in these presents be not made; yet we have granted full power, by virtue of these presents, them to be made; which laws so absolutely proclaimed, and by strength of right supported, as they are granted, we will enjoin, charge and command, all and eyery subject and liege people of us, our heirs and successors, as far as them they do concern, inviolably to keep and observe under the pains therein expressed; so as, notwithstanding, the aforesaid laws be agreeable, and not repugnant unto reason; nor against, but as convenient and agreeable as may be to the laws, statutes, customs and rights, of our kingdom of England."

*And because in the government of so great a province

'And because in the government of so great a province oftentimes sudden occasions do fall out, to which it shall be needful to apply a remedy before the free inhabitants of the said province can be called; and for that it shall not always be needful, in such cases, that all the people be called together; we will and ordain, and by these presents, for us, our heirs and successors, have granted to the said James Earl of Carlisle, and his heirs, that he by himself, or his magistrates and officers, in that case lawfully preferred, may make decrees and ordinances both fit and profitable from time to time, that they may be esteemed, kept and observed, within the said province, as well for keeping the peace as for the better government of the people there living, so that they may be publicly known to all whom they do concern. Which ordinances we will, within the said provinces, inviolably to be kept, upon pain in them expressed; so that these laws be agreeable to reason, and not repugnant nor against it, but, as far as may be, agreeable to the laws and statutes of our kingdom of England; and so that those laws extend not to the hurt or discommodity of any person or persons, either to the binding, constraining, or taking away, either their liberty, goods, or

We also of our princely grace, for us, our heirs and successors, will straightly charge, make and ordain, that the said province be of our allegiance; and all and every subject and liege people of us, our heirs, and successors, brought or to be brought, and their children, whether then born, or afterwards to be born, become natives and subjects of us, our heirs and successors, and be as free as they who were born in England, and so their inheritance within our kingdom of England or other of our dominions, to seek, receive, take, hold, buy and possess, and use and enjoy them as their own; and to give, sell, allen and bequeath them at their pleasure: and also freely, quietly, and peaceably, to have and possess all the liberties, franchises and privileges of this kingdom and them to enjoy as liege people of England, whether born or to be born, without impediment, molestation, vexation, injury or trouble of us, our heirs and successors; any act or statute to the contrary notwithstanding.

Charles soon forgot that he had ever made this grant to Lord Carlisle, and in February 1628, being much pressed by the earl of Pembroke, the unfortunate monarch made over Barbadoes to his Lord Chamberlain, the Earl of Pembroke, in trust for Sir Wm. Courteen, who, really for his zealous energy, deserved to have had the island bestowed on him in the first instance. Scarcely had this grant been made when the Earl of Carlisle returned from a foreign embassy, and to appease his lordship's resentment at the breach of faith evinced towards him, the irresolute monarch revoked the charter or patent, granted to the Earl of Pembroke, and restored the proprietary rights to his favourite, Carlisle. The proceedings just mentioned

had the good effect of stimulating the Earl to improve the territory bestowed on him, he contracted with a company of London merchants for a grant of 10,000 acres of land, on condition of receiving from each settler forty pounds of cotton annually, and the privilege of nominating a governor, or chief. Wolferstone, a native of Bermuda, was commissioned by the Earl of Carlisle as governor, with the power of Governor-Commander in-Chief and Captain, to do justice, decide controversies, keep his Majesty's peace, and punish offenders, according to the laws of England and the nature of their crimes. Sixty-four settlers (each entitled on landing to 100 acres of land) arrived in Carlisle Bay 25th of July, 1628, commenced the erection of wooden houses, threw a bridge across the river which intersected the ground, and laid the foundation for Bridgetown, the present capital. Earl of Pembroke's men, who were settled on the leeward of the island, refused to obey the windward, or Carlisle Bay Settlers. Arms were ultimately had recourse to, the windward men triumphed, and while the latter were asserting their right of jurisdiction in Barbadoes, the Earl of Carlisle had a new royal patent. made out in England, confirming in the most explicit and unequivocal manner the former grant. Sir Wm. Tufton was appointed Governor - Commander - in-Chief, in February, 1629. A military force was sent out to keep the leeward men quiet. A council of twelve settlers, appointed to assist the Governor in holding a Courts General Sessions of the Peace, laws were enacted suitable to an infant settlement, and the cultivated or occupied parts of the isle divided into six parishes, viz. Christ Church, St. Michael, St. James, St. Thomas, St. Peter, and St. Lucy.

In 1645 the island, under the prudent rule of Mr. Bell, was divided into four parishes, (George's, Philips,' John's, and Andrews, were added to the before mentioned) a church built in each, and an officiating minister appointed. A general assembly was instituted, composed of two deputies elected in each parish from the majority of freeholders. The island was divided into four circuits, in each of which a court of law was constituted - defensive fortifications erected around the isle-the militia constituted a formidable force of 10,000 infantry and 1000 cavalry -the total population of the island had increased to 150,000 persons of all colours and sexes, and the value of property was quadrupled in seven years. This prosperity was not owing to sugar culture, for Ligon who visited the island in 1647, says, that the plantation of the cane had only then recently begun; but it would appear that Barbadoes carried on an unrestricted foreign intercourse with Holland and other countries. The number of slaves in the island at this period is not on record, yet here, as elsewhere, the evils of the system were early felt, for in 1649 a formidable insurrection took place at Barbadoes, and a general day was appointed for the massacre of all the white inhabitants. The plot was discovered by a negro, in gratitude to his master, the day before its contemplated execution, and twenty-eight of the leading negroes were gibbeted, according to the custom of the times.

In 1650, Lord Carlisle, (the son of the first patentee), hearing much of the wealth of the island, which he considered patrimonial property, and desirous of reaping some advantages from the same, executed a lease to Francis Lord Willoughby, of Parham, an active royalist officer, conveying to his Lordship all his right and title to the colony for 21 years, upon condition that the profits arising from

the proprietary right should be mutually shared between them. Charles II., (then in exile), desirous of securing the West Indies for his crown, appointed Lord Willoughby Governor and Lieutenant-General of Barbadoes, and of all the Caribbee Islands; and the Legislature of Barbadoes on his Lordship's arrival, passed an Act, acknowledging his Majesty's right to the sovereignty of the island, and that of the Earl of Carlisle, derived from his Majesty, and transferred to Lord Willoughby. Barbadoes, always distinguished for its loyalty, exerted itself on this occasion, and equipped several ships of war, which compelled the neighbouring islands to submit to the authority of the crown, as emanating from the chief W. I. Government at Barbadoes. Cromwell, as it may be supposed, did not quietly permit this refuge to his royal opponent, and a formidable squadron, under the command of Sir George Ayscue, containing a large body of troops, was dispatched for the purpose of reducing the refractory colonists in obedience to the Commonwealth, and with a view of crippling the power of Holland, with which Barbadoes and the other W. I. possessions carried on a lucrative traffic; the far-famed navigation laws were passed, by which the ships of any foreign nation were prohibited from trading with any of the English plantations, without a license from the Council of State.

The Barbadians for some time gallantly defended themselves against Cromwell, and it was not until the Parliamentary forces had laid waste a large portion of the island, the defection of Col. Modiford, and that many had been slain on both sides, that the island was subdued by the Cromwellian power. George Ayscue was appointed Governor, after the reduction in 1652, and proceeded to subdue the other islands that had maintained their allegiance to the royal authority. On the restoration of Charles II., Lord Willoughby, who had been banished for life from the island, appointed Col. Humphry Walround, a faithful old royalist, superseding Col. Modiford, who proceeded to Jamaica, to be Deputy-Governor, and President of the Council of Barbadoes. Charles II. conferred the dignity of Knighthood on 13 gentlemen of Barbadocs, in testimony of their attachment to the royal cause.

Lord Willoughby, in 1662, as lessee of the Earl of Carlisle, renewed his claims on the island. Kinnaird, the kinsman and heir of the Earl of Carlisle, brought forward demands on the settlers amounting to 60,000l., and the heirs of the Earl of Marlborough, who were entitled to a perpetual annuity from the same quarter, claimed a large sum for arrears. To satisfy these claims, now urgently made, a large number of the Barbadians, (by Mr. Kendal) agreed to lay a duty of 4½ per cent. on all native commodities, the growth and produce of Barbadoes, when exported from the island. This impost was estimated at 10,000l. a-year. Many Barbadians protested against the perpetual rent-charge of 10 per cent. on their plantations; but after being submitted to the decision of the Privy Council, it was finally agreed, that the 4½ per cent. fund should be applied towards providing a sufficient compensation to the Earl of Kinnaird, for surrendering his right to the Carlisle charter,—to provide for discharging the Earl of Marlborough's annuity—one moiety of the surplus to be paid to Lord Willoughby for the remainder of his lease, the other moiety to the Creditors of Lord Carlisle, until the expiration of Lord Wilentire balance, until their demands were liquidated. Under these conditions (agreed to by all parties), the proprietary Government was dissolved, and the sovereignty of Barbadoes annexed to the British crown. Some of the inhabitants of Barbadoes long protested against the imposition of the 41 per cent. duties, but the rigorous and prudent administration of Lord Willoughby brought internal peace to the island, while his lordship extended the power of Britain in the western hemisphere. Lord Willoughby was lost in a hurricane, near Guadaloupe, while employed in reducing several islands to subjection. Col. Christopher Codrington became Deputy-Governor in 1668, and his administration was distinguished by vigilance and circumspection. In 1669, the windward and leeward isles were formed into distinct governments, Guadaloupe being the line of demarcation, and the commerce of the leeward isles was given to Sir W. Stapleton, while Lord Willoughby retained that of Barbadoes and the windward islands, which he kept until 1673.

In 1722, on the appointment of Governor Worsley, a salary of 6,000l. sterling per annum was fixed on his Excellency, and provided for by a capitation tax of 2s. 6d. on each slave—and by a tax on lawyers, patentees, and public officers, &c .-- a burthen which the colonists soon found themselves unable to defray. The administration of Lord Howe (commencing in 1733), seems to have been generally applauded; under his auspices a free press was established in Barbadoes, and he died at his government in 1735, beloved by all who knew him. In 1780, Barbadoes was ravaged by a terrific hurricane, which lasted for 48 hours, and devastated the island: such was the violence of the wind, that a 12 pound carronnade was blown from the pier-head to the wharf, a distance of 140 yards. Of 11 churches and two chapels only three were left standing; and not more than 30 houses of the extensive capital of Bridge-town; the Mole-head, which cost the colonists 20,000l. was destroyed, and the castle, battery, forts, town-hall, prison and cells demolished; the loss of amounted to 3,000, and of property to 1,018,9281.

The events which have since occurred do not require detail.

The following is a list of the rulers of Barbadoes since its establishment as a colony: 1625, W. Deane, Gov.; 1628, C. Wolferstone, do.; 1629, J. Powell, do.; 1629, R. Wheatly, do.; 1629, Sir W. Tufton, do.; 1630, H. Hawley, do.; 1633, R. Peers, Dep.-Gov.; 1636, Hawley, do.; 1638, W. Hawley, do.; 1639, H. Hawley, Gov.; 1640, Sir H. Hunks, do.; 1641, P. Bell, do.; 1650, F. Lord Willoughby, do.; 1651, Sir C. Arrent de. 1651, D. Gordon, Dep. Gov. 1651, Sir G. Ayscue, do.; 1652, D. Searle, Dep.-Gov.; 1660, T. Modiford, Gov.; 1660, H. Walrond, Pr.; 1663, Francis Lord Willoughby, Gov.; 1666, H. Willoughby, H. Hawley, Samuel Barwick, Joint Govs.; 1667, William Lord Willoughby, Gov.; 1668, C. Coddrington, Dep.-Gov.; 1670, W. Lord Willoughby, Gov.; 1670, C. Coddrington, Dep.-Gov.; 1672, W. Lord Willoughby, Gov.; 1673, Sir P. Colleton, Bart., Dep.-Gov.; 1674, Sir J. Atkins, Gov.: 1680, Sir R. Dutton, do.: 1683, Sir J. Witham, Dep.-Gov.; 1684, Sir R. Dutton, Gov.; 1685, E. Steed, Dep.-Gov.: 1690, J. Kendall, Gov.: 1694, F. Russell, do.: 1696, F. Bond, Pres.: 1698, R. Grey, Gov.; 1702, J. Farmer, Pres.; 1703. Sir B. Granville, Gov.; 1706, W. Sharpe, Pres.; 1707, M. Crowe, Gov.; 1710, G. Lillington, Pres.; 1711, loughby's contract, when, after a salary of 1,2001. R. Lowther, Gov.; 1714, W. Sharpe, Pres.; 1715, a-year for the future Governor of Barbadoes, the creditors of the Earl of Carlisle were to receive the Cox, do.; 1722, H. Worsley, Gov.; 1731, S. Barwick, Pres.; 1733, J. Dotin, do.; 1733, Scroop Lord Viscount Howe, Gov.; 1735, J. Dotin, Pres.; 1739, Hon. R. Byng, Gov.; 1740, J. Dotin, Pres.; 1742, Sir T. Robinson, Gov.; 1747, Hon. Henry Grenville, do.; 1753, R. Weeks, Pres.; 1756, C. Pinfold, Gov.; 1766, S. Rous, Pres.; 1768, W. Spry, Gov.; 1772, S. Rous, Pres.; 1773, Hon. E. Hay, Gov.; 1779, J. Dotin, Pres.; 1780, J. Cunningham, Gov.; 1783, J. Dotin, Pres.; 1784, D. Parry, Gov.; 1790, H. Frere, Pr.; 1791, D. Parry, Gr.; 1793, W. Bishop, Pr.; 1794, G.P. Ricketts, Gov. 1800, W. Bishop, Pr.; 1801, Francis Humberstone, Lord Seaforth, Gr.; 1803, J. Ince, Pr.; 1804, F. H. Lord Seafoth, Gr. 1806, J. Spooner, Pr.; 1810, Sir G. Beckwith, K. B. Gr.; 1814, J. Spooner, Gr.; 1815, Sir J. Leith, K. B. Gr.; 1816, J. Spooner, Pr.; 1817, Stapleton Lord Combermere, G. C. B. Gr.; 1817, J. F. Alleyne, Pr.; 1817, S. Lord Combermere, Gr.; 1820, J. B. Skeete, Pr. 1821, S. Hinds, do.; 1821, Sir H. Warde, K. C. B. Gr.; 1825, J. B. Skeete, Pr.; 1829, Sir J. Lyon, K. C. B. Gr.; 1827, J. B. Skeete, Pr.; 1829, Sir J. Lyon, Gr.; 1823, Sir L. Smith, do. 1836, Sir E. J. Mc Gregor.

III. Barbadoes, although generally level, except in the N. E. quarter, called Scotland (which is about 1,100 feet above the sea) has a very beautiful appearance, owing to its extent of cultivation, and sloping fields or terraces. In some deep vallies there are the remains of the primitive forests which formerly covered the whole island. The base of the island is calcareous rock, formed of madrepores, and other marine concretions, and is probably of volcanic origin, like the greater number of surrounding isles. Bridgetown the capital extends along the shores of the beautiful Bay of Carlisle for nearly two miles in length and half a mile broad, with about 20,000 houses. The handsome and spacious barracks of St. Ann's with their fine parade, are at the southern extremity of the town. The square, with Nelson's statue, is well laid out, and many of the houses are handsome. The Government-house, called Pilgrim, is about half a mile from Bridge-town. The fort of St. Anne, though small, is capable of making a good defence; it contains several excellent magazines stored with ammunition, and an armoury, with many thousand stand of arms in perfect order. The soil varies much; in some districts it is sandy and light, in others a rich black earth, and in several places spongy. Here and there is found a red clay of considerable depth, and the light whitish earth broken into a grey mould, or hardened into lumps resemble chalk, but actually consist of indurated argillæ, by exposure to the weather.

IV. Owing to the flatness of the island, leaving it open to the sea-breeze, and its extensive cultivation, Barbadoes is peculiarly healthy; and the details given of the range of the thermometer, &c., under St. Vincent will, with some modifications, answer for Barbadoes.

The returns under the section on climate in Jamaica shew the mortality of the troops on that island; the following document, drawn up by Deputy Inspector-General of Army Hospitals, Henry Marshall, Esq., will also to some extent indicate the climate of Barbadoes and the Windward islands.

Strength of the British army serving in the Windward and Leeward islands, from 1796 till 1805, and from 1810 to 1828 inclusive, together with the annual centesimal ratio of mortality from 1796 till 1828, being a period of 33 years.

Years.	Strength.	Deaths.	Centesimal ratio of mortality.	Mean centesimal ratio of mortality in each of the fol- lowing periods.

Total C. R. 100:0.

According to the above, March is the healthiest, and October the most unhealthy month of the year in the Windward and Leeward Island command, which comprehends the islands of Barbadoes, Trinidad, Grenada, St. Vincent, St. Lucia, Dominica, Antigua, St. Christopher, the Bahamas, Guyana on the continent, and all the other tropical British possessions in the West Indies and Continent of South America, except the island of Jamaica and the settlement of Honduras, which form a separate command. The troops in the Bermuda Islands, which lie in about 330 N. latitude, report to the commander of the forces in Lower Canada.

V. The inhabitants of this colony rapidly increased from its first settlement. In 1676, Barbadoes, on 100,000 acres, contained 70,000 whites and 80,000 blacks: total 150,000 souls. This great population was effected by granting out land, in lots of 10 acres each, to poor settlers and white servants who had

fulfilled the term of their indentures. Some, perhaps many, of these lots were subsequently sold when the island became too populous for the extension of sugar plantations; and the late occupiers, with the purchase money, proceeded to settle in other islands, where land was cheap and plentiful. In 1674, their numbers were calculated at 50,000 whites, and 100,000 coloured or negroes, thus giving 500 mouths to every square mile; while China, with its 350,000,000, has not more than 288 to the square mile.

The population at different periods of the last century was, as far as we have returns — 1724. Whites, 18,295; blacks, —. 1753. Whites, —; blacks, 69,870. 1786. Whites, 16,167; blacks, 62,953. 1788. Whites, 16,127; free coloured, 2,229; blacks, 64,405.

The slave population from 1817 to 1832, was-

There has been no recent census of the island; and the Blue Books at the Colonial office respecting Barbadoes are by no means complete, satisfactory, or creditable to the island.

A statement of the Number of Slaves for whom Compensation has been claimed, and of the Number of Claims preferred for such compensation, and of the Amount of Compensations awarded in each of the classes of Prædial-attached, Prædial-unattached, and Non-Prædial. [Parliamentary Return to the House of Lords, March, 1838.]

There are also, twice in the week, night schools in each of the three districts of
	for ditto. 5. School near the garrison. 6. 3 Infant schools. 7. School at 8. School Roebuck.		-53	58 115 204 57 50			Mistress 401. 5. Mast. 501.	

The situation of Codrington College is one of the most delightful that can possibly be conceived; surrounded by hills on every side, possessing the superior advantages of the sea breeze, an unbounded view of the Atlantic, and refreshed by a clear stream of water, collected in front into a small lake. The students receive their board and education for 351. per annum, and are examined and ordained by the bishop if intended for the church.

educated precisely upon the plan of the national

schools in England; all of them are fed during the day, and the major part are well clothed. The beneficial effects of this charity are already confessed on all hands; principles of sobriety and devotion are instilled into their minds, and habits of regularity and peaceful subordination are enforced. From this class of boys the master tradesmen, mechanics, overseers, and even managers, are now supplied. A girl's school has also been founded, under the auspices of the At the central school, about 160 white children are Bishop; they are both favourite institutions, and the chief people in the colony spare neither pains nor

expense in strengthening or maintaining them. There is also a large school for coloured children, with coloured managers, established under the Bishop's superintendence; and several more have been opened by the Bishop, at the Government expense;—every colour are admitted—the only conditions being cleanliness and constant attendance. Instruction is gratuitous.

IX. The government of the island is constituted in a manner similar to that already described under Jamaica; namely, a Governor, a Legislative Council, and a Representative Assemby. The Governor's legislative authority is entirely negative, he can only recommend subjects for consideration to the Assembly, and his concurrence is required before any bill can become law; each concurrence, however, not being valid beyond three years, unless sanctioned by the royal confirmation. In his executive capacity the Government is entitled to nominate, and of course remove the officers of militia; the right, however, is seldom exercised beyond the choice of Colonels, who nominate their Lieutenant-Colonels, Majors, and Captains, who in turn appoint their subalterns. The Governor, with the consent of the Council, has power to dissolve the General Assembly, and to issue writs for a new election: with the concurrence of five members he may suspend any member of Council, unless it be an extraordinary occasion requiring secrecy, when his power is absolute, subject to explanation at home. If there be less than seven Members of Council resident in the island, the Governor may fill up the number (to twelve,) pro tempore, for the dispatch of As Chancellor, his Excellency has the custody of the great seal, and presides in the Courts of Error and Equity, in which courts the Judges being Council, he only sits primus inter pares, his vote or opinion being of no greater consequence than that of any other member. As Ordinary he takes probate of all testamentary writings; in cases of litigation establishes or annuls the will; and in default of executors appointed by the testator. His Excellency issues letters of administration according to the rules of law. As Vice-Admiral he issues his warrant to the Judge of the Vice-Admiralty Court to grant commissions to privateers. Barbadoes, St. Vincent, Grenada and Tobago, are consolidated into one general Government; and Antigua, Montserrat, St. Christopher, Nevis, Tortola and Dominica into another general Government; the former called the Windward Island Government, and the latter the Leeward Island, Lieutenant-Governors are oppointed to each; and Governor-in-Chief at Barbadoes and Antigua. The militia force is strong and well appointed; there are six regiments of several battalions each, together with a corps of life guards, and a numerous and brilliant staff. In 1666, Barbadoes had an effective military force of 20,000 infantry and 3,000 cavalry composed of the colonists.

X. The income is raised as in the other islands. The following was the Barbadoes' gross Revenue and Expenditure, in £ sterling from 1821 to 1830:—

		1	Expenditur	e
Years.	Revenue.	Civil.	Military.	Total.
1821	13127	16679	2592	1927

XII. There is no paper currency; and the amount of coin in the island is not ascertainable. The gold coins are, a doubloon=16 Spanish dollars; 1 joe=8 Portuguese dollars; a moidore=6 ditto. A silver dollar=10 bits. There are \(\frac{1}{4}\), \(\frac{1}{2}\), and 1-16th parts of a dollar. The weights and measures as in England.

N.B.—It is to be regretted that the Barbadoes Blue Books, like those of Jamaica, afford by no means the satisfactory documents to statistical science that the importance of the subject demands.

CHAPTER VII.—ST. LUCIA.

SECTION I. This very beautiful island is in lat. 13.50 N., long. 60.58 W., about 32 miles in length, from N. to S., and 12 broad, and contains 37,500 acres of land.

II. It was discovered on St. Lucia's Day, and first settled on by the English about 1635, since which period it has undergone various changes, being sometimes declared neutral, (as by the treaty of Aix-la-Chapelle.) next in the possession of the French, then captured or transferred to the British, and vice versa. By the treaty of Paris in 1763, St. Lucia was allotted to France; and Dominica, St. Vincent, Grenada, and Tobago to England; during the American war, in 1779, it was taken by the British, but restored to the French by the peace of 1783, it was conquered at the commencement of the French revolutionary war in 1794, evacuated in 1795, and retaken in 1796; by the treaty of Amiens it was restored to France in 1801, and recaptured by us in 1803. The detail of the hard fought battles for the acquisition of this isle would be out of place, it may suffice to state that the fortune of war, in 1803 finally left it an English colony, with a French population, manners, language, and feelings.

III. The first approach to this island, (which is divided longitudinally by a ridge of lofty hills,) from

the S. is very remarkable.

Two rocks, called Sugarloaves, rise perpendicularly out of the sea, and shoot to a great height in parallel cones, which taper away towards the summit. These mountains, which are covered with evergreen foliage, stand on either side of the entrance into a small but deep and beautiful bay. Behind this, the mountains, which run N. and S. throughout the island, rise in the most fantastic shapes.

When sailing along the shore the variety of scenery is exquisitely beautiful; the back ground continues mountainous, but every three or four miles appear the most lovely little coves and bays, fringed with the luxuriant cane-fields, and enlivened by the neatly laid-out mansions of the planters; while the flotillas

of fishing and passage, or drogher boats, with their long light masts and latteen sails, add life and animation to the scene. On the west coast there is an excellent harbour, called *Little Careenage* with three careening places, one for large ships, and the others for frigates. It is accessible only to one vessel at a time, (the entrance defended by several batteries) but capable of holding thirty ships of the line.

The plains throughout the island are well watered, and the mountains clothed with fine timber.

Castries, the only town in the isle, is situate at the bottom of a long and winding bay of the same name. The fort is situate on the summit of *Morne*fortune, which is about two miles of exceeding steep road, or path, from Castries.

Pigeon Island is six miles distant from the harbour of St. Lucia, and, in a military point of view, is of great importance to the colonies, being within a short distance of Martinique, and commanding a view of every ship that may enter or depart from that island: it is moreover valuable for a very fine and extensive anchorage between it and the N. part of St. Lucia. The isle is about half a mile in length N. and S. and a quarter broad, the side towards the sea (W.) is a perpendicular cliff, from the ridge or crest of which there is a gradual descent to the opposite shore, and level ground enough to erect a barrack for 500 men. A barrack and hospital has been constructed on this healthy spot, and it is one of the most salubrious that can be expected in a tropical clime. St. Lucia is divided into Basseterre, the low or leeward territory. and Capisterre, the high or windward territory. The former is well cultivated and most populous; but the climate is unwholesome from the abundance of stagnant waters and morasses. The latter division is also unwholesome, but it becomes of course less so as the woods are cleared away. Indeed the health of all tropical countries will be found to be in proportion to their cultivation.

luxuriant cane-fields, and enlivened by the neatly IV. In 1777 the island contained whites, 2,397; laid-out mansions of the planters; while the flotillas free coloured, 1,050; slaves, 10,752; total, 14,199.

The Slave Population, according to a Parliamentary Return, was in numbers, from 1816 to 1831, as follows:—

				Incre	ase by I	Birth.	Decre	ase by I	Death.	
Years.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Decrease by Manumission.

V. Churches, Livings, &c. in 1836 [B. B.] .- In Castries the population is about 150 souls. The value of the living is about 300l. sterling. The church will contain about 200, of whom from 20 to 60 generally attend. This church is Protestant.

In Castries also a population of 3382 Roman Catholics. The value of the living is not fixed. There is a Parsonage House allowed. The church, when finished, will contain about 800 persons. There is also a small house serving as a chapel, which will contain about 250 persons.

Soufriere-Population about 3517 Roman Catholics. Value of living, 5,000 livres per annum. The church is generally full.

Vieux Fort-Population 1094 Roman Catholics. Value of living 6,000 livres sterling. There is a Parsonage House allowed, to which is attached 18 acres of uncultivated land. This church will contain about 200 persons. The foregoing is taken from returns received from the curates of the different parishes.

VI. Schools of St. Lucia in 1836 [B. B.] .- Castries. -A National School, containing 41 male scholars. The mode of instruction is the plan generally pursued in National Schools. The Master receives a salary of 501., paid by the Bishop of the Diocese, and the rent of the school room is paid by voluntary subscriptions until a house can be erected.

Soufriere.-A National School, containing 24 male and 8 female scholars. (Mode of instruction as above). The Master receives 40l. sterling, paid by the Bishop of the Diocese, and the rent of the school room is paid by voluntary subscriptions.

Gros-Islet .-- A National School, containing seven male scholars. The Master receives 40l. per annum from the Bishop of the Diocese. (Mode of instruction as above). The officiating Minister of St. Lucia at present bears the expenses of this school, which has been established but a short time. [There are no. other returns in the B. B.]

VIII. The inhabitants have their affairs administered by a Governor and Council, with French laws, where they are not adverse to the British.

St. Lucia Militia in 1836.—Northern Battalion: Regimental Officers—1 Lieutenants-Colonel; 1 Major; 9 Captains; 10 1st. Lieutenants; 9 2nd. Lieutenants; 5 Staff Officers—1 Pay-Master; 1 Sergeant-Major; 2 Assistant Surgeons; 1 Adjutant; 1 Quarter Master. Staff Sergeants—1 Sergeant Major; 1 Assistant Serjeant Major; 1 Quarter Master Sergeants; 14 Buglers and Drummers; 494 Rank and File. Southern Batt.—Regimental Officers—1 Lieutenant-Colonel; 2 Majors; 8 Captains; 8 1st. Lieutenants; 8 2nd. Lieutenants. Staff Officers—1 Pay-Master; 1 Surgeon; 1 Adjutant; 1 Quarter Master; 1 Sergeant-Major; 22 Sergeants; 16 Buglers and Drummers; 447 Rank and File.

The Expenditure of the Militia consists in the payment of contingencies; viz:—Companies; Drummers; Buglers and Fifers; Camp Colour; Adjutant Allow-

ances for Stationary, &c. These expenses are paid from a fund established in each Battalion; which is created by the payment of Fines on absentees from Parade; and the fees of Officers' Commissions. The Army, and accourtements of Soldiers are furnished by Government. The Soldiers pay for their own clothing, and those that are unable to pay, the Colony provides for them.

The forces of the Alien Corps, which is composed of Martinique Refugees, consist of 1 Captain Commanding; 5 Lieutenants; 15 Sergeants; and 369 Rank and File. This Corps is unarmed, it not being considered advisable to place arms in their hands; they clothe themselves, and are no expense to the Colony. (From B. B. for 1836, page 45.)

IX. The income is derived from custom duties, a capitation tax, licences, fines, stamp duties, &c. The poll tax is 20 livres on all adults between the ages of 16 and 60.

XI. Accounts are kept in pounds, shillings and pence: but the value of the circulating medium is thus stated:—12 deniers = 1 sol; 2 sols and six deniers= 1 dog; 6 dogs or 15 sols = 1 bit; 8 dogs, or 20 sols 1 livre; 9 livres = 1 current dollar: 10 livres = 1 round dollar; 20 livres = one pound currency. There is no paper money in circulation.

The Weights in use are the French pound and quintal; the pound = 2 marc (Paris); the marc = 8 oz.; the oz = 8 gros = the gros = 72 grains; the quintal = 100 French lbs.; the French lbs. = 17 oz. 9 dr. English; quintal of 100 French lbs. = 109 English.

The Measures are (land or square measure); the carré, containing 3 acres, 78 perches, 28 feet square (Paris measure) or 10,000 square paces; the acre = 100 square perches, or 2,644 paces, 11 feet; the perch = 26 paces, 5 feet, 72 inches square, or 9 square toises; the square toise = 36 square feet, or 2 paces, 11 feet, 72 inches square; the square pace = 12 square fcet, and 30 square inches; the square foot = 144

The principal articles of export, from 1822 to square inches; the square inch = 144 square lines, Long measure: the toise = 6 feet French; the foot = 12 inches; the inch = 12 lines; the French foot =12 and 2-3rd inches British. Cloth measure: the aune or ell = 3 feet 8 inches; and it is subdivided into one-half, one-third, one-fourth, and one-eighth; the ell = 1 yard 10g inches. Wine measure: gallon = 2 pots; 1 pot = 2 pints (Paris measure), 1 pint = 2 chopines; 1 chopine = 2 roquils; 1 roquil = 2 muces. Dry measure: the barrel = 44 quarts, or 55 pots; the half barrel = 27 pots; the quarter ditto = 13% pots; the half quarter ditto 6 7-8th pots. XII. The number of stock in the island is, horses

578 horned cattle, 2,239; sheep, 1,741; and goats, 594. The quantity of agricultural produce in 1831 was, sugar, 5,561,815 hogsheads; coffee, 149,571 hogs-

heads; cocoa, 33,515 hogsheads; rum, 90,687 galls.; molasses, 224,700 gallons. The number of acres of land under each crop was-in sugar canes, 4,752; coffee, 696; cocoa, 316; provisions, 4,049; pasture, 4,685-total, 11,321; leaving uncultivated -acres. 26.134.

Prices of Produce and Merchandize in 1836 .-Horned cattle, 131. each; horses, 251.; sheep, 15s. goats, 10s.; swine, 1l. 10s.; salt butter, 4l. 10s. per firkin; cheese, 10s.; beef, 6l. per barrel; mutton, 1s. per lb.; pork, 7l. per barrel; rice, 1l. 5s. per 100 lbs.; coffee, 4l. per ditto; tea, 6s. per lb.; sugar, 6d. per ditto; salt, 9s. per barrel; wine, 12s. per dozen bottles; tobacco, 3l. 10s. per cwt.

Wages for Labour -Domestic, 2s. per day; prædial. 2s. per ditto; trades, 3s. per ditto.

Return of the Produce, Stock, &c. of St. Lucia in 1836. [B.B.]

CHAPTER VIII.—DOMINICA.

SECTION I. The island of Dominica is situated in 15.25. N., 61.15. W., about twenty-nine miles in length, and sixteen in breadth, and containing 275 square miles, or 186,436 acres.

II. Dominica was the first land seen by Columbus on his second voyage, after having been 20 days at sea from the Canaries: it was made on Sunday, the 3rd. of November 1493, and so named by the great navigator; but its right of occupancy was claimed by the three kingdoms, of England, France, and Spain. right of possession remained undecided, and Dominica was considered a neutral island by the three crowns, till the year 1759, when, by conquest, it fell under the dominion of Great Britain; it was afterwards ceded to England by the treaty of Paris, February 1763. On the cession of the island to the English, commissioners were appointed under the great seal, and sent out there with authority to sell and dispose of the lands by public sale, to English subjects in allotments of not more than 100 acres of such land as was cleared; and not exceeding 300 acres of woods to any persons who should be the best bidder for the same.' These allotments were disposed of for the benefit of the crown, and were confirmed to the purchaser by grants, under the Great Seal of England, with conditions in each grant, 'that every purchaser should pay down 20 per cent. of the whole purchase money, together with sixpence sterling per acre, for the expence of surveying the land; and that the remainder of the purchase money should be secured by bonds, to be paid by equal instalments, in the space of five years, next after the date of the grants. That each purchaser should keep on the lands, so by him purchased, one white man, or two white women for every 100 acres of land, as it became cleared, for the purpose of cultivating the same. Or, in default thereof, or non-payment of the purchase money, the lands were to be forfeited to His Majesty, his heirs,

t.

and successors.' The commissioners were also empowered to execute leases to the French inhabitants, of such lands as were found in their possession on the surrender of the island; which lands were again leased to those inhabitants, who were desirous of keeping them in possession, on consideration of their taking the oaths of allegiance to his Britannic Majesty.

These leases were executed for a term not less than seven, some 14 years, and others for 40 years absolute, renewable at the time limited for the expiration of the same. With conditions in every lease, 'That the possessor, his heirs, or assigns, should pay to his Majesty, his heirs, or successors, the sum of two shillings sterling per annum, for every acre of land of which the lease should consist. And that they should not sell or dispose of their lands without the consent and approbation of the Governor, or Commander inchief of that island for the time being.' The Commissioners were likewise empowered to make grants, under the Great Scal of lots to poor settlers, to such English subjects as should be deemed fit objects of his Majesty's bounty, in allotments of not more than 30 acres of land to any one person. With authority also, to the said commissioners, to reserve and keep such lands, in the most convenient parts of the island as they should think proper, for fortifications, and the use of His Majesty's army and navy; together with a boundary of 50 feet from the sea shore, round the whole island; and reserving all mines of gold and silver, which might thereafter be discovered there, for the use of his Majesty, his heirs, and successors.

By these measures 96,344 acres (half the island,) were disposed of in lots of from 50 to 100 acres, which produced 312,090*l*, sterling. The prosperity of the island rapidly increased under a system of free trade; but the happiness of the inhabitants was interrupted on the capture of the island, by a large French

force, from Martinique, under the Marquis de Bouillé. I in 1778, after a gallant resistance on the part of the British colonists, by which they secured for themselves highly honourable terms; these advantages were, however, frustrated by the tyranny and rapacity of the new French Governor, the Marquis Duchilleau, whose memory is deservedly held in the deepest scorn. After five years, our colonists were rejoiced on the restoration of the island to England at the peace of 1783. During the war of 1805, a devastating descent was made on the Island of Dominica by a formidable French squadron; and although Roseau, the capital was burned, the colony was preserved to Great Britain by the skill of Sir George Prevost, and the gallant behaviour of the colonists. The island has ever since remained under the dominion of Great Britain.

In 1802, the 8th W. I. (black) regiment mutinied took possession of the Cabrites, and from the lower fort opened a fire on H. M. S. Magnificent, then at anchor in Prince Rupert's bay. The marines were landed, joined the royal Scotch and 68th regiments, and, after two days skirmishing, the 8th W. I. was subdued with great loss.

III. Dominica is one of the volcanic isles of the West. with lofty rugged mountains, and fertile intervening valleys, watered by about 30 fine rivers, and numberless rivulets, springs, and waterfalls, which descend with great impetuosity from the hills, and, under the umbrageous canopy of lofty and magnificent forests, form the most romantic cascades. The height of the elevations have been thus noted :-- Morne Diablotin, or Terre Firme, 5,314 feet above the sea; Laroche, 4,150; Coulisboune, 3,379; Outer Cabrite, 542; Inner ditto, 430; Morne Crabier, 485; Morne Bruce, 465; Daniole, 329. The heights of the forts and batteries are Scots' Head, 231 feet; Melville's, 147; Magazine Bat. 320; Hospital ditto, 440; Fort Young, 440; Fort Shirley, 153; Barracks at Douglas Bay, 126; Grand Savannah, 170; Layon, 160. About six miles from Roseau, almost in the centre of the island, and on the top of a very high mountain, surrounded by other more lofty hills, is a large lake of fresh water, covering a space of several acres, and in some places unfathomable; it spreads into three distinct branches, and has a very extraordinary appearance. Roseau, the capital, is situate in the parish of St. George, (about seven leagues from Prince Rupert's Bay), on a point of land on the S.W. side of the island, which point forms two bays—Woodbridges to the N. and Charlotteville to the S. 'The landscape behind the town is beautifully grand; indeed the whole prospect from the edge of Morne Bruce, a lofty table-rock occupied by the garrison, is one of the very finest in the West Indies. The valley runs up for many miles in a gently inclined plane between mountains of irregular heights and shapes, most of which are clothed up to their cloudy canopies with rich parterres of green coffee, which perfumes the whole atmosphere, even to some distance over the sea; the river rolls a deep and roaring stream down the middle of the vale, and is joined at the outlet of each side ravine by a mountain torrent, whilst at the top, where the rocks converge into an acute angle, a cascade falls from the apex, in a long sheet of silvery foam. Beneath, the town presents a very different appearance from what it does at sea; the streets are long and spacious, regularly paved, and intersecting each other at right angles; there is one large square, or promenade ground, and the shingled roofs of the houses, tinged with the intense blue of the heaven

above them, seem like the newest slates, and remind one of that clear and distinct look which the good towns of France have when viewed from an eminence.

The roadstead of Roseau (it can scarcely be called a harbour) is very capacious and safe, except in the hurricane months, (from the end of August to October), when the sea, from the southward, tumbles into the bay in a terrific manner, sometimes rising to an alarming height. On the last day of September, 1780, the sea suddenly rose to the height of 21 feet perpendicular above its usual level, destroying several houses in front of the beach and wrecking many vessels. The fortifications of Roseau, namely Young's Fort, Melville's Battery, Bruce's Hill, and Fort Demoulin, are very strong and commanding positions. Prince Rupert's Bay, on the N. W. of the island in St. John's parish, is three miles broad, one and a half deep, and safe and commodious enough for the whole British navy at all seasons: it is surrounded by two high mountains, called the Cabrittes, the inner of which is about 500, and the other 600 feet in perpendicular height, both out of the reach of any other elevated land. Fort Shirley lies betwen the two Cabrittes, with a rich plain of 100 acres in extent at its base, and in time of war the fortifications on these heights might be rendered as strong as Gibraltar. The grand Savanna, nine miles from Prince Rupert's Bay, and twelve from Roseau, is a fine fertile elevated plain, upwards of a mile in extent, and at a good distance from the neighbouring mountains, whose terraces jut out from their breasts: around whose declivities flourish the richest verdure, while murmuring cascades of babbling brooks, burst through the luxuriant vegetation, or roll along the hilly avenues, surrounded by magnificent piles of rocks, sometimes black and bare, sometimes green, with countless traceries of lovely creepers, interspersed with gigantic ferns and lofty palms.

IV. Dominica, is volcanic: the soil in some places is a light brown coloured mould, which appears to have been washed down from the mountains, mixed with decayed vegetable matter. In the level country, towards the sea coast, and in many districts of the interior, it is a fine, deep, black, mould, peculiarly adapted to the cultivation of the sugar cane, coffee, cocoa, and all other articles of tropical produce. The under stratum is a yellow, or brick clay, in some parts; in others, it is a stiff terrace, and frequently very stoney. Large quantities of excellent freestone have been quarried in the Savanna, and at one time it formed an article of export to Guadaloupe and elsewhere.

Several of the mountains of this island are continually burning with sulphur, of which they emit vast quantities. From these mountains issue various springs of mineral waters, (whose virtues are extolled for the cure of many disorders) which in some places are hot enough to cook an egg in less time than boiling water. The sulphureous exhalations from these springs are very strong, often too intensely penetrating for continued respiration, while the soil, or sulphur and sand, around them in the Souffrieres, is too hot for the feet, and scarcely firm enough to tread upon. Owing to the dense vegetation of the island, and the general apathy of W. I. planters for any thing but sugar and coffee, we know nothing further of the geology of Dominica. It is stated that gold and silver mines exist, and that the latter metal was at one time to be found in abundance.

V. The following thermometrical register is for Roseau, the capital (lat. 15.18. N.; long. 61.22. W.); but in the interior and on the mountains the heat is much reduced, and indeed so cold as to render woollens indispensable for body clothing and bed covering.

	THE	THERMOMETER.	ETER.		
MONTHS.	Max.	Med.	Min.	WINDS.	REMARKS.

September	87	80	74	S. and S.E.	Generally fair, rain.
October	86	80	75	N.E. to S.E.	Cloudy and fair ditto.
NT					

The wet season commonly sets in about the end of August, and continues till about the beginning of January, but with frequent intervals of fine weather. The severity of the rainy season is usually in the months of September and October, when very heavy continual rain falls for days together; sometimes for two or three weeks. The island, indeed, is seldom without rain in some part or the other; and often, during a promising day, the traveller meets with such sudden and heavy showers, that almost in an instant wet him to the skin, in spite of either umbrella or great coat. When the rains are violent and of long continuance, they do great mischief in the island among the plantations, carrying away large tracts of land, with coffee, plantain trees, sugar canes, and ground provisions, which are all hurried into the sea. To the towns also they do great damage, causing the rivers to overflow their banks, or breaking out in fresh places, sweeping off houses, or whatever else stands in the way of these destructive torrents.

Thunder and lightning is seldom so severe in Dominica as in many parts of the West Indies; neither are earthquakes so frequent or so destructive. It has been asserted, that soon after the English first took possession of the island, it was split in several places by one of those awful convulsions of nature; and in particular, a large chasm was made in a mountain

called Demoulins, so deep, that, although it was several times attempted, it never could be fathomed; the traces of this remarkable circumstance have, however, long since disappeared.

VI. Dominica, in 1692, contained 938 Caribs, and 349 French occupied the part of the coast which had been abandoned by the natives, and which they cultivated by the aid of 23 free mulattos, and 338 slaves. At the peace of 1763, the island contained 600 whites, and 2,000 blacks; in 1773, 3,350 whites, 20,000 negroes; and, in 1788, the population consisted of 1,236 whites; 445 free negroes; and 14,967 slaves. Total, 16,648. In 1792, the negroes were—males, 6,438; females, 5,214; male and female children, 4,462; total, 16,244. In 1798, the number of slaves was 14,967. In 1805, 1,594 whites, 2,822 free coloured, 22,083 slaves.

The slave population since 1817.

VII. Churches, Livings, &c. [B.B.]—A church in the town of Roseau, parish of St. George, capable of containing about 400 persons, of whom from 100 to 200 generally attend: value of living, 240l. sterling, and 60l. per annum allowed for parsonage-house. A chapel school at St. Joseph's, accommodating about 150 persons, of whom 40, chiefly children, generally attend. There are also two dissenting places of worship in the parish of St. George; one in St. Joseph, and one in St. Andrew's.

VIII. Schools in 1836. [B. B.] Three public or free schools in Roseau, 60 male scholars (supported by the bishop of the diocese); one infant school, 60 female scholars; one ditto, with 47 male and 33 female scholars (supported by voluntary contributions. A house, which has recently come into possession of the [colony, has been granted by the Legislature to the Dominica District Committee for the use of the schools). One public or free school in the town of St. Joseph, 22 male and 15 female scholars (supported by the Bishop of the diocese).

X. There is a Lieut.-Governor, a Legislative Council of eight, an Executive, a Council of 12, and a Representative Legislative Assembly of 20 Members. The general business is managed as in the other colonies. The militia in 1836 consisted of 10 Lieut.-Colonels; 3 Majors; 17 Captains; 21 Lieutenants; 8 Ensigns; 1 Surgeon; 1 Quarter Master; 54 Serjeants; 13 Drummers; 864 Rank and File; Total, 1092. An excellent body of men.

The laws in force in the island are the common statute law of England, so far as is applicable to circumstances; acts of parliament declared or manifestly intended to apply to the island, or to the colonies in general; and the acts of the island house of assembly, when not repugnant to the laws of Great Britain and sanctioned by the crown. The courts of civil jurisdiction are those of chancery, common pleas, complaints, error, admiralty, and the merchant court.

This latter court was revived and regulated by the law of Dominica, number 74, passed in 1817. It is a court of record, and the process and proceedings are conformable to those of the court of common pleas. The complaint court is for the recovery of debts, up The court of common pleas consists of a to 25l. chief and four other judges. The court of grand sessions of the peace consists of the Lieut.-Governor (not being commander-in-chief), the Members of Council, the Speaker, and all the Justices of the Peace who are Members of the House of Assembly. The Chief Justice presides, and the other judges seldom interfere. The court sits twice yearly. Any three ' Justices of the Court (being Members of Council) may at any time take bail, as in the English Court of King's Bench. The preceding and the Court of Queen's Bench have alone criminal jurisdiction in the

XI. The revenue is raised generally as in the other West Indian colonies.

* The diminution between 1832 and 1833 must have been owing to the cessation of a parliamentary grant for military protection. There is a local assessment of $2\frac{1}{2}$ per cent. on the rental of houses in Roseau, which produces £300 per annum. There is a paper currency of 2,000 dollars =£360 sterling, in notes of two and four dollars each, payable in coin on demand at the Colonial Treasury. The amount of coin in the island is not ascertainable.

Recapitulation of the Establishment.—Paid by Great Britain in sterling money: Civil Establishment, 2600l.; Judicial Establishment, 1800l.; Ecclesiastical Establishment, 180l.; total, 4580l. XII. Dominica is one of the best watered of the | and the cabbage part of them is excellent eating; Caribbee islands, and, with its rich soil, may be naturally expected to have a luxuriant vegetation. The woods afford a large supply of excellent timber, consisting of locus-wood, bully-tree, mastic, cinnamon, rose-wood, yellow-sanders, bastard-mahogany, iron wood, several species of cedar, and various other sorts useful for building houses, vessels, and canoes, -for furniture, for dyeing, and other necessary pur-The trees are of uncommon height, and by far exceed in loftiness the tallest timber in England; their tops seem to touch the very clouds, which appear as if skimming swiftly over the upper branches. Many are of enormous girth; and the seeds of different trees, being scattered by the wind, fall into the heart of the same plant, and thus become incorporated with the tree on which they are seen growing. The circumference of the body of the gum-tree is generally very great, and its timber is, on that account, made into canoes, by digging or burning out the inside, and shaping the log into form. The gum falls from the body and branches of the tree in great quantities, in substance like white wax: it was found very serviceable to the planters of that island, during the time it was in the possession of the French; the gum being used instead of oil (which could not then be had) to burn in lamps in boiling-houses when making sugar. The Romish priests of Dominica use it likewise in their censers at funerals, and other ceremonies of their church, on account of its delightful aromatic smell when burning. It is supposed to contain virtues which might be valuable in medicines, were they better known.

The timber also of this tree, as well as that of several others in the woods, make good shingles for covering houses, and staves for sugar and coffee casks. Several fine sloops and schooners have likewise been built here, and esteemed for their strength and durability. Cabbage-trees are in great plenty, and serviceable, as their trunks, sawed or split, make good leths or rails for cettle-pens, being very durable. The laths or rails for cattle-pens, being very durable. branches and leaves are used for thatching of houses;

when boiled, it tastes much like the bottom part of an artichoke. It also makes a good pickle.

The size of the ferns, whole forests of which are

found in the dips and recesses of the hills, is very remarkable; some of them rise to the height of 25 feet, with their branches as finely pinnated, and their colour as vivid and fresh, as the dwarfish and lowly, but lovely, English fern. In 1792, there were 31,695 acres in actual cultivation; 26,770 acres adjoining, and 30,175 acres partly cleared. There were 52 sugar and 291 coffee estates. The value of the landed property and buildings thereon was 3,100,000l. sterling.

A part of the crown lands, admirably adapted for cultivation, consists of a large run of woodland, known by the name of the Lazon Flats, extending across the island to Paguon or Commissioners' Bay, and comprising a surface of 20,000 acres, covered with the most valuable and durable timber, nearly on the same level, and watered by a great number of small streams, forming the Mahout and Lazon rivers on the W. side. and the Quanary and Pagoua rivers on the E. of the island. This land is stated by the intelligent Surveyor-general of the island, Mr. Finlay, to be admirably adapted to the cultivation of cocoa, coffee, and all Indian island.

kinds of provisions. Large pastures might easily be formed for cattle: its elevation above the level of the sea is from 800 to 1000 feet; the general temperature 68 to 75 Farenheit; and there are no local impediments but a want of funds, or it may be said of population, to demonstrate the advantages which would arise from Europeans colonizing this delightful West

CHAPTER IX.—ANTIGUA.

17.3 N. long. 62.7 W. 40 miles N. of Guadaloupe, 25 N. E. of Montserrat, 30 S. of Barbuda, extending in parallel lines from Friar's Head in the E. to Peyrson's Point in the W., 153 miles; containing from Shirley's Heights in the S. to Boon's Point in the N. 111 miles, being about 20 miles long, about 54 in circumference, and containing 108 square miles, equivalent to 69.277 acres.

II. Antigua was discovered by Christopher Columbus, on his second voyage, in 1493, and named by him, from a church in Seville, Santa Maria de la Antigua. Next to Barbadoes and St. Christopher it is the oldest British colony in the leeward isles, having been settled by Sir Thomas Warner, with a few English families in 1632. Antigua was granted to Lord Willoughby, of Parham, by Charles II, in 1663. In 1666 a French armament from Martinique and Guadaloupe, assisted by some Caribs, got temporary possession of the island, and plundered the planters unmercifully. By the treaty of Breda, the island was in 1688 finally settled under the British dominion, and by means of free trade, and beneath the auspices of the Codrington family, rapidly prospered.

III. Antigua is nearly of an oval shape, with an extremely irregular coast, indented with numerous bays, and almost surrounded by islets, rocks, and shoals, which render the approach to it very dangerous on every side except on the S. W. More than one half of the island on the N. E. is low, in some places rather marshy, and interspersed with gentle acclivities and swelling eminences, which, if less denuded of trees, would present the beautiful hill and dale scenery of England. Towards the S. and S. W. the elevation of the land gradually increases, forming round backed hills of a moderate height, generally running E. and W. intersected by cultivated valleys, and partially clothed with small trees and brushwood. The greatest elevation (computed at 1210 feet) is on the Sheckerley range of mountains, called Boggies Hill, about six miles to the W. of Monks Hill. The highest district may be said to take its rise from Falmouth, and to continue with various clevations to Five Island Harbour. The height to the N. E. and S. W. is not considerable, but on the latter part the hills are occasionally bold and precipitous, forming numerous ravines and vallies, their summits being extremely irregular, sometimes round, - at other times conical, and occasionally tabular; the rest of the island may, as a general feature, be said to consist of broad slopes, and repeatedly occurring undula-

No island in the W. Indics can boast of so many excellent bays and harbours, but they are all, except

SECTION I. This fertile island is situate in lat. | those of St. John, English Harbour, and Falmouth. (which require pilots) difficult of access. The other bays and harbours are St. Freeman's (at the entrance of English Harbour), Rendezvous Bay, Morris Bay, Five Island Harbour, Lydesenfis Bay, Parham, Non-such, and Willoughby harbours, and Indian Creek, contiguous to Freeman's Bay. St. John's, the capital, is irregularly laid out, pretty large, and built on the N. W. side of the island, at the head of a large but not deep harbour, the N. side of which is partly formed by an elevated rock, called Rat Island, about midway up the harbour, and connected with the main land by a causeway, which is submerged at highwater. From St. John's to the extreme N. and N. E. of the island the land is generally very low, inter-spersed with numerous ponds and marshy hollows; but, with these exceptions, the surface of the whole is sufficiently varied to prevent the accumulation and stagnation of water on its surface. Monks-hill (a military station) gradually rises from the bottom of Falmouth Bay, and, as it ascends, becomes precipitous till surmounted by Great George Fort, at the height of 625 feet, commanding to the N. and N. E. an extensive view of a highly cultivated country, overlooking the bay below the peninsula of Middle Ground, English Harbour, and the Ridge, whilst in the distant horizon are to be seen Guadaloupe, Montserrat, and in clear weather Nevis and St. Christo-English Harbour is a very complete dockpher. yard, on a small scale, surrounded by hills, on one of which at the N. E. the naval hospital is situate. With the exception of a few scanty rivulets amongst the hills, the whole island is destitute of running water, and the wells, heretofore dry, have proved brackish; ponds, and tanks are, therefore, the mainstay of the planters. The plan of boring for water should be adopted.

IV. The soil of the high lands is of a red clay, argillaceous, with a substratum of marl; in the low lands it is a rich dark mould, on a substratum of clay. The most superficial strata occupy the N. and E. parts, and are of a calcareous formation, and the outline of the district is in round hills and knolls, similar to those found in the chalk districts of England. Through the stratum of marl which appears on the surface run layers and irregular masses of limestone, containing a variety of fossil shells, nodules of calcareous spar, cellular and chrystalized quartz, chalcedony, agate, and coral-lines, both in a calcareous and silicious state. A calcareous sandstone is also found in this marl formation, composed of silicious particles, carbonate of lime, and a little oxyde of iron. A breccia also frequently appears, consisting of an agglutination of fragments of different coloured porphy-

ries. No bones of the larger animals have been found in this formation. The coarse chert, or flint, is seen in irregular masses on the surface, breaking into sharp angular blocks, and containing a great quantity of petrified wood and casts of shells. Petrified wood is also found on the surface of the conglomerate and marl formations, often so delicate and beautiful, that the colour of the wood and the distinctive form of its fibre are perfectly preserved. Agate, cornelian, and chalcedony, are frequently seen intermingled in the same specimen. Nitrate of potass, like a hoar frost, covers the flat oozy shore which bounds the bay of Falmouth on the N. and E. On a general view, the geological formation of the island may be said to consist of marl, conglomerate chert and trap. Marl forms the greater part, and extends over the whole N. and N. E. part; trap, the S. W.; conglomerate, an intervening section, extending inland from St. John's Harbour, and chert, embracing a section with the latter segment. Dr. Nugent divides the island into four distinct classifications. The range of mountains, or rather highlands, in the S. W. quarter, consisting of unstratified conglomerate, composed of masses of trap, breccia, wacke, porphyry, greenstone, &c. which are embedded in a clay matrix with brownish decomposing chlorite baldagé. Parallel with this range inland, a different formation appears, consisting of a claystone conglomerate, containing silicified wood, coralline chert, agate, amygdaloid, porphyry slate, bloodstone, &c. in a matrix of an intense green colour. The N. and E. districts have a calcareous formation subordinate to the lowest beds, of which, and nearly in the centre of the island, are extensive irregular masses of coarse chert, containing a prodigious quantity of casts of shells. The fossils and petrified woods found in Antigua, when polished, are exquisitely heautiful.

V. Owing to the elevation of the land, and the absence of dense and lofty woods, visible in Jamaica, Dominica, &c., the climate of Antigua is dry, and the rainy season so uncertain, that sometimes a great part of the hurricane season passes away without rain. The dry season generally commences in January, continuing to April or May, and from June to the end of the year the rains are usually abundant. In consequence of the dryness of the climate, the temperature is less subject to the variations observed in the other islands; heavy dews are not often experienced, and the thermometer seldom ranges more than 4 degrees in the 24 hours. On the ridges, or hills, the temperature is considerably modified by the sea breezes, or trade winds, which occasionally shift a few points to the N. and South.

A meteorological table for 1836 shewing an annual medium of temperature of 79.68, and a total annual fall of rain of 35.58. The most severe huricanes were those of 1681, 1707, 1740, 1772, 1780, and 1792. A dreadful earthquake occurred in 1689, and committed great destruction in Antigua.

Meteorological Table.—From a journal kept in St. Peter's parish, in latitude 17 deg. 8 min. N. longitude 61 deg. 48 min. W., from 1st. December, 1833, to 1st December, 1834.

VI. In 1673, the number of negroes in the island was 570. In 1707, whites, 2,892; negroes, 12,892. In 1720, whites, 3,672; negroes, 19,186. In 1724, whites, 5,200; negroes, 19,800. (Militia, 1,400.) In 1729, whites, 4,088; negroes, 22,611. According to the Abbe Raynal, the white inhabitants of Antigua, in 1741, amounted to 3,538, and negroes to 27,416. In 1774 the whites were 1,590 and the negroes 37,808. In 1787, whites, 2,590; free coloured, 1,230; slaves, 20,435. In 1788, the taxed negroes were 36,000. In 1798, the taxed negroes were 37,808. Colquhoun computed the whites, in 1815, at 3,200, the free people of colour, 1,200, and the slaves at 36,000. In 1821 the male slaves were, 14,531; females, 16,533-Total, 31.064. The number of white men liable to serve in the militia, from 14 to 59 years old, 877; of white females and children, 840; of white males, under 14 years, 235; number of coloured and black men, liable to militia service, between 14 and 59 years, were 881: of coloured and black females, including children, 2,346; ditto males, under 14 years, 622. Discharged and pensioned soldiers, 9; of African apprentices, 278; of white men, exempt from militia duty over 60 years old, 46. Grand total, 6,162.

Note.—These returns would appear to be for the established church alone, except in marriages.

The average population to the square mile in Antigua may be taken at 334. The greatest bulk of the population is employed in agriculture; there are none employed in manufactures, excepting of sugar, molasses, and rum. There has been no census of the population since 1821. The disproportion between the burials and the baptisms is accounted for from the circumstance, that many of the Wesleyans bring their children to the church to be baptized, but generally inter their own dead. The population may be estimated at 35,300 persons.

Antigua totally abolished slavery in August, 1834, without waiting the intermediate apprenticeship, as in the other slave colonies. Every fact, therefore, relative to the island must prove interesting. It will be perceived that the tables of education and religion are very complete. All accounts agree in a favourable representation of the progressively improving moral character of the negroes. Their physical condition is not deteriorated; and the value of property in the island has risen.

A statement of the number of Slaves for whom compensation has been claimed, and of the number of claims preferred for such compensation, and of the amount of compensation awarded in each of the classes of prædial-attached, prædial-unattached, and non-prædial. [Parliamentary return to the House of Lords, March, 1838.]

- * There has been no change in the parochial division in the island for more than 100 years.

 † Re-opened, after repair and enlargement, on 1st January, 1837.

 † This chapel has lately undergone considerable repairs in consequence of the hurricane of 1835.

The amount of population given in this return appears to be in a great measure conjectured; there being no recent census to refer to. St. George's church has been enlarged this year, at the expense partly of the parish and partly of the Society for the Propagation of the Gospel in Foreign Parts.

Fees to the Clergy.—The vestry assembles, when the acting churchwarden lays before them an estimate of the ways and means for the year. The number of acres and of slaves in the parish show the amount of the tax on each. This amount, with all items, is settled by the majority; the churchwarden delivers the accounts and collects the money. One of the principal disbursements is the minister's salary; about 2001. sterling is provided by an act of the island, and it is customary for the vestry to make a volun-

tary addition to it, generally from 60% to 100%. per annum. This, with a parsonage house, and sometimes a horse, is sufficient to make a clergyman comfortable; and the minister is under the necessity of avoiding conduct which would be offensive to his parishioners, while a portion of his income depends on the good will of his flock. The salary of the clerk is also on a liberal scale, being from 751. to 1201. per annum; he acts as vestry clerk in keeping the accounts and collecting the taxes. The surplice fees are liberal; three guiness is a common fee to a clergyman, and not unfrequently one guines and a half to the clerk, as a wedding fee. This, with 31. 13s. 6d. to the governor for a license (few white people being married by banns), makes matrimony an expensive business. [B.B.]

St., steeled as a school, spenking generally, is that and heave of each server with the allowance.

of the Wesleyans and Moravians, there are about eight private schools; at one of which, eight poor girls are boarded and educated at the expense of the parish of St. John. None in St. Paul's, St. Peter's, St. George's or St. Philip's, but one for the more wealthy in the parish of St. Mary.

The national school houses belong to the Christian Faith Society; books for the schools generally, are supplied by a district committee of the Christian Knowledge Society, and the Ladies' Association in England. The publicly endowed central schools in Gilbert, are supported entirely by himself. The as-

Private schools: besides those under the direction | St. John's Town, ceased to exist in August last, when the Act by which they were established expired; they have since been restored with some changes, but were not re opened until January 1837. St. Paul's, which is used also as a temporary chapel-of-ease; the infant school-house at English Harbour, is lent by the hon. Lady Guy, and the infant schools are supported partly by a grant of 25*l*. sterl. from the Ladies Association in England, partly by local contributions, partly by assistance from the Christian Faith Society. St. Peter's; the schools on the estates of the Rev. N.

sistance received from the local, or branch association of the Christian Faith Society, in 1836, amounted to nearly 201. sterl.; but besides this, the assistance given to each separate school by private individuals in the loan of houses, allowances of provisions, &c. would, if calculated, amount to a considerable sum. The principle of small payments from the scholars, has been tried with some, but not general success. In the national schools in St. John's Town, the sum of about 20 guineas, or rather more, was thus received in 1836, by payments from the senior classes of threehalfpence, sterl., and from the junior of half that sum weekly. In some, also, of the rural schools, the plan has succeeded. It will probably become general by degrees. The total number under school instruction, by this return, is less than by the last; there has been a falling off of about 200, or about one in eleven; which may be accounted for from various incidental causes, but chiefly from the temporary failure of certain pecuniary supplies, on which the remuneration of the teachers depended; these supplies are now returning, and the schools in consequence are beginning to flourish again. Besides regular schools, there is also much desultory instruction going on, by means of which, individuals unnoticed in the parochial returns, are learning to read on estates, at the intervals of their work, from their acquaintance or friends or some private teachers. On the whole, education is spreading in Antigua, as fast, probably, as is desirable. More excitement might unsettle the moral and industrious habits of the people and give rise to discontent, though there is still room for the quiet and

gradual extension of Christian instruction, so that all may read the scriptures and worship the supreme Being intelligently.

There is a very general countenance of religious instructors and instruction in most of the islands, and

in Antigua particularly.

There are Sunday and infant day schools carried on by the Church of England, the Moravians and the Methodists. The majority of the clergy are intent on the great duties of their calling: of the missionaries too much can scarcely be said. A too rigid adherence to high church principles has done much injury to the establishment, and exhibited the inadequacy of the episcopal system to the religious requirements of the slave population. The abandonment of the West Indies by the Church Missionary Society, has been of essential disservice; still there is much doing by exemplary and devoted men in the establishment, by going about on the estates, and preaching in the negro houses in a truly missionary spirit. The appointment of assistants or helpers (called by the negroes "Godfathers,") to exercise a certain surveillance over their flocks on the plantation, has tended very much to give effect to their ministrations. By these and other means, the character of the negroes has been much improved, and their outward attention of religion greatly increased; add to this, the refusal of all the ministers and missionaries to bury any whose names are not inserted as members in their books, produces an anxiety, on this, if on no other account, to be enrolled among the professors of religion. [B. B.]

Note.—No return for 1830. An augmentation of prisoners in the two last years is given in all the gaol returns, owing probably to some mistaken mode of filling up the Blue Book columns.

X. Antigua is legislated for by a Governor, Legislative Council (10 members), and House of Assembly, consisting of a Speaker and 25 members, representing the capital town (St. John's) and twelve divisions, or six parishes, into which the island is divided. The Governor of Antigua is also Governor and Commander-in-Chief over Montserrat, Barbuda, St. Christopher, Nevis, Anguilla, the Virgin Islands and Dominica; he, however, generally remains stationary at Antigua. The Governor is chancellor of each island by virtue of his office, but commonly holds the court in Antigua. In hearing causes from the other islands he acts alone; but in cases which arise in Antigua he is assisted by a council, and by an act of the Assembly of this island, the President and a certain number of the Council may determine chancery causes during the absence of the Governor. He has an Executive Council of 12 members to assist him in his government. The other courts of this island are a Court of King's Bench, a Court of Common Pleas, and a Court of Exchequer.

The militia consists of a brigade of artillery, a squadron of light dragoons, and a windward and leeward regiment of infantry.

Return of Militia [B. B.]—Artillery.—1 Colonel; 1 Lieut.-Colonel; 1 Major; 4 Captains; 8 Lieutenants; 1 Adjutant; 1 Quarter-Master; 1 Surgeon; 8 Serjeants; 8 Corporals; 3 Buglers; 170 Gunners; 1 Assistant Quarter-Master. Total, 208.

Light Dragoons.—1 Colonel; 1 Lieut.-Colonel; 1 Major; 2 Captains; 2 Lieutenants; 2 Cornets; 1 Adjutant; 1 Quarter-Master; 1 Surgeon; 4 Serjeants; 4 Corporals; 89 Privates; 2 Buglers; 1 Armourer. Total, 113.

1st Regiment.—1 Colonel; 1 Lieut.-Colonel; 2 Majors; 7 Captains; 7 Lieutenants; 4 Ensigns; 1 Adjutant; 1 Quarter-Master; 1 Surgeon; 14 Serjeants; 9 Corporals; 14 Drummers; 98 Privates. Total, 160.

2d Regiment.—1 Colonel; 1 Lieut.-Colonel; 2

Majors; 8 Captains; 10 Lieutenants; 7 Ensigns; 1 Adjutant; 1 Quarter-Master; 1 Surgeon; 1 Assistant Surgeon; 30 Serjeants; 29 Corporals; 16 Drummers; 341 Privates; 1 Quarter-Master Serjeant. Total, 450.

Recapitulation.—Staff, 15; Commissioned Officers, 87; Non-commissioned Officers and Privates, 843; Total, 945.

XI. The Antigua gross revenue in pounds sterling in 1821 was 12,382l.

Comparative yearly statement of the revenue of Antigua.—Sundry Taxes, viz. 1836	2411	16519	5114	24075

Shillings and pence omitted.

There are local revenues raised in each parish, by rates on land and houses, or a grant in aid. Parishes—St. John's, 1,662l.; St. George's, 582l.; St. Paul's, 787l.; St. Peter's, 402l.; St. Mary's, 749l.; St. Philip's, 617l.; total, 4,799l. The disbursement is for the salaries of the rector, clerk, &c., and for relief of proof.

XII. The exports of the island in 1787, were 284,526 cwt. of sugar: 716,546 gallons of rum; 5,910 gallons of molasses; 160,510 lbs. of cotton; value of dyeing woods, 4,146*l*.; miscellaneous, 48,006*l*.;—total value, 592,596*l*.

The principal exports since 1822 were:-

Years.	Sugar.	Rum.	Molasses.
	Hogsheads.	Puncheons.	Puncheons

		:														- 1	

To Elsewhere, 1829, 9331.

XIII. Antigua is most bountifully supplied with a variety of edible vegetables and fruit. The yam, sweet potatoe, cassave, cabbage, turnips, carrots, radishes, eddoes, squash pumpkin, cucumber, plantain, ochro (spinnage), &c. are among the former; and among the latter are the orange, mango, guana, shaddock, sweet lemon, pine apple, sapadillo, pomegranate, grenadilla, plum, grape, almond, alligator (and other) pears, melon, citron, banana, cashew, dildoe, redcaps, soursop, bread, and jackfruits, &c.

Sugar is the staple of the island; but other productions are now being attended to. Among the medicinal plants, spices, and trees, are a species of absinthium, aloe perfoliata, amomum zinziber, anisum vulgare, dolichas pruriens, datura stramonium, fæniculum dulce, glycirrhizza glabra, guaicum officinale, several species of menthæ, rosmarinus officinalis, quassia excelsa, and ricinus communis. Guinea grass is extensively cultivated.

The coast, bays, and harbours are plentifully supplied with excellent fish. Among the most numerous are the herring, mackarel, baracouta (of great size); glouper (sometimes 50 pounds); toad (poisonous); chief trade of the color mauget, hedgehog, hog-fish (poisonous); jew-fish (large and dear); snapper, fiatfork, squerrel, chubb, snitt, flounder, mullet, parrot (coloured like the bird), the coast is dangerous.

eel (like a serpent); silver, luck, and ink (shedding ink when caught) fishes; abacore (a large size); shark (plentiful); doctor (has a lance in the tail); sprat (two varieties, one poisonous); king, fry, whitening (poisonous); wattee, hind, comaree, convalby, old wife, queen mullet, cobbler, ten pounder, garr, bolalwe, reay, shew, and crawfish cat (a curious fish with five prongs, which, if left on the skin, sucks blood). The king fish taken young is termed coramour, and, when kept in a fish pond, or crawl for some time, is esteemed a great delicacy, as is also the mud fish (resembling tench), commonly found in thewater-courses. The mangrove oysters are considered a tantalizing dainty, and trunk lobsters, cockles, &c. are excellent.

BARBUDA.—This island, the property of the Codrington family, is situated 36 miles N. of Antigua, about 20 miles broad, with 1,500 inhabitants; the interior is level, the soil fertile, and the air of great purity. It was first settled by a party of colonists from St. Kitt's under Sir Thomas Warner, whom the Caribs at first compelled to retreat; but the English finally returned, and quickly began cultivation. The chief trade of the colonists consist in raising cattle, swine, poultry, horses, and mules, for sale in the neighbouring islands. There is a good roadstead; but the coast is dangerous.

^{*} No returns for this and the three following years.

CHAPTER X.—NEVIS.

SECTION I. This delightful little island, one of the leeward Caribbees, is separated from St. Kitt's by a strait, almost two miles broad and full of shoals, in latitude 17° 14′ N. longitude 63° 3′ W. It was first colonized by a few Englishmen, in 1628, under Sir Thomas Warner: and it is termed by Smith, in his amusing natural history of Nevis, "the mother of the English Caribbee Isles."

II. Nevis is a single mountain, about four miles in length, three in breadth, eight leagues in circumference, with an area of 20 square miles, springing by an easy ascent, as it were, out of the sea, and evidently of volcanic origin. The summit has the appearance of a crater. At a short distance from Clarke's hill there are several hot springs, containing neutral salts in solution. Their heat varies from 100 to 108 Farenheit. At the base of the mountain is a border of level land, extremely fertile and well planted. The appearance of Nevis is perhaps the most captivating of any island in the West Indies. From the S. and W. it seems to be nothing but a single cone rising with the most graceful curve out of the sea, and piercing a fleecy mass of clouds which sleep for ever round its summit. It is green as heart can conceive, perfectly cultivated, and enlivened with many old planters' houses of a superior style, and churches peeping out in the most picturesque situations imaginable. A complete forest of evergreen trees grows like a ruff or collar round the neck of the high land,

where cultivation ceases. On the N. and the E. the cone is not so perfect; it falls off in one direction in a long slope, which terminates in a plain towards the Narrows of St. Kitt's, and is broken to windward into one or two irregular hills. Columbus is said to have given the present name to this island, from the mountain of Nieves in Spain. Edwards supposes that a white smoke issued in that age from a volcano now extinct, but perhaps the vapours which rest on the summit may more probably have suggested the notion of snow.

Charlestown, the seat of government, is a larger, smarter, and more populous place than the capital of Montserrat. It lies along the shore of a wide curving bay, and the mountain begins to rise immediately behind it in a long and verdant acclivity. The court house is a handsome building, with a square in front; it contains a hall on the ground floor for the assembly and the courts of law, and another room up stairs for the council.

The island is divided into five parishes, and it has three tolerable roadsteads.

Nevis at one time had a very large white population. In 1673, there were 1,411 men able to bear arms, and 1,739 negroes. In 1707, 1,104 whites, 3,676 negroes. In 1720, 2,358 whites, 5,689 negroes. In 1730, 1,296 whites, 5,646 negroes. In 1788, 1,514 whites, 140 free coloured, 8,420 slaves. The white population is now estimated at 500.

III. Slave Population from 1817 to 1831.

IV. Churches, Livings, &c. [B. B. 1834.] Population of each parish, about 1,275. Value of each living, 18,000 lbs. of sugar, or 1261. sterling.

St. Paul's, Charles Town.—One parsonage house, one and a quarter acres of glebe; church situated conveniently in the town, will contain 600 persons; about 450 generally attend. No chapel. Two dis-

senting places of worship.

St. Thomas.—No parsonage house, but 1,500 lbs. of sugar allowed as an equivalent, equal to 131. 10s.; about eight acres of glebe; church situated in a central part of the parish, will contain 140 persons; about 100 generally attend. One chapel, erected on the property of T. P. Huggins, Esq.; service just now discontinued.

St. James.—No parsonage house, but same allowance as St. Thomas; about eight acres of glebe; church situated in a central part of the parish, will contain 170 persons; in general fully attended. One chapel, erected on the property of T. J. Coull, Esq.; 40 persons generally attend. One dissenting place of worship.

St. George.—Church situated in the centre of the parish, will contain 250 persons; about 120 generally

attend. Two dissenting places of worship.

St. John.—Church situated in the centre of the parish, will contain 200 persons; about 100 generally attend. [No return at the Colonial Office for 1836.]

IX. The coin in circulation is estimated at 10,000%; the denominations are, 1 dog (copper)= $1\frac{1}{4}d$. currency, or $\frac{3}{4}d$. sterling; 1 bit (silver) = 7 dogs.; 1 dollar, = 72 dogs, = 9s. currency, or 4s. 6d. sterling. There is no paper money. 200l. currency = 100l. sterling.

X. Average Prices of Produce and Merchandize in

The principal exports from Nevis, since 1830, were, | 1836 [B. B.]—Horned cattle, 10l. each; horses, 30l.; sheep, 11.; goats, 11.; swine, 11.; milk, 9d. per quart when it can be procured; fresh butter, 2s. 6d. per lb.; salt butter, 2s. 3d.; cheese, 1s. 6d.; wheaten bread, $4\frac{1}{2}d$.; beef, 9d.; mutton, 9d.; pork, $7\frac{1}{2}d$.; rice, $4\frac{1}{2}d$.; coffee, 1s. 6d.; tea, 9d.; sugar, 1s.; salt, $1\frac{1}{2}d$.; wine, 2l. per dozen; brandy, 11s. 3d. per gallon; beer, 12s. per dozen; tobacco, 9d. per lb.

Wages for Labour. - Domestic, 11. 2s. 6d. per month; prædial, ls. per day; trades, 2s.

The chief production of the island is sugar, the cultivation of which adds much to the richness of the scenery when contrasted with the mountain forests. There are five steam-engines, 40 wind, and 45 cattle mills for the manufacture of sugar, rum, molasses, &c.

CHAPTER XI.—MONTSERRAT.

Section I.—Montserrat in 16.47. N. lat., 62.13.25. W. long., 22 S.W. of Antigua, the same distance N.W. of Guadaloupe, and S.E. of Nevis, is about 12 miles long, 7½ broad, and 34 in circumference, containing 47 square miles, or about 30,000 acres.

11.-The isle was discovered and named by the sailors of Columbus, Montserrat, a name expressive in the Spanish language of its broken and mountainous

appearance. In 1632 it was first settled on by Sir Thomas Warner, under the protection of the British Government; about 1664, in the beginning of the reign of Charles II. it was taken by the French, but restored to the English at the peace of Breda, and has continued ever since under our flag.

III .- Like many other islands in its vicinity, Montserrat most probably owes its origin to a volcanic

N

equally mountainous, broken, and intersected; on the N. the extremity of the mountain chain terminates in a bold head-land coast, close to which vessels may approach with safety, but there is no landing, and scarcely any anchorage along the coast; the land slopes gently down to the shore, or rather ascends from it, like the W. side of the island, by a succession of round conglomerate hills, overtopping each other in pleasing undulations until they reach the mountain base.

On the S. there is no approach for vessels of any description until they get to the westward; the sea for a mile or two is studded with immense rocks and shelving banks of coral, which prohibit even the approach of boats; at this point the island springs up at once, and nearly perpendicular, to the height of 1500 feet; from thence the mountains begin to accumulate, throwing out branches nearly at right angles E. and W., of unequal magnitude, as if for supporters, to those originally formed; subsequently they advance and shoot up to 2500 feet, stretching across to the N. extremity, and terminating in the abrupt head-land above mentioned.

The mountains in many places are totally inaccessible in consequence of their declivities forming steep precipices of clay-stone, and being separated from each other by immense perpendicular chasms, several hundred feet deep. These gullies, and the mountains, are richly clothed to the very summit with lofty woods, and all the variety of beautiful shrubs and plants peculiar to a tropical mountain region. On the S.W. side of the chain is a small souffriere, situate 1000 feet above the sea in a dell, formed by the approximation of three conical hills; the scenery around which is grand and beautiful. No marshes exist, but a small lake is situate on the top of a high hill on the west 1,000, free coloured, 250, slaves, 9,500.

eruption; like them it runs from S. E. to N. W., is | side of the mountains, about two miles from Plymouth, which remains full the whole year.

Plymouth, the capital, is small, but extremely well built, and the houses constructed of a fine grey-stone, have a substantial and comfortable appearance.

IV. The same geological features mark Montserrat as are to be found in the neighbouring isles; many of the rocks might be termed vast masses of clay of various hues and colours. The conical hills abound with carbonate of lime, iron pyrites, and aluminous earth. The superstrative soil is in general dry, light, thin, gravelly, and thickly covered with blocks of clay and sandstone, except in the vallies where the loamy earth is deposited by rains.

V. The Montpellier of the W. is the term given to this Indian isle, which has long been celebrated for the peculiar elasticity of its atmosphere, the majestic grandeur of its picturesque and lofty mountains and bewitching scenery. The temperature of course varies according to locality. On the windward and leeward sides, and according to the elevation above the sea, the air is generally cool and dry; the seasons are similar to those of the neighbouring isles; it is subject to hurricanes, but their visitation are not severe or frequent.

VI. This island, like many of our W. I. possessions, was at one time more densely peopled by European colonists than it is at present. In 1648 there were 1000 white families, with a milita of 360 effective Europeans. In 1673, there were 1,175 men able to bear arms, and 523 negroes; in 1707, whites, 1,545, negroes, 3,570; in 1720, W. 1,688, N. 3,772; in 1724, W. 1,000, Militia, 500, N. 4,400; in 1730, W. 1,545, N. 5,616; in 1733, N. 6,176; in 1787, W. 1,300, Free coloured, 260, slaves, 10,000; in 1791, there were about 1300 W., and 10,000 N.; in 1805, W.

The increase and decrease of the Slave Population, since 1817, was-

Total	3399	3981	7380

Of the population 4600 were engaged in agriculture, 30 in manufactures, and 40 in commerce. In 1830 the births were 233, and the deaths 33.

Return of the Population in 1834. [B. B.]-The island generally contains. Whites, 143 males, 169 females; coloured, 324 males, 503 females; total, 477 males, 672 females.

What the present number of the population may be is uncertain, and especially of the apprenticed labourers; because many of them have emigrated to Demerara, and a few to Trinidad. It is asserted by

those who are best acquainted with the fact, that great mortality has prevailed among the children on plantations since the year 1834. The return below, of births and deaths, is not to be taken as complete. because some of the negro children die before they are baptized, and others of the negroes who live at a distance from the clergyman, bury their dead without any application to him. Another hindrance to the completion of this information, is, that of there not being any minister appointed for the new parish church of St. George.

The correct number of persons employed in agriculture, will not be ascertained until after the year 1840; because they are now the prædial unattached, who are sometimes employed in agriculture, and at other times at different occupations.

In the united parishes of St. Anthony and St. Patrick,-Births, 222; Marriages, 28; Deaths, 36. In the parish of St. Peter,-Births, 46; total, 268: Marriages, 6; total, 34: Deaths, 12; total, 48.

A statement of the number of Slaves for whom compensation has been claimed, and of the number of claims preferred for such compensation, and of the amount of compensation awarded in each of the classes of prædial-attached, prædial-unattached, and non-prædial. [Parliamentary return to the House of Lords, March, 1838.]

VII. Number of Churches, Livings, &c. in 1836. [B. B.]—In the united parishes of St. Anthony and St. Patrick, there is one Protestant church, which will contain 750 persons, and is generally well filled; the value of the living is about 2001. sterling. In the parishes of St. Peter and St. George, there is one Protestant church, which will contain, when the enlargement is completed, 350 persons, it is generally well attended; the value of the living is about 2001. sterl. There are also three Dissenting places of worship, one in town and two in the country, belonging to the Wesleyans. The Wesleyan chapel in town contains 400 persons; that in the country to the east, 700; and that to the north, 150. There is an infant day school in town, attended by 126 scholars; and two in the country, attended by 130. They have also three Sunday schools, which are well attended.

VIII. In 1831, there were six public or free schools, with 298 males and 390 female scholars.

No return given in for 1831, 1832, and 1835.

Antigua, but the islanders enjoy their separate Council and House of Assembly, the former consisting of 11 members and the latter of 12 members. The militia consists of 1 major, 4 captains, 4 lieutenants, 2 ensigns, 24 serjeants and 182 rank and file. A troop of horse is forming.

XI. Revenue of Monserrat for 1836.—Transient tax. 521.; import duty, 5201.; duty on brandy and gin, 261.; export duty, 1111.; liquor duty, 531.; colonial duty, 249 l.; fees received from town police, 50l.; property tax on lands, 5,707l; property tax on houses, 9191.; income tax, 2 per cent. 1351.; income tax, 1 per cent. 108l.; Miscellaneous, 22l.; Total revenue, 7,952l. Total revenue for 1834, 3,960l. Total revenue for 1835, 6,246l. No local return.

The Expenditure for 1836, was 8,6741., of which

X. The executive is embodied in the government of the poor received, 700l.; the police, 1,300l.; the ntigua, but the islanders enjoy their separate Counclergy, 1,082l.; and the military expenditure by the colony, about 6001. British Military Expenditure included in Antigua.

Recapitulation of the Establishment paid by the Colony in sterling money.—Civil establishment, 1,774L; contingent expenditure, 988l.; judicial establishment, 1001.; contingent expenditure, 1841.; ecclesiastical establishment, 4391.; contingent expenditure, 1411.; miscellaneous expenditure, 7101.; Total, 4,3371.

The coin in circulation is about 2,0001. There is no paper money. 210l. currency = 100l. sterling.

XII. The details enumerating staple products, as given under the other islands, answer for Montserrat, the sugar and rum of which, are much esteemed. Cotton is now being cultivated with success.

month.

CHAPTER XII.—ST. CHRISTOPHER.

SECTION I. In 17.18, N. latitude, 62.40. W. longitude, 72 miles in circumference, and containing 68 square miles, is situated St. Kitt's or St. Christopher, called by the Caribs *Licmuiga*, or the fertile isle, and in shape somewhat like Italy—as an outstretched leg.

in shape somewhat like Italy—as an outstretched leg. II. This singular looking but beautiful spot was discovered by Columbus, in 1493, and, as stated by some, received its name from the great navigator himself, by reason of his being so pleased with its fertile appearance; others say its name is derived from a part of Mount Misery, bearing a resemblance to the statues common at that period on church porches, of St. Christopher carrying our Saviour on his shoulders. The island was then densely peopled by Caribs, who remained for some time after its discovery in possession of their native home, subject to the occasional visits of the Spaniards for water, with whom they are stated to have been on terms of friendship—a very doubtful fact, unless the Spaniards did not require the land or persons of the Caribs.

In 1623, Warner (afterwards Sir Thomas) settled on the island, with his son and fourteen Londoners, and found three Frenchmen residing in tranquillity with the natives. Warner returned to England for more recruits, and, on his return in 1625, landed the same day with M. D'Enambuc, who had arrived from France with a party of colonists. The Caribs took alarm—made war on the European invaders—were discomfited with the loss of 2,000 in killed and wounded, leaving 100 foes dead from their poisoned arrows. The English and French agreed to divide the island between them, and articles of partition were signed 13th of May, 1627. The island was divided into upper and lower portions—the former and most extensive, called Capisterre, belonging to the French; and the lower, called Basseterre, alone inhabited by the English.

Don Frederick de Toledo, a Spaniard, proceeding to Havannah, with 15 frigates and 24 ships of burden, attacked the colonists in 1629, burned and plundered in every direction, and carried off 600 Englishmen as prisoners; but the flow of emigration was so great to the West Indies at this period, that in the following year the number of English settlers amounted to 6,000. Jealousies, bickerings, and at length hostilities began between the English and French settlers, which were stopped by the latter compelling the former to return within their line of demarcation; but, although it was agreed that if France and England went to war the colonists of St. Christopher should remain neutral, the resolution was broken on the commencement of hostilities in Europe, and a terrible battle, which lasted several days, ended in favour of the French colonists, who assumed the mastery of the whole island, and gallantly defended their acquisition in the following year against a large English force (sent to recover possession), in the contest for which Lord Belamont and Colonel Lauvreu were slain, all their officers wounded, eight colours lost, 700 British troops killed and drowned,

and many taken prisoners. At the peace of Bredz, the English colonists were restored to their portion of the island-and for 20 years the French and English lived in peace; but in 1689 the former entered the territory of the latter, put to death all who opposed, and, by the aid of fire and sword, forced the English to fly from the colony. In the following year General Codrington and Sir F. Thornhill, with a large force from Barbadoes, drove the French from St. Christopher's, and for several years the English, in turn, remained masters of the whole island; but by the treaty of Ryswick, restitution was made to the French of the part they had formerly possessed—this they retained until 1702, when the island was captured by the English; and by the treaty of Utrecht, in 1713, entirely ceded to the British crown. Most of the French removed to St. Domingo, and the sale of the crown lands produced a large sum for government, of which 40,000l. was voted as a marriage portion for the daughter of George II. St. Kitt's rapidly increased in prosperity, notwithstanding the effects of a terrific hurricane in 1722, which destroyed 500,000l. worth of property. In 1782, the Marquis De Bouillé, with 8,000 troops, and supported by the Count De Grasse with 29 sail of the line, captured the island ere Sir S. Hood, with 22 sail of the line, could effect any thing for its relief. The treaty of peace, signed at Versailles in the following year, restored St. Christopher's to Great Britain, in whose possession it has since remained. In 1805, a large French force landed at Basseterre without opposition, levied 18,0001. as contribution, and sailed away with six merchant ships which they found at anchor in the bay, and burned as soon as they got out to sea.

III. St. Kitt's presents to the eye an irregular

oblong figure, through the centre of which runs a regular series of mountains from N. to S. in the midst of which stands Mount Misery, 3,711 feet in perpendicular height, and, although evidently a volcanic production, clothed with the finest wood and pasture, almost to the very summit. From the foot of Mount Misery and the adjoining hills the country has a uniform sloping direction, stretching from a centre to a circumference, bounded by the coast, every inch of which is in a high state of cultivation. There is no plain in the island deserving the name of a swamp, and the great declination of the land towards the sea carries off any superabundant moisture. On the W. side, Brimstone hill rises gradually from the sea to a height of 750 feet; its E. prospect for two thirds of its altitude has a somewhat conical appearance, and then suddenly projects into two peaks, the N. one being called Fort George, the S. Fort Charlotte or Monkey Hill. At the foot and between these prominences is a plain of quadrangular shape, compassing about an acre of land, having on its E. skirts the barracks (denominated Bedlam), for 220 men. fortifications are very strong, and there is a tank within the ramparts capable of containing 90,000 gallons of water. Monkey hill is the S. termination

of a range of great mountains, which increase in height towards the N., and thicken together in enormous masses in the centre of the island. The apex of this rude pyramid is the awful crag of Mount Misery, which is bare, black, and generally visible whilst the under parts of the mountain are enveloped in clouds. It may, indeed, be termed a tremendous precipice of 3,000 feet, shooting slantingly forward over the mouth of a volcanic chasm, like a vast aerial peninsula. The vale of Basseterre is exquisitely beautiful when viewed from the hills of Mary Cayon, it has been said that there is no place on earth which can surpass the richness and cultivated beauty of this lovely scene. Nothing can be better disposed for completing the effect than the plantations are; the tall and moving windmills, the houses of the proprietors, the works and palm-thatched cottages of the negroes embosomed in plantain groves, present the appearance, as indeed they are the substance, of so many country villages in England. On one side is Basseterre, with the ships, on the other the ocean to windward, the mountains behind, in front the broken peninsular termination of the island to the S., the salt lakes gleaming between the opening of the rocks, and Nevis towering majestically over all.

There are four rivers in the isle, two at Oldroad, in the parish of St. Thomas, middle island; another at the small village of St. Mary's (Cayon), and the fourth (Pelhans) at Palmetto point, Trinity parish. In rainy weather few plantations are without their running streams. In the low lands springs are plentiful, but some of their waters unfit for drinking, owing to strong saline impregnations. The water in common use (as is the case in most of our West India possesions) is rain water, collected from the houses, preserved in large tanks, and of wholesale quality.

1V. This isle is unquestionably of igneous origin; immense layers of volcanic ashes are found in every parish, and the soil is chiefly of a dark grey loam, extremely porous. At Sandy Point, St. Ann's parish, there are alternate layers of this loam and ashes, to

the depth of 75 feet, on a substratum of gravel. This compost is considered the best in the West Indies for the cultivation of sugar. Clay is found in considerable quantities in the high or mountain land, while the low lands are entirely deficient of it. Among the mountains in the centre of the island there is one which contains mines of sulphur, and there is another not far distant from Fort Charles, in which there is said to be a mine of silver. In the N. E. there are very fine salt ponds, which produce most excellent salt; one of these is more than 100 acres in extent, surrounded with several lesser ponds. The structure of Brimstone Hill consists of granite, limestone, primary rock, schistus, volcanic ashes and madrepores, with a very small proportion of alluvial deposits on a few spots.

V. From the smallness of the isle and its elevation above the sea, St. Kitt's is extremely dry and healthy; the mean temperature on the coast is 80, but the mornings and evenings of the hottest days are agreeably cool. The coldest month is February—the warmest August. The winds for the greater part of the year are from the N. E. and S. E.; and although the isle is, from its position, within the range of the hurricanes, yet by these storms the air is tempered and purified, and health is the natural result. The rains that fall are more frequent than heavy, and the bracing qualities of the atmosphere are pourtrayed in the ruddy complexions of the inhabitants and the vigorous strength of body which they possess.

VI. The number of inhabitants was at one period, particularly as regards whites, very numerous. In 1673, there were in the island 496 men able to bear arms, and 352 negroes; in 1707, whites 1,416, negroes 2,861; in 1720, W. 2,740, N. 7,321; in 1724, W. 4,000, militia 1,200, N. 11,500; in 1730, W. 3,677, N. 14,663; in 1733, W. 3,881, N. 17,335; in 1787, W. 1,912, free coloured 1,908, slaves 20,435; in 1798, slaves 20,435; in 1802, by computation, W. 4,500, free coloured 500, slaves 25,000; in 1805, W. 1,800, free coloured 198, slaves 26,000.

Area in square miles and acres, and population of each parish in the island. [B. B. for 1836, Colonial Office.]

Remarks on the preceding Table by the Moravian Missionaries. - St. Peter and St. George's Basseterre. On account of the severe afflictions, and the loss of two valuable ministers, which our mission in St. Kitts has sustained in the past year, we are sorry to remark, that the schools in the Basseterre district are, at present, not in that order which formerly was maintained, only one minister having been here for nine months, which never has been the case before.

St. Mary. Cayon,-It is to be remembered, con-

cerning defraying the expenses of these schools, that the negroes themselves pay a small part. Some assistance is afforded by the several estates on which schools are established, and the rest is made up from the mission fund.

St. John's, Capisterre. — On account of the poor state of the parents here, we have no support from them for being able to keep private schools.-There is also one private night school.

XIII. The coins of the island are principally English, with some Spanish; and there is also a colonial coin sent from England, consisting of the following pieces:

Pieces & dollar Currency 2s. 3d. Sterling 1s. 14d. 1s. $1\frac{1}{2}d$. 0 63d. 1-16th 0 63d. 0 3 d.

The copper coin used, (besides the English penny,) is the dog, which passes for three farthings sterling, 72 making the Spanish dollar; the bitt is a nominal coin, value $4\frac{1}{4}d$, sterling. The coin in circulation is about 12,000l. There is no paper money. The course of exchange is 2001. currency=1001. British.

XIV. The Staple Products are similar to those of the neighbouring isles already described. Among its numerous fruits, the citrus aurantium, or China orange-tree (as also the Seville) grows in great luxuriance; it rises from 12 to 20 feet in height, distinguished by the beautiful deep green of its foliage; stem upright and ramifying in every direction, forming a regular and beautiful head. The fruit is excellent, and may be improved by grafting on the Seville orange stock, but the best is to be obtained by grafting on the pomegranate. The flowers are highly odoriferous, and yield their flavour to rectified spirits by infusion, and to both spirit and water by distillation. The citrus acrus, or lime tree, as also the citrus or sweet lime resembles the orange. From the latter the perfume called burgamot is obtained, which is, in

fact, the essential oil that resides in the rind of the fruit, and easily extracted by expression or distillation. There are varieties also of the lemon, citrus limon; but the most elegant of this genus is citrus tuberosa, or citron tree, the fruit of which imparts to spirits an agreeable flavour. The shaddock and forbidden fruit are of the citrus tribe. The shaddock is supposed to have been transplanted from Guinea, in Africa, by a Captain Shaddock, whose name it still bears throughout the West Indies. The fruit has all the appearance of belonging to the orange species, and is divided in the same manner, by a thin skin, into several quarters, but it is as large as a melon, and of a most agreeable and refreshing flavour, between sweet and acid. The outer coat or skin is extremely thick, of a bitterish taste and a pale yellow, or citron colour, very like, in appearance, to the skin of a lemon. There are two species of the shaddock; the pulp or inside of one is white—that of the other a beautiful pale red: the last is considered the most wholesome. This fruit a European may indulge in with safety—and it is almost the only one in this climate, excepting the orange, that will not injure him on his first arrival. The forbidden fruit is a species of the shaddock, only smaller and more delicate, while the outer skin is less coarse. Its juice and the flavour of the inside are quite delicious in a West Indian climate. The grenadella is month.

another excellent fruit, contained in a soft husk, which is produced by a large passion flower; the husk is filled with a sweet and most agreeable liquid; and the manner of eating it is to cut off one of the ends, and mix up in it Madeira wine and sugar, stirring it all up together; this renders it safe and wholesome for the stomach. It is of the size of a small melon. The laurus persea, or avocato, vulgarly called alligator pear, comes to fine perfection here; it is a pulpy fruit, resembling in appearance a large-sized swan's egg; the pulp, or vegetable marrow as it is called, is enclosed in a light green papyraceous skin, and contains a large irregularly-formed seed, that is immediately surrounded by brownish membraneous coverings.

CHAPTER XIII.—TORTOLA AND VIRGIN ISLES.

Section I.—The Virgin Isles were discovered by Columbus in 1493, and so named by him in honour of the 11,000 virgins of the Roman ritual. Excepting Anegada, they are a cluster of lofty islets and rocks, to the No. of 50, to the N. W. of the Leeward Islands, extending about 24 leagues E. and W, and 16 N. and S. Tortola, the capital is in 18.20 N. Lat., and 64.39 W. Long.

II. The Virgin Isles are divided between the English, Danes and Spaniards; the Eastern division belongs to the former, and the islands in our possession are named Tortola, Virgin Gorda, or Penniston, (sometimes corrupted into Spanishtown,) Jos van Dykes, Guana isle, Beef and Thatch islands, Anegada, Nichar, Prickly Pear, Camanas, Ginger, Cooper's, Salt, St. Peter and several other smaller islands.

The earliest occupant of the British Virgin Isles, were a party of Dutch Buccaneers in 1648 at Tortola. A stronger party of English Buccaneers expelled the Dutch in 1666, and took possession of the Dutch fort in the name of England, and shortly after Charles II. annexed them to the leeward islands Government, in coloured, 220; slaves, 9000. a commission, granted to Sir William Stapleton.

III. Throughout the Virgin Isles a series of precipitous and rugged mountains and rocks run E. and The shores are indented with bays, harbours, and creeks, affording shelter for a large extent of shipping. Large tracts of waste land, with pasturage accessible by mountain tracks, occupy the interior, and are therefore of difficult access.

The chief town, Tortola, is situate on the S. side of the island, close to the water's edge, in the western bight of a magnificent harbour or basin, and forming one long street, curving at the base of a projecting point of land. In front of the town and harbour is a chain of small islands, extending far to the southward, and forming the passage called Sir Francis Drake's Channel. The harbour of Tortola, extending thus in length 15 miles, and in breadth 31, perfectly landlocked, has been seen in war time affording shelter to 400 vessels waiting for convoy.

IV. The population in 1720 was, of whites, 1122; negroes, 1509. In 1787, whites, 1200; free negroes, 180; slaves, 9000. In 1805, whites, 1300; free

The slave inhabitants were, from 1818 to 1828.

V. Churches, Livings, &c. of Tortola and Virgin Isles.

—There is one Church in the parish of St. George, (comprising the Virgin Islands). The value of the Living is 250l. sterling. The Church will contain about 200 persons; 40 of whom generally attend.

There is no Chapel connected with the establishment, but divine service is performed by the rector, in the gaol on the Sabbath morning, and at King's Town in the evening; and since February, 1836, at which time a catechist was appointed for Spanish Town, Divine service is performed there twice on the Sabbath day in the school room.

There are also three Methodists Chapels in the island of Tortola. [B. B.]

VI. Schools, &c. 1836.—In the parish of St. George, (comprising the Virgin Islands,) there are two free schools, containing 95 scholars, viz., 60 males and 35 females. The master receives 30l. sterling, which is paid by the Society for promoting the Gospel in foreign parts. One school is at King's Town, which is supported by Government, to which is attached an Infant School, containing 52 scholars—also one free school at Spanish Town containing 65 scholars, [B.B.]

VIII. Up to 1773 the government of these islands was entrusted to a Deputy-Governor, with a Council, who exercised in a summary manner both the legislative and executive authority; but, in the latter year, a local legislature, similar to that of the other islands, was conferred on them, with courts of justice, in consideration of the inhabitants voluntarily (1) offering to pay an annual impost of $4\frac{1}{2}$ per cent. to the crown upon all the natural productions of the islands. They are now under the Government of St. Kitts, but possessing in Tortola a Council and Assembly of their own.

Return of Militia in 1836.—Infantry.—1 Colonel; 1 Lieut. Colonel; 4 Captains; 6 Lieutenants; 4 Ensigns; 1 Adjutant; 1 Surgeon; 1 Judge Advocate; 1 Provost Marshal; 32 Non-Commissioned Officers; 300 Privates. Cavalry.—1 Captain; 1 Lieut.; 1 Cornet; 4 Non-commissioned Offices, and 17 Privates, composing a company of Horse. [B. B.]

IX. Revenue, 1836.—Amount received for liquor, sugar, bread, hawker's licences, &c. 1201.—Duty on exportation of cattle, horses, and sheep, 201.—Amount received for stamp duty, 1131.—Amount of duties received from collector of Her Majesty's customs, 8241.

—Received for auctioneer's licenses, and duties on sales, 221.—Received from magistrates as fines and penalties, 201.—Received for duty on importation of flour, 91.—Received by sale of pews in churches, 431.—Received for warrants, 11.—Received for duty on sale of sugar, spirituous liquors, malt liquors, &c., 1221.—This sum received, being assessed taxes under General Tax Bills, 6831—This sum received, being poll tax on apprenticed labourers and saddle horses, 8191.—Nett Revenue. 27961. [B. B.]

819l.—Nett Revenue, 2796l. [B. B.]
In 1827, nett revenue, 790l.—1828, 698l.—1835,

Expenditure of 1836.—By this sum paid amount of arrears, 16591.—Paid treasurer 10 months salary at 2001. per annum, 1671.—Paid rent of officer's quarters 871.—Paid various contingencies, 1361.—Provost Marshal, 6 month's salary, at 1001. sterling per annum, 501.—Paid keeper of the gaol 6 months salary, at 621, 10s, sterling, per annum, 311.—Turnkey, 6 months salary at 501. sterling per annum, 251.—Matron of prison, 6 month's salary, 51.—Surgeon to prison,

6 months salary, at 37l. 10s. per annum, 19l.—Treasurer for the salary, 12l.—Contractors for furnishing bread, meat, &c. for prisoners in gaol, 66l.—Paid contractors for building wall round gaol, 197l.—Further contingencies, 52l.—Balance, 289l.—Amount expended, 2796l. [B. B.]

Amount expended in 1827, 11261.—1828, 12251.—1835, 5081.

Commissariat Department.—Provisions and Forage received from England, 507l.; purchased in the Command, 648l.; total, 1155l. Fuel and Light. received from England, 12l.; purchased in the Command, 92l.; total, 104l.

The principal articles of Export in 1828 were, sugar, 959 hogsheads; rum, 4 puncheons; molasses, 20 puncheons; cotton, 980 bales; employing a shipping inwards of 3,632 tons, and outwards of 3,184 tons. In war time these islands afford a valuable retreat for shipping.

XI. The Virgin Isles are celebrated for a great variety of fish, viz., rock fish, groopers, barracoutas, hogg and jar fish, bonetas, albacore, congo eels, bone fish or 10 pounders, colonels, whippers, snappers, pangies, old wives, angel fish, rock leveromous, mango, swapers, silver fish, diamond, gold laces, bass fish, turtle, hedge hogs, rainbow, grunts, margarets, grass fish, &c. Fish is generally sold at 3d. sterling per lb., but the value principally depends on the quantity and quality in the market. [B. B. for 1835.]

In Spanish Town there are between 30 and 40 mines which have been opened, some of which are at present filled up; the mines appear principally to be copper, and black lead, some gold and copper have many years back been taken out, the ore of some appear to be copper; they are principally situated on the East part of the valley, at a place called Red Point. None have ever been disturbed for upwards of 80 years, except occassionally by a few persons, who may go there through curiosity to see them, and take a

little of the ore. The lead is of a superior quality. There is an arsenic mine at Collins Hill. The silver mine has been worked until it was stopped by government. Upon the top of Red Point Hill, there are a quantity of quartz. There have been a quantity of chrystals taken out of this mine. There is no person alive at this day, who is able to state the quantity of gold and silver taken out of the mines. [B. B. 1835.]

Prices of Produce and Merchandize in 1836.—
Horned cattle, 6l. each; horses, 10l.; sheep, 1l. 4s. goats, 10s.; swine, 1l.; milk, 1d. per pint; fresh butter, 1s. per lb.; salt butter, 2s. per lb.; cheese, 1s. 6d. per lb.; wheaten bread, 4d. per lb.; beef, 6d. per lb.; mutton, 74d. per lb.; pork, 6d. per lb.; rice, 4½d. per lb.; coffee, 1s. per lb.; tea, 8s. 3d. per lb.; sugar, 9d. per lb.; salt, 1d. per lb.; wine, 2l. 10s. per dozen; brandy, 8s. 3d. per gallon; beer, 12s. per dozen; tobacco, 1s. 9d. per lb.

Wages for Labour .- Domestic, 121. 10s. per annum;

day. [B. B.]

Coin in circulation, about 1,000l. No paper money.

Area of the several Virgin isles in acres—Anegada 31,200; Tortola 13,300; Spanish Town 9,500; Jos Van Dykes 3,200; Peter's Island 1,890; Beef Island 1.560; Guana Island 1.120; and 40 other isles, with areas varying 900 down to five acres each, comprising in the whole 58,649 acres; of which there were in 1823 under sugar canes 3,000 acres; cotton grounds

prædial, for extra labour, 1s. per day; trades, 2s. per | 1,000; provisions 2,000; pasture land 33,500; forest day. [B. B.] 7.257 acres. The quantity of stock on the island is given at horses 240; mules and asses 529; horned cattle 2,597; sheep 11,442; goats 3,225; pigs 1,825; poultry 44,050; and of fish caught within the year 15,837,371 lbs.; and yielding altogether an annual production of property to the extent of 100,0001. sterling; and with a total aggregate of moveable and immoveable property of nearly one million sterling.

CHAPTER XIV.—ANGUILLA.

from its tortuous or cel-like form), is situated between 180 N. latitude and 640 W. longitude, 45 miles to the N.W. of St. Kitts, and separated from St. Martin's by a narrow channel. The island is in length about 30 miles, and in breadth scarcely more than three miles.

II. In 1650, it was discovered and colonized by the English, in whose possession it has ever since rethe French and from pirates, and to a brutal attack and pillage from the marauders under Victor Hugues, in 1796; in every instance, however, the islanders have displayed a noble spirit of independence and bravery. In 1745, the colonists, although then only about 100 strong, repulsed a body of 1,000 French who came to attack them, and obliged them to retire with the loss of 150 men. In 1796, the latter retaliated in a manner worthy of the atrocities of the revolution. Two ships of war were sent with 400 picked troops, by Victor Hugues, of "red-hot memory," with directions to burn every settlement, and exterminate the whole of the inhabitants (British) in the island. These emissaries set about their work in good earnest, and committed the most barbarous atrocities on the defenceless inhabitants, but were happily interrupted by the arrival of Captain Barton, in the Lapwing man-of-war, who brought the French ships to action, sinking the one and taking the other.

and with a deep chalky soil. It presents a very singular appearance for a West Indian island. A little from the beach, and, when you have mounted this, Kitt's Assembly.

SECTION I. Anguilla, or Snake Island (so called the whole country lies before you, gently sloping inwards in a concave form, and sliding away, as it were, to the south, where the island is only just above the level of the sea. The Flat island and St. Martin's terminate the view in this direction. Nine-tenths of the country are entirely uncultivated; in some parts a few coppices, but more commonly a pretty species of myrtle (called by the negroes, maiden berry) seems mained, subject, however, to transient incursions from to cover the whole soil; the roads are level grassy tracks, over which it is most delightful to ride, and the houses and huts of the inhabitants are scattered about in so picturesque a manner, as to bear a great resemblance to many scenes in Kent and Devonshire. Indeed there are scarcely any of the usual features of West Indian landscape visible; neither of those prominent ones, the lively windmill or the columnar palm, are to be seen, and there is a rusticity, a pastoral character on the face of the land, its roads, and its vegetation, which is the exact antipode of large plantations of sugar. In the centre of the island is a salt lake, yielding annually 3,000,000 bushels, a great part of which was wont to be exported to America. The soil yields freely sugar, cotton, maize, and provisions, and many cattle are reared. The climate is extremely healthy; and the people (amounting, in 1819, to, whites, 360; coloured, 320; and slaves, 2,451) strong and active. At one time the island was ips to action, sinking the one and taking the other. more densely peopled. In 1673 it had 500 men ca-III. Anguilla is flat, without mountains or rivers, pable of bearing arms; in 1724 there were 360 whites id with a deep chalky soil. It presents a warming and 2000 men arms. and 900 negroes. The colonists have a chief, or head magistrate, who is confirmed in his office by the Gowall of cliff of some 40 feet in height generally rises | vernment of Antigua, and a Deputy is sent to the St.

CHAPTER XV.—THE BAHAMAS.

SECTION I. This singular group of isles, reefs, and quays, termed the Lucayos, from the Spanish words los cayos (Anglice, the keys), or Bahamas, extend in a crescent like form; from the Matanilla reef in 27.50. N. latitude and 79.5. W. longitude; to Turk's Island in 21.23. N. latitude and 71.5. W. longitude, a distance of about 600 miles, not including various sand banks and coral reefs, stretching to a great extent castwards.

II. One of the Bahama isles, St. Salvador (Guanahani), is celebrated as being the first land discovered by the immortal navigator, on the 12th of October, 1492, when he made this advanced post of a new world. The Bahamas were then densely peopled by the Indian race, who were soon shipped off to work in the mines of Peru and Mexico, when the Spaniards began their search for gold. In 1629, New Providence was colonized by English (the natives were then totally extinct), who remained there till 1641, when the Spaniards drove them from the islands, murdered the Governor, and committed many acts of cruelty. In 1666, the English again colonized in the Bahamas, and New Providence remained in their hands till 1703, when the French and Spaniards again expelled them, and destroyed their plantations. The Bahamas now became a rendezvous for pirates, whose proceedings, so hurtful to commerce, were only finally suppressed by Capt. Woodes Rogers, of the British navy, who was established as Governor, and soon reduced the outlaws to obedience. After this some of the other islands became inhabited, and remained quietly in our possession until the American war, when, in 1776, Commodore Hopkins, with a squadron from Philadelphia, attacked and plundered the settlement, and carried off the Governor. In 1781, the Spaniards took possession of the isles, but they were restored to the British crown by treaty in 1783, having, however, been previously captured for England by the enterprising Col. Devaux, of South Carolina. The Bahamas have ever since remained in our possession.

III. Amidst a group of several hundred islets none are elevated; they are evidently the work of the coral insect, who, with all his apparent insignificance, has created many beautiful and habitable spots for the dwelling and culture of man. Some of the Bahamas are inhabited, others present to the eye a few plantations, the remainder are tenantless, though doubtless suited for culture, if there were an abundant population desirous of obtaining food. Generally speaking, the Bahamas are low and flat, indeed little elevated, even in their highest points, above the level of the sea, nevertheless, their verdant appearances render them extremely prepossessing. The ocean close to the isles is of an unfathomable depth; reefs of rocks, or rather walls of coral, bound the islands after the manner observable in the South sea isles. It will be sufficient to particularize a few of the principal of our possessions in the group.

New Providence, from its harbour and relative situation with respect to the Florida channel, is considered the most important of the Bahamas, and on it is situate Nassau, the seat of government for the isles, and the head quarters of the naval and military establishments. The island is about 21 miles in length from E. to W., and seven in breadth from N. to S., mostly flat, and covered with brushwood and extensive lagoons; a range of hilly rocks runs along part of the island, at a very short distance from the sea, in a direction E. and W. On this ridge many of the buildings of Nassau are constructed, including the government house, and at its extremity to the W. are the barracks and Fort Charlotte; another ridge, called the Blue Hills, runs in a direction nearly parallel with the former, and at about two and a half miles distance.

The principal works of defence in the Bahamas are at Nassau, in the island of New Providence, constructed to protect and defend the harbour and town, it being the seat of government of the Bahamas.

Fort Charlotte is the main work, having an attached work on the west front, called Fort D'Arcy; it is situated at the western extremity of a ridge of hills, which run nearly parallel to the bay or harbour, with the town of Nassau between. This work is built of the natural porous stone of the islands, and of its superstructure by that cut from the ditch; a portion of the height of the escarp and contrescarp being formed by slopes given to the cuttings in the natural rock. It is of a bad construction, with an unfinished

open ditch, with low contrescarp on the south front. Fort D'Arcy has no ditch or contrescarp, and an escarp is completely exposed to its base; its area is occupied by a splinter proof magazine for 500 barrels, and a general store for the ordnance service. In Fort Charlotte are several casements, with galleries of communication to them, cut out of the solid rock, but they are very damp and unfit for habitation. There is also a large powder magazine in the north front; it is capable of maintaining near 30 guns and three or four mortars. In case of necessity it could only be maintained for a few days, according to the force brought against it, since its faulty construction would be taken advantage of by an enemy.

Fort Stanley.—The main object of this work, in conjunction with a detached stone casemated battery, called Fort Stanley on the hill, and eastward of Fort Charlotte and the water battery of four 24-pounders, on traversing platforms at the foot of the hill on the sea shore, having its rear open, is to defend the western entrance to the harbour; it also commands a part of the town, and the main western road which runs along at the foot of the hill. It may be considered as the citadel of the garrison.

The next work of defence is Fort Fincastle, situated on the same ridge of hills and immediately in the rear of the town, which it completely commands. It is a stone work, mounting four 18-pounders on traversing platforms, and two short guns on platforms, of splinter proof casemated, for the troops and magazine, both of which are very small. It has no ditch, and the escarp towards the W. is of an inconsiderable height and exposed to its foot; its object is to defend the harbour and town, and to occupy, in connection with Fort Charlotte, from which it is distant between 1,700 and 1,800 yards, the high and advantageous ground in rear of the town. Upon these two forts are established signal stations, by which the town and garrison are apprized of the approach of vessels of every description.

Commanding the eastern entrance to the bay or harbour of Nassau is Fort Montague, situated on a point of land about two miles eastward of the town, it is a low quadrangular stone work of old construction, without a ditch, mounting four heavy guns on traversing platforms, at the angles; having a small building in the area for troops, and another over the entrance as a magazine.

On Potter's Key, a small island in the harbour, was formerly erected a two-gun battery, closed in the rear by a double block house; the latter has fallen into a ruinous and quite irreparable state, and the battery is not kept up. The intention of this work was to rake any vessel, on passing Fort Montague, and by a musketry fire prevent boats passing upward on either side of the island. There are now the remains of a block house on Hog Island, opposite to the town, long since disused and now uninhabitable. At the water's edge stands the old Fort Nassau, in the town; it is a dismantled square fort, having regular sides, with bastions connected by curtains, formerly was the only defence in the place, and gave shelter to the garrison. It has for many years past been in a ruinous and condemned state; there has been a project to take it down, and on its site to build iron barracks; but it would be more desirable to remove the materials, and employ them in carrying out an embankment, and forming a wharf or quay, which would open Heming's Square to the influence of the sea breezes. There are barracks enough for the garrison required, at head quarters; and it will become essentially necessary to

form posts for the protection of the inhabitants and their property in the out island settlements, where at present they are exposed to depredations from pirates, slaves, and adventurers. [B.B. for IN36.]

Hog Island is little more than a reef of rocks, which forms part of the N. harbour of New Providence. Rose Island, to the N. point, and E. of New Providence, is about nine miles long and a quarter broad. It affords protection to "Cochrane's Anchorage." HARBOUR ISLAND is five miles long and two broad, lat. 25.29 N. long. 76.34 W., very healthy, and a favourite resort for convalescents. Turk's ISLAND, lat. 21 32 N., long. 71.05 W., principal mart, for salt-making, peculiarly healthy, and a point of military importance in regard to St. Domingo. NORTH AND SOUTH BIMINIS. These isles are about seven miles long, in lat. 25.40 N. long., 79.18 W., healthy, well wooded and watered, capacious anchorage, and in the event of a war, highly important for the protection of the trade of the gulf of Florida, to the E. of which they are situate. The anchorage on the gulf side can admit any class of shipping. Those not mentioned above are in chief - Andros, long (22 leagues) and irregular, to the W. of New Providence eight leagues. Between them a tongue of ocean water runs in S.E. as far as lat. 23.21, called the Gulf of Providence: access difficult from reefs. Off its S.E. end are the Espirito Santo Isles. The BERRY ISLANDS, an irregular group. Several small harbours formed by them, where refreshments may be had. The S.E. of these islands are denominated the Frozen Keys, and the N. the Stirrup Keys. Off the northernmost of the latter there is anchorage on the bank, in lat. 25.49. The Great and Little Isaacs. W. 2 N., 48 miles from Little Stirrup Key, is the easternmost of three small keys, called the Little Isaacs, and five miles further is the westernmost key of the same name: these are from 50 to 60 or 70 feet in length; the middle key is not so large. These keys are situated on the western end of the Gingerbread Ground, which extends five leagues E. by S. from the weathernmost rock, or Little Isaac, is about five miles wide near the east end, and has some dangerous sharp rocks upon it, with only seven to nine feet water. The NARANJOS. or two ORANGE KEYS, lie four miles within the edge of the bank, in lat. 24.55, and long. 79.7. ELEUTHERA extends E. nine leagues, S.E. four ditto, and S. & E. twelve leagues. GUANAHANI, OF CAT ISLAND, N.W. eight leagues and a half E. & S. from Powel's Point, in Eleuthera; it thence extends south eastward 15 leagues, having a breadth of three to seven miles. Eleven miles S.E. from Cat Island is Conception Island, of about seven miles in length, N.E. and S.W., and three miles in breadth. Yuma, or Long Island, 17 leagues in length from S.E. to N.W. S. by W., 17½ leagues from the S. point of Long Island, is Cayo Verde, or Green Key. From Cayo Verde the edge of the bank forms a great and deep bay to the N.W., in the S.W. part of which is Cayo de Sal, at the distance of 10 leagues from the former. Egg Island is small. in lat 25.31. There are many smaller keys and rocks too numerous to mention.

An idea of the number and extent of the isles will be conveyed by the following statement of the lands in the Bahamas, from an official return dated in 1827.

Remaining in possession of the Crown, 2,431,000 acres in the Bahama Islcs.

IV. The Bahamas are formed of calcareous rocks, which are composed of corals, shells, madrepores, and various marine deposits, hardened into solid masses in the revolutions of ages. The deposits appear to have been thrown up in regular strata, at various periods; and their upper surface, deeply honey-combed, bears evident marks of having been long covered by the waters of the ocean. No primitive formation has been found, and the bases of the islands are evidently coral reefs, originating with the Moluscee, which, unpossessed of locomotive powers, have organic functions destined for the secretion of the lime required for their calcareous coverings. Marl is formed on many of the out islands, and here and there strata of argillaceous earth may be met with. Meteoric stones have been discovered rudely sculptured with human features by the aborigines; but whether found on the islands or brought thither, it is impossible to say; and at Turk's Island a great number of calcareous balls have been found, all bearing an indentation, as though they had been suspended to a pedicle. Their origin or nature is equally unknown. In confirmation of the idea that these islands have been raised from the bottom of the ocean on pillars of coral, after the manner of the eastern and southern bemisphere, it may be stated many of their salt-water lakes and ponds communicate with the ocean, as shewn by their sea fish. Some of them are so deep as not to allow soundings; and the water in them rises and falls with the tides on the coast.

V. Situated at the mouth of the gulf of Florida, placed by geographical position without the tropics, removed from the excessive heat of a vertical sun, and the intense cold of a northern winter, the Bahamas enjoy a climate mild, equable and delightful. To the islands within the torrid zone they are nearly akin—in the little variety of season, the natural productions of the earth, and the manners and customs of the people; but the decided difference in the mean annual temperature, and the more robust and healthy appearance of all classes of the community, gives to the

Bahamas all the appearances of a country situate in a more temperate latitude. The summer and winter (hot and cold) wet and dry seasons, are well marked the cold season lasts from November to May, during which period the sky is remarkably clear and serene, the mercury at noon F occasionally below 60, seldom beyond 70 or 75, while a refreshing N breeze tempers the mid-day heat, and the mornings and evenings are cool and invigorating. From May to November the heat increases and decreases as the sun advances and retires from its great northern declination. thermometer ranges from 75 to 85 F rarely higher a fine breeze frequently blows from the E., with cooling showers of rain, before the summer solstice and towards the autumnal equinox. The mornings have then a peculiar freshness, and the evenings a softness and beauty unknown to colder countries. From the flatness of the isles, the full benefit of the sea breezes is felt throughout every part of each island. health of the climate will be indicated by the fact, that out of a population of 1, 48 at Harbour Island, no funeral took place from the 5th of June to the 12th of November, while, with the same population, 20 or 30 would have expired in any part of Europe; and at Nassau the proportion of deaths to the population was, in 1826, only 1 in 45, which is less than the mortality of England.

	THE	THERMOMETER.	ETER.

VII. Churches, Livings, &c. in 1836. [B. B.]-Christ's Church, in the Island of New Providence: value of living, 3401., Church will contain from 700 to 800 persons, from 400 to 500 generally attend. There is a parsonage-house, a chapel which will contain 400 persons, about 250 generally attend. St. Mathew, in the Island of New Providence; living 3401., Church contains from 300 to 400, about 250 attend. St. John's Harbour, Egg Current Island; living, 2701., Church contains 400 persons, a Chapel which will contain 60, about 50 attend. St. Patrick Eludlein; living, vacant, the Chapel will contain 400 persons, from 50 to 60 attend. St. Salvador, vacant. St. Andrews at Exuma and Rugged Island, vacant. St. Paul's at Long Island, vacant. St. David's at Crooked Island, vacant. St. George at the Caicos, vacant. St. Thomas at Turk's Island, 2701., Church will contain 260 persons. House rent is allowed. St. Peter at Abuco, vacant. St. Christopher, district of Watling's Island and Rem's key, vacant. St. Stephen. district of St. Andrew's Island, vacant. Grand Baha-mas, and the Beng Islands, vacant. Most of these Churches are Protestant. There are nine Dissenting places of worship, including the Scotch Kirk.

VIII. In 1832 the number of male scholars in the Bahamas was 549; females, 568; total, 1117. Four were public schools; four Sunday schools; two day and one free school for infants. The public school-room in the town of Nassau is capable of containing 200 pupils. The Wesleyans have two Sabbath and two Catechetical schools in New Providence. In the former, (in 1832) 24 white and 281 coloured children and adults receive gratuitous instruction in reading and writing, by 10 white and 18 coloured teachers. They have also 10 Sunday schools in the out-islands, where 630 whites and coloured children are instructed.

Return of the number of Schools at the Bahamas in 1836. [B. B.]

X. As in the other West India possessions, the government of the Bahamas is modelled after that of England; viz. a House of Assembly or Commons, consisting of 30 members, returned from the several islands; an Executive and Legislative council of 12 members, approved by the crown, and a governor, who is commander-in-chief of the militia, and has the power of summoning and dissolving the legislative body, and of putting a negative on its proceedings. The electors are free white persons of 21 years of age, who have resided 12 months within the government, for six of which they must have been householders or freeholders, or in default of that have paid duties to the amount of 50l. To become a representative, the person must have 200 acres of cultivated land, or property to the value of 2,000l. currency.

There are several courts at law, such as the Supreme Court, which holds its sessions in terms of three weeks, with the powers of the common law courts at Westminster, and its practice modelled on that of the King's Bench, the Courts of Chancery, Error, Vice-

Admiralty, &c.

Nassau, in New Providence, as before observed, is the seat of government and the centre of commerce; it possesses a fine harbour, nearly land locked, and on the S. side of which the capital extends over a rather steep acclivity to the summit of a ridge, the W. of which is crowned by a fortress of considerable strength, where the garrison is kept. The island is divided into parishes, each of which has its church, clergy, and school, liberally provided for. The streets are regularly laid out, the public buildings good, and activity and cleanliness immediately attracts the eye of a stranger.

Governors of the Bahamas, from 1613 to 1838.—Chillingworth, 1673; Clark, 1677; Lilburne, 1684; Bridges, 1687; Cadwalader Jones, 1690; Trott, 1694; Nicholas Webb, 1697; Elias Hasket, 1700; Ellis Lightfoot,—;—Birch, 1704; Woods, Rogers, 1717; George Phenney, 1721; Woods Rogers, (again) 1728; Richard Fitzwilliam, 1733; John Tinker, 1738; William Shirley, 1759; Thomas Shirley, 1767; Montford Brown, 1774; John Maxwell, 1779; James E. Powel, (lieut.) 1784; John Earl of Dunmore, 1786; John Forbes, (lieut.) 1797; William Dowdeswell, 1797; John Halkett, 1801; Charles Cameron, 1804; Lewis Grant, 1820; Sir J. C. Smith, 1829; B. T. Balfour, (lieut.) 1833; Lieut. Coll. William G. Colebrook, 1835.

The military strength of the colony is shown as follows:—New Providence regiment of militia; 1 colo-

nel; 1 lieut.-colonel; 2 majors; 1 adjutant; 1 quarter-master; 2 surgeons; 1 serjeant-major; 1 military marshal; 7 captains; 13 lieutenants; 26 sergeants; 27 corporals; 3 drummers; 326 privates:—total, 412.

New Providence Marine Corps:—1 major; 1 quarter-master; 1 surgeon; 1 military marshal; 2 captains; 4 lieutenants; 10 serjeants; 8 corporals; 129 privates:—total, 157.

The regular troops amount to about 600 men.

XI. Comparative Yearly Statement of the Revenue of Bahamas.—1827, 15,544l.; 1828, 18,461l.; 1829, 21,439l.; 1830, 17,850l.; 1831, 20,433l.; 1832, 15,808l.; 1833, 10,201l.; 1834, 19,720l.; 1835, 22,803l.

Revenue of Bahamas for 1836.—Imports: Advalorem duties, 1,766l.; flour, 1,916l.; rice, 507l.; spirits, rum, gin and brandy, 2,97ll.; wine, 1,007l.; five per cent. on goods, 4,413l.; miscellaneous, 3,089l.: total imports, 15,669l. Exports and Taxes: sait, 2,100l.; vendure tax, 1,194l.; tonnage, 168l.; miscellaneous, 995l.: total exports and imports, 20,126l.

Yearly statement of the Expenditure of Bahamas.— 1827, 17,459l.; 1828, 17,395l.; 1829, 17,829l.; 1830, 19,205l.; 1831, 19,262l.; 1832, 15,098; 1833,

6,435*l*.; 1834, 20,737*l*.; 1835, 18,277.

Expenditure of Bahamas for 1836.—Civil department, officers salaries, 2,755l.; Ecclesiastical ditto, officers salaries, 1,915l.; Judicial ditto, officers salaries, 3,707l.; Militia ditto, officers salaries, 86l.; Light-house ditto, officers salaries, 289l.; Special Justices ditto, constables salaries and hire of vessels, 1,733l.; Contingencies, 981l.; Appropriation to public departments, 6,643l.; Commissions of receivergeneral and treasurer, 177l.; Interest on treasury bills, 911l.: total, 19,902l.

Recapitulation of the Establishment in 1836.—
[B. B.] Civil Establishment, paid by Great Britain in sterling money, 2,5891.; Judicial Establishment, 3,4001.; Ecclesiastical Establishment, 1401.; total, 6,1291. Civil Establishment paid by the Colony in sterling money, 2,7551.; Judicial Establishment, 3,7071.; Ecclesiastical Establishment, 1,9151.; Migcellaneous Expenditure, 11,4741.; Pensions, 481.; total, 19,9021.

Commissariat Department Bahamas.—Expenditure incurred by Great Britain in aid of Civil Establishments and Military Protection in 1836: Rations of provisions and forage, 4,551l.; fuel and light, 268l.; transport by land and water, 189l.; pay of Extra staff, 259l.; military allowances, 854l.; contingen-

cies, 6,908l.; ordinaries, 7,861l.; pay of commissa-; Colonial Service.—Advance to the liberated African riat officers, 447l.; cash payment on account of the department, mail, boat hire, teachers at Carmichael, army, 21,3411.; the value of supplies received from England, and issued to the army in kind during the year 1836, 2,959l.; cash and provision expenditure on account of army, 26,6751.

Royal Navy.—Amount of cash received from the military chest, 1,9271.; value of supplies received from England, and issued to the royal navy, 9001.; cash and provision expenditure on account of the navy, 2,8271. | 1828.

&c., pay of special justices and clerk of committee of compensation, 6,038l.; amount of general expenditure, 35,541l. None of the above expenses are defrayed by the colony. The particulars of the Ordnance expenditure in the colony, laid out under a note of Parliament, not to be noticed, agreeably to the Master of the Board of Ordnance's letter, dated 11th August

Silver Coins .- Spanish milled dollar, 8s. Cur., 4s. 4d. St.; half ditto, 4s.=2s. 2d.; quarter ditto, 2s.=1s. 1d.; eighth ditto, 1s. = $6\frac{1}{2}d$; sixteenth ditto, 6d. = $3\frac{1}{4}d$.; pistareen, 1s. 6d. = $9\frac{3}{4}d$.; half ditto, 9d. = $4\frac{3}{4}d$. quarter ditto, $4\frac{1}{2}d$. = $2\frac{1}{4}d$.

Rates at which gold, silver, and copper coins pass current in the Bahamas, by act of Assembly passed in the sixth year of his late Majesty's reign.—Sovereign, 11. 16s. 113d.; half ditto, 18s. 5d. 7-13ths; silver crown, 9s. 2d. 11-12ths; half ditto, 4s. 7d. 5-13ths; silver shilling, 1s. 10d. 2-13ths; ditto 6d. = 11d. 1-13th; 9d. = 5d. 1-26th; half ditto, 2d. 1-52nd; copper penny, 2d.; half ditto, 1d.

The amount of gold coin in circulation, may be estimated at, in sterling 10,000l.; silver coin in circulation, estimated at 26,000l.; copper coin, 501.: total, 36,0501. In the public bank there is in cash and notes about 12,0001. sterling. The debt of the colony is 18,2971. at six per cent interest. [B. B. for 1836.1

XIV. European and tropical vegetables and fruits thrive and are abundant; beef, mutton and poultry good and plentiful; the shores abound with fish, and there is turtle enough among the Bahamas to supply all Europe; almost every island has pretty good water; ambergris is occasionally found; cotton was formerly an abundant article of exportation, and there is scarcely a spot in any of the islands that is not covered with a luxuriant vegetation.

Ship timber of a most excellent quality, is abundant on many of the Bahama islands; logwood, brazilletto, fustic, green ebony and satin wood, are produced in considerable quantities for building or planking vessels; the cedar, horseflesh, madeira, mastic, and other durable woods, in great plenty, and there is an inexhaustible supply of very superior firewood; cassada or cassava, at 10s. per cwt.

sponges of good quality abound on the island shores. and the water from the wells at New Providence, has the desirable quality of keeping good at sea for any length of time.

The agricultural stock in the Bahamas in 1831, consisted of 1,165 horses, asses, and mules; 3,250 horned cattle; 5,975 sheep and goats; and 3,755 swine. The quantity of produce raised was 30,350 bushels of Indian corn (at 4s. 4d. market price per bushel); 74,250 lbs. of potatoes and yams (at 6s. per cwt.); 3,225 bushels of peas and beans (at 5s. 10d. per bushel); 38,465 dozen of pine apples (at 2s. per dozen); 22 tons of cotton (at 5d. per pound); 30,500 melons and pumpkins (at 3s. per dozen); 31,300 lbs. of ocre (at 2d. per lb.); and 19 tons of

Number of Ships built in the Colony in 1836. [B.B.] -In New Providence, 7, of 240 tons burthen, registered according to law; Harbour Island, 3, of 119 tons; Abaco, 4, of 98 tons; Exuma, 1, of 16 tons; Rugged Island, 1, of 6 tons; Rum Key, 1, of 4 tons; Andur Island, 1, of 18 tons: total, 18 ships, 501 tons.

EXUMA.—Salt is manufactured on this island in a pond of 223 acres; in Rugged Island in a pond of 42 acres; in Turks Island in a pond of 130 acres; on Gunn's Key, and in a pond of 212 acres on Long Key: on Rum Key, in a pond of 650 acres; and in several ponds on Long Island, extent together, 308 acres. There are no mines in this colony.

On the Island of New Providence, are several private quarries of porous limestone, used in building houses, &c., and also for dripstones. It is in great abundance throughout the colony, and its value at the quarry is about 61d. per square foot. Smacks and boats are employed in fishing, varying in size from 12 feet to 20 tons. Fish and turtle are worth, on an average, about 3½d. per lb.

within the Bahamas Islands; there are no established fisheries, properly so called; many persons, however, get their livelihood by fishing and turtling on the coast of Cuba, and obtaining sponge on the Bahama bank

CHAPTER XVI.—THE BERMUDAS OR SOMER ISLES.

Section I. The Bermudas, or Somer Isles, exceeding 300 in number, lie in the Atlantic Ocean, in latitude 32.20. N. longitude 64.50. W. about 600 miles. E. of South Carolina, the nearest point of North America, and containing about 12,000 acres.

II. They were discovered in 1522, by J. Bermudez, a Spaniard, who found them uninhabited. May, an Englishman, is said to have been wrecked there at an earlier period, and with his companions built a vessel, in which he returned to England. Sir George Somers was wrecked upon them in 1609, and made his way to Virginia in a vessel constructed of cedar, which did not contain an ounce of iron, excepting one bolt in the keel. They were settled shortly after from Virginia and England, but disputes for some time prevailed respecting the rights of the Virginia Company. They have ever since remained in the uninterrupted possession of England, and at one time attracted great attention for their salubrity and picturesque scenery.

III. When viewed from a ship at sea, the Bermudas appear to have but a trifling elevation compared with the bold and lofty aspect of many of our West India Islands; indeed the surface is very irregular, seldom presenting any lofty elevations, the highest land not exceeding 200 feet. The principal islands (St. George's, Ireland, St. David, Somerset, Paget, Longbird and Smith's), together with the minor islands, lie in such a manner as to form several bays, some of which are capacious and deep enough to afford harbour for the whole British navy, but difficult of ingress and egress; St. George's, the main island, Somerset and Ireland, form a chain, with very little interruption, for about 30 miles long, seldom exceeding in breadth two miles (resembling a shepherd's crook), running nearly E. and W., St. George's being the E. and Somerset and Ireland the W.; it appears, in fact, as if an extensive island had disappeared in some convulsion of nature, leaving above water only a long narrow ridge, without either mountains or vallies, rivers, forests, or plains. Groves of cedars are here and there detached on little plateaus of rising ground; and the numerous basins (some sixteen miles in circumference) formed by the islands give very much the appearance of lake scenery. The island of St. George, the military station of the colony, and formerly the seat of government, is about three miles long, and at no part exceeding half a mile broad: it lies at the entrance of the only passage for ships of burthen. The harbour of St. George, when once entered, is said to be one of the finest in the world, and capable of containing the whole British navy. It is completely land-locked. The entrance to the harbour of St. George is narrow, and is protected by a fort called Cunningham. After passing this entrance, the town presents one of the most beautiful landscapes the eye ever rested on. square tower to the little church—the white and vellow houses—the clear and cloudless sky above, with the dark foliage of the cedar-clad hills in the rear,combine to make the scene most enchanting. the westward of the town is a hill called Fort George, where is situated the telegraph. The streets are

extremely narrow, which, however, is undoubtedly an advantage in all warm climates, as it creates much pleasant shade, and without which, walking in the middle of the day would not be hearable. The houses are low, scarcely ever exceeding two stories, and built substantially of Bermuda stone. The barracks are situated on a hill to the eastward of the town, and are very commodious, and would probably comfortably accommodate 2,000 troops. There are few springs in the island, and consequently the people depend on rain, for the purpose of catching which they have large tanks, built of stone, and covered with Roman cement. The air being free from smoke, and the roofs of the houses newly whitewashed, the water thus caught is very pure, and is really as delicious as any I ever tasted. The government have large reservoirs of water on the north side of the town, for the supply of the navy. The fortifications for the protection of this end of Bermuda, are the already mentioned Fort Cunningham, at the mouth of the harbour, and a fort called Catherine, not quite completed, situated at the N. E. extremity of St. George's Island. The dock yard is situated at the W. end of Ireland Island, and distant about 15 miles from St. George's. For about three miles the course lies between St. George and Long-bird Islands; after passing which we arrive at the westernmost outlet of St. George's Harbour, a narrow passage about the eighth of a mile wide, called the Ferry. To protect this opening, a Martello tower, with one gun, erects its head. The ferry is so seldom used for the ingress or egress of vessels, from the shallowness of the water and strength of the current, that the above mentioned fortification is quite as strong as necessary. The tide runs with much force. The rocks on the N. of the island present a very formidable appearance, and certainly do away with the necessity of the work of man's hands, for no vessel could approach within 10 or 15 miles of this side of Bermuda without the certainty of being shipwrecked, and the lives of its crew placed in the greatest jeopardy. Nine miles N. is a rock, which, at low tides, presents a surface of about 40 feet in circumference, called the North Rock. Shoals surround it for many hundred yards, and the water, when the wind is boisterous, breaks over it with a terrific noise. This rock, placed as it were as a beacon, seems to say, "Hitherto shalt thou come, and no further;" for it must be a miracle indeed if a ship gets nearer shore than it, for the coral shoals lie thick in every direction in its neighbourhood. It is not often that vessels are wrecked on the North Rock, because careful mariners know the danger of passing Bermuda to the northward, as all books of navigation recommend the south side as being the safest. The shore presents rather a sterile appearance, and even the cedars, which have the misfortune to be growing near the water, have a dead dingy appearance. The sterility arises from the spray of the sea, the salt from which, acted upon by the sun, causes the grass, &c., to wither and die away. shore is principally inhabited by fishermen and shipbuilders; the produce of the occupation of the former

of the latter, in its various ramifications, affording! employment to shop-keepers, mechanics, labourers, and sailors. About midway between the Ferry and the dock yard is one of the houses appropriated as a residence for the governor for the time being; it is scarcely seen from the water; but near it is a hill called Mount Langton, on which is a flag staff, by which communication is kept up between St. George, Somerset, and the dock yard. A few miles beyond this is the residence of the admiral, King's Hill, or Clarence Lodge. Ireland Island, on which the dock yard is, is about one mile in length, and perhaps a quarter broad, and is nearly all occupied by the buildings required for the officers, artizans, and for storehouses. The hospital is situated on the highest part of the island, and is very large and commodious. The officers' residences are built in the English style, and are very comfortable. The most important work is a breakwater, similar to that at Plymouth. Several hundred convicts are employed on it. The dock yard is kept in fine order.

The Bermudas are, in fact, the Gibraltar of the West Indies, and Washington was very desirous of annexing them to the Republic, to make them, as he said, "a nest of hornets to annoy English commerce".

IV. A stone called "Bermuda rock," and peculiar to the place, forms, with few exceptions, the basis of the islands and minor rocks; it is extremely porous -so much so as to be unfit for filtering stones; at first sight it closely resembles loose sandstone, but on minute inspection it will be found to consist of a congeries of comminuted shells cemented together, and occasionally including larger and tolerably perfect portions of shells; the layers of this stone are stratified, and the dip varies very much in the direction it takes and the angle it forms with the horizon; the stone is easily wrought with axes and saws, is naturally friable, but becomes harder when exposed to the atmosphere, and changing from a whitish to a bluish grey colour; it is used in the principal buildings; for when covered with cement or lime it is impervious to the rain or damp, and was therefore at one time an article of extensive export to the United States of America.

Lieut. Nelson says that the whole group is composed of calcareous sand and limestone, derived from comminuted shells and corals, and the different varieties are associated without any definite order of 3877.

being the principal sustenance of, and the business position, the harder limestones occasionally resting of the latter, in its various ramifications, affording upon loose sand. The arrangement of the beds is employment to shop-keepers, mechanics, labourers, often dome-shaped, but in many instances the strata and sailors. About midway between the Ferry and are singularly waved.

The bottom of the basin within the zone of coral reefs is stated to consist of corals, calcareous sand, and soft calcareous mud resembling chalk, and con-

sidered by the author to have been derived from the decomposition of zoophytes.

Under the head of encroachments, he describes the banks of detritus thrown up by the sea, and the progress which, under certain circumstances, the loose sand makes in overwhelming tracts previously fertile. He states that wherever the shrubs and creepers have been destroyed, the sand has spread rapidly, but that it is invariably stopped as soon as it arrives at a plantation or row of trees.

The soil is of a reddish brown colour, and in some places, as at Ireland Isle, bearing strong marks of oxyde of iron. Round the coast there are some districts with a strong tenacious blue clay; in others a micaceous, kneadable brick earth; and again, an argillaceous soil, with luxuriant pasturage. There is no other point in the geology worth noticing.

V. The climate is favourable to European health, and may be said to be a perpetual summer. The meteorological register for the year is—

	Max. Med. Min.			WINDS.	REMARKS.					
January	64	66	63	N.W.	Cold frequent rain.					
February	60	:63	59	N.E.	Ditto.

Weekly cost of each Prisoner per head, 6s. 3d.

There is a convict hulk establishment at the Bermudas. The following is the latest account of its extent and expenses. The convicts are employed in constructing naval works, &c.

An Account showing the Expense of the Convict Hulk Establishment at Bermuda, from the 1st of January, to the 30th of June, 1837; the Labour of Convicts during that period; the Number of Prisoners confined; and the Number of Days' Labour performed by such Prisoners on the Public Works. [Report of J. A. Capper, Esq., to Lord Melbourne, 27th February, 1838.—Commons' Paper.]

								,
Name of the Hulk.	Station.	Expense.	Average No. of Convicts on Board.	Number of Days' Labour performed.	Number of Artificers employed.	Number of Labourers employed.	Rate per Diem.	Total Value of Labour.

X. The colonists have their own Legislative Assembly (36) and Council of eight members. There is no militia.

XI. Taxes in Bermuda in 1836. [B.B.]—On Rum and other Spirits, 2\frac{1}{4}d. per gallon; Wine, 1l. 10s. per pipe; Cider, Ale, or Mum, 3s. per barrel, if by inhabitants; double duties by all other.

Powder Duty.—A tax levied on vessels the property of colonists; taxes on personal property, 24 per cent., &c. &c.

Local Revenues. — St. George's, 217l.; Hamilton, 101l.; Smith's, 62l.; Devonshire, 91l.; Pembroke, 369l.; Paget, 112l.; Warwick, 154l.; Southampton, 87l.; Saudy's, 152l.; Total raised from Pew Rents, Parish Rates, Spirit Licenses, and Dog Tax. Expended in salary of Rector, and support of Poor, &c.

Comparative Yearly Statement of the Revenue of Bermudas. [B.B.]—1827, 12,234l.; 1828, 13,789l.; 1829, 14,390l.; 1830, 17,902l.; 1831, 13,484l.; 1832, 14,930l.; 1833, 14,577l.; 1834, 15,408l.; 1835, 16,726l.

Revenue of Bermudas for 1836.—Custom Duties received under Acts passed previous to 18th George 3. chap. 12. 213l.; Custom Duties received under Acts passed subsequent to the above, 4,389l.; Colonial Liquor Duty, permanent, 517l.; Colonial Annual Supply Bills, 5,383l.; Parliamentary Grant, 4,049l.; Drawn for upon Receiver-general of Customs in aid of Customs, Salaries, and incidental Expenses, 766l.; Miscellaneous, 1,313l.; Total, 16,630l.

Comparative Yearly Statement of the Expenditure of Bermudas.—1827, 10,405l.; 1828, 27,813l.; 1829, 15,834l.; 1830, 15,445l.; 1831, 16,201l.; 1832, 15,406l.; 1833, 12,380l.; 1834, 14,835l.; 1835, 18,171l.

Expenditure of Bermudas for 1836.—Governor's Salary, &c., 2,785l.; Civil Officers, 865l.; Customhouse Salaries, 2,595l.; Judicial Department, 1,400l.; Ecclesiastical Department, 1,823l.; Miscellaneous, 9,869l.; Total, 19,437l.

Recapitulation of the Establishment.—Paid by Great Britain in sterling money: Civil Establishment (exclusive of Customs Department), 2,799l.; Customs Department, 766l.; Judicial Establishment, 1,300l.; Ecclesiastical Establishment, 497l.; Total, 5,363l. Paid by the Colony in sterling money: Civil Establishment (exclusive of Customs Department), 852l.; Contingent Expenditure, 1,692l.; Customs Department, 1,828l.; Contingent Expenditure, 190l.; Jument, 1,828l.; Contingent Expenditure, 190l.; Jument, 1,828l.;

dicial Establishment, 100l.; Contingent Expenditure, 196l.; Ecclesiastical Establishment, 1,326l.; Contingent Expenditure, 49l.; Miscellaneous Expenditure, 7,839l.; Total, 14,073l. By Great Britain, 5,363l.; by the Colony, 14,073l.; Grand Total, 19,437l. [B. B.] The Governor's salary is 2,199l. from parliamentary grant, 533l. from the Colony, from quit rents 52l.=2,784l.

British Expenditure for Commissariat Department, 1836. [B. B.]—Provisions and Forage, 5,2771. Fuel and Light, 891. Miscellaneous Purchases: for Hospital, 102l.; for Commissariat, 17l.; Total, 119l. Pay of Persons in the Commissariat (excluding Officers and Established Clerks), 6221. Money Allowances to Commissariat, 1451. Rent and Contingent Expenses for Commissariat, 1781. Regimental and Staff Pay Allowances: No. 1, Pay, 7,2711.; 2, Money Allowances, 3801.; 3, Passage Money, Expenses of Courts Martial, and Contingencies, 1291; 4, Half-pay, Widows' Pensions, 1621.; 5. Chelsea Pensions, 1301.; Total, 8,0721. Pay of Commissariat Officers and Established Clerks, 8371.; Commissariat Half-pay, 2681.; Total, 1,1051. Imprests to Navy Departments 24,9501.; ditto to Convict Establishment, 8611.; Total, 41,4221. Advanced on account of the Expenses of the Commissioners of Compensation under the Act for the Abolition of Slavery, and to be replaced from the Fund upon which such Expenses are specially charged by that Act, 406l. Total Amount, 41,828l.

British Expenditure for Ordnance Department, 1836. [B.B.] Money Allowances, 1131. Drafts drawn for —Pay and Allowances Royal Artillery and Royal Engineers, 2,9101.; Rations and Stoppages (ditto), 1,1401; Barrack Department — Pay, Rent, Repairs, and Contingencies, 5471.; Imprests for Storckeeper's Department, 9071.; Military Works, 5,3541.; Total, 10,8581. Grand Total, 10,9711.

Bills are not drawn by the Commissariat expressly for the pay and allowances of the troops, who are usually paid in dollars received from Jamaica and other stations. Those that are drawn are almost entirely to pay for navy and army supplies. In the course of the year 1836, bills to the extent of 9,000l. for navy, and 6,518l. for army services, were drawn, at the fixed period of 1½ per cent. The amount of ordnance drafts on the military chest is stated above.

The par of exchange is 150 per cent. There is no paper money, and the amount of coin is not ascertainable.

XIII. The cedar grows to a great height in many places, and would seem in several parts to spring from the bare rock; it is used for ship-building; the palmetto is much cultivated for the making of straw hats, but arrow-root seems to be the staple of the island, and machinery has recently been imported for its preparation; coffee, cotton, indigo, tobacco, &c., are grown as good as in the West India islands, as do

also all the fine fruits and vegetables of the tropics. There are no wild animals, the feathered tribe is confined to a few varieties, but the sea around teems with fish, viz. the mackarel, mullet, hamlet, hine, grouper, porgy, rockfish, &c., and the whale is pursued with great animation, and killed for the sake of his oil and bone.

Manufactures, Mines, &c. 1836. [B.B.] There were eight ships built in the colony this year, of 631 tons burthen. The only manufactures are arrow-root, straw and palmetto plat and hats, and other such articles, made of straw or the palmetto leaf. There is an inconsiderable whale fishery carried on in Bermuda, that employs about 12 whale boats, and their crews, three months in the year. The number of whales seldom exceeds 20 in the season, yielding about 1,000 barrels of oil. This fishery being carried on very near the land, is capable of considerable extension, at small risk, by the employment of additional capital. The reefs that surround the islands abound in fish of great variety; and the inhabitants being in general exceedingly well supplied with it at

BOOK II.—POSSESSIONS IN SOUTH AMERICA.

CHAPTER I.—BRITISH GUIANA.

SECTION I. British Guiana, embracing the settlements on the rivers Essequibo, Demerara and Berbice, and covering an area of nearly 100,000 square miles. Under the Demerara and Essequibo districts, 70,000 square miles; and within the Berbice territory, 25,000 ditto. Extends about 200 miles from E. to W. along that alluvial portion of the South American Continent termed the 'Main.' which is formed by the deltas of the rivers Amazon and Orinoco, having for its boundaries on the E. the mouth of the river Courantyn, in latitude 6.10. N. longitude 56.25. W.; on the W. the boundaries of Colombia, between the Baryma and Pomeroon rivers, about latitude 8. N. longitude 60. W., and to the southward, or inland, about 100 leagues, or perhaps to a mountain range (the Cordilleras) extending on the eastward to within two degrees of the equator. Some consider the river Baryma, in latitude 8.35. N. longitude 60.10. W., the Western boundary; others the Pomeroon river, latitude 7.40. N. longitude 58.50. W.; but the limits have never yet been completely settled.

II. The territories on this coast are called, 1st, Spanish; 2nd, British; 3rd, French, and 4th, Portuguese Guiana. The 1st lying on both sides of the Orinoco, and extending S. and S. W. to the Rio Negro, and the Portuguese settlements, is bounded on the E. by the river Baryma in 8.50. N. latitude, 60.5. W. longitude. 2nd. British (formerly Dutch) Guiana described in the text; and 3rd, French Guiana (called Cayenne, from the name of the island on which the chief town stands) extends from the boundary of British Guiana on the W. to Vincent Pincon's Bay, near Cape North, in latitude 2.35. N. longitude 51. W.; (this bay the Portuguese have confounded with the bay of the great river Oyapoko, which joins the sea in N. latitude 4.35., W. longitude 51.20.) and 4th, Portuguese Guiana, it is alleged, extends from Cape North, between the parallel of 1 and 2.25 N. latitude, to the junction of the great river Amazon with the Rio Negro or black river, thus cutting off the southern parts of French, British, and Spanish Guiana, from 51. to nearly 65. W. longitude, 800 miles, and having for its S. and S.W. boundary the great river Amazon.

A detail of the early history of this part of the South American Continent would be out of place in a work whose chief object is to enable the British public to form a correct view of the position, magnitude and importance of our colonies; the leading points of the European settlement and English acquisition will therefore suffice. So early as 1580, the Dutch attempted to form small settlements along this coast on the banks of the Amazon, Orinoco, and Pomeroon rivers (for trading purposes), on the latter named river they had a factory called Nieuw Zealand, and in 1581 the States-General of Holland privileged certain individuals to trade to the coast. These proceedings were viewed with a jealous eye by the Spaniards, who, aided by the Indians, drove the Zeaniards, who, aided by the Indians, drove the Zeaniards, who

landers from their station; the persevering character of the Dutch would not allow a first check to daunt their efforts, their commander, Joost Van Den Hoog, succeeded in gaining possession of a small island at the junction of the Mazerooni and Cavuni, called Kykoveral; and in 1602, Jan Van Peere, a native of Flushing, attempted to open a trade with the Indians of the Orinoco, but was defeated by the Spaniards; the Zealanders, however, about this time, effected a settlement on the banks of the Essequibo, in 1613 they reported their colony to be in a flourishing condition, and in 1621, the Dutch government undertook to supply the colonists with negro slaves from Africa; for the prosecuting of which trade a company was formed and a monopoly granted. Jan Van Peere, with his companions, when driven by the Spaniards from the Orinoco, commenced colonizing on the banks of the Berbice river, and cleared a large extent of territory between the rivers of Berbice and Courantyn. In 1657, the Zealanders colonized on the river Pomeroon and the creek Morocco, and erected thereon the towns of New Zealand and New Middleburgh. Essequibo, in 1665, was taken by the English, and afterwards plundered by the French; but both were expelled from the Dutch settlements, in the following year, by an expedition from Holland. It is said that, in 1662, after its settlement, the whole coast was ceded by Charles II. to Lord Willoughby, the then Governor of Barbadoes, who named the principal river wherein Paramaribo is situate, and, in fact, the whole colony. Surryham (in honour of the Earl of Surry, the term being afterwards changed into Surrinam), and that the colony was purchased from the heirs of Lord Willoughby by the British crown, and exchanged with the Dutch Government for New Holland, in North America (now New York). In 1669, the whole of Dutch Guiana was transferred from certain gentlemen in Amsterdam, Flushing, &c., who claimed to be proprietors, to the Dutch West India Company. In 1712, the French took possession of Berbice, by force, from the Dutch proprietors; but, in 1714, returned it to its former owners, on the payment of a sum of money. At this period, the States-General contracted for the supply of negroes to the colony, in the proportion of two-thirds male and one-third female, at the rate of 250l. each.

In 1720, the proprietors of Berbice, not having a capital equal to the cultivation of which the colony was capable, raised a fund of 3,200,000 florins, divided into 1,600 shares of 2,000 florins each, to be employed solely in cultivated sugar, cocoa, and indigo; 50 per cent. was to be repaid in 1724, the remainder when required by the directors, who consisted of seven proprietors (afterwards increased to nine) of 20,000 florins each, residing at Amsterdam; the former proprietors of Berbice were also to be paid 800,000 florins, or allowed to purchase 400 shares. From this period the colonies rapidly flourished and extended;

coffee cultivation was introduced from Surinam, and a fort built at the junction of the Canje. A passage from the river Amazon to the Essequibo was discovered in 1735, by a Portuguese, named Silva de Rosa, who had been private secretary to the Viceroy of Brazil; but, having killed a nobleman in a duel, he fled with some negroes in a canoe along the Rio Branca, Tacusa, Moan, and across the lake Amuca; thence entering the Rippanouny, and finally reaching Essequibo.

In 1741, the planters at Essequibo, thinking the low lands near the sea more productive than the upper country, over which they had previously settled, began emigrating to the former; and, in 1745. the Directors of the Chamber of Zealand gave permission to form plantations on the uninhabited coast of the river Demarara. A most disastrous negro insur-rection took place in Berbice, in 1763, from which the colony was not relieved until after eleven months desolation, and only then by the arrival of a strong squadron from Holland. Courts of policy and of civil and criminal justice were established for Demerara 1773, on an island named Borsden, about 20 miles up the river; but, the following year, the seat of government was removed from thence to the east point of the mouth of the river, and named Stabroek, now George Town. In 1781, the colonies on the Essequibo and Demerara were placed under the protection of Great Britain, by a squadron of Admiral Lord Rodney's fleet; but, in 1783, the French took temporary possession of the whole Dutch settlements. which, in 1796, surrendered to the British forces under the orders of Sir Ralph Abercrombie, and com-manded by Major-Gen. White. These settlements were, however, restored to the Dutch by the treaty of Amiens, in 1802, but again taken possession of by England on the breaking out of the war in 1803; since which period they have belonged to Great Britain. In 1812, all distinctions between the colonies of Essequibo and Demerara, whether of jurisdiction or otherwise, were abolished—the office of commander of Essequibo was done away with, the courts of civil and criminal justice of both colonies united at Demerara, and the judicial established at Fort Island discontinued: the name of the capital was also changed from Stabrock to George Town, and a board of police appointed for its internal management, the financial representations of Demerara and Essequibo combined with the College of Kiezers, and the right of suffrage extended to all persons paying income tax on 10,000 florins, or possessing 25 slaves. In 1807, the slave-trade was only finally abolished. By an additional article to a convention signed at London, August 13, 1814, Demerara, Essequibo, and Berbice were finally ceded to Great Britain, with the condition that the Dutch proprietors had liberty, under certain regula-tions, to trade with Holland. The year 1818 witnessed the first introduction of trial by jury and the In 1820, after commission of oyer et terminer. much angry dispute relative to the enormous and illegal exactions of fees, a tariff of the same was fixed, and a petition to the crown, praying for an enquiry into judicial abuses, agreed to, which enquiry was ordered. A serious insurrection of the slaves took place on the east coast of the Demerara river, in 1823, which was finally suppressed, and Mr. Smith, a Missionary of the London Society, condemned to death for inciting the negroes to rebellion-a sentence which was commuted at home to total banishment from the West Indies: Mr. Smith died in prison pending the sentence. In 1831, the colonies of Demerara, Essequibo, and Berbice were united into one government, and called British Guyana.

Governors of British Guvana-Demerara and Essequibo .- Gov. Beaujon, from capture in 1796 to restoration in 1802; Lieut. Col. Nicholson, Acting Gov. from capture in 1803 to arrival of Gov. Beaujon, 1804; Gov. Beaujon, from 1804 to October, 1805; Brig. Gen. Montgomery, Acting Gov., from Gov. Beaujon's death, in 1805, to arrival of Lieut. Gov. Bentinck, 1806; Henry Bentinck, Esq., Lieut. Gov. from 1806 to August, 1807; Brig. Gen. Montgomery, and Col. Nicholson, Acting Govs. during absence of Lieut. Gov. Bentinck, August, 1807, to end of 1808; Henry Bentinck, Esq., Gov., January, 1809 to 1812; Major Gen. Carmichael and Major Gen. Murray, Acting Govs. 1812 to 1813, on absence of Gov. Bentinck; Major Gen. Murray, Lieut. Gov., 1818 to 1824; Major Gen. Sir B. D. Urban, Lieut. Gov., 1824 to 1831; Major Gen. Sir B. D. Urban, Gov. of British Guiana, 1831 to 1833; Lieut. Col. Chambers and Col. Sir C. F. Smith, Acting Govs. 1833, on resignation of Sir B. D. Urban; Major Gen. Sir J. C. Smyth, Gov. June, 1833, to March, 1838; Major Orange, Acting Gov. 1838, on death of Sir J. C. Smyth; Henry Light, Esq. from May, 1838.

Berbice.-Gov. Van Batenburg, from capture in 1796 to restoration in 1802; Lieut. Col. Nicholson, Acting Gov. from capture in 1803 to 1804; Gov. Van Batenburg, from 1804 to 1806; Lieut. Col. Nicholson and Brig. Gen. Montgomery, Acting Govs. from end of 1806 to 1809; William Woodley, Esq. Lieut. Gov. from March, 1809, to January, 1810; Major Gen. Dalrymple, Acting Gov. 1810; Robert Gordon, Esq. Lieut Gov. end of 1810 to middle of 1812; Brig. Gen. Murray, Acting Gov., 1812 to 1813, on governor's absence; Robert Gordon, Esq. Lieut. Gov. February to June, 1813; Major Grant, Acting Gov., 1813, on Lieut. Gov. Gordon's resignation; Maior Gen. John Murray, Lieut. Gov. August to December, 1813; Major Grant, Acting Gov. December, 1813, to January, 1814; H. W. Bentinck, Esq. Licut. Gov. January, 1814, to November, 1820; Major Thistlethwayte and Col. Sir Jno. Cameron, Acting Govs. November, 1820, to March, 1821, on death of Licut. Gov. Bentinck: Harry Beard, Esq. Lieut. Gov. March 1821, to March, 1825; Major Gen. Sir B. D. Urban, Acting Gov. March, 1825, to July, 1826, on Lieut. Gov. Beard's absence; Henry Beard, Esq. Lieut. Gov. July, 1826, to union of the colony with Demerara and Essequibo, in 1831, as British Guiana.

111. With the exception of ranges of sandstone hills, (some on the west bank of the Demerara river from 100 to 150 feet high, and nearly perpendicular) extending 20 to 30 miles inland, and rarely more than 40 or 50 feet above the level of the rivers and crecks; the whole country inhabited by the Europeans is perfectly flat and alluvial, bearing a striking resemblance to Holland and Flanders, and, like those countries, drained by canals and sluices, with lofty dikes or mounds of mud, of considerable thickness, embanking each estate, and kept, together with the numerous bridges, in repair by the proprietors of the land in which they are situate.

As the country is ascended from 80 to 100 miles inland, its fine savannahs are interrupted by, in some places, a beautiful hill and dale territory, varied with high and frequently rocky land—presenting a strong contrast to the rather monotonous scenery which a dead flat possesses, and which those who have visited Bengal and the delta of the Ganges, as contrasted with the upper provinces, will readily understand.

Further southward, at the Coomarow Fall (vide river Essequibo), the granitic table-land belonging to the Cordillera rises to the height of 6,000 feet above the level of the sea, at 3,000 miles distant from the ocean.

The whole face of the coast of Guiana, from the Maranon to the Orinoco, is low, and generally bordered with a sandy flat, extending far out to seaward: moreover the various large rivers by which it is intersected, continually bring down from the upper country vast quantities of alluvial matter, which, on depositing, form a margin of low ground, covered with mangrove bushes, appearing an inaccessible barrier at low water, but completely hidden at full tide. About 500 paces within these mangroves, the low and level savannahs commence, extending irregularly inland, and every where intersected by rivers, rivulets and creeks, with a dense, luxuriant and magnificent vegetation. The alluvial flat may be considered to terminate at the sand-hills, the general breadth from the sea being about 30 miles, although the first indications of rock are about 70 miles inland from George Town, consisting of apparently a porphyritic sandstone under water. The plantations are regularly ranged on either side of the great rivers, or along the coast, in allotments of from 500 to 1,000 acres each. The Dutch West India Company parcelled the allotments out into 500 acres conditional grants, with an additional 500 acres behind the first allotment, when two-thirds of the latter were cultivated. Sales and divisions of patrimony have caused some changes in the area of the estates. The dwelling-houses, elevated on piles of timber, are generally close to the river's brink, with a wharf or landing-place, opposite, for the convenience of shipping produce; buildings of different descriptions are scattered about in every direction; sugar-mills driven by wind, or by steam, and on the coffee plantations, logies or barns, three stories high, form a picturesque prospect, in addition to the numerous boats sailing up and down the rivers and creeks; while the insulated, well-tilled plantations, excellent brick-made and avenued roads, with numerous white bridges, afford a most pleasing indication of an industrious and intelligent community. The physical aspect of the colony may be further judged of by its Rivers. The three great rivers within British Guiana, are the Essequibo, Demerara and Berbice, with their numerous tributaries: to begin with the most westerly, the Essequibo, situate nine miles west of the Demerara river, at its embouchure from one side of the main land to the other, is from 15 to 20 miles wide, and covered with many beautiful low, and bushy islands, with shoals or sandy spits, extending from the north parts of the islets a considerable distance to seaward, and dividing the navigation into four separate channels. The most eastern island is termed Leguan, (containing 24 sugar estates), between which and the east side of the river is the ship channel, a wide passage, but much encumbered with shoals; to the westward is a long and narrow island, called Wakenaam, containing 18 sugar estates, its dimensions are about nine miles long and 3 broad; to the north-west of the latter and near the west shores is a small islet, termed Tiger Island (containing three sugar estates). Hog Island, is the largest in the Essequibo: its south end extends nearly to Fort Island. A succession of other islands (one termed Fort Island about 15 miles from the mouth), extend to the southward and further up the river, from 25 to 30 miles, between all of which there are channels, but from the extensive deposits of mud, it is difficult to state the soundings for any length of time, the depth of water

on the whole coast being continually undergoing a change, according to the heaviness of the rains or the duration of the winds that blow on the shore. From Fort Island, the Essequibo runs nearly south for about 30 miles, where it is joined by the large river Cayuni, which runs nearly south west, afterwards north west through the province of Colombian Guyana, where it is supposed to join some of the interior branches of the Orinoco: a little further, or inland, the Essequibo is joined by the Mazarooni river, which makes a considerable sweep to the north west, and then returns so as to form a large peninsula, inclosing lofty mountains and considerable creeks or rivulets: indeed for 80 miles inland the breadth of the Mazarooni is so great, and the wooded islands and creeks so numerous, that it has more resemblance to a lake than a river, and the influence of the tides is felt, at least in the Essequibo, 100 miles from the ocean.

The DEMARARA RIVER, is situate to the south east of the Essequibo, 16 miles from Leguan island, and about 57 miles westward of the bar of the Berbice river, in 6.40. N. Lat. and 57.45 W. Long. nearly three miles broad at its mouth, and becoming narrower as it is ascended. The capital of British Guiana, in lat. 6.49.20. N. long. 58.11.30. [Light-house] W. formerly called Stabroek, now called George Town, is situate amidst a dense foliage, on its E. or right bank, about one mile and a half from a small fortification, built of mud and fascines, with two low platforms, and termed Fort William Frederick. If it were not for the tropical scenery around George Town, it might be mistaken for a Dutch city; except close to the river the houses, raised on supports to prevent damps, are widely scattered, built of wood, after the Dutch style with a stoup, coloured according to the fashion of the owners, surrounded by a garden and lofty trees, and separated from each other by canals, dykes, or lofty mud embankments. The most ancient part of the capital Stabroek, runs back from the river towards the forest, consisting of two rows of houses full a mile long, with a broad and shaded road between them, and a canal in the rear of each line of houses, communicating with the river. In consequence of the scarcity of fresh water, each house is provided with a large cistern, and pipes leading into it, for the preservation of rain water. The barracks, hospitals and public buildings in Demerara, are in evidence of the taste and munificence of the colonists, at whose cost they have been erected. George Town, is divided into districts, thus: Kingston, joining Fort William Frederick; Cumingsburgh, North and South; Vlissengen, which is subdivided into Robs Town and Lacey's Town. Stabrock, a district in itself, and ancient part of the Dutch capital; also en Rust and Charles Town, which are bounded by plantation La Penitence; to the eastward of Fort William Frederick, is situated Camp House, the residence of the governor, a few hundred yards to the east of which is the residence of the ordnance storekeeper. Between Camp House and the ordnancce department, a little to the south, are placed two splendid hospitals, with kitchens, cisterns, &c. for the military; nearly opposite to which, the new military barracks have been lately erected; they cannot be surpassed in accommodation in any part of her majesty's dominions; two for the men and officers, with kitchens, servants' apartments, cisterns, &c. &c. To the east of the ordnance department, are the quarters of the engineers'; and adjoining the engineers' quarters are the York and Albany barracks, built by the colony, for the accommodation of 200 men and officers. Facing the river, in the district of Stabroek, new public buildings of bricks, stuccoed, have been erected by the colony to accommodate all the public officers; they have cost the colony upwards of 50,000l. sterling: near to the latter is the Scotch church, a very handsome modern building, to the eastward of which is the town guard-house, &c. The river is navigable by ships of burden for 100 miles up, as far as the cateracts, and affording an excellent harbour, capable of holding the whole navy of Great Britain; but unfortunately the bar will not allow vessels that draw more than 18 feet to go over it. For 30 miles inland, along the banks of the Demerara river, the country consists of extensive level meadows or savannahs; several sand-hills then appear, and as the river is ascended, the country becomes more broken and mountainous.

The general direction of the river, ascending it, is south, with a slight inclination to east; the rapids in a straight line, being not more than 70 English statute miles south by east of George Town, but 106 by the course of the river. The difference of level between the water above and below the rapids is only 12 feet, and the river describes at them a very considerable arc of a circle, the chord of which is about one mile and a half; the rapids are descended safely in small canoes.

The BERBICE RIVER. Fifty-seven miles east of the Demerara, reaches the Atlantic in 6.24 N. Lat.; at its luxuriant looking entrance, a little to the north of Fort St. Andrew, it is about three miles wide, with low cleared land on both sides, covered with trees, and at a distance resembles a number of islands. the middle channel lies Crab island (so called from its numerous crabs), about one mile in circumference, with a spit of land running out to the north and south dividing the river into two navigable channels; the east with 17 to 20 feet, the west with but eight to 13 feet water. Eight miles north of Crab island is a bar of sand, with only seven feet on it at low water, thus lessening the importance of the harbour. Neap tides at Berbice rise from eight to nine feet, and springs 11 feet; in September before the equinox, they rise 15 feet; the flood sets strong to the west, and the ebb to the east. The times of high and low water at full and change of moon along this coast are, seven miles off Bram's point 5h.; at Bram's point, 5h. 30m.; off Fort Amsterdam, 6h. 10m.; Fort Zeelandia, 7h.; at Demerara bar, generally at half-past four; and at Fort Frederick, at five.

There are several small creeks on the coast, but navigable only by boats, and a shallow flat extending along the shore renders it impossible for vessels, except those of small draught, to approach within a league of the coast. Moderately sized ships can go up the river Berbice as far as Fort Nassau, which is at the distance of 50 miles in a straight line from the entrance, and vessels drawing 14 feet water may, it is said, sail 200 miles up the Berbice. The Canjee river, or creek, waters the Berbice district, and is navigable for schooners, for 50 miles, but its course is then impeded by falls and cataracts. About 40 miles below its head there is a creek, communicating with the Courantyn river, by which despatches have been conveyed from Surinam to British Guiana by the Indians. The banks of the river are low, and covered with numerous plantations, as also along the 60 miles of sea coast territory of Berbice, the roads through which, close along the sea coast, communicating with Demerara, are kept in excellent repair at the expense of the individual proprietors through whose estate they

pass, and may be said to be almost entirely formed of brick. The early Dutch settlers constructed a fortress 50 miles up the river, called Zelandica, but this was subsequently abandoned, and New Amsterdam built on the side of the river Canjee, at its confluence with the river Berbice, two miles above Crab island, on the east bank of the river, where it is intersected by canals, and has all the advantage of the tides.

Three strong batteries protect the entrance of the river; two on the E. side, and the other, York Redoubt, on the W. side, opposite Crab Island. Fort St. Andrews, nearly four miles from the entrance of the river, and two from New Amsterdam, is like Fort William Frederick in the Demerara river, a small, low fortification, consisting of four bastions, surrounded by a ditch or fosse, and mounted with 18 twelvepounders. An extensive savannah or swamp extends in the rear of the fort (which is separated from New Amsterdam by the Canjee river or creek), so that it cannot be commanded from any adjacent point. Sixty miles E. of Berbice river lies the Courantyn, about three miles wide at its entrance, with the navigation obstructed by many small islands and quicksands. The islets are fertile, covered with trees, and having on the W. side good clean anchorage in five fathoms. The W. banks of the river (which form the E. boundary of Berbice) are under British jurisdiction, and have a smiling appearance of cultivation. Besides the foregoing, there are numerous other rivers, which in Guiana are termed creeks, though they would be considered large rivers in Europe. Among the principal is the Mahaica creek, about 20 miles to windward or eastward of the Demerara, between that and Abary creek; the Mahaicony is also on the E. or windward coast, not far from the Mahaica; the Boesary is on the leeward coast, near the Essequibo. Along the interior or southern portion of the colony there are numberless small rivers and creeks, intersecting wild and almost impenetrable forests, which, during the rainy season, empty themselves in torrents into the larger rivers, Essequibo, Cayuni (of which we know very little), Mazarooni, Demerara, Berbice, &c., which latter rivers generally flow towards the ocean in discoloured streams at the rate of six or seven knots an

IV. Little is known of the geological stata of Guiana. An alluvial flat, as before observed, extends along the sea coast for about 30 miles inland, terminating at a range of sand hills. Efforts have recently been made to obtain water by boring at George Town. In 1830 Major Staples sunk a shaft of 140 feet at Cumingsburgh; on arriving at the micaceous substratum, indicating a primary formation, a clear spring of water, strongly impregnated with iron, burst forth, At 12 feet below the alluvial surface, an irregular stratum of fallen trees (of a kind called the Courida, and still known on the coast) was discovered, in a semi-carbonized state; and, at 40 feet depth, blue clay; at 50 feet below the surface, another similar stratum of decaying wood, 12 feet thick; nine feet deeper, a compact of whitish grey clay; 31 ditto, yellow sand, mixed with clay; six ditto, violet-coloured clay, diminishing in shades to yellow light straw, and again merging into slate-coloured clay; the remainder to a depth of 120 feet from the surface, is argile, the lower part being of that smooth soapy surface indicating the purest wedgewood clay. Mr. Hillhouse says, that it seems evident from this, 'that some ages ago, this continent was habitable 50 feet below the present surface, and that it was then covered with an immense forest of Couridas, which was destroyed by conflagration, as appears by the ochrous sub-stratum. The sea must, at that time, have been confined to the blue water, where there is now eight or nine fathoms; and, whatever may have been the comparative level between the Pacific and Atlantic, on this side of the Isthmus of Darien the surface must have been then 50 feet lower than now.' The water obtained by boring is perfectly good for washing and for culinary purposes (except for tea) after exposure to the air. Wells have since been sunk in various parts of the colony, and water obtained at depths varying from 100 to 145 feet. This supply has proved a great advantage to the inhabitants.

The delta of the Essequibo (and, to a considerable extent, along all the rivers) is decayed vegetable matter, forming a fertile black mould, on a clavey substratum. As the Essequibo is ascended, the alluvium of the estuary changes to white sandstone, with scattered appearances of black oxyde of manganeze; to the sandstone felspar succeeds, and then granite. The mountain ranges seen on passing from the Essequibo into the Mazarooni, appear to be white quartz, 5,000 feet high, having the appearance of gold, from the numerous shinining particles of mica in the quartz, which give to the mass the appearance of the precious metals, thus forming the far-famed El-Dorado of the chivalrous and ill-treated Raleigh. Raleigh's peak is supposed to be volcanic, and, according to the Indians, several volcanoes exist in the interior, particularly between the Siparoonee and Ripanoone rivers.

On the Demerara river, the first indication of rock is met with at 70 miles from George Town, under water; it appears to be porphyritic sandstone. At the Postholder's (94 miles from George Town), there is a large bed of rocks of granitic nature, with some hornblende, and at the rapids, 106 miles up (or 70 miles, as the crow flies, from George Town), there is abundance of stratified green-stone.

The structure of the mountains is principally granite, with a large proportion of ironstone. The Warrow land of Poomeroon, and the coast lands of the whole colony, are described by an accurate observer as principally composed of an alluvial blue clay, intermixed with narrow strata of sand—and, on the Mahaica coast, with sand and shell reefs.

This tract is particularly adapted to the cultivation of sugar, cotton, and plantains, to which it is mainly devoted; nor does there exist in the known world a soil possessed of such amazing richness and fertility. It is never manured, though an acre has been known to produce upwards of 6,000 lbs. of sugar, or 20,000 lbs. of farinaceous food (the plantain), in a year. As we go deeper into the interior, the clay loses its blue tinge, and gradually becomes yellow; at this stage, it is always covered with a stratum of vegetable residuum, called pegas, which is the half-decayed vegetable mould from dead grass and leaves, and is, in many places, several feet deep, forming a great impediment to cultivation.

Plantains do not thrive in this land; but it is peculiarly favourable to the growth of coffee, for which it is principally cultivated, and the returns are ample, and of superior quality.

Behind the pegas lands, come high ridges of sand, interspersed with vallies, in which is a slight admixture of clay. These sand reefs present many fertile spots for the cultivation of coffee, cocoa, arnotto, fruits, and ground provisions of all kinds; and extending in their direction parallel with the sea coast, are occupied exclusively by the Arawaak nation.

To the south of this belt the rocky region com-

mences, consisting of elevated ridges and detached conical hills, resting on bases of sand, stone, granite, and siliceous crystal, containing a great variety of ochres and iron ores, mica, prismatic, hexagonal crystals, and, in some instances, slight indications of the precious metals. Though it is fully as probable that gold and silver exist in the primitive mountains of the west, as well as in those of the eastern coast, yet no native specimens have ever been produced by the Indians within our territory. Two or three attempts at mining were made by the Dutch, on their first settlement in Essequibo, but the ore was not found worth the expense of working. The most probable site of the precious metals, is in the mountains of the Attaraya and Attamacha nations.

The rocky region is possessed by the Accaways and Caribisce, interspersed with small settlements of Macousi and Paramuna; but these latter are principally found in the debateable land at the foot of the mountains, where they become the alternate victims both of the coast tribes and the mountaineers.

Dr. Hancock who resided long in the interior of the country of Demerara, says that nothing of petrifactions, sea shells or the organic remains of marine animals has been observed in the mountains of the interior of British Guyana. The principal component parts of the interior mountains, he supposes to be granite, porphyry, and their various modifications, all denoting a primitive formation, while exterior ranges towards the coast of a minor elevation, are chiefly composed of indurated clays, with sand and gravel stones; indicating a secondary order of formation. The great rocks of the interior are chiefly of a conoidal figure; on a savannah in 2.50. N. Lat. there is a mountain called Weive, composed of one entire solid block of granite, 700 feet high, and about 40 miles to the N. E. is another still higher, called Taripoor, (devil's rock); they are both of the cone or pyramid shape, much exceeding the Egyptian piles in elevation and magnitude. Veins of quartz are very common traversing the great masses of granite, and most perspicuous along the channel of the rivers in the dry season, the direction of all the strata in Guiana being almost uniformly from N. E. to S. W. Vast quantities of iron are met with in the mountains, the soil of which (as also that of many parts of the interior), consists of a strong and fertile loam, being a mixture of clay, sand, and vegetable mould, with little calcareous earth, but much ferruginous matter, giving to the soil a reddish tinge in some places. The soil of some of the upland savannahs is composed of clay and gravel very close, and though apparently sterile, yielding food for the immense herds of cattle and horses that depasture along the Rio Branco. Of a very pure white clay. This clay may be similar to the khari found in the Bhagulpoor district of Hindostan. (Sce vols. 1 & 2 of " Eastern India.") There are immense masses forming the high banks of the Essequibo above the falls, which would probably prove a valuable article in the manufacture of stone-ware or porcelain, as would also the huge blocks of milk-white quartz found in various places. Some indurated ciays, of great hardness, have been found mixed with sand, mica, calcarcous earth, oxyde of iron, &c., amorphous and full of particles of a metallic brilliancy. These indurations, which are of various degrees of hardness, lie in horizontal strata, breaking into diagonal plates; they are found along the edge of the water, and Dr. Hancock thinks are caused from the alternate influence of the sun and water, assisted by a deposition of heterogeneous earthy matters. Substances of a metallic

nature which have the appearance of ores are also very abundantly met with in the mountains, but still more plentiful among the falls and rapids of the river. Rock crystal is found upon several mountains of Demerara, growing, (if it may be so said) out of beds of quartz; Dr. Hancock only met with one species, and that always crystallized into hexagonal columns, and generally terminated by a single pyramid with from three to six faces. These columns are commonly found solitary, but are sometimes met with in groups standing together as it were agglutinated. perfectly transparent, of a water colour, taking a fine polish, and nearly as hard as agate. Red agate is found in the Rio Mow opposite, and not far distant from a crystal mountain. Much of the land at Moroko is thickly scattered over with siliceous gravel stones of an iron colour. At this range of mountains primitive rock in smaller or larger portions is every where to be seen; no traces of a secondary formation are visible: on most of them are found large masses of indurated clay scattered in loose masses amongst the granite, but no calcareous matter or organic bodies are to be found, and they appear as if undisturbed since the creation of the world. The Conoko mountains (belonging to the chain of the cataracts of the Orinoco) form an insulated group, seated on the elevated plains, which separate two great systems of rivers; the tributary streams of the Essequibo flowing N. E. and those of the Tacutu, Baranco, &c. S. W. towards the Rio Negro and Amazon. From the summit of these mountains can be seen the spot where the Tacotu and Rapanooni take their rise. The soil here is also of a pure white clay, (not chalk) giving to the Rio Branco and other rivers a milky colour, owing to the quantity of clay therein diffused, and in such a minute state of subdivision as to require several days before the waters become transparent by deposition. In fine, as regards geological science, British Guiana presents a wide field for the geologist, and in reference to the agriculturist a great diversity of soil, the three leading features of which are first, the clayey alluvial soil of the coast, extending eight to ten miles inland; second, hills of siliceous sand or gravel, which with intervening fertile savannahs extend to the falls 50 miles inland; third, a rich primitive soil; and, lastly, a mountainous country, with divers coloured ochres, indurated clays, and various mixtures of loamy earth and vegetable mould on beds of granite to a vast extent, all offering food and the means of obtaining every necessary and comfort of life to the hand of the industrious and skilful emigrant.

V. The mortality of Europeans, on the early settlement or colonization of Guiana, was very great, partly owing to torrid heat acting on a moist soil and luxurious vegetation pregnant with animal and vegetable decomposition, and partly owing to the intemperate habits of the settlers, and their non-conformity with the customs of the country and the dictates of nature. Of late years, however, as the coast became cleared, and a free circulation of air was admitted, the health of British Guiana has materially improved, and may now be considered as good as the nature of a low country will permit in any zone, particularly when we consider the extraordinary quantity of rain which falls annually. In 1830 there fell, in five months, six feet eight inches of rain at George Town. It is difficult to ascertain accurately the quantity of rain throughout the year, not only because Demerara is subject to two rainy seasons, but from the variation which takes place in cleared and drained land, on the sea-coast or in the interior. In the dry season, and when the sea breeze prevails, there is rarely any moisture observable in the morning, the thermometer F. averaging about 82 during the night, with no very material difference in the shade during the day. At the distance of 20 miles from the sea, or where the country is not extensively cleared, the trees and plants will be found every morning dripping with dew, the thermometer falling to 76 or 78; and a blanket is acceptable at nights. As the country is ascended (or southernward towards the Equator), the vicissitude of climate is yet greater; and on the table land, 300 miles inland, the climate is described to be delicious, and the influence of the monsoons regularly felt in the periodical fall of rain. Two wet and two dry seasons mark the revolutions of the year, each continuing for three months: the wet embrace the months of December, January, and February; and then June, July, and August, during which periods the thermometer is lower than at any other time, and the land winds (which are, of course, less healthy than the sea breeze) prevail. The dry season is exceedingly delightful; the morning twilight commencing at four, gradually unveils a deep azure sky, over which the sun crosses cloudlessly from the ocean to the inland mountains, behind which it sets. The invigorating sea breeze sets in at ten, giving animation to nature, and continuing to blow with increasing vigour till sunset, at six P.M., when it gradually dies away, but frequently returns again during the night.

During the wet season the wind is often from S. to W., and the rain then descends in torrents, sometimes for two or three days without intermission, in the interior and on the coast. At these periods, our sailors say it only leaves off raining to commence pouring. It appears to be admitted that the moisture, and consequently the fertility, of British Guiana is greater than that of the contiguous coast of the Orinoco, and may be accounted for by waters of the Essequibo, Demerara, and Berbice having less declivity than those of the mighty Orinoco. Yellow fever (if in reality it ever did exist there) has for some years been unknown in Guiana; but agues, and what we term in India jungle fevers, are prevalent among new comers, if they rashly expose themselves to the night air or vertical sun. Demerara has been cited as one of the strongest instances of a deleterious atmosphere, particularly among our West India colonies; but when we come to examine facts, it turns out otherwise. The range of mortality, even among the labouring slave population, is about 1 in 37 to 40; but in London and France it is equal as regards the whole population, rich and poor; and in other countries it is even more: thus, in Naples, 1 in 34; Wirtembergh, 1 in 33; Paris, 1 in 32; Berlin, 1 in 34; Nice, 1 in 31; Madrid, 1 in 29; Rome, 1 in 25; Amsterdam, 1 in 24; Vienna, 1 in 224! Thus that which is termed our most unhealthy West India colony has, even as regards its working population, a greater duration of life than the rich and poor of some of the principal parts of Europe! On six years, ending 1832, the increase on 40,892 Creole population was 3,678, or nine per cent. The following comparison will put this point more clearly. In the Appendix to the Report of the Committee of the House of Commons on the Factory Bill, it appears that in a number of 10,000 deaths, in a healthy county (Rutland), under 20 years of age, 3,756 died; under 40 years of age, 5,031 died; lived to 40 years and upwards, 4,969. In London, under 20 years of age, 4,580 died; under 40 years of age, 6,111 died; lived to 40 years and upwards,

3.889. In the town of Preston, under 20 years of age, 6,083 died; under 40 years of age, 7,462 died; lived to 40 years and upwards, 2,538. In the town of Leeds, under 20 years of age, 6,213 died; under 40 years of age, 7,441 died; lived to 40 years and upwards, 2,559. In the town of Bolton, under 20 years of age, 6,113 died; under 40 years of age, 7,459 died; lived to 40 years and upwards, 2,541. Contrast this with Demerara, where it appears, by the last registration, that the deaths during the triennial period were 7,016, of whom died, under 20 years of age, 1,929; died, under 40 years of age, 3,359; and 3,657 lived to upwards of 40 years of age. Supposing, then, the number of deaths to have been 10,000, instead of 7,016, the result would be - died under 20 years of age, 2,749; died under 40 years of age, 4,788; and lived to 40 and upwards, 5,212; being 243 in favour of the duration of life in the colony of Demerara, as compared with a healthy county (Rutland) in England, and a still greater and increasing difference in favour of the colony, as compared with the towns before mentioned.

In the hurricane months, when the Carribbee islands are ravaged with terrific tempests, vast masses of clouds advance towards the south; the mountains inland reverberate with pealing thunder, and the night is illumined with faint lightning coruscations; brief storms succeed; but, happily, the Barbadian hurricane is unfelt. The length of the day in Guyana is about 13 hours. In the hot season, the thermometer ranges from 84 to 90, on the coast; and, 20 miles inland, seldom exceeds 80, during the warmest part of the day, falling at night to 60, or even 50.

MONTHS.	TRERM.	WIND.	REMARKS.
January	85-74	R	Cool and pleasant : refreshing breezes.
February	92-98	N.E.	Clouds heavy, with occasional showers.
March	85-77	E.N.E.	Ditto, frequent ditto.
April	85-76	K.	Hot: no rains.
May	86-78	N.E.	Clouds heavy; frequent lightning.
June	83-75	S. and variable.	Hot, with occasional rains.
July	86-78	E. and S.	Sultry and oppressive.
August	89-77	S.	Hot: occasional rains.
September	87-77	S. and E.	Warm; thunder and lightning.
October	92-98	Variable.	Refreshing breezes; light showers.
November .	85-77	N. and E.	Steady, exhilirating breezes; ditto.
December .	78-75	N.N.E.	Heavy showers; strong winds; cool.

At the Portuguese fort of St. Joaquim, on the Rio Negro (lat. 3 N., long. 62 W.), which was visited by

Dr. Hancock, the thermometer ranges from 76 to 89 in April. Mr. Shomburgk, in his present exploring expedition of British Guiana, thus noted the temperature (Farenheit) of the air in the shade, from six, A.M., to six, P.M., from October, 1835, to March, 1836, between the parallels of 2.36 and 6.49 N. lat.

	October.	November.	December.	January.	Pebruary.	March.

Fair	10	18	9	9	5	0-51

At six, A.M., the water was generally from eight to ten degrees warmer than the air; at two, P.M., air one to two degrees warmer than water; at six, P.M., water two to three degrees warmer than air.

According to Mr. Hillhouse, who has repeatedly visited the interior, the climate of the region inhabited by the Indians is much more salubrious than that of the coast; though, approaching nearer to the line, its superior elevation causes a decrease of temperature, and the surface of the earth is always kept cool, from the thick shade of the forest with which it is universally covered.

It is a common observation, that the air of the rivers is unhealthy; but this only applies to that part of them which runs through the swamp land and level with the sea coast. Here the exhalations and vapours accumulate, and the sea breeze is not always sufficiently constant or powerful to dissipate them. Throughout the whole extent of the salt or brackish water, fever and ague predominates; but, beyond the influx of the tide, the banks of the rivers are so proverbially healthy, that, were the population ten times more numerous than it is, there would be little employment for a physician.

As we approach the high sand hills of the interior, the natural drainage is so perfect, and the torrents of fresh water supplied by the creeks form so strong a current, that all impurities are quickly drained from the vallies, and the surface water is instantly absorbed by the sands. The water of those creeks that are uniformly shaded from the sun, is about five degrees colder than that of the river.

The breadth of the river, by exposing a great surface to the influence of the sun, causes its increased temperature. During the night, therefore, which is seven or eight degrees cooler than the day, the water of the river becomes comparatively a warm bath; and the time of its lowest comparative temperature is about noon, when the heat of the air is greatest, and the river has not yet recovered the heat it lost during the night. Bathing, therefore, in the heat of the day, is more bracing to the system; but bathing in the morning is most congenial to the feelings, as there is scarcely any difference between the temperature of the air and the water, for two hours after sun-rise.

The evaporation in the neighbourhood of the line being supposed ten times greater than near the poles, the rains are in proportion much more heavy and frequent. In these regions vegetation would cease, were the supply of moisture only equal to that of temperate climates; and, upon the hills, where the water runs off more rapidly, a greater quantity of rain is required than in the vallies, where it stagnates, and is absorbed in superior proportion by the earth. We accordingly find that, upon the hills of the interior, the clouds discharge three times as much rain as falls upon the coast, and without causing any inconvenience. This disproportion between the rains of the coast and the interior, would not be so great, but from the circumstance of the vast tract of low land, from which the forest has been cleared for cultivation. countries are always the most humid: and, in a plain without trees, the clouds will pass over without discharging any rain, from the want of points of attrac-tion. The importance of this fact has not hitherto met with sufficient consideration. A plain in the tropics, without rain to moisten it, soon becomes a sterile desert; and nothing will attract the electricity of the clouds, and cause them to burst, but the intervention of groups or rows of tall trees. It is a point, there-fore, worthy the consideration of the colonial legislature, to preserve a portion of bush standing on the coast for the attraction of rains, or to oblige the different estates to plant tall fruit or forest trees on their side-lines, as there is no doubt that the more the country is cleared of bush, the drier it becomes, and the less fertile, and this more particulary with regard to the sugar cultivation.

In the interior, the direction of the winds is by no means so uniform as on the coast. From the month of April to July, they blow more from the S. than from any other point; and these land winds, which occur at intervals throughout the year, by impeding the course of the clouds as they are propelled by the sea breeze, are another cause of the increased rains.

From the superior salubrity of the climate, and the simple habits of the Indians, it is reasonable to suppose that, prior to the introduction of rum, they enjoyed great longevity. The native intoxicating beverages are so mild and diuretic, that little inconvenience results from their excesses with them; but their system of computation is so defective, that they can neither calculate their own age, or those of their offspring.

Early puberty is common in all hot latitudes; but it does not seem to shorten the period of existence, though the appearance of age comes on sooner. The Indian girls are marriageable at 12 or 13, and the boys at 15 or 16. At 25 years the women lose all the appearance of youth; but the men at 40 are not older in appearance than Europeans of the same age.

Upon the whole, there is no doubt, that if the hand of cultivation reached to the hills of the interior, and a few artificial improvements were added to the advantages of local situation, the climate of the Indians would be the most healthy and agreeable of any within the tropics—with fish, flesh, fowl, and vegetables in abundance, pure water, no fevers, and no mosquitoes.

VI. In estimating the population of births and deaths in the African population of the West India Colonies, it must be remembered that the African is as much a stranger to the West India climate and soil as the European is, and, indeed, experience teaches that the superior civilization and food of the European renders him much better enabled to withstand viciasitudes of climate than his dark coloured brethren. The decrease of the African slave population (especially when we consider manumissions, the prevailing disparity of the sexes, and the arts to which the African women resort to prevent their being mothers) is not therefore to be wondered at, but it will be found to be over balanced by the increase of the creole population, or Colonial born African descendants.

Demerara and Essequibo contains 11 parishes, whose names and extent are, St. Mary's, extending from Abary Maicony, and to Mahaica, thence to Plantation lowlands inclusive, and embracing the settlements on the banks of the Maicony and Mahaica creeks; St. Paul's, from plantation Northbrook to Cuming's lodge, inclusive; St. Ceorge and St. Andrew united, embrace George Town and the plantations on the Cumingsburgh canal; St. Matthew, from George Town up the east bank of the river as far as the settlements extend, including those in canal No. 3; St. Mark, from plantation Mindenburgh along the W. bank of the river as far as the settlements extend, including those on canals No. 1 & 2; St. Swithin, from plantations La Grance to Jalousie inclusive; St. Luke, from plantation Blakenburgh inclusive to the Essequibo river, and along the E. bank upwards as far as the settlements extend; St. Peter comprehends Leguan and Hog islands, in the mouth of the Essequibo river; St. James, Waakenham and Troolie islands, in ditto; St. John, from Schoeven creek to Capoey ditto, on the W. coast of Essequibo river, including the settlements on the intervening creeks and on Tiger island; Trinity, from Capoey creek to the Pomeroon river, and as far as the British settlements extend.

Summary of the Slave Population of the united Colony of Demerara and Essequibo, from the year 1817 to the year 1832, at intervals of three years.

Between 1817 and 1820 were considerable importations of slaves from other colonies; some few also between 1820 and 1823; and afterwards at the census of 1829, there were of males under three years of age, 2,319; of females, 2,365; and in 1832, males, 1,974, females, 2,365; thus indicating a rising preponderance in females, the preliminary to an increasing population.

The following census, made in 1832, is given as an historical record, in order that it may serve for comparison at a future period:—Statement of the slave population of the District of Demerara and Essequibo, 31st May, 1832. African males, 13,519; Creole ditto, 20,830; total males, 34,349. African females, 9,052; Creole ditto, 22,116; total females, 31,168; grand total registered for 31st May, 1832, 65,517. Of whom are males, under three years, 1,974; females, ditto, 2,112; above three, and not above five years, 2,744; between five and ten, 5,401; ten and sixteen, 6,115; sixteen and thirty, 16,013; thirty and forty, 8,345; forty and fifty, 13,585; fifty and sixty, 7,179; sixty and seventy, 1,613; seventy and eighty, 363; eighty and ninety, 40; ninety and a hundred, 7; aged one hundred and upwards, 2; ages unknown, presumed to be absentees, 24; total, 65,517.

Decrease by death since the preceding registration—males, under ten years of age, 770; females, ditto,

714; males, between ten and twenty, 216; females, ditto, 229; males, between twenty and thirty, 254; females, ditto, 194; males, between thirty and forty, 637; females, ditto, 345; males, between forty and fifty, 1,277; females, ditto, 622; males upwards of fifty, 1,121; females ditto, 637; total, 7,016. Of whom were Africans, 3,850; ditto Creoles, 3,166.

Births since last registration—males, under three years of age, 1,974; females, ditto, 2,112; total, 4,086. Decrease on the past three years, 2,930.

According to the return in the Office of Compensation under the Act for the Abolition of Slavery, there were 69,579 apprentices; 3,352 aged and invalids; 9,893 children under 6 years of age, in 1834; of the 69,579, 36,582 were males, and 32,997 females, 3,463 were tradesmen, and 4,871 were domestics; 7,418 were fegistered as non-prædials, and obtain their release in August 1838; 2,050 labourers and artificers arrived during 1837. The services of 191 persons were appraised, for the purpose of purchasing their release from apprenticeship in 1837, of whom 151 were prædials, and 40 non-prædials. The average price at which the prædials were valued is 924 guilders, that of the non-prædials 379 guilders. The population of British Guiana, is supposed to exceed 100,000. The sexton of George Town, gives a return of 914 burials in 1837; viz. 428 white persons, including 97 seamen; 126 apprenticed labourers; and 360 unapprenticed coloured persons.

The native Indians of this coast have long engaged the attention of Europeans, and received the protection of the British government. When this part of the South American continent was first visited by the

mariners of the old world, it was found densely peopled; but few now remain of the aboriginal inhabitants.

The principal tribes in and around British Guiana. are, the 1. Arrawaks; 2. Accawai; 3. Caribisce; 4. Warrows, and 5. Macoosies. The first mentioned border on the coast line; the second are removed further inland, and in stature, colour and some other respects, are like the first; the third, inhabit the upper country between the Essequibo and Cayuny, they are described as having the manliness and intrepidity of all highland tribes, and as being fairer than the Arrawaks or lowlanders. According to tradition, they once inhabited the W. I. islands; it is more probable, however, that the W. I. islands were originally peopled by the Carabisce from the main land. The fourth or Warrows, occupy the coast between the Pomeroon and Orinoco, and are a black, short, hardy race of fishermen and sailors, subsisting chiefly by boat-building. The fifth or Macoosies, reside in the deep recesses of the forests of the interior, and are numerous, very industrious, extremely cunning, and implacable in their revenge; probably they are the aborigines of the country, and fleeing before more civilized tribes, as we find to be the case in every part of the eastern hemisphere.

It is difficult, if not impossible, to estimate the number of Indians south of the Rippanooney; about 5,000 consider themselves under the protection of the British government, receiving triennial presents and annual supplies; about 20,000 are migratory, unattached to any particular government, and moving at pleasure from the Orinoque to the Brazils, Cayenne or Surinam, as necessity (i. e. want of food) or inclination may dictate. [A full description of the natives will be found in the popular edition of this work; vol. i. West Indies of Colonial Library.]

There are six protectors of Indians in British Guiana, under whom are six postholders and assistants, on the different rivers. The postholders receive 1581. a year, and a house; their assistants each 721. per annum. The protector's duty is to overlook that of postholders in the performance of their duties, to endeavour to make peace between the Indian tribes when

at war, and to transmit quarterly returns to the Lieutenant-governor. They receive no salary, and are generally merchants and planters along the coast. The postholders are instructed to keep their posts or stations in good order, to attach the Indians to their posts, to prevent, as far as in them lies, quarrelling or fighting between the tribes, to obtain passes, signed by the Lieutenant-governor or Protector of Indians, for all persons passing the station, and to give in quarterly returns of all occurrences at their posts.

VII. Throughout the West India colonies considerable efforts have been made by the local governments and legislatures, for several years back, to promote religion and education, and by none more so than Guiana; in Demerara and Essequibo (independent of suasion.

Berbice) there are attached to the Established Church of England, seven rectors and one curate; to the Church of Holland, two ministers; to the Church of Scotland, five ministers; and to the Roman Catholic Church, two priests; twelve catechists, or school-masters, one being attached to each parish church of the English and Scotch persuasion; besides four schools in George Town for free boys and girls, and slave boys and girls, to which there are two masters and two mistresses. The annual sum paid to the clergymen, catechists, schoolmasters and mistresses, from the colonial fund, amounts to 135,450 guilders, equal to about 10,000%; the Roman Catholic clergyman is placed on the same footing as the clergy of the Established Church, or those of the Dutch or Scotch persuasion.

* 1571. allowed for house-rent.

There is no glebe or parsonage house to any of these parishes.

There have been expended between the years 1824 and 1831, upwards of 350,000 guilders, equal to about 26,000l., on the building of churches and parsonages; independently of which, large sums have voluntarily been contributed by individuals for that purpose. On the estimate for the year 1832, a sum of 200,725 guilders, equal to 14,337l. was placed for the support of the establishment for that year alone. The expense for 1827 (which, with several other documents, I have been favoured by the Hon. H. E. F. Young, Government Secretary at British Guiana) was 221,350 guilders=15,810l.

These expenses are borne solely by the inhabitants, by taxes levied on them by the Court of Policy, combined with the financial representatives of the community. There are 36 paid clergymen of the Church of England, Scotland and Rome. The parishes are exclusively designated Episcopalian or Presbyterian, and are allotted to those persuasions nearly equal. From England, through the Bishop of the diocese, by means of the Parliamentary Grant or otherwise, there has been received in 1837, about 5,000l. towards chapels and schools. From the colonial funds in 1837, there has been paid 3,407l. towards the erection of schools or the procuring of teachers. The amount raised from private contributions or defrayed

by the Missionary societies, has been, during 1837, very considerable, not less than that raised by the colony, but it is difficult to arrive at a correct estimate. There were in 1837, 1,516 marriages. One church, in the parish of All Saints district of Berbice, extending about four miles along the east bank of the River Berbice, and all along the left bank of Canje Creek, as far as the settlement extends, the cultivation on which does not extend beyond eight miles; the population is about 4,700 souls, and the living is worth 7,000 guilders per annum. The church will contain about 400 persons, and is generally well filled. Their tenets are thoroughly Protestant of the old school. There are likewise 10 chapels, which will contain from 450 to 850 and are generally well attended: Protestant.

Among the English Colonists the Episcopalian is the principal creed, and each parish has its rector, under the diocese of Barbadoes; the Dutch have their Lutheran church and minister, the Romish their chapel and minister, all paid (as I have before said) and supported by the colony; and there are 13 active and useful missionaries endeavouring to instil Christianity into the negro population.

VIII. Schools, Demerara and Essequibo.—There are two public schools in the parish of St. George, one

followed, is Bell's. The schoolmaster and mistress each receive 1501. per annum, which is given by government. The average number of persons receiving schools. There are eight private schools.

for boys and one for girls; the system of instruction | instruction in 1837 was 14,077, of whom 7,715 were children and 6,362 adults; 8,350 were at Sunday schools, 3,264 at day schools, and 2,463 at evening

There is a sheriff in each of the three districts into which the colony is divided. The sheriff and three justices of the peace constitute an inferior criminal court. Not less than three inferior courts are required by law to be held in each district every month.

The convictions in 1837, were 345. There are 15 special justices; the punishments inflicted by them during 1837, amounted to 5,170, of which 40 were cases of corporal punishment by flogging. From January 1835 to December 1837, floggings by sentence of the inferior courts, have amounted to the follow-

ing numbers, each number denoting a period of three months; 60, 85, 48, 26, 42, 46, 29, 27, 15, 28, 8, 8. From July 1835, (when the power of inflicting floggings was vested exclusively in the special justices appointed from England,) to December 1837, the apprenticed labourers so punished, were, according to the subjoined numbers, which denote also a period of three months, 167, 153, 127, 84, 140, 71, 21, 6, 10, 3. From 1835 to 1837, there have been but five or six cases of floggings under sentence of the supreme criminal court. There are upwards of 90 ordinary justices of the peace, they have no jurisdiction unless assembled collegialiter, with a sheriff as president; they have power however, to commit for trial. Each special justice has two paid constables. There are 76 paid policemen resident in the two towns, and they are placed under the respective sheriffs. There are 1,561 unpaid special constables, selected in 1834, chiefly from amongst the labourers in the country by the special magistracy; they are called upon to act in the trial of petty offences within the town.

cases of emergency only. There are 325 unpaid headboroughs, selected about the same time, from amongst the managers and overseers, by the special magistracy as above. George Town is divided into 11 wards, in each of which a town councillor is selected by the inhabitants; the town councillors select a mayor; the mayor and town council have the distribution of the town funds, and constitute a court for

Prisoners in the Gaols of Berbice throughout each Year. [B. B.]

No returns for 1830 or 1835.

X. Form of government,—Dutch and English. At | Court. In the Combined Court every item of the the period of the capture of Demerara in 1803, the | estimate was discussed, and every member, whether of form of government of the colony was peculiar; it consisted of a Court of Policy of eight members-four official appointed by the Sovereign, and four from amongst the inhabitants by the College of Kiezers. Official members—the Governor, the Commander of Essequibo, the Fiscal of Demerara, the Fiscal of Essequibo; two members returned from the district of Demerara, and two from the district of Essequibo. Each district had a College of Kiezers, consisting of seven members. The College of Kiezers for each district was elected by the inhabitants. They held the situation for life, or during their residence in the colony; qualification, 25 slaves, and three years' residence in the colon; qualification of electors, the possession of 25 slaves. Vote by ballot. Votes sent into the Governor's Secretary's office, and deposited in a sealed box, and opened in the presence of the Governor and not less than two other members of the Court of Policy.

The College of Kiezers nominated two persons to fill vacancies in the Court of Policy. The Governor and the Court selected one from the nomination, and The notified in the Gazette the person selected. senior member of the Court went out after the meeting of the Combined Court, which assembled annually for levying the taxes.

Financial Representatives. The College of Financial Representatives, nominated by the inhabitants, the same as Kiezers, and consisted of six; three returned by the district of Demarara, and three by the district of Essequibo. Term of service, two years; qualification, same as Kiezers; duties, to sit with the Court of Policy annually, for the purpose of levying taxes and regulating the expenditure, which was then called the Combined Court-"the Court of Policy combined with the Financial Representatives." this combined meeting the Court of Policy submitted an estimate of the expenses for the year, which had previously been prepared and discussed in that

estimate was discussed, and every member, whether of the Court of Policy or Financial Representatives, had an equal vote. At this meeting the public accounts of the preceding year were examined and audited, which was the peculiar province of the Financial Representatives.

The Court of Policy passed all laws for the internal regulation of the Colony, it required four members to constitute a Court. No law binding without the concurrence of one member of the representative section of the Court. Qualification for a member of the Court of Policy, the owner of a plantation, and three years' residence.

Judicial Department.—Each district had a court of civil and criminal justice, which consisted of six members and a president. The members (colonial) elected by the Kiezers in the same manner as the Court of Policy; the two senior members retiring every year; qualification, possession of 25 slaves, and three years' residence in the colony. The commander was president of the Court of Justice of Essequibo; the governor president of the Court of Justice of Demerara; the law of Demerara was the law of Holland or Roman law. Each member of the court an equal vote on both law and fact: all cases decided by a majority of votes.

In 1812 the courts of justice of Essequibo and Demerara were united by proclamation of the Acting-Governor, Major-General Carmichael; and the court of justice of Demerara became the court of both districts; and consisted of eight colonial members and a president, the president appointed by the Crown.

The colleges of Kiezers and Financial Representatives existing in 1812 were dissolved by General Carmichael's proclamation, and a College of Kiezers and Financial Representatives was established, in which the functions of both colleges were united; this college consisted of seven members: term of service two years; and elected by the inhabitants of both districts, paying tax on an income of 10,000f, per annum, or

possessing 25 slaves; all the courts having been | and local laws, and putting down any disturbances united.

In July, 1831, the ancient court of justice was abolished, and a new court constituted by order in the Council, by which Berbice was united with Demerara and Essequibo; and the Court of Policy formed of ten members, five official (Lieut.-gov., Chief Justice, High Sheriff, Sheriff, and Attorney-general) and five colonial; the governor, in case of an equality of votes, having a casting vote as formerly.

The Colleges of Kiezers and Financial Representatives were separated in 1831. The members of the College of Kiezers are now for life, and consist of seven members; the Financial Representatives of six members, term of service two years; one college each of Kiezers and Financial Representatives for the colony of British Guiana, being Demerara, Essequibo, and Berbice; and the qualification, possession of 25 slaves, as previous to 1812.

The Court of Policy now consists of the governor, chief justice, attorney-general, collector of customs, and government-secretary, and of an equal number of unofficial persons selected by the College of Electors. The College of Electors consists of 7 gentlemen, elected by the inhabitants for life. The unofficial members of the Court of Policy serve for three years, and may be re-elected. The governor, in the Court of Policy, has a casting vote, all other members have each a vote. All laws, with the exception of the Annual Tax Ordinance, are enacted by the governor and Court of Policy. The Queen in Council, may enact or disallow any law. The Combined Court is composed of the governor and Court of Policy, and of five financial representatives. The financial representatives, are chosen by the votes of the inhabitants. The Combined Court, discuss the annual estimate, examine the expenditure and receipts of the past year, and raise the annual taxes by ordinance. There are three professional judges who constitute the Supreme Civil Court, there is an appeal to her Majesty in Council. The Roll Court, at which documents are filed, evidence taken and recorded, transports and mortgages of property executed, and all civil cases referred for adjudication by the Supreme Court, is held once a fortnight before one professional judge. Appeal or re-audition, may be obtained before the Supreme Court. A Petty Debt Court is held once a month, before one professional judge. The justices of the peace have also a petty debt jurisdiction. The three professional judges with three colonists, as assessors, constitute the Supreme Criminal Court, there were seven convictious in 1837. In criminal cases, three assessors, qualified by certain regulations, and open to challenge as jurors, are associated with the judges, and punishment can only be inflicted by sentence of the majority delivered in open court. In each of the above-mentioned colonies, courts of inferior jurisdiction in civil and criminal causes are established, subject to the appeal and revision of the superior court of assize.

Each male freeman between the ages of 16 and 50 is compelled to enrol himself in the militia, which is liable to be called out at the pleasure of the governor, for service, not extending beyond the preservation of internal tranquillity. The strength of the militia may be reckoned at 5,000 men. The senior officers in the country are justices of the peace, and exercise a jurisdiction over certain districts, each of which is distinguished by different coloured banners. They are termed burgher officers, and their duties in general consist in promulgating proclamations, taking depositions upon tax schedules, carrying into effect public which may arise within their jurisdiction.

Staff.—One commander-in-chief, 1 brigadier and inspector-general, 1 adjutant-general, 3 adjutant adjutant-generals, 3 aides-de-camps, 2 brigade majors, 2 judge advocates, 3 lieut-colonel commandants.

One lieut.-colonel, 11 majors, 44 captains, 47 first lieutenants, 50 second lieutenants, 12 adjutants, 12 quarter-masters, 10 surgeons, 21 assistant-surgeons, 155 sergeants, 19 drummers and bugles, 2,969 rank and file. In Berbice there are four regiments, containing 46 officers and 411 non-commissioned officers and rank and file.

XI. The income of the colony is from the following sources :-

Table of Taxes and Duties received at the Office of the Colonial Receiver-general, under the authority of the Honourable Court of Policy, combined with the Financial Representations of the Inhabitants of the District of Demerara and Essequibo.

Income Tax payable by those whose Revenue or Revenues, from 1st January to 1st December, amount to any sum from-

To Eisewhere, value, 1822, 5932/. No returns for 1330 and 1835.

The shipping which entered the ports of British Guiana in the year 1837 were, in number, 653; tons, 110,093; seamen, 6.375.

guilders, stivers, and pennings; 16 pennings one stiver, 20 stivers one guilder.

English.	Guilder.	Dutch Stivers.	Pennings
Half-a-crown	1	15	0
One shilling	0	14	0
Sixpence	0	7	0
One penny	0	1	4
Half-penny	0	0	10
Farthing	0	0	5

Pass at these rates by virtue of a proclamation of the Governor. There are no gold or copper coins (British or Foreign) current in this colony.

Colonial Currency-Pieces of three guilders, equal to 60 stivers; two ditto=40; one ditto=20; half

ditto=10; quarter ditto=5.
Foreign Currency—Spanish dollar, equal to 60 stivers or three guilders; half ditto=30 or 11; quarter ditto=15 or 3.

Amount of Coin in circulation-19,116 pieces of one florin each, 19,116 florins; 37,958 pieces of 10 stivers each, 18,979 florins; 76,384 pieces of five stivers each, 19,096 florins; 58,528 pieces of two and a half stivers each, 7,316 florins; total, 64,507 florins =46071. 12s. 101d. sterling.

Paper currency in circulation-13,258 notes of one joe or 22 florins each, 291,676 florins; 8,189 of two joes or 44 florins each, 360,316; 4,201 of three joes or 66 florins each, 277,266 florins; 3,150 of five joes or 110 florins each, 346,500 florins; 1,700 of 10 joes or 220 florins each, 374,000 florins; 1,250 of 20 joes or 440 florins each, 550,000 florins; total, 2,199,758 florins=157,1251. 11s. 5d. sterling. In Berbice the paper currency on the 31st December, 1834, was 426,092 guilders, issued on the security of the revenues of the colony.

Course of Exchange .- The rate of exchange in all government or public transactions is fixed, by an order in council, at 4s. 4d. sterling for the Spanish dollar of three guilders; which is equal to 13 guilders and 11-13ths of a guilder to the pound sterling. This exchange does not vary. The rate of exchange in private and mercantile transactions fluctuate from 13 to 16 guilders per pound sterling, according to the demand for or scarcity of bills on Great Britain. is now (December 31, 1836,) at 13:15 guilders to the pound sterling. [B. B.]

Banking.—There is a branch of the W. I. Colonial Bank, at Demerara; and there is a local establishment called the "British Bank of Guiana," the first half yearly meeting of which was held 31st December,

XIII. The monies of account in British Guiana are | 1837, at George Town. The following is an abstract statement of the affairs of the "British Bank of Guiana and the Berbice Branch, 31st December, 1837:-

Dr. Due to proprietors for paid u Ditto lodgments, and intere		florins. 1,514,660 sit
receipts Balance in favour of bank	• •	1,153,662 75,855
Cr.	Total	2,743,677

in bonds, bills discounted, cash in hand, 2,685,818 &c. Bank premises 47,860 10.000 Preliminary expenses 2.743.678 Total

Due to the bank on account of securities

4,500 shares subscribed from the colony, and held by 360 proprietors. Instalments of 50 per cent. have been paid up.

The bank has received a charter, among the conditions of which it is stated are the following:-Half the subscribed capital to be paid up. Liability of each shareholder to be continued for one year after his disposing of his share. Full accounts for each week to be published every half year. Bank precluded from purchasing or holding its own stock. No advances on security of real property. Notes not less than five dollars, and payable in silver. Amount of paper discounted, bearing the names of directors or officers of the bank, not to exceed one-third of the total amount discounted.

XIV. Sugar, rum, coffee, and cotton, form the principal articles of growth and export. The following return, given on oath, shews the production of Demerara and Essequibo for three periods of three years each.

In the first period (1823, 1824, and 1825), 213,478,633 lbs. (112 lbs. Dutch=112 lbs. 4 ounces Avoirdupois) sugar; 17,779,473 lbs. coffee; 6,808,913 lbs. cotton. In the second (1826, 1827, and 1828), 239,556,975 lbs. (Dutch) sugar; 13,897,083 lbs. coffee; 7,389,373 lbs. cotton. In the third (1829, 1830, and 1831), 262,709,559 lbs. (Dutch) sugar; 7,059,431 lbs. coffee; 2,252,557 lbs. cotton.

It will be seen from the foregoing, that, while coffee and cotton cultivation diminished, sugar increased. A return of produce from 1810 to 1831 is given on the next page.

The following is a return of the two districts of Demerara and Essequibo united, since 1831.

Years.	Sugar.	Rum.	Molasses.	Coffee.	Cotton.	Value of Plantains.	Value of Cattle.	Other Revenue.

A steam-ship company has been formed at Berbice for carrying on a communication with Demerara and the rivers of British Guiana. Weights.—Principally steelyards, from 1 to 3,500 lbs.; 110 lbs. Dutch = 100 lbs. English, or 10 per cent. difference. Of measures, 1 Dutch ell of 26 inches Rhyland, is equal to 27 inches.

According to Mr. Peter Rose, (Evidence before W. I. Parliamentary Committee) of Demerara, the following is the cost of producing 10,769 cwt. of sugar, and 58,334 gallons of rum, on an estate in the best part of Demerara, with 500 negroes or workmen, on it: salt fish, 6771. 1s.; clothing, 7501.; plantains purchased, 1,1431.; coals and sugar hogsheads, 1,2051.; drogherage, 300l.; salaries, medical attendance and taxes, 1,500l.; pork, rice, port wine, bricks, lime, timber, lumber, nails, temper-lime, lamp oil, tar, pitch, cordage, cane, punts, &c. 1,096l.; machinery, implements (employed in the manufacture of sugar and rum), repairs of buildings, negro houses, &c. 1,000l.; insurance on buildings, 248l.; total, 7,919l. 1s. Cost of production: 10,769 cwt. sugar, at 12s., 6,461l. 8s.; 58,334 gallons rum, at 6d. per gallon, 1,458l. 7s.; total, 7,919l. 15s. These calculations are without reference to the invested capital: this estate cost the proprietors 120,000l. sterling. The foregoing statement is given, that it may serve for future comparison with a system of free labour.

Prices of Produce, &c. at Berbice in 1836. [B.B.]—Horned cattle about 12l. each; horses, 40l. each; sheep, 3l. each; swine, 3l. each; salt butter, 2l. 10s. per firkin; cheese, 2s. per lb.; wheaten bread, $4\frac{1}{2}d$. the 1 lb. loaf; beef, from $6\frac{1}{2}d$. to $8\frac{1}{2}d$. per lb.; mutton, 1s. $5\frac{1}{2}d$. per lb.; pork, 9d. per lb.; loaf sugar, 1s. per lb.; Madeira wine, 60l. per pipe; brandy, from 12s. to 14s. per gallon; beer, about 7l. 10s. per hds.; porter, from 8s. 8d. to 10s. per dozen.

Domestic Labour.—About 21. 12s. for men, and 1s. 6d. for boys.

Value of Property Annually Created, and Moreable and Immoveable, in British Guyana, calculated in sterling Money, and excluding Slaves.-The value of property expended in purchasing slaves, has actually amounted in the aggregate, at 1201. each, to 9,960,000l.! Sugar, 1,000,000 cwts. at 20s. 1,000,000l. Rum, 4,800,000 gall. at 1s. 6d., 360,000l. Molasses, 3,000,000 gall. at 10d, 125,000/. Coffee, 4,000,000 lbs. at 7d., 116,666l. Cotton, 3,000,000 lbs. at 7d., 87,500l. Plantains, value at 4l. per annum all round, 400,000l. Animal food and fish, at 5l. per annum all round, 500,000l. Vegetable food, at 1l. per annum all round, 100,000l. Merchandize made, 500,000l. Income and sundries, 600,000l. Land cultivated and granted, 2,000,000 acres, at 71., 14,000,0001. Ditto uncultivated, 32,000,000 acres at 2s. 6d., 4,000,000/. I estimate the productive uncultivated land in British Guiana at 50,000 square miles; thus excluding nearly one-half the territory as barren, a circumstance which is over estimated, in order not to exaggerate the value of property. Public Property-Wharfs, Forts, Barracks, Churches, Gaols, Roads, (full 250 miles of public roads, averaging 600l. a mile) Canals, (some idea may be formed of the labour employed in drainage, and the capital required to establish it. when it is stated that 30 miles of private canals, 12 feet wide by five deep, and 200 miles of drains, 2 feet wide by 18 inches deep, are required for the drainage and transportation of the canes to the mill of an estate producing 700 hogsheads of sugar.), &c. 1,000,000l. Private Property - Dwelling-houses, Clothes, Plate, Furniture, &c. 1,500,000/. Wharfs, Boats, Rafts, Merchandize, Canals, Roads, &c. Boats, Rafts, Merchandize, Canals, Roads, &c. 3,000,000l. Cattle, Horses, Swine, &c. 500,000l. Gold and Silver Coin in circulation, 20,000l. Total of Property Annually Created, 3,789,1661. Total of Moveable and Immoveable Property, 24,020,000l.

Since the foregoing pages were printed, the following document has been laid before the House of Commons, in continuation of the papers ordered to be printed 2 March 1838, No. 180; the statement is subjoined, as illustrative of an important fact in relation to the future prospects of the colony.

Statement of the Average Annual Mortality on Five Estates in Berbice under Superintendence of Davidsons, Barkley and Co., compiled from monthly returns sent home during the last three years. The previous returns (as well as those on other estates during the same period) did not distinguish the free persons from the apprentices, and therefore afforded no criterion of the deaths among the latter class.

Add for December, 1837, Return not yet received, 34 deaths.

38 deaths in 1,309 Negroes gives 1 in 34₅² as the average of 1835. 45 — in 1,271 — 1 in 28½ — 1836. 34 — in 1,226 — 1 in 36 — 1837.

in 3,806 lim 32d as the average of the three years.

A mortality less than the average of several European nations; as Italy, Greece and Turkey, in which the proportion, according to M. Moreau de Jonnes, is 1 in 30, and very little more than that within the Bills of Mortality of the metropolis.

CHAPTER III.—HONDURAS.

SECTION I. The British settlement of Honduras, in | Thomas Lynch, the conduct of Spain would have been the province of Yucutan, is situate in the southern part of the American continent, between the parallels of 17 and 19 N. lat. and 88 to 90 W. long., on a peninsula extending from the west side of the Bay of Hondnras (that either gives or takes its name from the settlement) to the sea, northwardly forming the Bay of Campeachy on the west, and the Bay of Honduras (Hondura, depth of water) on the cast side of the peninsula, the coast line extending about 270 miles; the inland boundaries are ill-defined. According to Henderson, the line which includes the settlement commences at the mouth of the Rio Grande. or Hondo, whose course it follows and afterwards runs parallel with, for 30 miles—then, turning south, passes through the New River Lake, in a straight line, to the river Balize, up which it ascends for a considerable distance—and then again proceeds south till it reaches the head of the Sibun, whose windings it pursues to the sea coast—the whole settlement embracing an area of 62,750 square miles. The Mosquito shore—the Indians of which are in alliance with, and, in some respects, subject to the Crown of Great Britain, extends from Cape Gracios a Dios, southerly to Punta Gordo and St. Juan's river; N. W. and westerly, to Romain river; and S. E. beyond Boco del Toro to Coclee or Coli, near the river Chagre and Porto Bello.

II. The Honduras coast was discovered by Columbus in 1502-its period of early settlement is very vague. At first it was occasionally resorted to by mahogany and other wood-cutters, whose chief place of residence was then a small island called St. George's Key, about nine miles to the N. E. of the town of Balize, the present capital of the settlement. first regular establishment of British logwood cutters was made at Cape Cartoche by some Jamaica adventurers, whose numbers increased so, that in a short time, they occupied as far south as the river Balize, in the Bay of Honduras, and as far west as the island of Triste and the Laguna de los Terminos, adjacent to Campeachy. The territorial jealousy of the Spaniards was soon roused, and the Governor of Campeachy fitted out several expeditions against the logwood cutters, in which he not only failed, but on two occasions, in 1659 and 1678, the cutters actually took possession of the town of Campeachy, without a single cannon, and aided only by the seamen engaged in the trade.

By a treaty concluded with Spain in 1670, by Sir W. Godolphin, the seventh article generally, though not specifically, embraced the territorial right of British occupancy at Honduras—and in consequence the English population fast augmented, the number of whites (no negroes were introduced) being then 1700. The jealousy of the Spanish monarch at the success of the English, led to a renewed discussion of the territorial right of our settlers, which the imbecile ministers of the pusillanimous Charles II. so far admitted. as to direct the Governor of Jamaica (Sir Thomas Lynch.) in 1671, to inquire into the same, and had it not been for the spirited and patriotic couduct of Sir

sanctioned by the court of St. James'. The Spaniards, at all events, determined to drive the woodmen from the Campeachy shore, and by 1680, they succeeded in confining the English to the limits now occupied.

From this period the establishments on the other side of Cape Cartoche were entirely abandoned by the settlers. In 1718, the Spaniards sent a large force to try to dispossess the English from the Balize river, as they had done from the opposite coast, but the bold front of the logwood cutters deterred the Castilians, who contented themselves with erecting a fortification in the N.W. branch, of which they held possession for a few years, and finally abandoned it. The logwood cutters were left for 36 years in peace, until the attack on Truxillo by the English in 1742, which led to the long projected expedition of 1754, to exterminate the latter from Honduras. By the treaty of peace in 1763, the Spaniards were compelled to give a formal permission of occupancy to the British colonists, though they subsequently endeavoured to annul it.

The Spaniards made another attack on the settlements in 1779, destroyed a great deal of property, and marched off many of the English settlers of both sexes, blindfolded and in irons, to Merida, the capital of Yucutan, and thence shipped them to the Havannah, where they were kept in captivity until 1782; but, in 1784, a commission from the crown of Spain was authorized "to make a formal delivery to the British nation of the lands allotted for the cutting of logwood," &c. It is necessary to state this explicitly, because many persons are not only ignorant whether Honduras is an island or part of the continent, but very many, who are aware of the position of the settlements, think the British have merely a right to logwood and mahogany cutting in the Bay of Honduras, and that it is not a territorial occupancy of the British crown, which in fact it is, as much as Jamaica or any other settlement. The last Spanish attack on the settlements was during the war in 1798, and consisted of an expedition of 3,000 men, under the command of Field Marshal O'Neil, who was gallantly repulsed by the "Bay Men" (as the Honduras settlers are termed), for which they received the thanks of his Majesty. This act of conquest is a perfectly good title of occu-

III. The sea coast of our territory at Honduras is flat, and the shore studded with low and verdant isles (keys). From the land the coast gradually rises into à bold and lofty country, interspersed with rivers and lagoons, and covered with the noblest forests. bay reaches from Cape Cartoche, in 21.31, the N. point of the peninsula of Yucutan, to Cape Honduras, in 16 S. lat., and 86 W. long. From thence the coast, comprehending Cape Gracias a Dios, and extending between 500 and 600 miles to the mouth of the Rio de San Juan as it flows from the Nicaragua lake, is known by the name of the Mosquito shore. Within these limits lie the settlements which have been considered the dependencies of Jamaica.

The town of Balize (called by the Spaniards, Valize;

corrupted from the original, Wallis, the noted English buccaneer), the capital of the Honduras settlement, is divided into two parts by the river Balize, which empties itself by two mouths in a tortuous manner into the sea, at the western side of the Honduras Bay, where, as before observed, the shore is extremely flat, with numerous keys or small islands dispersed along the coast, and densely covered with trees or shrubs, so exactly resembling each other as to puzzle the most experienced sailor, and rendering navigation exceedingly difficult. That part of Balize which is situate on the S. or right bank of the river, along the eastern edge of a point of land, is completely insulated by a canal on its western side, which runs across from a small arm of the sea, and bounds the town on its S. side.

The number of houses are nearly 500, many of them convenient, well built, spacious, and even elegant; they are chiefly constructed of wood, and raised 10 feet from the ground. The streets are regular, running parallel N. and S., and intersected by others, the main one running in a N.E. direction (to a bridge crossing the river, and facing the chief quays and wharfs) from the government-house, which is situate on the S.E. point or angle of the island, on the right bank of the river, and bounded on the S. and E. by the sea. The church is situated behind the government-house, on the E. side of the main street, and the whole town is shaded by groves and avenues of the cocoa-nut and tamarind trees. To the N. of Balize is an extensive morass, three miles in circumference, now being drained. Fort George is situate about half a mile from the river on a small islet; it is low, 600 feet long and 200 broad, principally formed of the ballast from the shipping, every vessel being obliged to deposit a portion of ballast proportioned to its tonnage.

The lighthouse of Honduras, situate on Half Moon Key, or Isle, is about 43 miles E. by S. southerly from Balize. Like all the islands with which the Bay of Honduras is studded, its appearance at a distance is flat; but, on a nearer approach, it is found to be more elevated than the keys in the neighbourhood. On this bay stands the lighthouse. In 1821 this highly useful building was erected on the N.E. point, the most elevated on the island, which is a rocky promontory, nearly 30 feet above the low-water mark: and from its base, which is 22 feet square to the lanthorn, it rises about 50 feet. It is in lat. 17.12 N., and long. 87.28 W. It is built in a pyramidal form to within nine or ten feet of the top. There is a fixed reflected light from sun-set to sun-rise, for which the public of Honduras allow the contractor the sum of 4001. currency per annum. By day the lighthouse, being painted white, serves as an excellent beacon. In days of yore, this spot was much resorted to, and at several periods was the residence of the buccaneers when they infested these seas.

This key is now the chief residence of the branch pilots. They are a set of men remarkable for their abstemious habits, activity, and humanity on all occasions; and there hardly can be remembered an instance of their deviation from duty.

IV. The first geological feature requisite for the knowledge of man is the capability of the soil to grow food. In this respect Honduras is not behind hand in fertility to any spot in the Old or New World. The soil of the Cahoun ridge consists of a deep loam, produced by decomposed vegetable matter, and capable of growing every European, as well as tropical aliment. The Pine-ridge land has a substratum of loose reddish

sand, and its indigenous products exhibit those varieties of the vegetable kingdom whose assimilative powers are strong and perennial. Extensive natural prairies, or pastures, spread over this soil. An inexhaustibly rich alluvial soil exists on the margin of the numerous creeks and rivers which stud the country.

Veins of fine marble, and mountains of alabaster, are known to exist. Valuable crystals have been found within 180 miles of Balize; and fine pieces of transparent feltspar lie along the banks in many places, which are used in ornamental stucco work. Gold has, at various periods, been found in the Roaring Creek (a branch of the Balize river), but no trouble has been taken to ascertain from whence it proceeded. Quantities of lava and volcanic substances have been found in different situations. Labouring Creek, about 100 miles inland, on the Balize, is remarkable for the petrifying properties which it possesses; its waters have a powerful cathartic effect on strangers, and a healing property when applied externally to an ulcer.

V. The climate about Balize is generally moist. In July, the dryest and hottest month of the year, the average maximum heat is 83 F., the medium 82, and the minimum 80; but, though the absolute heat appears so great during the hot months, yet it is so tempered by the sea breezes, which almost constantly prevail from the N.E., S.E., or E., that the air feels pleasant and often cool; but, on the wind shifting to the N. or W., the atmosphere becomes sultry, and often oppressive. During the wet seasons, which last five months, the mercury sinks to 60. The variation in the temperature is very great, sometimes 15, between six A.M., and two P.M., and at night 20 or 25 less than in the day.

November	80	79	74	E.N.E. and W.	Dry and pleasant.
December	18	75	71	N.N.E. and W.	Ditto, ditto, slight showers.

It is asserted in the Honduras Almanac, that the climate of Honduras is more favourable to European constitutions than any other climate under the tropics. Those who have not trifled with it by intemperance and irregularities, enjoy the best health, as demonstrated by the many instances of longevity, European and native, that exist.

VI. According to a census in 1823, the population was—whites, 217; slaves, 2,468; free people of colour, 809; free blacks, 613; pensioners from discharged West India regiment, 819; detachment of second West India regiment, 231; ditto of Royal Artillery, 22; total, 5,179. The proportions of males and females, adults and children, were—

				Male Adults.	Female Adults.	Male Children.	Female Children,	Total.
Whites .				136	51	20	10	217
Colonred				192	243	183	191	809
Free Black				217	222	93	81	613
Slaves .				1440	628	214	186	2468
Fensioners				650	54	50	65	819
Second Wes	t In	dia	Re-	200	14	10	7	231
Royal Artill	ery			10	4	- 4	4	22

In 1826 there were, whites—267 males; 65 females. Coloured and free—1,629 males; 826 females. Slaves—1,606 males; 3,502 females. Grand total—3,502 meles; 4,393 females. King's troops—379 men; 30 females; 47 children.

The aggregate population of Honduras from 1823 to 1830 was—

Ycars.		and Free ared.	Sla	ves.	То	tal.
ž	Males.	Females	Males.	Females	Males.	Females
1823	842	798	1654	814	2496	1612
1926	1996	891	1606	804	3502	1695
1829	1596	920	1329	798	2925	1718
1830	937	919	1347	680	2284	1599

In 1833 the population was, whites, males 143; females 80; free blacks, males 832; females 956. Slaves, males 1,132; females 651. Total, males 2,107; females 1,687 = 3,794. Births 135—deaths 133—marriages 28. In 1832 the births were 147—deaths 173—marriages 28.

In the B. B. for 1836 is the following return for Balize. Whites—males, 134; females, 88. Coloured population—males, 1,288; females, 1,033. Total—males 1,422; females, 1,121. Births, 238; marriages, 39; deaths, 136.

This settlement has never been surveyed.

The above return is not strictly correct. The cholera prevailed several months during the year, and many of the victims were buried at a distance from the town by their friends. The number of births can only be taken from the baptisms registered.

The coloured population has arisen from the intercourse of Europeans with Africans or Indians. They, therefore, partake more or less of the qualities of black and white, directly as to their distance from either.

Mosquito shore men, sojourning in great numbers in the colony, have long greasy black hair, and coun-

tenances remarkable for vacuity of intelligence, but with a muscular formation of body that might serve as a model for a sculptor's Hercules.

The Indians, who are the real aborigines of the South American continent, are a timid and inoffensive race.—(See "Colonial Library," West Indies, vol. ii., for a detailed description of the people.)

A statement of the number of Slaves for whom Compensation has been claimed, and of the Number of Claims preferred for such Compensation, and of the Amount of Compensations awarded in each of the classes of Prædial-attached, Prædial-unattached, and Non-Prædial. [Parliamentary Return to the House of Lords, March, 1838.]

Divisions.	Classes.	No. of slaves in each class.	Compensa- tion value of each class.	Total.

	non-effective	90	Nil.	

Number of claims having reference to each division. Prædial attached, 0; Prædial unattached, 179: Non-prædial, 220.

VII. The British settlement of Honduras is not divided into parishes. The population is supposed to be between 3,000 and 4,000. The value of the living for 1836 was 827l. sterling: there is a parsonage-house attached, but no glebe. The church is situated in the town of Balize, and will contain about 600: the number generally attending varies, according to the different seasons. There are no chapels, but two dissenting places of worship, viz. one Wesleyan and one Bautist.

VIII. There is one school situated in the town of Balize for boys and girls, containing 47 of the former, and 79 of the latter. The master, receives 320l. currency per annum, and the mistress, 100l. currency per annum. They have each also a house found them to reside in. The Madras system is the mode of instruction adopted. This school is endowed by the public of Honduras. There are also five private schools, and one Wesleyan Methodist Sunday school, and one Baptist school.

X. Honduras is governed by a superintendant nominated by the Crown to watch over the interests of the settlers, to secure them from any improper intrusion of foreigners, and to regulate all affairs which more particularly affect the dignity of the Crown. There is a mixed legislative and executive power, termed the Magistrates of Honduras, by whom enactments are made, which, on receiving the assent of the King's representative, become laws to be enforced by the executive power. The magistrates in whom the power is thus vested are seven in number, elected annually by the inhabitants, thus—a poll is opened on the order of the bench to the Provost-marshal-general, and remains so 21 days, at the expiration of which a scrutiny takes place, and the Provost-marshal-general returns those duly elected, who are sworn into office on being approved of by the Superintendant. are the Counsellors of His Majesty's Superintendant, the Guardians of the Public Peace, the Judges of all the Lower Courts; they form the Court of Ordinary, they are the Guardians of Orphans, and can delegate their power in the management of the property to such persons whom they consider worthy of their trust. They are the protectors of all properties of

intestate or insane persons, or of those incapable of managing their own affairs; they settle all salvage on wrecked vessels, stores, and merchandize; they manage the public funds, and control the treasurer; and no money can be paid without the sanction of four, who sign all orders for the issue; and previous to retiring from office, they examine all his accounts, and sign them, if approved. No emolument arises to them; services are entirely gratuitous. Trial by jury is established; and from the decisions of the court an appeal lies direct to the King in Council, which, however is rarely made.

The militia of Honduras is a very fine body of men, about 1,000 strong, and consists of a brigade of royal artillery, and a regiment of the line; there is also a local maritime force, termed the Prince Regent's Royal Honduras Flotilla. The Superintendant of the settlement is, of course, commander-in-chief of the militia, with a fair proportion of aides-de-camp and staff.

XI. Revenue and Expenditure of Honduras from 1807 to 1836.

	Revenue.	Expend.		Revenue.	Expend.
	£.	£.		£.	£.
807	7566	8291	1822	[483]	14296

821	12306	12027	1836	20071	15204

Of the Expenditure,—the Superintendant has 1,500l.; the Police costs about 2,000l.; Public Works and Miscellaneous, about 6,000l., and the remainder is employed in the payment of the officers of government.

Payments by Honduras Settlement in 1836. [B. B.]
—Civil establishment, 3,178l.; Contingent expenditure, 779l.; Ecclesiastical establishment, 554l.; Contingent expenditure, 36l.; Pensions, 350l.; School establishment, 425l.: Total, 5,322l.

Schedule of Taxes and Duties, and other sources of Revenue of the British Settlement of Honduras, during the year 1836 .- All duties and taxes are levied under the authority of Acts passed by the Settlers, assembled in Public Meeting, and sanctioned by the Superintendants. The following are now in force; viz. On tonnage of British vessels, 2s. 6d. per ton; tonnage of foreign vessels, 5s. per ton; spirits, wines and cordials, 6s. 8d. per gal.; articles not rated for duty, sale or deposit, 1 per cent.; articles not rated for duty for sale, on account of foreign transits, 5 per cent.; foreign dye-woods, 20s. per ton; sugar and coffee, 10s. per 100 lbs.; tea, 2s. 6d. per lb.; molasses, 1s. per gal.; segars, 6s. 8d. per th.; tobacco, 2s. 6d. per 100 lbs.; lumber, 13s. 4d. per th.; shingles, 3s. 4d. per th.; spirit licenses, 501. per annum; duty on mahagony introduced from beyond the limits of the settlement, 201. per thousand; horned cattle, 6s. 8d. per head; calves, 3s. 4d. per head; horses or mules imported into the settlement, 20s. per head; horses or mules kept in town, 40s. per annum; carriage wheels, 40s. per wheel; foreign small craft, 6s. 8d. each. All fines and forfeitures are paid into

the public treasury in aid of the revenue, also marketrent. The duty on mahogany introduced from beyond the limits of the settlement, disallowed by proclamation of her Majesty's Superintendant, on 5th May 1836, in pursuance to instructions from her Majesty's government.

Commissoriat Department. [B. B.]—Provisions and forage, 3,469l.; fuel and light, 538l.; transport, 61l.; pay of extra staff, 113l.; military allowances, 581l.; special services, 2,033l.; contingencies, 550l.; ordinaries, 7,365l.; pay of commissariat officers, 514l.: total, 15,225l.

Ordnance Department in 1836. [B. B.]—Pay of royal artillery, 373l.; acting ordnance store-keeper and English labourers, 197l.; barrack stores, 47l.; washing barrack bedding, 154l.: total, 771l. Total of Commissariat, 15,225l.. Total amount out of military chest, 15,996l. Salt meat, oats and candles from England, 2,600l. Total, 18,596l.

XII. The trade of Honduras is as yet but in its infancy, although exceeding half a million annually sterling.

XIII. There is no paper currency, and the amount of coin in circulation is not known. The difference of exchange between the Honduras and Great Britain is by custom, 40 per cent: the dollar is therefore current at 6s. 8d. The premium on mercantile bills is 14 to 16.

Value in English money of the Spanish coins in circulation.

Gold Coins—Doubloon, 5l. 6s. 8d.; half ditto, 2l. 13s. 4d.; quarter ditto, 1l. 6s. 8d.; one-eighth ditto, 13s. 4d.; one-sixteenth, 6s. 8d. currency.

Silver Coins. — Dollar, 6s. 8d.; half ditto, 3s. 4d.; quarter ditto, 1s. 8d.; one eighth, 10d.; one-sixteenth, 5d. currency.

XIV. The agricultural produce of this settlement consists of Indian corn, rice, yams, and plantains, raised merely for the internal consumption of the country, not being permitted by his Majesty's government to export them to the United Kingdom The soil is extremely well adapted for the culture of coffee, cotton, and sugar; cocoa grows spontaneously and in great quantities in the thickets, but from the cause above mentioned, no care is taken of it. A few horses, and many horned cattle are bred in the settlement, the latter are principally used in drawing the mahogany out of the woods. [B. B. 1836]

Oranges, (which are uniformly of excellent quality,) shaddocks, lime, mangoes, melons, pine apples, water melons, avocato pears, cashew, cocoa-nuts, and many others too numerous to mention, are very abundant during their respective seasons. They all grow in the neighbourhood of the town, but are also brought in large quantities from higher plantations. The country abounds with game of every variety, whether fish, flesh, or fowl. The Spaniards, who frequent Balize from Bacalar in open crafts, carry on an extensive trade in poultry, eggs, corn, &c., and, except in very rough weather, the supply of salt water fish is abundant and excellent.

The mahogany tree and logwood are the present staples of Honduras: another valuable timber covers the country for many thousand acres, and would prove a useful article in England, the pinus occidentatis, grows to 60 feet high, with irregular branches and serrated edged leaves, and which, owing to the quantity of tar and turpentine which the best sort contains, will sink in water when felled.

The pinewood is of course highly inflammable, a property which, to the poor, renders it very valuable; a torch of this wood, one end inserted in the earth, and the other ignited, emits a clear and powerful light. Owing to its durability it is, of course, much used by builders. It not only resists the action of the atmosphere, but it is also proof against the chemical influence of the earth even in the dampest situations. It is not uncommon to see posts extracted from the ground in which they have been fixed for years, in as high a state of preservation as when they were first put down; and the only difference they exhibit is increased solidity and hardness, and a strong bituminous smell.

The cahoun (locally pronounced cohoon) tree is chiefly valuable for the elegant vegetable oil it yields; which when unadulterated is almost colourless, being paler than the cold drawn castor oil. It is entirely free from any empyreumatic or fetid taste, possessing a slight and rather agreeable flavour. It emits a beautiful palish flame without smoke or smell, a property which renders it as a lamp oil, not equalled by any other known, and therefore much in demand in genteel society. Its affinity for oxygen is so remarkably strong, that steel smeared with it very soon rusts. Indeed its caloric is so easily abstracted, that at the temperature of 60, F. it condenses into a white waxlike substance, but when heat is applied it immediately expands and resumes its original appearance. There are several little known woods, of beautiful vein and close texture, which might be turned to a profitable account, such as the iron-wood, claywood, rosewood, palmaletta, dark and beautifully figured, Santa Maria, which possesses the properties of the Indian teak, caoutchouc, or Indian rubber, sapodilla, and innumerable others.

Many other valuable products of the territory would be developed with an increased population. [See Colonial Library, vol. IV.]

CHAPTER III.—FALKLAND ISLANDS.

SECTION I. The Falkland islands which are about 90 in number, are situate between the parallels of 50.58. and 52.46, south, and the meridian 57.20. and 61.29 west, contiguous to the Straits of Magellan. The two largest are nearly 100 miles in length and 50 in breadth. They were first discovered by Sir Richard Hawkins during the reign of Queen Elizabeth, in the year 1594, or, as some think, by Captain Davis, an English navigator under Sir Thomas Cavendish, in 1592. Subsequently they were visited by a ship belonging to St. Maloes, from which they were called by the French, 'the Malouins;' and afterwards by the Spaniards, 'the Malvinas.' Little, however, was known of them until Commodore Byron, when on a voyage of discovery to the South Seas, visited them in January, 1765, and formally took possession of them for his Majesty Geo. III. under the title of 'the Falkland Islands,' though others say this name had been previously given them by an English navigator named Strong, in 1689. After being there about 14 days,

he left Port Egmont on Sunday, 27th January, and described it as being the finest harbour in the world, capacious enough to hold all the navy of England in full security. Geese, ducks, snipes, and other fowl were found in such abundance, that the sailors were quite tired of eating them; and in every part there was a plentiful supply of water.

When the French lost the Canadas, a colony of farmers was transported hither by M. de Bougainville, and about the same time a British colony was established at Port Egmont by Capt. M'Bride; but their right being disputed by the Spaniards, M. de Bougainville surrendered the possession of his part to the latter in April, 1767. Great Britain, however, by virtue of her original discovery, claimed the sovereignty, which led to a rupture with Spain in the year 1770, and the point was warmly and strongly contested for a considerable period. Spain, however, finally conceded our right to the islands.

II. The two largest of the islands are about 70 leagues

in length, and from one to three in breadth. The harbours are large, and well defended by small islands, most happily disposed. The smallest vessels may ride in safety; fresh water is easily to be obtained; there is seldom any thunder or lightning, nor is the weather bot or cold to any extraordinary degree. Throughout the year the nights are in general serene and fair; and upon the whole, the climate is favourable to the constitution. The depth of the soil in the vallies is more than sufficient for the purpose of ploughing.

Since 1767 they fell into comparative insignificance; and, for many years past, little notice has been taken of them by our government. Ships of war, on their passage round Cape Horn, have occassionally touched there for supplies of water, &c. and South Sea whalers and other merchant vessels; but the navigation being little known, they have not, until lately, been much frequented, although very nearly in the track of ships homeward bound from the Pacific.

Latterly, however, circumstances arose which induced the last commander-in-chief on the South American station (Sir Thomas Baker), to send down a ship of war for the purpose of reclaiming that possession, which lapse of time seemed to have rendered almost absolutely abandoned, as the Buenos-Ayrcan Government endeavoured to set up a claim to the islands; the Spaniards having formerly used the islands as prisons for South American delinquents.

In the month of December, 1832, Commander Onslow, in H.M.S. Clio, proceeded to Port Egmont, and found on Saunders' Island the ruins of our former establishment. The town stood on the south side of a mountain not less than 600 feet high. The settlers had extended their gardens to the westward, the remains of which are still perceptible. Not finding any inhabitants, an inscription was left there, attached to a signal staff, on a spot which appeared to be Fort George, stating, 'That these islands had been visited by his Britannic Majesty's ship Clio, for the purpose of exercising the rights of sovereignty, 23d December, 1832."

During their stay of ten days, the boats were employed in examining Brett's Harbour, Byron's Sound, Keppel's Sound, and to the westward to Point Bay, a distance of 60 miles from the Clio's anchorage.

At Port Louis, on East Falkland Island, a Buenos-Ayrean schooner of war was lying, and a small party of soldiers under the same flag occupied the shore, where there was an inconsiderable settlement of foreign persons, chiefly Buenos-Ayreans, who were engaged in catching wild cattle, &c. for the supply of such ships as occasionally touched there. Lieut. H. Smyth, of H. M. ship Tyne, was subsequently sent down with a boat's crew to settle on the islands.

Port Louis, at the head of Berkley Sound, is admirably adapted for vessels to refit at, under any circumstances; it is we'll sheltered, and has an inner harbour for vessels drawing 14 feet of water, where they may heave down with safety if requisite. Water is also good and plentiful; and reflecting on the number of vessels passing and repassing Cape Horn, and the accidents they are liable to, from the tempestuous weather frequently experienced off that Cape, the advantages of a port of refuge becomes apparent.

East Falkland Island possesses large and secure harbours for first rate ships of war, with facilities for exercising the crews on shore without the risk of losing them, and with abundance of wild cattle, antiscorbutic herbs, and fish, for their support.

The country, in the northern part of the island, is

in circumference, and divided by a channel 12 leagues | rather mountainous. The highest part was called San Simon, at no great distance from the bottom of Berkeley Sound. The tops of the mountains are thickly strewn with large boulders, or detached stones, of which quantities have fallen, in some places, in lines along their sides, looking like rivers of stones: these are alternated with extensive tracts of marshy ground, descending from the very tops of the mountains, where many large fresh-water ponds are found. from one to two feet deep. The best ground is at the foot of the mountains, and of this there is abundance fit for cultivation, in plains stretching from five to fifteen miles along the margin of the sea. the southern peninsula there is hardly a rising ground that can be called a hill. Excellent fresh water is found every where, and may be procured either by digging or from the rivulets, which flow from the interior towards the sea, through vallies covered with a rich vegetation.

III. The climate on the island is, on the whole, temperate. The temperature never falls below 26. Fahrenheit in the coldest winter, nor rises above 75. in the hottest summer; its general range is from 30. to 50. in winter, 50. to 75. in summer. The weather is rather unsettled, particularly in winter; but the showers, whether of rain, snow, or hail, are generally of short duration, and their effects are never long visible on the surface of the ground. Thus floods are unknown; snow disappears in few hours, unless on the tops of the mountains; and ice is seldom found above an inch thick. Thunder and lightning are of rare occurrence; fogs are frequent, especially in autumn and spring, but they usually dissipate towards noon. The winter is rather longer than the summer, but the difference not above a month, and the long warm days of summer, with occasional showers, produce a rapid vegetation in that season.

The wind blows commonly from the north-west in summer, south-west in winter, and seldom long from the eastward in either season. The finest weather in winter is when the wind draws from the west or north-west, and in summer when it stands at northwest or north-east. A north wind almost always brings rain, especially in summer, and east and southeast winds are constantly accompanied by thick and wet weather. Snow squalls generally come from the south-south-east, south, or south-south-west. Storms are most frequent at the changes of the seasons, and blow commonly from south-south-west to west-southwest; but they seldom last above 24 hours.

IV. Of the geology of the islands we yet know little. There are marks of copper ore with some pyrites, and the rocks are chiefly quartz. Ores of different colours are common, and red and grey slate is plentiful. There is abundance of excellent clay and stone adapted for building.

The soil of East Falkland Island has been found well adapted to cultivation, consisting generally of from six to eight inches of black vegetable mould, below which is either gravel or clay. The meadows are spacious, well watered, and producing excellent grasses. Wheat and flax were both raised of quality equal, if not superior, to the seed sown, which was procured from Buenos Ayres; and potatoes, cabbage, turnips, and other kinds of vegetables produced largely, and of excellent quality. Fruit trees were not tried, the plants sent from Buenos Ayres having perished before they arrived.

The soil also produces different kinds of vegetables wild, as celery, cresses, &c., and many other esculent plants, the proper names of which were not known to the settlers, but their palatable taste and valuable anti-scorbutic properties were abundantly ascertained by them. Among others is one which they called the tea-plant, growing close to the ground, and producing a berry of the size of a large pea, white with a tinge of rose colour, and of exquisite flavour. A decoction of its leaves is a good substitute for tea, whence its name. It is very abundant.

No trees grow on the island, but wood for building was obtained tolerably easy from the adjoining Straits of Magellan. For fuel, besides peat and turf, which are abundant in many places, and may be procured dry out of the penguins' holes, three kinds of bushes are found, called fachinal, matajo, and gruillera. The first of these grows straight, from two to five feet high, and the stem, in proportion to the height, is from half an inch to one inch and a half in diameter; small woods of this are found in all the vallies, and form good cover; it bears no fruit. The second is more abundant in the southern than in the northern part of the island; its trunk is nearly the thickness of a man's arm, very crooked, never higher than three feet, and bears no fruit. The gruillera is the three feet, and bears no fruit. The gruillera is the smallest of the three, growing close to the ground, and abundant all over the island; being easily ignited, it was chiefly used as fuel when the people were a way from the settlement, and to light the peat fires in the houses. It bears a small dark red berry of the size of a large pea, of an insipid taste.

The most curious of the vegetable productions is a resinous plant, or rather excrescence, for it grows from the earth without stalk, branch, or leaves, called the resinous gum plant. It is frequently six feet in diameter, and 18 inches high, and so strong as to bear the weight of a man. Its surface ejects drops of a tough resinous matter of a yellow colour, and about the size of peas, having a strong odour like turpentine. Great quantities of water cresses, sorrel, and wild parsley, are found in every direction, as well as a small shrub of the nature of spruce, which, being made into beer by the help of molasses, has proved an excellent antiscorbutic to seamen afflicted with scurvy after a long voyage on salt provisions. Scarcely any fruits are found, indeed only two fit for use, which grow upon creeping plants, and are similar to the mulberry of Europe, and the lucet of North America. Though there are numerous flowering plants, only one, which had a smell like that of a rose. appeared to yield any perfume.

Only one species of animal was found in the island, a kind of wolf-fox, which Byron describes as extremely fierce, running from a great distance to attack the sailors when they landed, and even pursuing them into the boat. It is about the size of a shepherd's dog, and kennels under ground, subsisting on the seals and birds, which it catches along the shore. Sea lions, wallruses, and seals, are abundant about the coast, many of them of great size, and very fierce. Swans, wild green ducks, teal, and all kinds of seafowl, are found in great numbers; and so tame were some of the birds when the first settlers landed there that they would suffer themselves to be caught by the hand, and often perch upon the heads of the people. There is a bird called the grele, of beautiful plumage, and a kind of gentle note, whose flesh is much esteemed, and which suffers itself to be approached so as to be knocked down with a stick; there are also falcons, snipes, owls, curlews, herons, thrushes, &c. Fish are not so plentiful, but they consist of mullet, pike, sardini, gradlaw; and, in the fresh water, a green trout, without scales; all sorts of small shellfish are found around the coast, but it is difficult to get at them, or indeed for a boat to land, on account of the prodigious quantity of sea-weed with which the shore is loaded. The tides produce a curious phenomenon, they do not rise at the settled calculated periods, but just before high water the sea rises and falls three times; and this motion is always more violent during the equinoxes and full moons, at which time several corallines, the finest mother-of-pearl, and the most delicate sponges are thrown up with it; and amongst other shells, a curious bivalve, called la poulette, found no where else but in a fossil state.

Herds of wild horned cattle, to the extent of many thousands, exist on the island, sufficient to maintain a great many settlers; and wild hogs are abundant in the northern peninsula. Wild horses are also found there of small size, but very hardy, which, when broken in, as some were without difficulty, were found of great service to the settlement. Rabbits are in great numbers, of a large size and fine fur. Foxes, too, are found, but differing considerably from those of Europe, having a thick head and coarse fur; they live chiefly on geese and other fowl, which they catch at night when asleep.

Game is extremely common, especially wild geese and ducks; of the former two kinds were distinguished, the lowland or kelp-geese, and the upland geese; the latter were much superior in flavour, the former being of a fishy taste, living chiefly on muscles, shrimps, and kelp. Both were very tame, and the upland geese were easily domesticated. They are finest eating in autumn, being then plump, in consequence of the abundance at that season of tea-berries, of which they are very fond; the rest of the year they live on the short grass. They have a white neck and breast, with the rest of the body speckled of a fine brown marbled colour. The lowland gander is quite white, and the goose dark, with a speckled breast. Of ducks there are several kinds. The loggerheaded are the largest, and almost of the size of the geese; their flesh is tough and fishy; they cannot fly, and when cut off from the water are easily caught. The next size is also of inferior quality, tough and fishy, but the smaller kinds, which are not larger than young pigeons, are deliciously good, and are found in large flocks along the rivulets and fresh water ponds. Snipes are found so tame that they were often killed by throwing ramrods at them. In addition to these, a great variety of sea birds frequent the shores, of which the most valuable to sailors and settlers, from the quantity of eggs they deposit, are the gulls and penguins. These birds have their fixed rookeries, to which they resort in numerous flocks every spring; the gulls generally in green places near the shore, or on the small islands in the bay; the penguins chiefly along the steep rocky shores of the sea. The eggs of both are eatable even with relish, after long confinement on board ship, the penguin's being, however, the best, and less strong than that of the gull. So numerous are these eggs, that on one occasion eight men gathered 60,000 in four or five days, and could easily have doubled that number had they stopped a few days longer. Both gulls and penguins will lay six or eight each, if removed, otherwise they only lay two and hatch them. The gulls come first to their hatching places, the penguins a little later.

Fish abounds in all the bays and inlets, especially in spring, when they come to spawn at the mouths of the fresh water rivulets. A company is now forming for the colonization of the islands.

BOOK III.—POSSESSIONS IN NORTH AMERICA.

CHAPTER I.—LOWER CANADA.

derived from the Indian word Kanata, signifying a collection of huts, and which the early European dis-coverers mistook for the name of the country. This important section of the British empire is bounded on the E. by the Atlantic Ocean, the Gulf of St. Lawrence and a part of the Labrador coast (which is separated by the Straits of Belleisle from the island of Newfoundland), on the N. by the Hudson Bay terri-tories, on the W. by the Pacific Ocean, and on the S. by the United States, by part of New Brunswick, and by the unexplored territories of the Indians. The division line on the S. from the grand portage on Lake Superior (vide general map) runs through the great lakes and down the St. Lawrence river to latitude 45., and thence along that line to Connecticut river, from whence it follows the high lands which separate the waters running into the St. Lawrence and the Atlantic, till it reaches due N. of the St. Croix river, the boundary between the United States and New Brunswick.

The boundary is thus described in the 2nd article of the treaty between Great Britain and the United States. "From the N. W. angle of Nova Scotia, viz. that angle which is formed by a line drawn due N. from the source of St. Croix river (the claim set up by the Americans is based on the pretence of their being two 'St. Croix' rivers, and next as to the ' highlands' specified) to the highlands along the said highlands, which divide those rivers that empty themselves into the river St. Lawrence, from those which fall into the Atlantic Ocean, to the north-westernmost head of the Connecticut river; thence down along the middle of that river, to 45. N. latitude; from thence by a line due west in said latitude, until it strikes the river Iroquois or Cataraquy; thence along the middle of said river into Lake Ontario; through the middle of said lake until it strikes the communication by water between that lake and Lake Erie; through the middle of said lake, until it arrives at the water communication between that lake and Lake Huron; thence along the middle of said water communication into Lake Huron; thence through the middle of said lake to the water communication between that lake and Lake Superior; thence through Lake Superior northward to the Isles Royal and Philipeaux, to the Long Lake; thence through the middle of said Long Lake and the water communication between it and the Lake of the Woods, to the said Lake of the Woods; thence through the said lake to the most north-western point thereof; and from thence on a due west course to the river Mississippi; thence by a line to be drawn along the middle of the said river Mississippi until it shall intersect the northernmost part of 31. north latitude; -south, by a line to be drawn due east from the determination of the line last mentioned, in the latitude of 31. north of the

SECTION I. The term Canada is supposed to be Catahouche; thence along the middle thereof to its junction with Flint River; thence straight to the head of St. Mary's River; and thence down along the middle of St. Mary's River to the Atlantic Ocean ;east, by a line to be drawn along the middle of the river St. Croix, from its mouth in the Bay of Fundy, to its source; and from its source directly north to the aforesaid highlands, which divide the rivers which fall into the Atlantic Ocean from those which fall into the river St. Lawrence; comprehending all islands within 20 leagues of any part of the shores of the United States, and lying between lines to be drawn due east from the points where the aforesaid boundaries between Nova Scotia on the one part, and East Florida on the other, shall respectively touch the Bay of Fundy and the Atlantic Ocean, excepting such islands as now are, or heretofore have been, within the limits of the said province of Nova Scotia.'

England's admission of the boundary claimed by the United States, on the frontier of Maine alone, would be a loss of 10,000 square miles of one of the finest sections of the British North American territory, namely, 6,918,410 acres from Lower Canada. and 2,372,010 acres from New Brunswick; and it would bring the United States to the very seaboard of Lower Canada, and destroy the internal communication between each of our provinces, from the coasts of the Atlantic to the shores of Lake Huron.

This extensive country was, in 1791, by His Britannic Majesty's order in council, divided into two governments (entitled Upper and Lower Canada), the boundary between the provinces commencing at Pointe au Baudet, on Lake St. Francis, about 55 miles above Montreal-running northerly to the Ottawa river-up that river to its source in Lake Temiscaming, and thence due N. to the Hudson's Bay boundary. The words of the order in Council are-"to commence at a stone boundary on the N. bank of the lake of St. Francis, at the cove W. of Pointe au Baudet, in the limit between the township of Lancaster and the seigniory of New Longueuil running along the said limit in the direction of N. 34. W. to the westernmost angle of the said seigniory of New Longueuil; then along the N. W. boundary of the seigniory of Vaudreuil, running N. 25 E. until it strikes the Ottawa river; to ascend the said river into the lake Temiscaming, and from the head of the said lake by a line drawn due N. until it strikes the boundary of Hudson's Bay, including all the territory to the westward and southward of the said line, to the utmost extent of the country commonly called or known by the name of Canada." The want of clear-The want of clearness in the above delincation, added to the imperfectness of the map on which it was drawn, particularly as regarded the westwardly angle of the seigniory of New Longucuil, and the S.W. angle of Vaudreuil. which are represented as coincident, when, according equator to the middle of the river Apalachicola or to Col. Bouchette, Surveyor Gen. of Lower Canada,

they are nine miles distant from each other—has of Pavia, in 1525, put a temporary stop to further naturally caused discussions as to the boundaries between Upper and Lower Canada. When the Government, however, ceased to follow up the result of

The territory of Lower Canada, or seaward portion, is comprised within the 45th and 52nd of N. latitude, and the parallels of 57.50, to 80.6, of W. longitude. embracing, so far as its boundaries will admit an estimation, an area of 205,863 square statute miles, including a superficies of 3,200 miles covered by the numerous lakes and rivers of the province, and excluding the surface of the St. Lawrence river and part of the gulf, which occupy 52,000 square miles; the entire province, water and land, being a quarter of a million of square miles, or one hundred and sixty million of acres. The boundaries of Lower Canada are the territories of the Hudson Bay Company, or East Maine, on the N.; on the E. the Gulf of St. Lawrence and a line drawn from Ance au Sablon, on the Labrador coast, due N. to the 52nd of N. latitude; on the S. by New Brunswick and part of the territories of the United States, viz. Maine, New Hampshire, Vermont, and New York; and on the W. by the line separating it from Upper Canada as before described. This boundary was fixed by the 6 Geo. IV. c. 59, which also reannexed the Island of Anticosti to Lower Canada. The whole territory is divided into three chief districts-Quebec, Montreal, and Three rivers, and two inferior ones-Gaspé and St. Francis; these again further divided into 40 counties (vide population section), with minor subdivisions consisting of seigniories, flefs and townships, &c.

II. The discovery of the coast of Canada, according to the most authentic statements, was made by the celebrated Italian adventurers John and his son Sebastian Cabot, who received a commission from Henry VII. of England to discover what Columbus was in search of-a N.W. passage to the East Indies or China, or, as the latter country was then called, Cathay. The adventurers sailed, in 1497, with six ships, and, early in June of the same year, discovered Newfoundland; whence, continuing a westerly course, the continent of North America was arrived at, which the Cabots far N. as 67.50 N. lat. They returned to England in 1498. In 1502, Hugh Elliott and Thomas Ashurst, merchants of Bristol, with two other gentlemen, obtained a patent from Henry VII. to establish colonies in the countries lately discovered by Cabot; but the result of the permission granted is not known. In 1527, another expedition was fitted out by Henry VIII. by the advice of Robert Thorne, a merchant of Bristol, for the purpose of discovering a N.W. passage to the East Indies, and one of the ships in making the attempt was lost.

Francis I. of France, piqued at the discoveries of Spain and Portugal, and having his ambition roused by the monopolizing pretensions of these two powers to the possessions in the New World, authorized the fitting out of an expedition, the command of which he gave to John Verrazani, an Italian, who discovered Florida, and thence sailing back round the American coast to the 15 degree of lat., took formal possession of the country for his royal master, and called it "La Nouvelle France." On Verrazani's return to Europe 1524, without gold or silver or valuable merchandize, he was at first coldly received, but subsequently sent out with more particular instructions and directions to open a communication with the natives, in endeavouring to fulfil which he lost his life in a fray with the Indians, and the object of the expedition was frustrated; while the capture of Francis I. at the battle

exploration of the coast of Canada. When the Government, however, ceased to follow up the result of Verrazani's formal acquisition of Canada, the Frenchmen of St. Maloes commenced a successful fishery at Newfoundland, which, so early as 1517, had had 50 ships belonging to the English, Spanish, French and Portuguese engaged in the cod fishery on its banks. Jacques Cartier, a native of St. Maloes, engaged in Newfoundland fishery, took the lead in exploring, at his own risk, the N. coasts of the new hemisphere. This bold and experienced navigator at last received a commission from his sovereign, Francis I., and left St. Maloes on the 20th April, 1534, with two vessels, neither of which were more than 20 tons burthen! He coasted part of the gulf which he named St. Lawrence; sailed 300 leagues up the river to which he gave the same name; contracted an alliance with some of the natives; built a small fort, in which he wintered; took formal possession of the country, and returned to France with a native chief named Donnaconna, and two or three of his principal attendants (all of whom were forced from their country by treachery), but without any of those precious metals which were then the great objects of European cupidity. The enterprizing character of his royal master induced him to despatch Cartier in the following year with three larger vessels, and a number of young gentlemen as volunteers. Cartier sailed up the St. Lawrence, found the country densely peopled, and the Indians every where friendly. Quebec (or, as it was termed by the natives, Quilibek) was touched at, and an Indian village found there. Cartier pursued his route until he reached an island in the river with a lofty mountain, which he named Mont Royal. now called Montreal. (There is a discrepancy in the public records as to whether Montreal was visited in the first or second voyage.) After losing many of his followers from scurvy, Cartier returned to France in 1536; and the French court, finding that no gold or silver was to be had, paid no further attention to La Nouvelle France, or Canada, until the year 1540, when Cartier, after much exertion, succeeded in getting a royal expedition fitted out under the command of Francois de la Roque, Seigneur de Roberval, who was commissioned by Francis I. as Viceroy and Lieut-general in Canada, Hochela (or Montreal), &c. Roberval despatched Cartier to form a settlement, which he did at St. Croix's Harbour. The Viceroy himself proceeded to his new colony in 1542, where he built a fort and wintered, about four leagues above the isle of Orleans (first called the Isle of Bacchus); but, for want of any settled plans, and from the rising and deadly hostility of the Indians, owing to Cartier's having carried off the Indian chief in 1535, little was accomplished. Roberval's attention was called from Canada to serve his sovereign in the struggle for power so long waged with Charles V. of Spain; and Jacques Cartier, ruined in health and fortune, returned to France in 1549, where he died neglected by his fickle countrymen. Roberval, on the death of Francis I., embarked for Canada, with his brother and a numerous train of enterprizing young men; but, from having never afterwards been heard of, they are supposed to have perished at sea. For 50 years, France paid no attention to Canada, and the few settlers or their descendants left by Cartier or Roberval, were unheeded and unsuccoured; but, in 1598, Henry IV. appointed the Marquis de la Roche his Lieut.-general in Canada, with power to partition discovered lands into seigniories and fiefs, to be held under feudal tenure, and as a compensation for military service when required. Such was the origin of the Canadian seigneuries. The further history of the province will be found in the "Colonial Library," vol. i., in which is detailed the struggles and disasters of the colonists until the British capture of Quebec by General Wolfe, on the 12th September, 1759.

The determined and loyal conduct of the Canadians of all classes, whether of English or French origin, in Lower Canada, effectually prevented the Americans making an impression on that province; and our occupation of both the Upper and Lower Provinces has been uninterrupted for nearly 80 years.

The following is a chronological list of Governors and Administrators of the Government of Canada, since the province was erected into a royal govern-ment, in 1663, and the time when they began to govern. French-Sieur de Mésy, May, 1663; Sieur de Courcelles, 23rd Sept. 1665; Sieur de Fronte-pac, 12th Sept. 1672; Sieur de la Barre, 9th October. 1682 : Sieur Marquis de Nonville, 3rd August. 1685; Sieur de Frontenac, 28th November, 1689; Sieur Chevalier de Callieres, 14th September, 1699; Le Sieur Marquis de Vaudreuil, 17th September, 1703; Le Sieur Marquis de Beauharnois, 2nd September, 1726 : Sieur Conte de la Galissoniere, 25th September, 1747; Sieur de la Jonquière, 16th August, 1749; Sieur Marquis du Guesne de Meneville, 7th August, 1752; Sieur de Vaudreuil de Cavagnal, 10th July, 1755. English—James Murray, 21st Nov. 1765; Paulus Emilius Irving (Pres.), 30th June, 1766; Guy Carleton (Lieut.-gov., &c. Commander-in-chief), 24th September, 1766; Ditto, ditto, 26th October, 1774 : Hector J. Cramahé (President), 9th August, 1770; Guy Carleton, 11th October, 1774; Frederick Haldimand, 1778; Henry Hamilton (Lieut.-governor and Commander-in-chief), 1774; Henry Hope (Lieut.governor and Commander-in-chief), 1775; Lord Dorchester (Gov.-general), 1776; Colonel Clarke (Lieut.-Governor and Commander-in-chief), 1791; Lord Dorchester, 24th September, 1793; Robert Prescott, 1796; Sir Robert S. Milnes, Bart. (Lieut.-governor), 31st July, 1799; Hon. Thomas Dunn (President), 31st July, 1805; Sir J. H. Craig, K.B. (Gov.-general), 24th October, 1807; Hon. Thomas Dunn (President), 19th June, 1811; Sir George Prevost, Bart. (Gov.general), 14th September, 1811; Sir G. Drummond, G.C.B. (Ad.-in-chief), 14th April, 1815; John Wilson, (Administrator), 22nd May, 1816; Sir J. C. C. Sherbroke, G.C.B. (Gov.-general), 12th July, 1816; Duke of Richmond, K.C.B. (Gov.-general), 30th July, 1818; Hon. James Monk (President), 20th September, 1819; Sir Peregrine Maitland, 20th September, 1820; Earl of Dalhousie, G.C.B. (Gov.-general), 18th June, 1820; Sir Francis M. Burton, K.C.G. (Lieut.-governor), 7th June, 1824; Earl of Dalhousie, G.C.B. (Gov.-general), 23rd September, 1825; Sir James Kemp, G.C.B., 8th September, 1828; Lord Aylmer, July, 1830; Lord Gosford, July, 1835; Earl of Durham, June, 1838.

III. The natural features of the territory of Lower Canada are extremely picturesque—mountain ranges, noble rivers, magnificent cascades, lakes, prairies, farms and forests, alternating in every direction with sudden and beautiful variety. On the ocean boundary the eastern parts of the river St. Lawrence are high and mountainous, and covered in most parts with forests. On the northern side of the St. Lawrence the mountains run parallel with this vast river as far up as Quebec, when the range quits the parallel of the capital, and runs in a S.W. and S.E. direction into the United States. These mountains, which are known

by the name of the Alleghanies, rise abruptly from the Gulf of St. Lawrence at Perée, between the Bay of Chaleur and Gaspé Cape, and in their course divide the Atlantic coast from the basin of the Ohio, their loftiest elevation being from 3,000 to 4,000 feet above the sea. The country between these two ranges of mountains and the S. boundary line of Lower Canada in 45° of N. lat., is marked by numerous risings and depressions into hill and dale, with many rivers running from the N. and S. into the great valley of the St. Lawrence. In order to give a clear view of this valley, it will be well to divide it into sections, and then treat briefly of the rivers and lakes throughout the province; to begin with the sea coast:—

1. The most northerly and easterly section of the province of Lower Canada, extending from Ance au Sablon on the Labrador coast to the Saguenay river, Lat. 48.5 Long. 69.37, occupies a front of 650 miles, of which we know little more than the appearance of the coast, as explored from time to time by fishers and hunters. A bold mountainous country, in general characterises the coast line; in some places the range recedes from the shores of the Gulf and river St. Lawrence to the extent of 12 or 15 miles, leaving a deep swampy flat or moss-bed nearly three feet in depth,—in other parts (as at Portneuf 40 miles E. of the Saguenay) the shores are of moderate elevation, composed of alternate cliffs of light coloured sand and tufts or clumps of evergreens.

The country between the two points just stated, is well watered by numerous rivers, among which may be mentioned the Grande and Petit Bergeronnes, the Portneuf, Missisiquinak, Betsiamites, Bustard, Manicougan, Ichimanipistic (or seven islands) St. John, St. Austins and Esquimaux. It can scarcely be said that we know any thing more of these rivers than their embouchures. There are no roads along the coast. and the only settlement of any consequence is at Portneuf, a trading mart belonging to the Hudson Bay Company, who possesses under lease from the crown until 1842, the exclusive right of bartering, hunting and fishing over this vast territory and even to the westward of the Saguenay. The tract is termed the King's domain and formed part of the "United farms of France," according to the Ordonnance of 1733.

The country around Lake St. John and the head waters of the Saguenay, has an extent of about 6,000,000 acres of (it is asserted) cultivable land, better watered than any known country. It is protected by a range of mountains to the N. E., and it is alleged has a milder climate than Quebec. The Saguenay is stated to be navigable for a ship of the line of the largest size, for a distance of 27 leagues, and the port of Tadoussac at the mouth of the Saguenay, is open two to three weeks earlier than Quebec.

I give this on the authority of Captain Yule, R. Engineers, who surveyed the country, and favoured me with his notes. Captain Yule speaks in high terms of the Saguenay as an eligible, social, and military station.

2. The second geographical division of the province N. of the river St. Lawrence, is that comprised within the mouths of the Saguenay and St. Maurice rivers, which form the great highways to the northern territories and ramify in various directions with numerous lesser streams and lakes. The distance between the Saguenay and St. Maurice is nearly 200 miles; Quebec City being nearly equidistant from each river. From Quebec to the Saguenay there is a bold and strongly defined range of mountains; from Cape Torment the ridge is unbroken (save where rivers find

their exits to the St. Lawrence) to 15 miles below the Saguenay. Beyond this coast border, the country is flat and undulating with chains of hills of moderate height, well watered by numerous lakes and rivers; among the latter are the St. Charles, the Montmorenci, the Great river or St. Ann's, the du Gouffre, Black river. &c.

The country N. W. of Quebec, between that city and the St. Maurice, is not so bold as it is to the S.E. towards the Saguenay; the land rises in a gentle ascent from the St. Lawrence banks, presenting an extremely picturesque prospect, with alternations of water, wood, and rich cultivation, bounded in the distance by remote and lofty mountains. The rivers Jacques Cartier, Portneuf, St. Ann's and Batiscan with their numerous tributaries, add fertility and beauty to the landscape.

3. The third territorial section N. of the St. Lawrence, embraces the country lying between the St. Maurice river and the junction of the Ottawa and St. Lawrence, where Upper and Lower Canada meet. The aspect of the country from five to fifteen miles from the river's bank is slightly elevated into table ridges, with occasional abrupt acclivities and small plains.

The islands of Montreal, Jesus and Perrot, situate in the river St. Lawrence, come within this section. Montreal (the principal) is a beautiful isle of a triangular shape, 32 miles long by 10 broad, lying at the confluence of the Ottawa and St. Lawrence, and separated on the N. W. from isle Jesus by the rivière des Prairies. Montreal exhibits a nearly level surface with the exception of a mountain, (Coteau St. Pierre) and one or two hills of a slight elevation, from which flow numerous streams and rivulets. The island is richly cultivated and tastefully adorned. Isle Jesus N. W. of Montreal, 21 miles long by six broad, is every where level, fertile, and admirably tilled; off its S.W. end is Isle Bizard, about four miles in length and nearly oval, well cleared and tenanted. Isle Perrot lies off the S. W. end of Montreal seven miles long by three broad; level, sandy and not well cleared; the small islets de la Paix are annexed to the seigniory of isle Perrot, and serve for pasturages.

4. Before proceeding to describe the physical aspect of the S. side of the St. Lawrence, it may be proper to observe that but little is known of the interior of the portion of the province bounded by the Ottawa or Grand River; so far as it has been explored it is not distinguished by the boldness which characterizes the E. section of Lower Canada; now and then small ridges and extensive plains are met with receding from the bed of the Ottawa whose margin is an alluvial flat, flooded often by the spring freshes and autumnal rains to the extent of a mile from the river's bed. Beyond the first ridge that skirts these flats the country is little known.

5. Let us now view the province of the S. of the St. Lawrence, beginning as before at the sea coast—on which the large county and district of Gaspé is situate. This peninsulated tract more properly belonging to the New Brunswick than to Lower Canada, lies between the parallel of 47.18 to 49.12 N. Lat. and 64.12 to 67.53 W. Long., bounded on the N. by the river St. Lawrence, on the E. by the Gulf of the same name, on the S. by the Bay of Chaleurs adjoining New Brunswick, and on the W. by the Lower Canada territory; having its greatest width from N. to S. about 90 miles, and with a sea coast extending 350 miles from Cape Chat round to the head of Ristigouche Bay. This large tract of territory has been as

yet but very superficially explored; so far as we know the face of the country is uneven, with a range of mountains skirting the St. Lawrence to the N., and another at no remote distance from the shores of Ristigouche river and Bay of Chaleurs; — between these ridges is an elevated and broken valley, occasionally intersected by deep ravines. The district is well wooded and watered by numerous rivers and lakes, the soil rich and yielding abundantly when tilled. The sea beach is low (with the exception of Cape Gaspé which has lofty perpendicular cliffs) and frequently used as the highway of the territory; behind, the land rises into high round hills well wooded. The chief rivers are the Ristigouche into which falls the Pscudy, Goummitz, Guadamgonichone, Mistoue and Matapediac; the grand and little Nouvelle, grand and little Cascapediac, Caplin, Bonaventure, East Nouvelle, and Port Daniel that discharge themselves into the Bay of Chaleurs;—grand and little Pabos, grand and little River, and Mal Bay river flowing into the Gulf of St. Lawrence:-the river St. John and N. E. and S. W. branches fall into Gaspé Bay: there are also many lakes.

6. The country comprized between the Western boundary of Gaspe and the E, of the Chaudiere river, has a front along the St. Lawrence river to the N. W. of 257 miles, and is bounded to the S. E. by the high lands dividing the British from the United States territories. These high lands are 62 miles from the St. Lawrence at their nearest point, but on approaching the Chaudiere river they diverge Southwardly. The physical aspect of this territory, embracing about 19,000 square miles (of which the United States claim about 10,000 square miles), is not so mountainous as the opposite bank of the St. Lawrence; it may more properly be characterized as a hilly region abounding in extensive valleys. The immediate border of the St. Lawrence is flat, soon however rising into irregular ridges, and attaining an elevated and extensive tableau: at the distance of 15 to 20 miles from the shores of the St. Lawrence, the tableau gently descends towards the river St. John, beyond which it again reascends, acquiring a greater degree of altitude towards the sources of the Allegash-finally merging in the Connecticut range of mountains.

7. The last section of Lower Canada S. of the St. Lawrence is that highly valuable tract W. of the river Chaudiere, fronting the St. Lawrence, and having in the rear the high lands of Connecticut and the parallel of the 45 degrees of N. Lat., which constitutes the S. and S. E. boundary of Lower Canada, where the latter is divided from the American States of New Hampshire, Vermont and New York. The superficial extent of this tract is 18,864 miles, containing 17 counties and a population numbering 200,000. The physical aspect varies throughout this extensive section; at the mouth of the Chaudiere the banks of the St. Lawrence still retain the characteristic boldness for which they are remarkable at Quebec and Point Levi, but proceeding Westward they gradually subside to a moderate elevation till they sink into the flats of Baie du Febre, and form the marshy shores of Lake St. Peter, whence the country becomes a richly luxuriant plain. Proceeding from Lake St. Peter towards Montreal, the boldness and grandeur of the country about Quebec may be contrasted with the picturesque champagne beauties of Richelieu, Vercheres, Chambly and La Prairie districts. In the former especially the eye of the spectator is delighted with a succession of rich and fruitful fields, luxuriant meadows, flourishing settlements, neat homesteads,

gay villages and even delightful villas adorning the banks of the Richelieu, the Yamaska and the St. Lawrence, whilst in the distance are seen the towering mountains of Rouville and Chambly, Rougemont, Mount Johnson and Boucherville, soaring majestically above the common level. As the country recedes from the St. Lawrence banks to the E. and S. E., it gradually swells into ridges, becomes progressively more hilly, and finally assumes a mountainous character towards lakes Memphramagog and St. Francis, beyond which the country continues to preserve more or less that boldness of aspect to the borders of the Chaudiere and the height of land at the Connecticut's sources. This is the section of the fine country known by the name of the Eastern Townships, in which the British American Land Company's possessions are situate.

It is probable that the range of hills traversing Bolton, Orford, &c., are a continuation of the Green mountains which form a conspicuous ridge running from S. to W. through the state of Vermont. Several bold and conspicuous mountains rise in an isolated manner from the valleys or plains of Yamaska and Chambly, adding a delightful interest to the scenery. This territory is abundantly watered by numerous rivers and lakes and rivulets winding in every direction. The chief rivers are the Chaudiere (forming the boundary to the Eastward) the Beçancour, Nicolet (two branches), St. Francis, Yamaska, Richelieu (or Chambly), Chateauguay and Salmon: all but the three last have their sources within the province. The chief lakes are the Memphramagog (part in Canada, part in the United States), Scaswaninipus, Tomefobi, St. Francis, Nicolet, Pitt, William, Trout, and many smaller ones.

QUEBEC, in Lat. 46.48. Ion. 70.72. is situated upon the N. E. extremity of a rocky ridge or promontory, called Cape Diamond (350 feet above the water's edge), which runs for seven or eight miles to the westward, connected with another cape called Cape Rouge, forming the lofty and left bank of the river St. Lawrence, which is but for a short space interrupted by a low and flat valley to the N. E. adjoining the level in which the river St. Charles now runs to the N. of the city. The site of the town on the N. of the promontory has apparently been chosen from its more gradual slope on this side than to the southward, which is precipitous. To the N. and W. of the city the ground slopes more gradually, and terminates in the St. Charles valley. The large river St. Lawrence flows to the southward of the city, washes the base of the steep promontory of Cape Diamond, and unites its waters with the small river St. Charles, flowing along the N. side of the city, the junction being in front of the town, where they expand into a consisiderable basin, forming the harbour of Quebec.

The city is nominally divided into two, called the Upper and Lower Towns; the latter being built at the base of the promontory, level with the high water, and where the rock has been removed to make room for the houses, which are generally constructed in the old style, of stone, two or three stories high, with narrow and ill-ventilated streets. From the Lower to the Upper Town there is a winding street (Mountain-street,) extremely steep, which is commanded by well planted cannon, and terminates at an elevation of 200 feet above the river, at the city walls; or by 'Break Neck Stairs,' where the Upper Town commences, extending its limits considerably to the westward, along the slope of the ridge and up the promontory towards the Cape within fifty or sixty yards of its summit.

The aspect is N., and well placed for ventilation, although the streets are narrow and irregular. There are suburbs to each town; in the upper, they extend along the slope of the ridge called St. John's; in the Lower, they extend along the valley from the St. Charles, called the Rocks. The influence of the tides, which extend several leagues beyond Quebec, raise the waters at the confluence of the two rivers many feet above their general level, and overflow the St. Charles valley, which rises gradually from the river to the northward, in a gentle slope for a few miles, until it reaches the mountains. This valley and slope is wholly under cultivation and extremely rich and picturesque. The ridge on which Quebec stands is also cultivated as far as Cape Rouge to the west-ward.

As a fortress, Quebec may be now ranked in the first class; the citadel on the highest point of Cape Diamond, together with a formidable combination of strongly constructed works extending over an area of forty acres: small batteries connected by ramparts are continued from the edge of the precipice to the gateway leading to the lower town, which is defended by cannon of a large calibre, and the approach to it up Mountain Street enfiladed and flanked by many large guns: a line of defence connects with the grand battery, a redoubt of great strength armed with 24 pounders, entirely commanding the basin and passage of the river. Other lines add to the impregnability of Quebec; the possession of which, (if properly defended) may be said to give the mastery of Upper as well as of Lower Canada. [For a complete description of the topography of the country, see Colonial Library, vol. i.]

MONTREAL, in 45.46. Lat. N., is situate upon the N. or left bank of the St. Lawrence (160 miles S. W. from Quebec), upon the Southernmost point of an island bearing the same name, and which is formed by the river St. Lawrence on the S., and a branch of the Ottawa or grand river on the N. The island is in length from E. to W. 30 miles, and from N. to S. eight miles: its surface is an almost uniform flat, with the exception of an isolated hill or mountain on its W. extremity, which rises from 500 to 800 feet higher than the river level. Along its foot, and particularly up its sides, are thickly interspersed corn fields, orchards and villas, above which to the very summit of the mountain, trees grow in luxuriant variety. The view from the top, though wanting in the sublime grandeur of Cape Diamond at Quebec, is romantically picturesque: on the S. the blue hills of Vermont, and around a vast extent of thickly inhabited, cultivated and fertile country embellished with woods, waters, churches, cottages and farms,—beneath the placid city of Montreal-its shipping and river craft, and the fortified island of St. Helena, altogether exhibiting a scene of softly luxuriant beauty. Within a mile to the N. W. of the town, the range of the mountain gradually declines for a few miles to the W. and N. to the level of the surrounding country. bank of the river upon which Montreal is built, has a gradual elevation of 20 to 30 feet, sloping again in the rear of the town, where there is a canal to carry off any accumulated water: the land then again undulates to the N. to a higher range. The streets are parallel with the river, and intersect each other at right angles; the houses are for the most part of a greyish stone, roofed with sheet iron or tin: many of them are handsome structures, and would be considered as such in London.

In the extent and importance of her trade-in the

signs of wealth, Montreal is far a-head of the metropolitan city of the province. Its population in 1825, was 22,357; and in 1831, 27,297; at present it is about 35,000, if not more. The whole island is com-

beauty of her public and private buildings—in the prized in one seigniory, and belongs to the Roman gay appearance of her shops, and in all the extrinsic Catholic clergy, who are consequently wealthy, but very liberal in exacting the lods et ventes due to them on the mutation of land,—they usually compound for these fines (see Section VII.).

IV. So far as we know, the geological structure of Canada exhibits a granite country, accompanied with calcareous rocks of a soft texture, and in horizontal strata. The prevailing rocks in the Alleghany mountains are granite in vast strata, but sometimes in boulders between the mountains and the shore: grevwacke and clayslate also occur with limestone occasionally; various other rocks, usually detached, present themselves. The lower islands of the St. Lawrence are mere inequalities of the vast granitic strata which occasionally protrude over the level of the river; the Kamouraska islands and the Penguins in particular exhibit this appearance, and in Kamouraska and St. Anne's parishes large masses of primitive granite rise in sharp conical hills (one is 500 feet high) with in some places smooth sides and scarcely a fissure, in other places full of fissures and clothed with pine trees which have taken root therein—the whole country appearing as if the St. Lawrence at one period entirely covered the land. At St. Roch the post road leads for more than a mile under a perpendicular ridge of granite 300 feet high. The banks of the St. Law. rence are in many places composed of a schistus substance in a decaying or mouldering condition, but still in every quarter granite is found in strata more or less inclined to the horizon, but never parallel to it. In the Gaspé district there have been obtained numerous and beautiful specimens of the quartz family, including a great variety of cornelians, agates, opals, and jaspers; coal indications have also been traced.

Among the mountains to the N. W. of the St. Lawrence have been obtained iron felspar, hornblende, native iron ore, granite, (white, grey and red) and a kind of stone very common in Canada, called Limestone Granite, it being limestone that calcinates to powder, yet by fracture apparently granite: marble is in abundance and plumbago of the finest quality. The iron mines of St. Maurice have long been celebrated, and the metal prepared (with wood) is considered equal if not superior to Swedish; there is no doubt that Canada is rich in copper, lead, tin, and other mineral productions.

The beautiful spar peculiar to Labrador, whence it derives its name, has long been celebrated; some specimens are of an ultra marine or brilliant sky-blue colour—others of a greenish yellow—of a red—and of a fine pearly grey tint. Marble of excellent quality and of varied hues (white, green, and variegated) is found in different parts of the country, and limestone, so useful to the agriculturist, almost everywhere abounds.

The quantity of good soil in Canada compared with the extent of country is equal to that of any part of the globe; and there yet remains locality for many millions of the human race. The best lands are those on which the hardest timber is found-such as oak, maple, beech, elm, black-walnut, &c. though bass-wood when of luxuriant growth, and pine when large, clean and tall, also indicates good land. Many of the cedar swamps, where the cedars are not stunted and mingled with ash of a large growth, contain a very rich soil and are calculated for the finest hemp grounds in the world. So great is the fertility of the soil in Canada, that 50 bushels of wheat per acre are frequently produced on a farm where the stumps of trees which probably occupy an eighth of the surface, have not been eradicated - some instances of 60 bushels per acre occur, and near York in Upper Canada, 100 bushels of wheat were obtained from a single acre! In some districts wheat has been raised successively on the same ground for 20 years without manun.

Along the Ottawa there is a great extent of alluvial soil, and many districts of fertile land are daily brought into view which were before unknown. [See Geology—" Colonial Library."]

V. In Lower Canada, the temperature of the season may be considered severe rather than mild: the winter divides the year,—commencing in November, and terminating in May. In Upper Canada the winter is shorter by two months.

Meteorological Register for Quebec.

Averaging	58 32 4	o	

 The minimum for January, February, and March, of course, indicates below zero.

The greater severity in the eastern or lower province is owing to its more N. E. position, and to the contiguous N. E. range of uncultivated mountains. In the N. E. the snow commences in November: but seldom continues many days on the ground before December, when the whole country is covered for several feet deep, which does not entirely disappear before the beginning of May. The frost during this period is generally intense, with N. W. winds and clear atmosphere during the greater part of the winter; but on a change of wind to the southward and eastward, the weather is overcast, the atmosphere becomes damp, sometimes accompanied with thick fog and snow-falls, with a considerable rise in the thermometer,-which usually ranges, during the months of December, January, February, and March, from 32 to 25 below zero, Fahrenheit.

Below Quebec the St. Lawrence is not frozen over, but the navigation is impeded by the large masses of ice which are floated down the river from the upper districts, and kept in motion by the combined action of the current at the narrows opposite Quebec, and the diurnal influence of the ocean tides.

During the month of April the influence of the sun on the ice and snow begins to be felt, and about the first week in May the snow has all disappeared in the neighbourhood of Quebec, (the spring is three weeks earlier at Montreal, distant on the St. Lawrence about 180 miles) and the ice which had been accumulating in the great lakes and rivers that pay tribute to the mighty stream, rushes down in vast masses and almost incredible quantities towards the ocean, which again dashes it inland with the impetuosity of the gulf tides, presenting an extraordinary and almost terrific scene: sometimes the St. Lawrence is choked up from bank to bank with masses of ice from 4 to 500 yards in diameter,-the sea-tide and land current forces these on one another, and breaks them into small pieces, forming fantastic groups of figures high above the surface of the river;—the effect of the wind and water on these masses may well be imagined. The navigation

of the river is not said to be completely open until 1813..51.41; 1814..60.45; 1815..65.87; 1816.. they have all disappeared, which is about the second 58.65; 1817..62.19; 1818..64.00. they have all disappeared, which is about the second week in May; vessels attempting to get out of, or to enter the St. Lawrence while the ice is forming or disappearing, are frequently lost by being embayed and crushed to pieces during a severe storm, when the running rigging, and even the rudder becomes immoveable.

The climate of Canada has undergone a change as shown by the mean height of the thermometer at 8 A. M. for the month of July, from 1799 to 1818 consecutively :-

1799..66.87; 1800..66.70; 1801..66.51; 1802.. 68.35; 1803..69.38; 1804..72.19; 1805..67.93; 1806..65.96; 1807..75.18; 1808..73.35; 1809... 60.60; 1810..59.16; 1811..65.32; 1812..62.16;

The warmest of the foregoing years in July was 1807, and the coldest 1813. Since 1818 the climate of Canada has undergone considerable change, partly owing to the motion of the Magnetic Poles and the clearing consequent on the cultivation of the country, the effect of which is mainly observable in the lengthened duration of summer and consequent shortening of winter. The state of the weather during the height of summer and winter at Cape Diamond, Quebec, (lat. 46.48 N., long. 71.17 W.) will be yet further seen by a Meteorological Register for January and July, taken in the year 1828, a year of rather remarkable high and low temperature.

* —These lines indicate the mercury being so many degrees below Zero.

During the summer months there is a great deal of i electric fluid in the atmosphere, and the vividness of the lightning and loudness of the thunder are sometimes appalling in the extreme. As a general rule it may be observed that the prevailing winds (viz. N.E., N. W. and S. W.) have considerable influence on the temperature of the atmosphere and state of the weather. The S. W. (the most prevalent) is generally moderate and accompanied by clear skies,-the N. E. and E bring continued rain in summer and snow in winter,—the N. W. is dry, cold and elastic, owing to the ice-bound region it springs from. Winds from due N., S. or W. are not frequent, and the direction of the tide (which is felt for nearly 60 miles above Que- | ments, has been as follows :-

bec) often causes a change in the atmospheric current.

[See "Colonial Library," vol. I.—2nd Edn.]
VI. Canada, as well as the other portions of the American continent, was comparatively densely peopled by a dark race, termed Indians, when first discovered by Europeans; and as colonization extended, the coloured population perished before the civilization of the whites.

The earliest European census of Lower Canada was in 1622, when Quebec, then a small village, did not contain more than 50 persons. A general capitation took place in 1676, since which the increase, according to Charlevoix, La Potheraye, and public docu-

The progress of population (dividing males from females), from 1822 to 1831 was, according to a Colonial Office Return, as follows:—

The rapid increase observable of late years is evidently ascribable to emigration from Europe:

Years	Males	Females	Total.	Births.	Marriages	Deaths.

General rate, from 1825 to 1836, of Lower Canada, 11 years	. 33 1	
Average increase from 1760 to 1784, of Lower Canada, per annum		2,000
Average increase from 1784 to 1825, of Lower Canada, per annum		8,219
Average increase from 1825 to 1831, of Lower Canada, per annum		10,319
Average increase from 1831 to 1836, of Lower Canada, per annum		17,816

In a general view, the French and French-descended population are estimated at 400,000; and the British and British-descended, at 200,000; the latter, however, are rapidly increasing by births and immigration.

The last complete census of the Colony was in 1831, but the births, marriages, and deaths of the districts of Quebec, Montreal, and Three Rivers, have been returned to the Colonial Office thus:—[See B. B. Lower Cadada, 1836.]

* Who have arrived by sea, since 1st May, 1825.
† Who have arrived by any other way than by sea, since 1st May, 1825.
; Who have arrived since 1st May, 1925.

VII. The prevailing, or most numerical creed in Lower Canada, is the Roman Catholic faith, the clergy of which are educated in Canada, and have no connexion with the Pope; they are not paid by government, but have for their support the 26th part of all the grain raised on the lands of Catholics. Hay and potatoes are exempted from the charge, and if the Catholic turn Protestant, or sell his lands to a Protestant, the estate is no longer subject to this moderate tythe. The church is governed by a Romish Bishop (a Canadian born and educated), who receives, in addition to the rent of some lands of little value, the sum of 1,000l. per annum from Great Britain, which is the only charge for the Catholic Church establishment. The income of the Curés, whose numbers are about 200, average 300l. per annum, by which they are enabled to live respectably, and even hospitably. In aid of the bishop or primate, there are two coadjutors or titular bishops, and four vicars general, and there are upwards of 200 vicaries, curés, &c. Several religious communities, exists, viz. the Hotel Dieu de Montreal, founded in 1664, and containing 37 religieuses professes; the Congregation de Noire Dame à Montreal (in 1650), with 81 professes; the Höpital general de Montreal (1753), with 29 professes; the Hotel Dieu de Quebec (founded in 1637, " pour les pauvres Malades"), with 34 religieuses professes; the Ursulines de Quebec, with 56 professes; the Hôpital general de Quebec (1693), with 50 pro-fesses; and the Ursulines des trois rivières (founded in 1677, "pour l'instruction et pour les pauvres Malades"), with 34 professes: all these establishments have novices and postulants.

The Church of England establishment consists of a bishop (of Quebec) and 40 clergymen; the Presbyterians of the Church of Scotland are about 14 in number, and there are 12 Wesleyan ministers.

The ecclesiastical charges, voted in the parliamentary estimates for the term from 1st April 1834, to 31st March 1835, are, bishop of Quebec's salary 3000l.; archdeacon ditto, 500l.; rector ditto 400l., and house-rent, 90l.; minister of Trinity Chapel, Quebec, 200l; Montreal rector, 300l.; Three Rivers, ditto, 200l.; William Henry ditto, 150l.; Durham ditto, 100l.; Chatham ditto, 100l.; Evening lectures at Quebec, 100l.; Verger of ditto, 150l.; Quebec Presbyterian minister, 50l.; Montreal ditto, 50l; Argenteuil ditto, 100l.; Roman Catholic bishops of Quebec, 1000l. In addition to the foregoing, there is a charge of 4,000l. to the Society for the Propagation of the Gospel in all our North American provinces, making a total of 10,690l.

The number of churches in Lower Canada is about thirty. One-seventh of the whole of the lands in the townships, is set apart as a provision for the Protestant Church.

VIII. A Committee of the Canadian House of Assembly, thus reports on the subject of education in 1832:—

"In 1830, there were 981 schools; in 1831, 1216; teachers in 1830, 947; in 1831, 1305; scholars in 1830, 41,791; in 1831, 45,203. [In 1829, the total number of children reported as receiving elementary education, was only 18,410, of which 3,675 were under the Royal Institution.]

The number of scholars taught gratuitously, has increased from 21,622, to 23,805. Those who pay, from 16,591 to 18,016.

The whole amount of expenses for elementary schools, paid out of the public chest, in 1830, was

about 20,000l; in 1831, it will be about 26,000l., giving an average for each scholar in 1830, of 10s.4d.; in 1831, of 11s.2d.

The proportion which the number of children, receiving instruction, bears to the whole population, is about one in twelve throughout the province, instead of one in four, the proportion in the adjoining state of New York. The counties of Montmorency, Stanstead, Sherbrooke, and Lotbinière, are the only counties out of forty-one where nearly all the children, of a fit age to attend school, are receiving a school education. In some counties only one child in twelve, and one in ten, are at school. The average throughout the province, of the children at school is one out of three.

Your Committee has observed with satisfaction, that, out of the whole number of schools, viz.:—1216, 142 (chiefly in the towns of Montreal, Quebec, Three Rivers, and Laprairie), have 6,281 scholars, who pay for their education, or receive it in convents, or at a low rate in institutions which derive no support from the public money. In Quebec there are no less than 2,525 scholars at elementary schools, and whose parents pay for their education and entirely support forty-one schools, at a rate of payment from 1s. to 2s. 6d. per month."

The money paid towards public schools by the House of Assembly was, in 1829, 6,439l.; 1830, 18,08l.; 1831, 17,317l.; 1832, 23,324l.; making in four years 65,168l. sterling, or 72,409l. currency, distributed through upwards of 2,000 schools annually.

The lands granted to the Jesuits by the old French government, and which fell into the Crown on the demise of the last of the Jesuits, in 1800, have been granted by the government for purposes of education.

Return of the Institutions for the Instruction of Youth in Lower Canada. [Canadian Commissioners Report, 1836.]—PROTESTANT. 1. Royal Grammar School, Quebec; 200l. a year, and 90l. a year school-house rent, from Jesuits' estates. Twenty free scholars, 11 pay for their tuition; all day-scholars. Terms, under 12, 8l., above 12 and under 13, 10l. per an., above 13, 12l. per. an. French and English taught; course of instruction as in the grammar schools in the United Kingdom.

2. Royal Grammar School, Montreal; 2001 a year, and 541. a year school-house rent, from Jesuits' estates. Twenty free scholars admitted, 15 scholars pay for their education; all day scholars. Terms, highest 101., lowest 81. per an.; instruction as in grammar-school at Quebec; and this school is in possession of an extensive apparatus for experiments in natural philosophy.

3. Seminary at Chambly; contributions of students; a private institution lately established under the patronage of the Lord Bishop of Quebec. Board and tuition according to age of student, 40L, 50L and 75L per an.; day-scholars, 15L and 20L per an. There are 17 boarders and 9 day-sholars. Those who pay 75L per an. are young men studying for holy orders, and others finishing their education.

CATHOLIC.—1. Seminary of Quebec; no revenues specifically appropriated to the purposes of education, but possessed of several estates. Value, made many years ago, computed at 1,249l. a year, besides large contributions in grain, and the lods et ventes on mutations of property, which amount to a considerable sum. Attended by 188 students; the terms for tuition and board, 17l. 10s. per an.; for tuition only, 1l. per an. Poor children instructed gratis. The seminary

of Quebec was erected by letters patent of the French | authorized to establish a seminary at Montreal, and Crown, dated in April 1663.

2. Seminary at Montreal; in possession of estates valued many years ago at about 2,000l. a year, besides large contributions in grain, and lods et ventes on mutations of property, which in the seigniory of Montreal, comprehending the whole of the town, must amount to a large sum. Attended by 260 students; terms for board and tuition per an. 211., for tuition only, 18. 15s. Instruction as at the seminary of Que-The ecclesiastics of St. Sulpice, at Paris, were

allowed to hold the Island of Montreal in Mortmain, by letters patent of the French Crown, dated in May 1677.

- 3. Seminary at Nicolet; supported principally by private contributions. The number of students, or the price paid for tuition, not known.
- 4. Seminary at St. Hyacinthe; as No. 3.5. Seminary at Chambly; as No. 3.
- 6. College of St. Ann; as No. 3.

Numbers 4, 5 and 6, receive Legislative Grants.

General Statement of Education in the Province of Lower Canada, made from the Returns transmitted to the House of
Assembly by the Visitors named in virtue of the Act 1st William IV, chapter 7.

The following abstract of the New School Act may be considered useful for imitation in our other colonies, or even in the mother country:

"For one elementary school in a central situation in each district, the present act grants 201, per annum; and for one separate school for girls in every school district in the Roman Catholic parishes or missions, where there is a church or chapel, at the rate of 201, per annum, provided that such girl's schools be open for tuition to all the female

children of the parish or mission at the same rate as other schools. An additional los for each school district allowed to the school visitors, for prizes so distributed among the scholar sof the girl's school in the Catholic parishes. The superiors and professors of colleges and academies, and the superiors and professors of colleges and acamenes, and the presidents of education societies now existing, may act as visitors of schools. Any three school visitors may extend the age (above 15 years) at which pupils may be admitted and made part of the number required by law to give a right to such allowance, according to the population of the county, parish, or township, on making an entry thereof in the minute book of the school, and they may also alter the school hours, under peculiar circumstances, on making a like entry. Returns of schools hereafter to be made up on the 15th May and 15th November, and payments made at those times. If the visitors find a school kept boas fide from second Monday in August in any district, which would have been entitled to an allowance, if the meeting of the inhabitants had taken place, and trustees elected according to law, they are authorised to grant the allowance for the time in which it has been kept by an entry in the school minute book. If the visitors find a school bona fide held in any school district (but not the regularly established district school) for more than thirty-five regular pupils, they may certify the same by an entry in the school minute book of the district, and include the master in their return, who shall become entitled to the allowance, provided that

the number of schools recommended in the returns doe not exceed the number fixed for such county by this act. The visitors are authorised to augment the number of pool children whom the trustees may place in each school from ten to fifteen by an entry in the minute book, provided that twenty regularly attending and paying papils are st such school. The visitors may also dispense with the condition which requires that no poor child can be admitted gratis, unless there is one of the same family attending the school and paid for. If the visitor find in any school a teacher qualified to teach, and actually teaching both French and English, on making an entry thereof in the minute book, such teacher shall be entitled to 44. per annum, in addition to the 204. already granted. Copies of this act to be sent to the members for the county, for each school district, and a sufficient number of the returns required by the law."

Number of Elementary Schools in each County, number of Scholars taught, amount paid for the support of such Schools, and other particulars relating to the Province of Lower Canada, to 15th November, 1835. [B. B. No return for 1836.]

	Ditto No. 1.	12	11	23	20	are maner statistics of careamont

Some alterations have been recently made for the purpose of more equally distributing the elementary schools over the Province. The number of school districts, in 1833, was—

Bonaventure, 22; Gaspé, 14; Rimouski, 35; Kassouruska, 34; L'Islet, 25; Bellechasse, 49; Dorchester, 37; Beauce, 67; Megantic, 17; Lotbiniere, 41; Nicolet, 41; Yamaska, 27; Drummond, 10; Sherbrooke, 51; Stanstead, 62; Missiskoui, 48; Shefford, 25; Richelieu, 29; St. Hyacinthe, 31; Rouville, 47; Vercheres, 17; Chambly, 35; Laprairie, 34; L'Acadie, 30; Beauharnois, 59; Vaudreuil, 24; Ottawa, 19; Two Mountains, 49; Terrebonne, 23; Lachesnaye, 21; L'Assomption, 36; Montreal, 18; Berthier, 48; St. Maurice, 36; Champlain, 27; Portneuf, 45; Quebec, 23; Montmorency, 19; Saguenay, 19; Orleans, 10. Total, 1,295 school districts.

There are French colleges also at Quebec, Chambly, Nicolet, and St. Hyacinthe; and there are many high class public and private schools.

In several of the colleges there are professorships

Some alterations have been recently made for the of divinity, medicine, anatomy, philosophy, mathemators of more equally distributing the elementary tics, &c., and the chairs are all ably filled.

The fine arts are making no inconsiderable progress. The Museum of Natural History, of Montreal, is increasing rapidly; and the Literary and Historical Society, of Quebec, is rising into notice; hopes are entertained that, when the existence of these institutions are more generally known in England, books, tracts, and manuscripts, &c., will be sent from the mother country. There are several public libraries: one in Quebec contains upwards of 6,000 volumes of standard and valuable works, and the Montreal public library is fast overtaking its elder brother of Quebec; and there are the mechanic's institutions, school societies, and agricultural associations, &c.

Intimately connected with education is the state of crime. The following is the latest return at the Colonial Office. By comparing the returns with those of Upper Canada, or an equal amount of population in another colony, the state of crime and morals may

in some degree be estimated.

pound and a half of the best brown bread per day, with one quart of gruel, or two pounds of potatoes. The weekly cost per head for each prisoner is about 2s. 21d. The sick receive whatever may be ordered by the physician. Destitute prisoners are provided with such clothes as are absolutely necessary, on an approved estimate. The bedding consists of a straw palliasse, one sheet, two blankets, and a rug. The prisons are under the superintendence of the sheriff.

Number of Officers, and how appointed .- A gaoler, a superintendant of works, and a matron appointed by the sheriff, and two turnkeys appointed by the goaler. The employment of the prisoners consists in picking oakum, teazing hair, sawing and splitting firewood, &c. The females sew, wash, knit, spin, card, weave, &c. The hours of labour are from seven to twelve and from one to six. Prisoners not for hard labour are allowed the use of the airing-yard until four, P.M., in summer. The amount of earnings are credited to Government, and go towards the maintenance of the establishment.

The building is in a very dilapidated state, and has been reported to be very insecure by each successive grand jury which has visited it during the last 10

years. [B. B. for 1836.]

X. The constitution of the Lower Province, until the late insurrection suspended it, may be thus summarily stated. The authority of the sovereign of Canada, limited by the laws of Great Britain and by the capitulations of the Province. The supreme legislative authority in His Majesty and the two houses of the Imperial Parliament; this authority again limited by the capitulations and its own acts; the most remarkable of which, the Act 18 George III. cap. 12, confirmed by 31st George III. cap. 13. declares that no taxes shall be imposed on the colonies but for the regulation of trade, and that the proceeds of such taxes shall be applied to and for the use of the Province, in such manner as shall be directed by any law or laws which may be made by His Majesty, his heirs or successors, by and with the advice and consent of

the Legislative Council and Assembly of the Province. The Provincial Legislature consists of His Majesty, acting by the Governor of the Province for His Majesty, of a Legislative Council of 34 members, the Chief Justice and Protestant Bishop, appointed by His Majesty for life; of a House of Assembly, of 88 members, elected for four years by His Majesty's subjects resident within the Province, and possessed, for their own use and benefit, in the counties, of real property to the yearly value of 40s. sterling; in the towns of the yearly value of 51. sterling, or paying rent to the amount of 10l. sterling. No religious disabilities exist as to electors, but clergymen or Jews are not eligible as representatives. The Assembly is empowered to make laws for "the peace, welfare and good of the government" of the Province, such laws not being repugnant to the Act of 31 George III. c. 31, elections by open voting. Members of the House of Assembly allowed, by grant of the Legislature, an indemnity of 10s. currency per diem, and 4s. per league from their places of residence to the town or capital where the sittings of the Legislature are held, which is Quebec. Session of the Parliament of Lower Canada generally lasts three months, seldom more than four, and is held during the winter. Salary of the Speaker of the House of Assembly 9001. voted annually by the Provincial Legislature.

The constituency of Lower Canada is very widely diffused—among the half million of people there are

Diet of the Prisoners in the Gaol of Quebec .- One | at least 80,000 electors, of whom nine-tenths are proprietors of the soil; several counties have from 4 to 5,000 electors, all of whom are landed proprietors. The total number of proprietors of real property in 1831, was 57,891; and of persons holding property not otherwise than real, 25,208. Of families employed in agriculture, 50,824; and of families engaged in commerce, only 2,503. The number of farm servants employed was 7,602, which shows what a large proportion of the agriculturists are small farmers. The number of persons subsisting on alms, in a total population of upwards of half a million, was only 1,282; and which, I suppose, included a large proportion of 408 deaf and dumb, 334 blind, and 924 insane persons.

The Governor, in his Majesty's name, assembles, prorogues, and dissolves the two houses, which must be called together once in every twelve calendar months. All questions arising in either of the two houses, are decided by the majority of the members present by open voting. The Governor gives, withholds, or reserves for the further signification of His Majesty's pleasure, the royal sanction to bills proposed by the two other branches. Laws assented to by the Governor, may be disallowed by His Majesty within two years. His Majesty cannot assent to any act or acts affecting the enjoyment of the dues of the clergy of the Church of Rome, or affecting the establishment of the Church of England within the Province, or the provisions made for the same, or the enjoyment or exercise of any religious form or mode of worship, or creating penalties, burthens, disabili. ties, or disqualifications on that account, or granting, or imposing any new dues in favour of any ministers of any former form of worship, or affecting the prerogative, touching the granting of the waste lands of the Crown; without such acts having been 30 days before both houses of the British Parliament, and neither of the houses having addressed His Majesty not to sanction the same.

When Canada was in possession of the French, the government was nearly pure despotism.

Shortly after the cession of the province of Lower Canada to the British Crown, the King of England, in a proclamation dated the 7th of October, 1763, declared, that "all the inhabitants of the province, and all others resorting to it, might confide in his royal protection for enjoying the benefit of the laws of England." In 1774, the first Act of Parliament was passed, fixing the boundaries of Canada, making provision for the better government of this part of the British dominions, and vesting the authority in a governor, aided by a council of not less than 17 persons, and not exceeding 23 in number, who had power to frame ordinances, but not to levy taxes, except for making of public roads and erecting a few local struc-By this Act the English criminal law was preserved; but it was enacted, "that in all matters of controversy relative to property and civil rights resort should be had to the rule and decision of the laws of Canada," excepting, however, in this concession to French law: "lands which had been or should be granted in free and common soccage." The Roman Catholic religion, with all its immunities and rights. was secured to the Canadians.

After 17 years' interval, this Act was followed by Mr. Pitt's, or rather Lord Grenville's Act, styled the Constitution of 1791, under the provisions of which Canada was divided into upper and lower provinces. This Act gave to Lower Canada a Constitution, consisting of a Governor and Executive Council of 11

Privy Council in England); a Legislative Council, appointed by mandamus from the King, forming the second estate, and then consisting of 15 members (but since increased to 34, including the Protestant Bishop of Quebec and the Chief Justice, who is Speaker); and a Representative Assembly, or third estate, composed of 50 members, and consisting of four citizens from each of the cities of Quebec and Montreal; three burgesses (being two for the town of Three Rivers, and one for William Henry, so called in honour of the visit of his late Majesty), and the remaining number divided over the province as knights of the shire, representing 22 counties, into which Lower Canada was divided. Population was partly made the basis for regulating the division: thus a small and thickly-populated territory on the banks of

members, appointed by the Crown (similar to the the St. Lawrence was found sufficient to form a county; and in the more distant parts large areas were included in one county, in order to combine the requisite amount of population necessary to a representative election.

> The unequal manner in which this division of counties, with regard to population, and not to area, was felt after a few years, and a new county division proposed and adopted by the Provincial Act ix., Geo. IV.; but in order to understand the change which took place in the extension of the representation, it will be requisite to show the division as it stood according to the Act of 1791. This I can best do by the following return of the census of Lower Canada in 1827 and 1831, with the number of Members returned to the Assembly.

The laws in force in Lower Canada are: 1st. The | executed in His Majesty's name, and, in virtue of his acts of the British Parliament which extend to the Colonies: 2nd. Capitulations and treaties: 3rd. The laws and customs of Canada, founded principally on the jurisprudence of the Parliament of Paris, as it stood in 1663, the edicts of the French kings, and their colonial authorities, and the Roman civil law: 4th. The criminal law of England as it stood in 1774, and as explained by subsequent statutes: 5th. The ordinances of the Governor and Council, established by the act of that year: and 6th. The acts of the Provincial Legislature since 1792. These laws are

commission and instructions, by the Governor, or person administering the government, by the means of a number of inferior officers, all of whom are appointed during pleasure. The Governor also possesses all other powers and prerogatives, generally, which, His Majesty may legally enjoy, and delegates to him. The Governor of Lower Canada is Governor General of all the British Colonies in North America, and Commander-in-Chief of all the forces in those Provinces. The *judiciary* consists of a High Court of Appeal, a Court of King's Bench, presided over by a Chief Justice of the Province, and three Puisné Justices for the district of Quebec; another Court of King's Bench for Montreal, with a Chief Justice and three Puisné Justices; there are also three Provincial Courts, with a Judge for Three Rivers, and terms of the Court of King's Bench, including the Provincial Judge for trials of causes above 101., one for Gaspé and one for the district of St. Francis.

There is also a court of Vice Admiralty, Quarter Sessions, and other minor tribunals for civil matters. With respect to the highest legal tribunal in the Province, the Court of Appeal, it consists of the Governor, (ex-officio President), the Lieutenant-Governor, Chief Justice of the Province, the Chief Justice of Montreal, and the Members of the Executive Council, five of whom, including the President, are a competent quorum to hear and determine appeals from judgments pronounced in the courts of King's Bench in civil matters. Should the suit in dispute exceed 500l. in value, an appeal lies before the King and Privy Council; if below that sum, the Canadian High Court of Appeal decision is final.

The Canadian Court of King's Bench combines a jurisdiction similar to the King's Bench and Common Pleas at Westminster; it has distinct civil and criminal terms, and an appellate as well as an original jurisdiction; appeals lying, in certain cases, from the decisions of the provincial judges, or inferior courts, over each of which a Puisné Judge presides; whose jurisdiction, in the district of Three Rivers, is limited to 104. sterling (with the exception before explained); in St. Francis, to 201.—but in Gaspé, by reason of its distance from the superior tribunals, it is extended to 1004.

The duties of the Vice Admiralty Court devolve, by commission, on a Judge Surrogate, who is also a Judge of the court of King's Bench; this union is rightly considered objectionable, as the Court of King's Bench possesses a controlling power over the Admiralty Court; and, owing to the increasing commerce of Quebec, it is necessary that the Vice Admiralty Judge should be unconnected with any other office.

The Court of Escheats was created by the 10th sec. 6 George II. ch. 59—Imperial Parliament; it consists of Commissioners appointed by the Governor to inquire, on information being filed by the Attorney-General, into the liability of lands to be escheated by reason of the non-performance of the conditions on which they were granted. The decision is by a verdict of a jury composed of 12 men, summoned in the usual way, and the lands forfeited become revested in the Crown.

The other courts, being similarly constituted to those of the same name in England, require no explanation. The police of the country is administered by unpaid justices of the peace, of whom there are 110 in the Quebec district; 215 in the Montreal ditto; 44 in Three Rivers, 23 in Gaspé, and 19 in St. Francis, exclusive of the members of the executive and legislative councils, the judges, &c., who are ex-officio everywhere justices of the peace. Trial by jury is universal in all criminal cases; but in civil matters, the appeal to trial by jury is confined by statute to certain cases, viz., the demand must exceed 101. sterling, the parties, merchants, or traders, and the subject matter grounded on debts, promises, contracts, and agreements, of a mercantile nature only; or else the cause of the action must arise from personal wrongs, to be compensated in damages; in all other cases the Bench are judges both upon the law and the fact,—a very small proportion of these cases are tried by jury. Law proceedings are in French and English, and it is not unusual to have half the jury English and the other half French. There are about 200 lawyers on the rolls of the Courts of King's Bench, who are solicitors and proctors as well as barristers. The notaries, who are the conveyancers in the country, now form a distinct class, and are upwards of 300 in number. In the Quebec district there are 45 advocates, or barristers, 43 advocates, or solicitors, and 128 notaries. In Montreal district, 26 avocats, 60 advocates, and 164 notaries; and Three Rivers, St. Francis, and Gaspé, 72; making a total of 538 lawvers.

Of the laws it may be said that the *criminal* is English, with some provincial statutes not repugnant thereto; the *admiralty* is wholly English; the *commercial* laws of evidence are English. Quebec and Montreal are corporate cities, having each a mayor and common council.

Intimately connected with the laws of the country are the tenures by which land is held; all lands granted since the conquest are in free and common soccage; in the French districts, lands are held according to the old Norman law.

French Landed Tenures .- It may be necessary to advert to the peculiar state of the landed tenures in Lower Canada. When the country was first settled by the French, the feudal tenure was in full vigour on the continent of Europe, and naturally transplanted by the colonizers to the New World. The King of France, as feudal lord, granted to nobles and respectable famlies, or to officers of the army, large tracts of land, termed seigniories, the proprietorsof which are termed seigniors; these possessions are held immediately from the King, en fief, or en roture, on condition of the proprietor rendering fealty and homage, on accession to the seignorial property; and in the event of a transfer, by sale, or gift, or otherwise, (except in hereditary succession), the seigniory was subject to the payment of a quint, or fifth part of the whole purchase money; and which, if paid by the purchaser immediately, entitled him to the rabat or a reduction of two-thirds of the quint. This custom still prevails; the Kings of Great Britain having succeeded to the claims of the King of France.

Estimating the number of acres of land under cultivation in Lower Canada at 4,000,000, and the seignorial grants of good and bad land, at 10,000,000 acres, it will be perceived that a large portion of territory is embraced under the seigniories. On this account it will be necessary to give some explanation of the different terms used in relation to this property.

Quints are a fifth part of the purchase-money of an estate held en fief, which must be paid by the purchaser to the feudal lord, that is, the King. If the feudal lord believes the fief to be sold under value, he can take the estate to himself, by paying the purchaser the price he gave for it, together with all reasonable expenses. Reliefe is the rent or revenue of one year for mutation fine, when an estate is inherited only by collateral descent. Lods et ventes are fines of alienation of one twelfth part of the purchasemoney, paid to the seigneur by the purchaser, on the transfer of property in the same manner as quints are paid to the king on the mutation of fief; and are held en roture, which is an estate to which heirs succeed equally. Franc alue noble is a fief, or freehold estate, held subject to no seignorial rights or duties, and acknowledging no lord but the king. The succes-

sion to fiefs is different from that of property held en roture or by villenage. The eldest son, by right, takes the château, and the yard adjoining it; also an arpent of the garden joining the manor-house, and the mills, ovens, or presses within the seigniory belong to him; but the profit arising from these is to be divided among the other heirs. Females have no precedence of right, and when there are only daughters, the flef is equally divided among them. there are only two sons, the eldest takes two-thirds of the lands, besides the chateau, mill, &c., and the younger one-third. When there are several sons, the elder claims half the lands, and the rest have the other half divided among them. Censive is an estate held in the feudal manner subject to the seigniorial fines or dues. All the Canadian habitans, small farmers, are censitaires. Property, according to the laws of Canada, is either propre, that is, held by descent, or acquits, which expresses, being acquired by industry or other means. Communité du bien is partnership in property by marriage; for the wife, by this law, becomes an equal partner in whatever the husband possessed before, and acquires after marriage, and the husband is placed in the same position in respect to the wife's dowry. This law might operate as well as most general laws do, if both mari and femme died on the same day; but very unhappy consequences have arisen when one has predeceased the other. For instance, when the wife dies before the husband, the children may claim half of the father's property, as heirs to the mother; and the mother's relations have often persuaded, and sometimes compelled them so to do. [It has been justly observed, that it would have been almost impossible to have formed a law more fruitful of family discord, or more destructive of that affection which ought to subsist between parents and children. So fully sensible, in fact, are the most simple habitans of the unhappy operation of this law, that scarcely any of them marry without an ante-nuptial contract, which bars the communité du bien.]

The dot, or dowry, is the property which the wife puts into the communité du bien: moveable or immoveable property, falling to her by descent, is a propre, and does not merge in the communité. Dower in Canada, is either customary or stipulate. The first consists of half the property which the husband was possessed of at the time of marriage, and half of all the property which he may inherit or acquire—of this the wife has the use for life, and the children may claim it at her death. If they be not of age, the wife's relations, as guardians of the children, can take it out of the father's hands, and may compel him to sell his property and make a division. Stipulated dower is a portion which the husband gives instead of the customary dower.

Those farmers who hold land from the seignieur en roture, and who may be termed tenanciers or censitaires, are subject to certain conditions, viz. a small annual rent, from 2s. 6d. to 5s. (or perhaps more of late years) for each arpent in front; [The Canadian farms are remarkable for the small breadth of the farm on the bank of the river, and its great depth inland; the latter being often in proportion to the former as sixty to one; namely, half an arpent broad in front of the St. Lawrence, or other river, and 30 arpents in depth.] to this are added some articles of provision annually, such as a pig or goose, or a few fowls, or a bushel of wheat, according to the means of the farmer, who is also bound to grind his corn at the moulin banal, or the seignieur's mill, when one-fourteenth is taken for the lord's use, as mouture or

payment for grinding. The lods et ventes form another part of the seignieur's revenue: it consists of a right to one twelfth part of the purchase-money of every estate within his seigniory, that changes its owner by sale, or other means equivalent to sale: this twelfth to be paid by the purchaser, and is exclusive of the sum agreed on between the latter and the seller, and if promptly paid, a reduction of one-fourth is usually made, in the same manner as two-thirds of the quints due to the Crown are deducted on prompt payment. On such an occasion, a privilege remains with the seignieur, but is seldom exercised, called the droit de retrait, which confers the right of preemption at the highest price offered, within 40 days after the sale has taken place.

All the fisheries within the seigniories contribute also to the lord's income, as he receives a share of the fish caught, or an equivalent in money; the seignieur is also privileged to fell timber any where within his seigniory, for the purpose of erecting mills, constructing new or repairing old roads, or for other works of public and general utility. In addition to the foregoing burdens on the farmer, he is, if a Roman Catholic, bound to pay to his curate one twenty-sixth part of all grain produced, and to have occasional assessments levied on him for building and repairing churches, parsonage houses, &c.

The duties of the seignieur to his tenants are also strictly defined,—he is bound in some instances to open roads to the remote parts of his fief, and to provide mills for the grinding of the feudal tenants' corn; he cannot dispose by sale of forest lands, but is bound to concede them; and upon his refusal to do so, the applicant may obtain from the Crown the concession he requires, under the usual seignorial stipulations, in which case the rents and dues appertain to the King.

The Position and Extent of the Seignorial Grants, are :-

Lower Canada is in the possession of an extensive militia. In 1807, the militia men bearing arms, consisted of 50,000 able-bodied soldiers, with a due proportion of officers; and belonging to themselves, (i. e. independent of the arms furnished by government) 10,000 muskets. From this period to 1815, their numbers were little increased; but from a report of a special committee of the Assembly appointed to enquire into the state of the militia, which report, printed at Quebec, is now before me, I find the state of the militia to be, in 1827, as follows:—

St. Francis	5	76	5146	-
Gaspé	3	26	2147	-
Total	92	1067	93210	8892

By the Militia Act, every able-abodied male inhabitant, from 18 to 60 years of age, after six months' residence, is liable to serve as a militia man, unless specially exempted by law; the exemptions embrace the clergy, civil and military officers of Her Majesty's Government, physicians, surgeous, notaries, landsurveyors, ferrymen, millers, schoolmasters, stewards of religious communities, and students in seminaries, colleges, &c., and persons who had served as officers of militia previous to the act. Officers are appointed by the government, the qualification for those above the rank of captain being a bond fide possession of an estate yielding 50l. currency per annum; half the sum qualifies for a captain or subaltern's commission. There is an annual muster by companies (29th June) throughout the province. The light cavalry, artillery, and rifle corps, would do honour to any body of men under arms in Europe; and there is an esprit du corps throughout the service highly honourable to all engaged in a force which, with readiness, could turn out nearly 100,000 armed men to repel invasion, if the Americans should ever again feel disposed to attempt the conquest of Canada. A new militia levy took place during the recent insurrection; i. e. by calling into active service those only who were disposed to suppress rebellion.

The Queen's troops, in Lower Canada, generally amount to three regiments of infantry, two companies of foot artillery, and two companies of the royal engineers; the head-quarters of two regiments are Quebec, and one at Montreal. The troops of the line stationed in Canada since 1816 (including artillery and engineers), taken at four intervals, in order to shew the average number, were as follows:

Years.	Colonels.	Lt.Colonels.	Majors.	Captains,	Lieutenants.	Ensigns.	Paymasters.	Adjutants.	QrMasters.	Surgeons.	Assist. Surgeon	Serjeants,	Drummers.	Rank and File.

1827	1	7	6	44	50		5	5	5	5	6	171	59	2855
1833	1	6	5	35	46	13	5	5	5	5	7	159	57	2551

The fortifications of Quebec are now impregnable; the island of St. Helen's, near Montreal, is also strongly defended, and there are some posts near the American frontier on Lake Champlain. Quebec, however, is the key to Lower and also to Upper Canada. The Governor of Quebec garrison is a major-general, and the Lieutenant-governor a lieutenant-general.

The head-quarters of the Commissariat, and other | very extensive, and in excellent order; and the sevemilitary departments, for Upper and Lower Canada, are in the Lower Province. The naval station of North American colonies is Halifax, Nova Scotia. The naval station of our

The barracks at Quebec (formerly the Jesuit's College,) which the troops at present occupy, are situate nearly in the centre of the Upper Town, forming the west side of the Market-square, of a quadrangular figure, built of stone, three stories high, with a considerable open space in the centre, and capable of containing 1,500 men. The armoury at Quebec is

ral departments of the army, medical, commissariat, &c. are well attended to.

XI. When conquered, the income of Lower Canada was very trifling; in 1807, it amounted to about 30,000l.; in 1821-22, to about 60,000l.; in 1825, to about 90,000l.; and for the 10 years ending with 1836, the Blue Books at the Colonial Office, afford the following return, as accurately as can be collected from annual returns often varying.

1884	5854	6517		5120		17492
1835	4407	17396*	••••	5200		27004

 In this sum is included a payment of 6000l. by the British American Land Company, being their first annual instalment applicable to the general expenses of the government.

† The duties under the Act 14 George III. c. 88, were surrendered to the control of the legislature, by the Act 1 & 2 William IV. c. 23, under the promise of a

Civil List being fixed by the Assembly: but this promise was never fulfilled.

In addition to the above revenues, the sum of 5000% sterling per annum is permanently appropriated to the expenses of the administration of justice, under the Provincial Act 53 George III. c. 9.

The local revenues of the city of Quebec, for 1836, were 44771., derived from tolls, licenses and fines; ditto of Montreal, 5,3491. derived from tolls.

The following articles pay a duty of 71.10s. per cent. ad valorem :- Alabaster, anchovies, argol, anniseed, amber, almonds, brimstone, botargo, currants, capers, cascacoo, corks, cinnibar, dates, essence of bergamot, lemon, citron, roses, oranges, lavender, rosemary, emery stone; fruits preserved in sugar or brandy, figs, honey; iron in bars, unwrought and pig iron, juniper berries, incense of frankincense, lava and malta stone for building, marble rough and worked, mosaic work, medals, musk, maccaroni, nuts of all kinds, oil of olives, oil of almonds, orris root, ostrich feathers, ochres, orange buds and peel, olives, pitch, pickles in jars and bottles, painting, pozzolana, Parmesan cheese, pumice stone, punk, prints, pearls, precious stones (except diamonds), quicksilver, raisins, sausages, sponges, tar, turpentine, vermillion, vermicelli, whetstones.

Ditto 30 per cent. Clocks and watches, leather manufactures, linen, musical instruments, wires of all sorts, books and papers, silk manufactures.

Ditto 20 per cent. Glass manufactures, soap, refined sugar, sugar candy, tobacco manufactured, cotton manufactures.

Ditto 15 per cent. Goods, wares, or merchandize (being foreign), not otherwise charged with duty by 3 and 4 William IV. c. 59.

The other duties paid at Quebec on British produce may be thus summarily stated:—Sugar, 14d. per lb.; ditto refined, 1d.; tea, per lb.—Hyson, 6d.; Bohea, 2d.; all other sorts, 4d.; coffee, per lb., 2d.; wine, rum, brandy, or geneva, per gallon, 6d.; whiskey, 3d.; tobacco manufactured, per lb., 3d.; snuff, 4d.; pimento, 1 d.; cocoa, per cwt., 5s.; salt, per pk. 2d.; and upon all other goods, wares, or merchandize (not included under the free trade goods or otherwise), 21

Upon such of these goods as are liable to the provincial duty of 21 per cent. that duty is payable under the provincial law, but its amount is deducted from the duty payable under 3 and 4 William IV. c. 59.

If any of the articles enumerated in the list of goods which are subject to the duty of 71 per cent. should come properly under any of the general denominations (such as drugs or gums, &c.) of articles duty free, such enumerated articles will nevertheless be free. notwithstanding their having been named in that list.

Free goods, under the Imperial Acts, the goods being of foreign produce or manufacture :- Asses, bread or biscuit (1), beef, bacon, bullion, cattle, carriages of travellers, coin, corn, cotton wool (2), cabinet makers' wood (1), diamonds (1), dye woods (1), drugs, fruit and vegetables (1), flour, flax, fresh meat, fresh fish, gums or resins (1), grain, hay (1), hams, hemp, raw hides, horses, live stock, mules, meal, pork, straw (1), salt (1), tallow (1), tortoiseshell (1), tow (1), wood and lumber (1), East India goods (1).

Any sort of craft, food, or victuals (except spirits), and any sort of clothing or implement, or materials, fit and necessary for the British fisheries in America, imported into the place at or from whence such fishery is carried on, in British ships (1).

Also the following goods when imported from the

warehouses in the United Kingdom :-- Brimstone (1) burr stones (1), cheese, cork (1), cider (1), dogstones (1), fruits (1), hops (1), oakum (1), ochres (1), oils, vegetables (1), pitch, pickles (1), seeds, spices (1), sago (1), sponge, sulphur (1), sausages (1), tar, tapi-oca (1), tallow (1), turpentine (1), wax (1), wheat flour, woods of all sorts (1).

Free goods under the provincial laws:—Apparel for private use, beef salted, butter (2), barley, beans, cattle, live stock, oats, oil (fish oil) (3), pork salted, peas, pitch (2), cheese (2), fish salted (3), fish oil (3), flax, flour, furs (2), grain of all kinds, horses, hogs, honey (2), hemp, Indian corn, potatoes, packages containing dutiable or free goods, rice, rye, resin, seeds, skins (2), tar (2), turpentine (2), wheat.

Household goods and necessaries of all kinds which any person or persons coming into this province, for the purpose of actually settling therein, shall import or bring with them for their own use, and for the use of their families.

1) Liable to provincial duty.

2) If foreign, liable to the foreign duty.

(3) If foreign, prohibited.

Prohibitions under Imperial Acts—the goods being of foreign produce or manufacture, and from foreign countries.

Arms, ammunition, and utensils of war, books for sale (1), base or counterfeit coin, fish dried or salted, gunpowder, train oil and oil of all sorts, blubber, fins, or skins, the produce of fish or creatures living in the sea (3).

(1) First composed or written and printed in the United Kingdom, and printed or reprinted in any other country, imported for sale, except books not reprinted in the United Kingdom within twenty years; or being parts of collections, the greater part of which had been composed or written abroad.

(3) Unless taken by British ships.

Schedule of the duties at the ports of Lower Canada, in the year 1835, distinguishing whether under Acts of the Imperial Parliament or the Colonial Legislature. Imperial Act 4th George III. cap. 15.— Wines of the Madeiras or any other island or place, and from whence such wines may be lawfully imported from such island or place, per ton, 71.; all wines, except French wines imported from Great Britain, per ton, 10s. Imperial Act 6th George III. cap. 32.-Molasses or syrup, per gallon, 1s.; coffee, British plantation, per cwt., 7s.; pimento, ditto, per lb., 0½d. Imperial Act 14th George III. cap. 18.—British manufactured spirits, per gallon, 3d.; rum, &c., from the sugar colonies in the West Indies, 6d.; ditto from his Majesty's colonies in America, 6d.; foreign spirits, from Great Britain, 1s.; foreign rum, &c. imported from any place except Great Britain, 1s.; molasses imported in British vessels, or in vessels of this Province, 3d.; molasses of the other British Colonies, 3d. Imperial Act 3rd George IV. cap. 119, sec. 8.-Rum of the British plantations, imported from Great Britain, per gallon, 6d. Provincial Acts rendered permanent by the Imperial Act George IV. cap. 119. 33rd George III. cap. 8.—Madeira wine, per gallon, 4d.; all other wines, 2d. 35th George III. cap. 9.—Foreign brandy, or other foreign spirits, per gallon, 3d.; rum or other spirits, except British manufactured spirits, imported from Great Britain, per gallon, 3d.; molasses or syrup, 3d.; Madeira wine, 2d.; all other wines, 1d.; Muscovado or clayed sugar, per lb., 0ad.; coffee, 2d.; leaf tobacco, 2d.; playing cards, per pack, 2d.; salt, per minot (bushel), 4d. 41st George III. cap. 14.—Snuff, per lb., 4d.; manufactured tobacco, 3d. 55th George III. cap. 2.—Bohea tea, per lb. 2d.; stations, or necessary articles brought by persons who souchong or other black tea, 4d.; hyson tea, 6d.; all intend settling in the Province. other green tea, 0d.; spirits or other strong liquors, per gallon, 0d.; all wines, 0d.; molasses or syrup, 0d. 53rd George III. cap. 2. Annulled by 55th George III. cap. 2. All goods imported on which a duty is not already imposed, per 100l., 2l. 10s. Except goods imported by the commissioners, or contractors for the use of the army or navy, or Indian

The following table of Expenditure is collected from the Blue Books,-but the accounts vary so much in each year that it has been found difficult to prepare a consecutive statement, and the stoppage of the supplies by the late House of Assembly, has made the task more laborious.

Comparative Yearly Statement of the Expenditure.

 Miscellaneous includes, for 1836, 3,677l., the purchase money of Grosse Isle as a quarantine station; 6751. care of sick mariners; 3741. for Montreal gaol; 7201. for relief of distressed inhabitants; and 1,7051. expenses out of British American Land Company receipts. In 1835, the miscellany includes 9,6741. for the same object; and 1834 has 7.8771, for relief of distressed inhabitants.

† Partial payments made only—the House of Assembly having refused the necessary supplies; the estimated amounts required were for 1833, 39,687l.: 1834, 40,130l.: 1835, 40,717l.

The accounts which we have of the past are vague and imperfect; according to the best materials to be collected, the Civil expenditure of Lower Canada from 1794 to 1826 was:-

1804 £39364	1814£186106
1805 42177	1815 147203
1806 42862	1816* 88745

	1826 71098
	1020 1.000
	1805 42177 1806 42862 1807 51497 1808 53104 1809 50067

* I can find no return from 1816 to 1821.

The increase in 1812 to 1815 was owing to the American war.

An annual sum is voted, in the British Parliamentary estimates for the Indians, which is thus divided between Upper and Lower Canada, for 1835. According to the Parliamentary estimates, the expense of the Indian establishment for Lower Canada, for the year ending 31st March, 1835, is 1,8131.;

interpreter, Quebec, 1071.; do. do., 1021.; missionary, 751.; do. do., 501.; schoolmaster, 201.; a superintendant at Montreal, 2311.; three interpreters, 1021. each; a resident, 131*l.*; two missionaries, 50*l.* each; and one at 45*l.* There is nearly a similar establishment from Upper Canada, of which the salaries are 1,7571.; and the pensions for wounds and long services, 5721.; The total expense of Indian presents, stores, &c., for the year ending April, 1835, is 15,856l.; making a grand total, in the miscellaneous British Parliamentary estimates, of 20,000l.

The expenditure of Great Britain on account of Canada is thus given in the B. B. for 1836.

Expenditure incurred by Great Britain for military protection, and in aid of the civil establishments.

Commissariat. Pay of the troops, provisions, &c. Provisions and forage, 24,107l.; fuel and light, 11,430l; miscellaneous purchases, 4,3701; transports, 3,7361.; pay of assistant clerks, issuers, &c., commissariat, 2,9501.; military allowance to commissariat and ordinance department, 3,273l.; local services, including 6,250l., being the amount of salaries to the Ecclesiastical Establishment of Lower Canada, 7,5411.; Indian department, 17.880l.; contingencies, 4,039l.; namely, secretary, 2391.; superintendants, 2391.; ordnance department, (exclusive of the pay of military and civil officers drawn through agents at home,) 57.7251.:

Ordinaries of the Army.—Regimental and staff pay, command money, &c., exclusive of pay of regimental officers drawn through agents at home, 44,9361.; half pay and pensions, 19,7671.; Chelsea pensions, 16,4301.; Total, 71,133. Pay, half pay, pensions, &c., commissairat, 9,082; imprests to Royal Navy, half pay, pensions, &c., 5,0411.; Total expenditure incurred by Great Britain, 222,3121.

A. N. B. The difference between this amount and the total of ordnance, arises from the circumstance of the former being the sum actually paid in 1836, on account of ordnance stores, and the latter the value of stores issued in the same year.

Ordnance expenditure in Canada in 1836.—Military works, stores, barracks, &c. Artillery department, staff pay, 47l.; subsistence Royal Artillery, 8,475l.; incidents, 248l.; total, 8,770l. Engineer department, ordnance works, &c., 26,143l.; barracks, commissariat, and miscellaneous, 4,138l.; total, 30,281l. Store keeper's department, expenditure thereof, 4,280l.; ordnance, civil pensions, 562l.; Barrack department, pay of barrack sergeants, 2,231l; cuntingencies, 1259l; total, 3,490l. Stores issued from the store keeper's charge, ordnance, 1,258l.; barrack, 2,980l.; total, 4,239l. Total sterling, 51,624l.

The source where the civil expenditure is derived is thus shewn:---

Lower Canada civil and judicial expenditure in 1836. [B. B.] Colonial Office. Civil establishment, paid by Great Britain 540l.; by the Colony 25,822l. Judicial do., by Great Britain, nothing; by the Colony, 13,854l. Ecclesiastical, by Great Britain, 6,470l.; by the Colony, 290l. Pensions by the Colony, 2,252l., divided among 53 persons.

The salaries of the principal functionaries in Lower Canada are as follows:—Lower Canada salaries. Salary of governor 4,500l.; Castle of St. Lewis, civil secretary to ditto, 500l.; members of executive council have 100l. a year each; The register and clerk, 550l. and fees; clerk of Legislation Council, 450l.; speaker of the House of Assembly, 900l; clerk of do. 450l.; collector of customs, 1,000l.; post-mastergeneral, 500l.; receiver-general, 1,000l.; cost of crown lands, 500l.; chief justice of the peace, 1,500l.; three puisne judges, 900l. each. Quebec district.—Chief justice of Montreal, 1,100l.; three puisne judges, 900l. each; resident judge, Three Rivers, 900l.; judge of Infr. District, Gaspe, 500l.; ditto of St. Francis, 500l.; Attorney - General, 300l.; Solicitor ditto, 200l.; clerk of the peace, 990l. Lord Bishop of Quebec, 2,400l.; house, 400l.; total, 2,800l.; Roman Catholic Bishop, 1,000l.

XII. Quebec and Montreal are the shipping ports of *Upper* as well as *Lower* Canada; it will be necessary, therefore, to give in this chapter a statement of the maritime trade of the two Canadas. The following brief table sufficiently shows the rapid

Accounts are kept in Halifax currency, by which a guinea (weighing 5 dwts. and 6 grs.) is equal to 23s. 4d. currency; a sovereign to 22s. 3d. a Joannes (a gold coin, weighing 18 dwts.) to 41.; a moidore (weighing 6 dwts. and 18 grs.) to 21.; and an eagle (weighing 11 dwts. and 6 grs.) to 50s. The gold Spanish and French coins are—a doubloon (17 dwts.) 31. 14s. 6d.; Louis-d'or, coined before 1793, (5 dwts. 4 grs.) 11. 2s. 8d.; the pistole, ditto (4 dwts 4 grs.), 18s. 3d.; the forty-franc piece, coined since 1792 (8 dwts. 6 grs.) 11. 16s. 2d.; the twenty-franc piece (4 dwts. 3 grs.), 18s. 4d. In silver coins the crown is equal to 5s. 6d.; Spanish and American dollar to 5s.; English shilling, is. 1d.; pistareen, 10d.; French in 1830, the basis of the metallic circulation we crown, coined before 1793, 5s. 6d.; French piece of in dollars and half dollars, valued as follows:—

six francs, 5s. 6d.; five-franc piece, 4s. 8d.; American dollar, 5s.; and so on. The coins in most general circulation are dollars of various denominations, the weight and pure metal of which will be found in the

Appendix.

The rates of exchange during the year 1836, for bills on His Majesty's Treasury, were from 4s. to 4s. 11d. per Spanish or American dollar.

Accounts kept in £. s. d. To change Halifax currency (4 dollars=11. currency) into British sterling, deduct one-tenth. To change British sterling into

Halifax currency, add one-ninth.

According to the report of the House of Assembly in 1830, the basis of the metallic circulation was then

Since the foregoing statement was prepared, a considerable portion of British coins have poured into the colony, by means of the emigrants. The metallic circulation may be, therefore, estimated at about 250,000*l*. sterling; this sum being independent of a balance of from 100,000*l*. to 150,000*l*. sterling in the military chest.

We come now to the paper circulation. There are no notes issued by the government, or on the credit of the colony, nor have the government any share in the private banks, which exist to the number of three—viz. the Quebec, Montreal, and City banks, which are authorized by charter to issue notes from one dollar in value to any amount, payable on demand in specie, and subject to the proviso of having cash in their vaults to the extent of one-third of their circulation: a full account of each bank is required to be printed and laid before the Legislature annually.

	ne Book for 1836 gives the follower circulation in 1836 :—	wing account
tion	of Quebec Bank notes in circu	£58,150
Ditto	Montreal ditto	191,071
Ditto	City Bank Montreal ditt	94,751
	Total sterling	£343,972

The above mentioned are the only banks at present established by Act of Parliament in Lower Canada, and their notes are the chief circulating medium. There is also another bank, called the "Banque du Peuple," which is not incorporated either by act or charter.

The following abstracts from the books of the different banks, exhibit a general statement of their affairs:—

General State of the Funds of the Quebec Bank, 27th October, 1837.

There are several smaller banks, viz. the "Banque du Peuple," which is a Société en Commandite. The "Commercial Bank" (Mills and Co.), a private establishment. "St. Hyacynthe Bank," like the "Banque du Peuple." The "Bank of British North America," whose head-quarters is in London, applies to all the North American Colonies. [See Appendix.]

The following is a statement of the amount of stock in the public undertakings of the district of Montreal, held by the inhabitants of the two races composing the population of Lower Canada.

This statement has been drawn up by the Constitutional Association at Montreal, in order to show the comparative enterprize of the British and French descended population: the former carry on 19–20ths of the maritime commerce of the Province.

XIV. The principal exportable articles are timber and ashes. The production of timber is very great, and capable of being continued for many years to come: an idea may be formed of its extent, from the fact that the capital employed in the lumber (timber) establishments and saw-mills in the neighbourhood of Quebec, is 1,250,000l.; this sum is laid out in erecting saw-mills throughout the country, forming logponds, building craft for the transport of deals, and forming a secure riding for the ships in the strong tide-way of the St. Lawrence, while loading the timbers. The lumber-trade is of the utmost value to the poorer inhabitants, by furnishing their only means of support during the severity of a long winter, particularly after seasons of bad crops (frequent in the lower provinces), and by enabling young men and new settlers most readily to establish themselves on the waste lands. The American ashes contain a larger proportion of pure potash than those of Dantzic or Russia.

There are manufactories of different articles established at Montreal and Quebec; soap and candles are now being exported; in 1831, soap 81,819 lbs., and

candles 31,811 lbs., almost entirely to the other northern colonics, and the corn and flour trade of Canada promises to be a great source of wealth to the colonists.

A manufactory for making cloth is situated in the township of Ascot, which keeps in constant employment 20 persons. The number of domestic looms in the province, is supposed to be 13,500, which it is computed, manufacture annually of coarse cloth 1,500,000 yds, flannel 990,000 yards, linen 1,370,690 yards. The number of mills in the province is, Carding, 90; Fulling, 97; Paper, 3; Grist, 395; Saw, 737.

Whiskey is distilled to a considerable extent, but there are not any means of ascertaining the quantity. Sugar is made in large quantities from the maple tree, but the quantity cannot be ascertained.

Iron works are carried on to a very great extent at St. Maurice, in the district of the Three Rivers. There is one iron foundery in the district of Quebec, and six in the district of Montreal.

[B. B. 1836.]

Fisheries.—Description of fish, and value in sterling money: Codfish, 107,060 cwt., 71,132l.; Salmon, 141 tierces, 137 barrels, 124 half-barrels, 1,172l.; Pickled fish, 11,196 barrels, 20 half-barrels, 46 boxes, 7,274l.; Codsounds, 72 kegs, 26l.; Fish oil, 26,200 gallons, 2,254l.; total, 81,858l. The above quantities imported from Quebec, Gaspé, North Carlisle, and the Magdalen Islands. Codfish, 93,467 cwt., Cod oil, 37,162 gal., whale oil, 19,360 gal. 74,414l. This is the gross produce of the fisheries in the county of Gaspé, a part of which is exported, and the remainder consumed in the provinces. Codfish, 7,075 cwt. 5,046l.; Salmon, 2 barrels 6l.; Pickled fish, 10,596 barrels, 6,646l.; Fish oil, 5,760 gal. 512l.; total, 86,624l. Gross produce of the fisheries at the Magdalen Islands. [B. B. 1836.]

Horned cattle, sheep, swine, &c. multiply with astonishing rapidity, and the European breeds seem improved on being transplanted to the American continent. The quantity of fish caught in the river and guif of St. Lawrence, and in other streams is very great, and the consumption of this diet considerable in consequence of the tenets of the Roman Catholic faith. Fish oil is becoming an extensive article of export, as are also hides and horns. The peltry or fur trade (see Hudson's Bay Territory chapter) has its outlet from the N. W. territories through Lower Canada. I hope to see ere long, tobacco, hemp, wool, wax, rape and other oils among the staple products of this fine colony.

The Montreal district made in 1837 the following return for 1836. [B. B. L. C. 1836.]

Crops.—Wheat, 20,000 acres; barley, 2,000 ditto; oats, 10,000 do.; peas, 5,000 do.; rye, 50 do.; Indian corn, 200 do.; potatoes, 4,000 do.; turnips, 50 do.; meadow, 20,000 do.; pasture, 30,000 do.; total in crop, 61,300 do.; uncultivated, 15,000 do. Horses, 6,500; horned cattle, 16,000; sheep, 15,000.

Produce.—Wheat, 160,000 bushels; barley, 30,000 do.; oats, 150,000 do.; pease, 60,000 do.; rye, 600 do.; Indian corn, 2,000 do.; potatoes, 400,000 do.; turnips, 5,000do; hay, 28,000 tons; straw, 30,000 do.

The following prices of provisions and wages of labour in Lower Canada for 1836, were transmitted to the Colonial Office in 1837. Four months of the year are given on account of the variety of the seasons. Horned cattle, 5l. 10s.; horses, 12l. 10s.; sheep, 10s.; swine, 2l. 10s.; milk, per gal. 8d.; butter (fresh), per lb. 1s.; butter (salt), per lb. 1s. 8d.; cheese, per lb. 6d.; wheaten bread, per 6 lb. 9d.; beef, per 100 lbs. 1l. 10s.; mutton per lb. 3\frac{1}{2}d.; pork, per 100 lbs. 1l. 15s.

Wages for Labour.—Prædial, 181. per annum, with board and lodging. Day labourers employed at farmwork in spring, summer and harvest, obtain from 2s. to 4s. per day, without food. Females from 1s. to 2s. per day.

Prices of Harvest Produce in Montreal District in 1836.—Wheat, per bush. 5s. to 8s. 4d.; barley, 3s. 4d. to 4s. 8d.; oats, 2s. to 3s.; pease, 4s. 2d. to 5s. 6d.; rye, 4s. to 5s. 6d.; Indian corn, 4s. to 5s. 6d.; potatoes, 1s. 6d. to 2s.; turnips, 1s. 3d. to 1s. 6d.; hay, 2l. to 3l. per ton; straw, 15s. to 25s. per ton.

The following shews the land granted in Lower Canada in 1836; acres, 94,484,—of which 39,209 were gratuitous, and the remainder by purchase. The total number of acres in the Colony granted, is 3,129,544—including two grants in Murray Bay of three leagues each, and two tracts in Chaleur Bay, contents unknown. Remaining to be granted as surveyed, 4,074,862, independent of vast tracts not yet surveyed. [B. B. 1836.]

Nature and Value of Property annually created in Lower Canada, and if not consumed turned into moveable property.-Wheat, 3,404,756 bushels at 5s. per bushel, 851,689l.; Oats, 3,432,274 bushels at 2s., 314,227l.; Barley, 394,795 bushels at 4s., 78,958l.; Buck Wheat, 106,050 bushels, at 4s., 21,020l.; Indian Corn, 339,633 bushels, at 4s., 67,866l.; Rye, 234,529 bushels at 3s., 35,179l.; Peas, 984,758 bushels at 4s., 196,951l.; Potatoes, 7,357,416 bushels at 1s. 6d., 551,806l.; Animal Food, 600,000 mouths 30 lbs. each yearly, at 4d. per lb. 300,000l.; Fish, fresh and salt, 600,000 mouths, ditto, at 2d. per lb., 150,0001.; Butter, Cheese, Milk and Eggs, 600,000 mouths at 2d. each daily, 50,000l.; Indispensable manufactures, &c. Spirits, Soap, Candles, Linen, Woollens, Shoes, Clothing, &c. 51. for each person, 3,000,000l.; Luxuries, not before-mentioned, as food and drink, furniture, and apparel worn, &c. &c. 51. each, 3,000,0001.; Income from trade, &c., Surplus beyond immediate consumption for necessaries, 101. each person averaging, 6,000,000l.; Timber and Ashes, consumed at home, and exported, at least, 1.000.000l.: Value of Commerce not before given, including the coasting and maritime trade, at least, 1,500,000l.; Wasted annually, by shipwreck, fire, bad seasons, improvidence, &c., 250,0001.: total annually created, 17,417,6961.

Nature and Value of Moveable Property.—Horses, 116,686, at 10l. each, 1,116,860l.; Neat Cattle, 389,706, at 5l. each, 1,948,530l.; Sheep, 543,343, at 1l. each, 543,343l.; Swine, 295,137, at 1l. each, 295,137l.; Poultry, may be valued at least, 150,000l.; House furniture, 83,000 houses at an average of 20l. a house, 1,860,000l.; Clothing and Equipage, 600,000 persons at an average of 10l. each, 6,000,000l.; Machinery, and Farming Implements, 1,500,000l.; Bullion, or Gold and Silver Money; at least in money and plate, 1,000,000l.; Ships, Boats, Timber, and Merchandize; the Timber is almost incalculable; altogether at the very least, 20,000,000l. Total, 34,413,870l.

Nature and Value of Immoveable Property.—Houses, 83,000 at 15l. each, 1,245,000l.; Land improved in culture, 2,065,913 acres, at 5l. per acre, 10,329,665l.; Land occupied, not in culture, 3,981,793 acres at 1l., 3,981,793l.; Lands not granted and waste, of 120,000,000 acres at least, fit for cultivation, 30,000,000 at 5s., 7,500,000l.; Streets, Roads, Canals, Dykes, &c., the extent of roads is great, public and private, a low estimate, 1,500,000l.; Forts, Gaols, Churches, Public Buildings, a great deal of money has thus been expended by the French and English, 1,500,000l.; Manufactories, Stores, Iron Mines and Quarries, 500,000l. Total, 26,556,385l. Grand total, Annually created, Moveable and Immoveable, 78,387,924l.

BOOK III.—POSSESSIONS IN NORTH AMERICA.

CHAPTER II.—UPPER CANADA.

SECTION I. The boundary line between Lower and Upper Canada, has been stated in the preceding chapter; the province of Upper Canada is bounded on the S. W. by a line drawn through the centre of the great lakes, and separating it from the U. States, on the N. by the Hudson Bay territory, on the E. by the Ottawa and Lower Canada, and on the N. W. by the undefined boundaries, or, it may be said, by the Pacific Ocean, comprising in round numbers about 100,000 square miles.

II. The early accounts of Canada, so far as is necessary to the general reader, are embraced in the preceding chapter: the French, as the allies of the Hurons and Algonquins, penetrated into Upper Ca-nada, and the conquest of the lower province in 1759 made the British, by one campaign, masters of the whole of Upper Canada; the main features in whose history is, the contest with N. America in 1812, and which it is not necessary to detail in this work. See "History of British Colonies, or Colonial Library," Vol. I.—2nd Ed.

Lieutenant-Governors, Presidents, and Administrators of Upper Canada, from the division of the province 1791 to 1834.-Col John Graves Simcoe, Lieut.-Gov., July 8, 1792; the Hon. Peter Russel, Pres., July 21, 1796; Lieut. Gen. Peter Hunter, Lieut.-Gov., August 17, 1799; the Hon. A. Grant, Pres., September 11. 1805; His Excellency Francis Gore, Lieut.-Gov., August 25, 1806; Major-Gen. Sir Isaac Brock, Pres., September 30, 1811; Major-Gen. Sir R. H. Sheaffe, Bart., Pres., October 20, 1812; Major-Gen. F. Baron de Rottenburgh, Pres., June 19, 1813; Lieut.-Gen. Sir Gordon Drummond, K. C. B., Provincial Lieut.-Gov.. December 13, 1813; Lieut.-Gen. Sir George Murray, Bart., Provincial Lieut.-Gov. April 25, 1815; Major-Gen. Sir F. P. Robinson, K. C. B., Provincial Lieut.-Gov., July 1, 1815; His Excellency Francis Gore, Lieut.-Gov. September 25, 1815; the Hon. Samuel Smith, Adm., June 11, 1817; Major-Gen. Sir ders of the great lake and rivers.

P. Maitland, K. C. B., Lieut.-Gov., August 13, 1818; the Hon. Samuel Smith, Adm., March 8, 1820; Major Gen. Sir P. Maitland, K. C. B., Lieut.-Gov., June 30, 1820; Major-Gen. Sir John Colborne, Lieut-Gov., November 5, 1828; Sir Francis Bond Head, 1835; Sir George Arthur, 1838.

III. The vast territory embraced in the province of Upper Canada, as regards the inhabited parts, is in general a level champaign country; for, from the division line on lake St. Francis to Sandwich, a distance of nearly 600 miles westerly, nothing like a mountain occurs, although the greater part of the country is gently undulated into pleasing hills, fine slopes, and fertile vallies: but a ridge of rocky country runs north-east and south-westerly through the Newcastle and Midland districts, towards the Ottawa or Grand River, at the distance of from 50 to 100 miles from the north shore of Lake Ontario and the course of the River St. Lawrence. Passing this ridge to the north, the explorer descends into a wide and rich valley of great extent, which is again bounded on the north by a rocky and mountainous country, of still higher elevation.

Farther to the north, beyond the French river which falls into Lake Huron, are immense mountains, some of them of great but unknown elevation.

The country on the north and west side of Lake Ontario, and of Lake Erie which is still further west, continues flat as far as Lake Huron, with only occasional moderate elevations of the surface of easy ascent. In the whole extent of this tract of country, there is but a small portion of it under cultivation, the remainder being in its primitive state of forests, lakes, and rivers; the latter for the most part falling into the great lakes, or into larger rivers, which again empty themselves into the great artery of the country, the St. Lawrence. The settlements are chiefly confined to the borders, or within a few miles of the bor-

The lakes of Upper Canada are very numerous, a few of those best known are as follow:-(For descriptions, see Colonial Library, 2nd Edition, Vol. I.)

Names.	Length.	Breadth.	Circum- ference.	Average depth.	Elevation above the sea.*	Bottom be- low tide of ocean.*

^{*} These statements are the nearest approximations we possess to truth.

Toronto, formerly called York, but now restored to its native name, (Lat. 43.39 N. Long. 79.36 W.) is the infant capital of Upper Canada, delightfully situate in the township of York, near the head of Lake Ontario, on the north side of an excellent harbour or an elliptical basin of an area of eight or nine miles, formed by a long, low sandy peninsula or island, stretching from the land east of the town to Gibraltar Point, abreast of a good fort. The town is laid out at right angles, with long and spacious streets, (King Street, the great thorough fare is half a mile long), the side paths well flagged, and some of the streets macadamized. It contains the principal buildings and public offices of the province, viz.: the Parliament House and Government offices, Government House, the College of Upper Canada, the Hospital, Court House, Gaol, Protestant, Scotch and Roman places of worship, and several Meeting Houses, the Upper Canada Bank, Law Society Hall, the Barracks, &c.

Official return of the population of the City and Liberties of Toronto, taken by the assessors in May and June, 1835.

To these numbers may be added strangers, emigrants, omissions, casual residents, tenants of the prison, and the soldiers in garrison, in all over 1800 persons, giving an actual population of more than 11,000 souls within the city and liberties.

The population is now about 15,000, composed of English, Irish, Scotch, native born Upper Canadians and a very few French Canadians. Little more than 30 years ago, the site whereon York now stands, and the whole country to the north and west of it was a perfect wilderness—the land is now fast clearing—thickly settled by a robust and industrious European, and European descended population, blessed with health and competence, and on all sides indicating the rapid progress of civilization. The other British town of importance on this shore is—

Kingston, (distant from Toronto 184 and from Montreal 189 miles) in Lat. 44.8. Long. 76.40. W. is advantageously situate on the north bank of Lake Ontario at the head of the river St. Lawrence, and separated by Points Frederick and Henry by a bay which extends a considerable distance to the N. W. beyond the town, where it receives the waters of a river which flows from the interior. Point Frederick is a long narrow peninsula, extending about half a mile into the lake in a S. E. direction, distant from Kingston about three quarters of a mile on the opposite side of its bay. This peninsula forms the west side of a narrow and deep inlet called Navy Bay, from its being the chief harbour of our navy on Lake Ontario. The extremity of the point has a strong battery, and there is a dock-yard with store-houses, &c.

Point Henry, forming the east side of Navy Bay, is a high narrow rocky ridge, extending into the lake in

the same direction as Point Frederick. It is crowned by a fort built on the extremity of the ridge, and occupying the highest point of any ground in this part of Canada. The dock-yard store-houses, slips for building ships of war, naval barracks, wharfs, &c., are on an extensive scale; during the war a first rate (the St. Lawrence) carrying 102 guns was built here, and in case of emergency, a formidable fleet could in a very brief period be equipped at Kingston in defence of British interests or honour.

Kingston, next to Quebec and Halifax, is the strongest British post in America, and, next to Quebec and Montreal, the first in commercial importance, and has rapidly risen of late years, by becoming, through the means of the Rideau Canal, the main entrepot between the trade of the lower province and all the settlements on the great lakes to the westward, and with the measures now in progress to render the St. Lawrence navigable between Montreal and Lake Ontario, it may be expected to increase yet more rapidly; in 1828, its population amounted to 3,528; in 1834, to near 6,000.

The Rideau Canal .- This far-famed undertaking, which is not properly speaking a canal, but rather a succession of raised waters by means of dams, with natural lakes interspersed, commences at Entrance Bay, a small bay in the Ottawa, 128 miles from Montreal, and 150 from Kingston, in latitude N. 45.30. longitude W. 76 50.—about a mile below the Falls of Chaudiere, and one and a half mile above the point where the Rideau River falls into the Ottawa. From Entrance Bay the canal is entered by eight locks; it then passes through a natural gully, crosses Dow's Swamp (which is flooded by means of a mound), crosses Peter's gully by means of an aqueduct, and joins the Rideau River at the Hog's Back, about six miles from Entrance Bay. At the Hog's Back there is a dam 45 feet high and 400 long, which, by throwing back the river, converts about seven miles of rapids into still navigable water. The canal rises into the river by means of a lock. A series of locks and dams now commence with occasional embankments.

There is a dam and lock at the Black Rapids (138 miles from Montreal); a dam, three locks, and two embankments at Long Island Rapids, which render the river navigable for 24 miles, to Barret's Rapids, 167 miles from Montreal; eight dams and 14 locks bring the canal to Olive's Ferry, 210 miles from Moutreal, where the Rideau Lake contracts to 463 feet wide, and a ferry connects the road between Perth and Brockville. At the Upper Narrows, 16 miles further, the Rideau Lake contracts again to about 80 feet across, over which a dam is thrown, with a lock of four feet lift, forming the Upper Rideau Lake into a summit pond of 291 feet above Entrance Bay, in the Ottawa; six miles further is the isthmus which separates the Upper Rideau Lake from Mud Lake, the source of the river Cataraqui. The canal is cut through this isthmus, which is one and a half mile wide; five miles advancing is the isthmus Clear Lake, 330 feet across, through which a cut is made to avoid the rapids of the natural channel.

To Cranberry Marsh, 17 miles from Isthmus Clear Lake (the last station adverted to), 255 miles from Montreal and 23 from Kingston, there are three dams and six locks. The Marsh is about 78 feet above the level of Kingston Harbour, and about eight miles long. Besides flowing into the Cataraqui River, the waters of this marsh or lake burst out at White Fish Fall, and flow into the Gananoqui River, which is the waste weir for regulating the level of the water in the

Rideau Lake (the summit pond); thus the water in the whole line of canal, whether in times of flood or drought, is kept at a steady height. At Brewer's Upper and Lower Mills, 18 and 17 miles from Kingston, there are three dams and three locks; and at Kingston Mills, five miles from Kingston, one dam and four locks. The Canal, or Cataraqui River, falls into Kingston Bay at these mills, at a distance from Montreal of 273 miles.

The Rideau opens a water communication between Kingston and the Ottawa, a distance of 132 miles, by connecting together several pieces of water lying in that direction, viz. Kingston Mill-stream, Cranberry Lake, Mud Lake, Rideau Lake and River, the length of the cuts not exceeding 20 miles. The difference of level is 445 feet; about 20 miles are excavated, some through rocks. There are 47 locks, which are in length 142 feet, in breadth 33, and with a water depth of five feet, which admit vessels under 125 tons. There was either sad blundering in the estimate, or gross mismanagement in the expenditure on this canal. the original estimate for which was but 169,000l.the next estimate, before the plan of enlarging the locks was adopted, amounted to 486,0001., the addition of the locks raised the estimate to 762,6731.; but it may now be stated, that the total expenditure will not be short of one million sterling. The locks were originally planned upon a scale to correspond with those on the La Chine canal, i. e. 100 feet by 20; these dimensions were subsequently increased to 142 feet in length by 33 in width, with a depth of 5 feet water, hence a considerable augmentation of expense.

The Welland Canal connects Lake Eric with Lake Ontario. It was not undertaken by government, but by a company incorporated by the Legislature in 1825. The canal communicates with Lake Ontario by the Twelve-mile Creek, and is conducted over the range of hills forming the barrier of Lake Erie, at the Falls of Niagara, by means of locks until it meets the Chippawa at eight miles and a half from its mouth; it ascends the Chippawa about 11 miles from thence, joining the Ouse upon Lake Erie at about one mile and a half from its mouth; the shifting bar at the entrance of the Ouse being remedied by extending piers into deep water beyond the bar. The length of the canal is 41 miles, its width 56 feet, and its depth 84; the summit level is 330 feet, the ascending locks are 37 in number (made of wood), 22 feet wide, and 100 feet long. The cost of this canal has been, so far as we can yet estimate, upwards of 500,000l.; but there is little doubt that as the population on Lake Erie and Huron shores increases, a fair return will be vielded for the capital expended.

The Grenville canal consists of three sections, one at the Long Sault on the Ottawa-another at the fall called the Chûte à Blondeau, 60 miles from Montreal and 218 from Kingston, and a third at the Carillon Rapids, 56 miles from Montreal and 222 from Kingston, opening into the Lake of the Two Mountains, through which an uninterrupted navigation is practised by steam-boats to La Chine, nine miles above the city of Montreal. This canal renders the navigation of the Ottawa between the Rideau and Montreal complete. All the locks on the Carillon, and on the Chûte à Blondeau are of the same size as on the Rideau, but on a part of the Grenville Canal, which was commenced before the large scale was adopted, some locks and a part of the cuttings will only admit boats 20 feet wide; the locks on La Chine are also calculated for boats only 20 feet wide; the navigation for boats above 20 feet wide is interrupted at the

Grenville Canal, and if large boats be used on the Rideau, and on the higher part of the Ottawa, all goods must be unshipped on arriving at the Grenville Canal, and be either conveyed by portage or removed to smaller boats.

The distance from Kingston, on Lake Ontario, to Bytown, where the Rideau River joins the Ottawa, is about 150 miles; from Bytown to the Grenville canal, 64 miles; total, 214 miles; through the whole of which line the locks and cuttings are of a size to admit steam boats 134 feet long and 33 feet wide, and drawing five feet of water. A canal is proposed across the west extremity of the Island of Montreal, near the town of St. Anne's, to surmount the rapids.

The Montreal communication with the Ottawa, by the canal between the former place and Lake St. Louis, at La Chine, near Montreal, is termed La Chine Canal; it is 28 feet wide at the bottom, 48 at the water line, has five feet depth of water, and a towing path; the whole fall is 42 feet, with the locks; the length is about seven miles. It is the property of a company; was begun in 1821, completed in three years, at a cost of 137,000l. which was defrayed by the company, slightly assisted by government, and for which the public service is exempt from toll.

By means of the great and useful works just mentioned, a large extent of country is opened up to the industry of the British settlers; there is continuous steam-boat communications in Upper Canada of about 460 miles, viz. from the Grenville canal, on the Ottawa, to Niagara.

The value of canals and steam navigation may be judged of from the fact, that, in 1812, the news of the declaration of war against Great Britain by the United States, did not reach the post of Michilimackinac (1,107 miles from Quebec) under two months; the same place is now within the distance of ten days' journey from the Atlantic.

IV. Our knowledge of the geological structure of the country bordering on the great lakes is more minute than the examinations yet made in Lower Canada [see Colonial Library, Vol. I.]

Beyond Lake Superior, or what La Hontan called the "fag end of the world," the country is exceedingly dreary—miles of ponds and marshes, where the mud is knee deep, are succeeded by open, dry, sandy barrens, terminating in forests of hemlock and spruce, and then again a regular alternation of swamps, mud, bog, windfalls, and stagnant water, and in the course of many miles there is seldom a dry spot to be found for a resting place; in winter strong whiskey is frozen to the consistence of honey, and in the height of summer (!) the thermometer is down to 36. Farenheit at sun-rise.

A secondary sandstone (according to Mr. Schoolcraft, an American gentlemen, who formed part of a government expedition from New York), forms the whole south coast of Lake Superior, through which the granite on which it rests occasionally appears; chalcedony, cornelian, jaspar, opal, agate, sardonyx, zeolith, and serpentine (all siliceous except the last two), with iron, lead, and copper are found imbedded in it. The sand hills west of the Grand Marais present to the lake, for nine miles, a steep acclivity 300 feet high, composed of light yellow siliceous sand, in three layers 150, 80, and 70 feet thick; the last mentioned uppermost and like the lowest pure, while the middle bed has many pebbles of granite, limestone, hornblende, and quartz. By the subsidence of the waters of Lakes Superior and Huron, occasioned, Mr. Lyell thinks, by the partial destruction of their barriers at some unknown period, beds of sand, 150 feet thick, are exposed, below which are seen beds of clay, enclosing shells of the very species which now inhabit the lakes.

At Lake Superior, a red sandstone, for the most part horizontal, predominates on the south shore, resting in places on granite. Amygdaloid occupies a very large tract in the north stretching from Cape Verd to the grand Portage, profusely intermingled with argillaceous and other porphyries, sienite, trappose greenstone, sandstone, and conglomerates. Part of the north and east shore is the seat of older formations, viz. sienite, stratified greenstone, more or less chloritic, and alternating five times with vast beds of granite, the general direction east, with a north or perpendicular dip. Great quantities of the older shell limestone are found strewn in rolled masses on the beach from Point Marmoaze to Grand Portage.

Copper abounds in various parts of the country, in particular some large and brilliant specimens have been found in the angle between Lake Superior and Michigan. At the Coppermine River (Ontanagon, 300 miles from the Sault de St. Marie), the copper, which is in a pure and malleable state, lies in connexion with a body of serpentine rock, the face of which it almost completely overlays, it is also disseminated in masses and grains throughout the substance of the rock.

The almost uniformly level shores of Lake Huron, present few objects of interest to the geologist: secondary limestone filled with the usual reliquiæ, constitutes the great mass of the rock along the coast.

The chasm, at Niagara Falls, affords a clear indica-tion of the geology of the country. The different strata,-first, limestone; then fragile slate; and lastly, sandstone. The uppermost and lowest of these compose the great secondary formation of a part of Canada, and nearly the whole of the United States, occupying the whole basin of the Mississippi, and extending from it between the lakes and the Alleghany ridge of mountains, as far eastward as the Mohawk. between which the slate is often interposed, as at Niagara, and throughout the State of New York generally. At Niagara, the stratum of slate is nearly 40 feet thick, and nearly as fragile as shale, crumbling so much as to sink the superincumbent limestone, and thus verify, to some extent, the opinion that a retrocession of the falls has been going on for ages. The subsoil around Lake Ontario is limestone, resting on granite. The rocks about Kingston are usually a limestone of very compact structure, and light blue. ish grey colour, a fracture often approaching the conchoidal, a slight degree of translucency on a thin edge; and after percussion, the odour of flint rather than that of bitumen. The lowermost limestones are in general more siliceous than those above them; and so much is it the case, that in some places, a conglomerated character is given to the rock by the intrusion of pieces of quartz or hornstone. It is remarkable, that both angular and rounded masses of felspar rock, which usually underlies limestone (or, if absent, is supplied by one in which hornblende predominates), are imbedded and isolated in the limestone, demonstrating the latter to have been at one time in a state of fluidity.

The limestone formation is stratified horizontally, its dip being greatest when nearest to the elder rock on which it reposes, and by which it would appear to have been upraised subsequently to the solidification of its strata; the thickness of which, like the depth of the soil, varies from a few feet to a few inches. Shale

occurs, as amongst most limestones; and, in some places so intimately blended with the latter, as to cause it to fall to pieces on exposure to the atmosphere. The minerals as yet noticed, in this formation, are chert or hornstone, basanite, chlorite, calcareous spar, barytes, sulphate of strontian, sulphuret of iron, and sulphuret of zinc. Genuine granite, is seldom or never found.

The soils of Upper Canada are various; that which predominates is composed of brown clay and loam, with different proportions of marl intermixed; this compound soil prevails principally in the fertile country between the St. Lawrence and Ottawa; towards the north shore of Lake Ontario it is more clayey and extremely productive. The substratum throughout these districts is a bed of horizontal limestone, which in some places rises to the surface. The Newcastle district lying between the upper section of the Ottawa and the St. Lawrence, is a rich black mould, which also prevails throughout the East Riding of York, and on the banks of the Ouse or Grand River, and Thames.

At Toronto the soil is fertile, but stones are scarce for common use, which is also the case in some townships bordering Lakes Erie, St. Clair, and the Detroit, thus demonstrating the alluvial nature of the territory. A light sandy soil predominates round the head of Lake Ontario.

The predominating soil of the country (east shore, Lake Huron) traversed is a meagre, red, or yellow, ferruginous, sandy loam, varying in depth from feet to inches, often not exceeding three of the latter dimension, and not unfrequently absent altogether, leaving the rock bare but for its hoary covering of lichen clay, or clayey loams, were rarely seen, and when noticed, their usual position was either in some of the swampy valleys between the rocks or forming alluvial deposits on the banks of rivers, often deeply covered up by a siliceous sand.

V. In an extent of country embraced between 42° and 50° of north latitude, the climate is necessarily various; in the settled townships it is generally delightful, neither so cold in winter as Lower Canada, nor so hot in summer as New York; in the Newcastle district between the 44° and 45° a man may work in the woods the whole winter in his shirt sleeves, as in England; and the summer heat is tempered by a cool breeze, which sets in from the S. W. about 10 a. m., and lasts generally to 3 or 4 p. m. In summer the wind blows two-thirds of the season from the S. W., i. e. along the great lakes.

In spring and autumn this wind brings a good deal of moisture with it. The N.W. the most frequent in winter, is dry, cold and elastic; the S.E. soft, thawey and rainy; the wind seldom blows from west or south, more rarely from the northward. Of course changes of wind are accompanied by corresponding alternations of weather; the most sudden are to the N. W., followed by weather clear and cold for the scason, almost every thunder shower clears up with this wind: the longest storms of rain, and the deepest falls of snow, are usually accompanied by easterly winds. The following table will afford a comparative view of the climate of Upper and Lower Canada throughout the year, as regards the highest, lowest, and mean temperature, for each month in Upper and Lower Canada; latitude 42 north in Upper Canada, latitude 45. north in Lower Canada.

The winter of Upper Canada, although not at present severe, is becoming milder every year as cultivation extends. It is a great error to suppose that the great Lakes, Ontario, &c. are frozen over at any time, they are always open in the centre, frequently exhibiting a beautiful and striking phenomenon during the inclement season, by reason of the water being warmer than the circumambient atmosphere, an evaporation resembling steam, may be observed ascending in every variety of shape, in clouds, columns and pyramids, with uncommon grandeur and magnificence from the vast surfaces of Ontario, Erie, Huron and Superior, as if from so many boiling cauldrons.

The chain of shallow lakes which run in an east and south-easterly direction from Lake Simcoe to-

wards the midland district, are seldom frozen more than inch thick until about Christmas, and they are again open before April.

The earth in Upper Canada is not generally frozen at a greater depth than from 12 to 18 inches, and the snow rarely lies at a greater depth than from 18 inches to two feet unless when drifted. It is very seldom that the roads are in a permanent condition for the use of the sleigh or carriole before the second week in January, and they are again broken up by the end of March: this shows the duration of sharp frosts and snow: in fact a labouring man may, if he chuses, work at all times out of doors: in Lower Canada, at the more northerly stations, it would be impossible so to do.

VI. The people of Upper Canada are among the most favoured on earth; they enjoy peace, liberty, security and abundance on a fertile soil, and in a healthful climate, with an almost total exemption from burthens of any kind. To demonstrate the extraordinary increase of this population, and their distribution throughout the province, is the object of this section.

The earliest European settlers in Upper Canada were some French families, who colonized about the banks of the Detroit and on the St. Lawrence, previous to the British acquisition of the province, after which period the settlements of Europeans, or loyal inhabitants from the United States, began to be encouraged.

In 1806, the number of mouths was estimated at

70,718; in 1811, at 77,000; but the war with the United States tended much to check the prosperity, and with it the increase of population in the province.

According to some returns before me, the number of males and females were in the following years thus—

Years	Males	Fem.	Total.	Years	Males	Fem.	Total.
1821 1823 1827	65792 79238 95903	70931	150169	1831 1832 1833	130003	117039	247042
1828 1829 1830	99465 103285			1834 1835 1836	194064	173597	367661

The foregoing return was furnished by the Colonial Office to the statistical department of the Board of Trade. The Population of Upper Canada from 1823 to 1835, deduced from the Returns to the House of Assembly.

Thus the increase of European, and European descended population, between 1823 and 1833, was 162,404; this is exclusive of the Indian population, whose numbers, though fast diminishing, amount, according to some estimates, to 28,000. Mr. McTaggart, the engineer, collected in 1828, the following data of the Indian population throughout North America: he did not state on what authority he gave these figures, and it is difficult to place reliance on the number he mentions, namely, upwards of two millions and a half. I give his statement without further comment than a hope it may be true, and that every effort will be made to preserve from further destruction, by the Europeans, so fine a race as the North American Indians, which I regret my limits forbid my giving an historical account of. The following table will shew the increase of male and female population separately at two periods, and the extent occupied and cultivated in 1832.

Assessment for district purposes, at the rate of one penny in the pound, in 1835, 1,888l.

It will be perceived from the foregoing, that the eastern division is formed into three counties, and these again subdivided into 12 townships. The district commences at the boundary line separating Upper and Lower Canada, and runs along the St. Lawrence, with part of Lake St. Francis (an expansion of the St. Lawrence), and the Long Sault rapid in front, until it reaches the adjoining district of Johnstown: inland, it is bounded by the Ottawa district. A range of elevated land commences at Lochiel, and runs diagonally to the township of Matilda, whence it passes into the adjoining district.

The soil is rich, and well watered, cultivated and fertile. Some of it has been granted to discharged soldiers, and a good deal to the children of New England loyalists, and the Canada company possess some lots in it. There are nearly 15 acres of rateable land in the district to each individual, of which about 21 acres are cultivated by each man. The male population does not so far outnumber the female as might be supposed in a new country. The inhabitants under 16 years of age, exceed those above that period of life.

collected relative to the native population that once occupied the country now tenanted by Europeans and their descendants, must prove interesting, I give the following return, printed in the Annual Register, towards the close of the last century: " The names of the different Indian nations in North America, with the numbers of their fighting men, from the best authority I have been able to collect, are as follow; on the Mobile and Mississippi, the Choctaws or Flatheads, Delawares, on the west of the Ohio, 300. The Mia-

N. B.—As every statistical information that can be | 4,500; the Natches, 150; the Chickesaws, 750. The Cherokees, behind South Carolina, 2,500; the Catawbas, between North and South Carolina, 150; the Piantias, a wandering tribe on both sides of the Mississippi, 800; the Kasquuasquias, or Illinois in general, on the Illinois river, and between the Ouabache and the Mississippi, 600. On the Ouabache, the Piankishaws, 250; the Ouachtenons, 400; the Kikapous, 300. The Shawnese, on the Siotto, 500. The

mis, on the Misamis river, falling into Lake Erie and I the Miniamis, 350. The upper Creeks, back of Georgia, the middle Creeks, behind West Florida, the lower Creeks, in East Florida, 4,000. The Caouitas. on the east of the river Alibamous, 700; the Alibamous, on the west of the Alibamous, 600; the Akansaws, on the Akansaw river falling into the Mississippi on the west side, 2,000; the Ajoues, north of the Missouri, 1,000; the Paddoucas, west of the Mississippi, 500. South of the Missouri, the white Panis, 2,000; the freckled or pricked Panis, 2,000; the Canses, 1,600; the Osages, 600; the Grandes Eaux, 1,000. The Missouri, upon the river Missouri, 3,000. Towards the heads of the Mississippi, the Sioux of the woods, 1,800; the Sioux of the meadows, 2,500. The Blancs, Barbus, or White Indians with beards, 1,500. Far north near the lakes of the same name. the Assiniboils, 1,500; the Christaneaux, 3,000. The Ouiscansins, on a river of that name that falls into the Mississippi on the east side, 550. South of Puans Bay, the Mascoutens, 500; the Sakis, 400; the Mechecouakis, 250. Near Pucans Bay, Folle Avoine, or the Wildout Indians, 350; the Pucans, 700. The Powtewatamis, near St. Joseph's River, and Detroit, 350; the Messesagues, or River Indians. being wandering tribes on the Lakes Huron and Superior, 2,000. Near the Lakes Superior and Michigan, the Ottahwas, 900; the Chipwas, 5,000. The Wiandots, near Lake Erie, 300; the Six Nations, or as the French call them, the Iroquois, on the frontiers of New York, &c., 1,500; the Round-headed

Indians, near the head of the Ottahwa River, 2,500; the Algonquins, near the above, 300; the Nipissins, near the above also, 400. St. Laurence Indians, on the back of Nova Scotia, &c., the Chalas, 130; the Amelistes, 550; the Michmacks, 700. The Abenaquis, 350. The Conawaghrunas, near the falls of St. Lewis, 200: total amount, 58,930. This being the whole number of men fit for bearing arms, from hence we may be enabled to form some idea of the number of all the Indian inhabitants, men, women and children, on the continent of North America; which calculation, however, I am ready to confess can be but rather a vague conjecture.

There being 58,930 warriors, it is computed that about one-third of the same number more are old men unfit for bearing arms, which makes the number of males come to maturity amount to about 88,570; and multiplied by six will produce 531,420, which I consider as the whole number of souls, viz. men, women and children, of all the Indian nations that are come in any degree within our knowledge throughout the continent of North America.

It is a most melancholy consideration to reflect. that these few are all that remain of the many millions of natives, or aboriginal inhabitants with which this vast continent was peopled when first discovered by the whites; and that even these will soon be extinct and totally annihilated, considering the amazingly rapid depopulation they have hitherto experienced, since that (to them) fatal period or era of the first arrival of the whites in America."

The Ottawa district is situate in the rear of the its population, cultivation, stock, &c., were as follows Eastern, bordering on the south shore of the river in 1835. Ottawa from the Rideau river to the St. Lawrence;

District assessment of one penny in the pound for 1835, 308l.; number of rateable inhabitants, 883.

good, but low and marshy. Along the Rideau canal cultivation is being extended; and as cultivation increases, those very lands which are now considered useless marshy soils, will become the most fertile sections of the country. There are nearly 18 acres of area rateable to each individual, of which somewhat river to the westward of the Ottawa and Eastern Dismore than two acres are cultivated by each. The dis- | tricts. The Rideau canal passes through it.

The Ottawa district is thinly settled; the lands are | proportion of males to females is very trifling, and the inhabitants under 16 years of age, are within 62 of the same amount as those above that period of life. The proportion of stock in the district is small, compared with other parts of the country.

Johnstown District, lies along the St. Lawrence

The soil in Johnstown is generally good, and it is | this interesting, and in many respects important proadvantageously situated. There are about 14 acres of land rated to each individual, of which there are nearly three acres of cultivated to each mouth. The number of people under 16 years of age, exceed by 1,150 those above that age. This proportion of children to adults is a striking feature in all new countries; it would appear to be an effort of nature to fill up a vacuum. To accomplish this, it has been frequently observed that the proportion of female births exceeds those of males; in Upper Canada this does not seem at present to be the case, but the period for the necessity of such a law may be past, and a due proportion of males to females required. Certain it is, that there are as fixed laws relative to male and female products in every class of creation in reference to increase and decrease, as there are in the more apparent laws of matter and motion. We have not yet, perhaps, a sufficiency of facts generalized, to indicate fully those laws; but the statistics now collecting in various countries, will, it is hoped, enable us to solve

blem, in the history of civilization.

The townships on the Ottawa, N.W. of Bathurst district, are in much request: lumberers now go 150 miles beyond Lake Chat; and, as the Ottawa has few rapids to the northward, towards its junction with Lake Nipissing, we may command a shorter communication between Montreal and Georgiana Bay, and Lake Huron, than that we now have through Lakes Ontario, Erie, and the Detroit, with the great additional advantage of its being beyond the threats of the American Government. A great part of this district is colonized by Highland and Lowland Scotchmen, whose prudent, thrifty habits admirably fit them for emigrants. Here we find the proportion of females to males doubled, although the numbers above 16 and under 16 years of age are nearly equal. There are upwards of 18 acres of rateable land to each mouth, and more than 2 acres cultivated; but the proportion of hands cultivating 57,197 acres is very small, namely, 2,855 men, i. e. 20 acres to each person.

The District on the north bounded by the river Ottawa, is called the Bathurst District. Census in 1835.

Assessments, in 1832, £746.

The next division as we proceed westward, is the long and extensive tract called the *Midland District*, whose base or southern extremity rests on the St. Lawrence and Lake Ontario, in the parallel of 44° S. latitude, while its northern boundary extends to 46.30, and is terminated on the N.E. by the Ottawa river.

These five districts may be considered as forming the eastern section of the province, and present generally a moderately-elevated table land declining towards its numerous water courses. The timber of the forests is large and lofty, and of every The soil, though moist and marshy in many places, is extremely rich, consisting chiefly of a brown clay and yellow loam, admirably adapted to the growth of wheat and every species of grain: the rivers and lakes are extremely numerous; of the former may be mentioned as most conspicuous the Rideau, Petite Nation, Mississippi and Madawaska, which have their sources far in the interior, generally to the westward, and which fall into the Ottawa: the Gannanoqui, Raisin, Cataraqui, Napanee, Salmon, Moira, and part of the Trent discharge themselves into the Bay of Quinté and the St. Lawrence. These streams, besides fertilizing the lands through which they meander, St. Lawrence.

afford, in general, convenient inland communications, and turn numerous grist, carding, fulling, and saw mills.

Besides numerous inferior lakes there are the Rideau, Gannanoqui, White (Henderson's), Mud, Devil, Indian, Clear, Irish, Loughborough, Mississippi, Olden, Clarendon, Barrie, Stoke, Marmora, Collins, Blunder, Angus, and Ossinicon. There are many roads throughout the section; the principal one is along the St. Lawrence, between Montreal and Kingston, traversing Cornwall and Lancaster, through which a line of stage coaches run daily (except Sundays) between the two provinces when steam-boats cannot traverse. Kingston, the maritime capital of Upper Canada, has to the westward the fine Quinté tract in a prosperous state of cultivation.

Bytown, in Nepean, on the south bank of the Ottawa, is most picturesquely situate; as is also Kinnel Lodge, the romantic residence of the highland chieftain, M'Nab, on the broad, bold, and abrupt shore of the lake of Chats. Perth is a thriving village in the township of Drummond, on a branch of the Rideau, occupying a central position between the Ottawa and St. Lawrence.

These totals include 43 insane persons, and 61 persons deaf and dumb.

The soil throughout this large district is in general good, and though the population is large compared with other districts, there is yet abundance of room for more settlers. It is well watered by the Rice, Balsam, Trout, and other lakes, and by the Otanabee rivers, part of the Trent, &c. Rice Lake, in the district of Newcastle, about 15 miles from Lake Ontario, and lying nearly S. W. and N. E., is 25 miles long by 5 wide. Its name is derived from the wild rice growing on its margin and surrounding marshes. The principal river on the North British shore of Ontario, is the Trent, which issuing out of Red Lake, after a very winding course of 100 miles, falls into the Bay of Quinté, near the village of Sidney. The Otanabee, which falls into the north shore of Rice Lake, may be considered a continuation of the Trent River, of which the Rice Lake is merely an expansion, as is often the case in the American rivers. The Otanabee, like the Trent, is a broad and full river, and both are navigable for boats. From its source in Trout Lake, it communicates by a chain of lakes with Lake Simcoe, through which it is proposed to open a canal communication between Lakes Huron and Ontario. The extensive territory adjoining Newcastle, with its N. W. extremity resting on Georgiana Bay (an inlet of Lake

Huron), is termed the Home District, it contains the

capital of Upper Canada, Toronto (late called York).

The central section of Upper Canada does not fall short in fertility of either the east or west portions of the province; it is well watered, the Nottawasaga, Holland, Muskethsebé, Beaver, Talbot, and Black Rivers fall into Lake Simcoe; the Credit, Etobicoke, Humber, and Don Rivers, flow into Lake Ontario. There are excellent roads throughout the section; a canal is projected through the Home District, to connect Lakes Huron and Ontario. Toronto, the capital, is rapidly improving; in 1833, its population wasmales above 16, 2,597; males under 16, 1,404; total males, 4,001; females above 16, 2,155; females under 16, 1,317; total females, 3,472. In the suburbs-Macauley Town, 558; from Osgoodehall, where Macauley Town ends, to Farr's brewery, Lot-street, 400; from the eastward of King-street to the Don Bridge, taking in all about the windmill, 300, making a grand total of 8,731. In 1836, the return gives males, 4,793; females, 4,861; total, 9,654. This I presume to be exclusive of the liberties of the city.

The physical aspect of the shores of Ontario exhibits great diversity, towards the N. E. they are low, with swampy marshes; to the N. and N. W., the banks assume a bold appearance, which again subside | station is well sheltered by hills of sand and rolled to almost a plain on the southern or American shore; but well relieved in the back ground by a ridge of hills, that, after forming the precipice for the Niagara cataract, stretches away to the eastward. The country borderiug the lake is well wooded, and through the numerous openings the prospect is enlivened by flourishing settlements; the view being extremely picturesque along the white cliffs of Toronto, and the high land over Presqu'isle, called the Devil's Nose.

The principal British naval station in this neighbourhood is Pentanguishine (Lat. 45.67. Long. 79.35.), in the S. E. bight of Georgiana Bay, (which is studded depth of soil, and with fine havens) within Gloucester harbour. The easy of cultivation.

blocks.

Simcoe Lake, in the Home District, between Lake Huron and Ontario, with an area of 300 square miles, is the most extensive interior Lake of Upper Canada; the elevation of its surface (estimated by the height of the frequent falls and cascades by which its outlet is broken) is 100 feet above the level of Lake Huron, and, therefore, much higher than either Erie or Ontatario. It is proposed to connect Simcoe with Huron and Ontario Lakes by canals. The lands in the vicinity of Lake Simcoe are remarkably fine; and from the depth of soil, and equality of the surface, peculiarly

Amount of assessment for district purposes, 2,3121.

Western; it embraces the Gore, Niagara, London and Western Districts, and circumscribed by the waters of the great lakes, Ontario, Erie and Huron, it may be considered a vast equilateral, triangular peninsula, with its base extending from Fort Erie to Cape Hurd, on Lake Huron, measuring 216 miles, and a perpendicular striking the Detroit river at Amherstburgh, of about 195 miles in length, and an almost uniformly level or slightly undulating surface, except a few solitary eminences and a ridge of slightly elevated table land in the Gore and Niagara Districts, averaging 100 feet, and at some points approaching to 350 feet in height. The whole tract is alluvial in its formation, consisting chiefly of a stratum of black and sometimes of yellow loam, about which is found (when in a state pursuing our route as before from east to west, are of nature) a rich and deep vegetable mould. The

The next section of the province is termed the substratum is a tenacious grey or blue clay, sometimes appearing at the surface intermixed with sand. Throughout the country there is an almost total abofsence stones or gravel within the greatest arable depth, but numerous and extensive quarries exist which furnish abundant supplies for building, &c. The forests are remarkable for the steady growth and the rich foliage of their trees; in several places immense prairies or natural meadows exist, expanding for hundreds of miles, and with the vista delightfully relieved by occasional clumps of oak, white pine, and poplar, as if planted for ornament by man. delicious climate stretching from 42. to 44. N. latitude, it is not to be wondered that this section is one of the finest in Upper Canada. The statistics of the first,

* Total Assessment £ 1,774.

There are in the Gore district upwards of five acres of land rated as cultivated to each individual, and little more than 15 uncultivated.

The district to the southward of Gore, and termed Niagara from being bounded to the east by the river follows:-

and cataract of that name, is one of the finest and richest tracts in the world, and most elegibly situate in a bight as it were between the magnificent sheets of water, Erie and Ontario. Its statistics are as

It will be perceived from the foregoing that in this comparatively small district the quantity of land in cultivation and amount of rateable property is very large in proportion to what may be observed in the other districts; there is still, however, a large quantity of uncultivated land in Niagara.

The scenery throughout this part of Canada is extremely picturesque. Fort George, or Niagara, or Newark, formerly the seat of government (distant from Toxonto, round the head of Lake Ontario, about 40 miles) is the sea port (if it may be so called) of the district. It is situate upon a rising ground on the west bank of the river Niagara, within a mile of the angle formed by the river and the lake, protecting on our side the western boundary of the Niagara fronticr. The Niagara river enters Lake Ontario in latitude N. 43.15.30, longitude 79.00.40; the difference of height between its efflux and afflux being 344 feet on a distance of 364 miles.

The Niagara river, which connects Eric and Ontario Lakes, commences at the N. E. extremity of the former, and is the outlet not only of the waters of

Erie, but also of those vast basins of Huron, Michigan, Superior, and their thousand tributaries. The river is 33½ miles long in its bends (28 direct), and traverses a country unrivalled for its richness and fertility; on the American as well as on the British side. When first assuming the character of a river at Fort Erie, it is one mile wide, but soon contracts its bed, at Black Rock, to half a mile, and becomes rapid; but again expanding to its original dimensions, it flows on with more gentleness, its general course being from S. to N. A ferry at Black Rock, when the current is seven miles an hour, offers a sublime prospect of the mighty mass of waters rushing from the inland seas, to join their parent ocean. Beyond Black Rock, the river widens to embrace Grand Isle, twelve miles long, and two to seven miles broad, with Square Isle at its head, and Navy Isle at its foot. Below this, the river resembles a bay, more than two miles in breadth, and then narrow down the rapids to the far-famed Falls of Niagara, which are 20 miles from Lake Erie, the whole is navigable, except below Chippewa, where the indraught of the cataract begins to be felt.

This immense district has the advantage of a great | extent of water frontier along the shores of Lakes Erie and Huron, besides a large portion of the Thames and the rivers Ouse on Lake Erie and Aux Sables and Maitland on Lake Huron. London, though at present small, is in the heart of a fertile country on the banks of the beautiful river Thames, and will no doubt rapidly increase.

By recent information we learn that there is in progress a railroad making between Chatham, on the Thames, to London, thence to Hamilton, on the head waters of Lake Ontario, which will connect Lakes Huron, St. Clair, Erie, and Ontario; and from the work already performed, it will be quite equal to the Manchester rail-road. Ten years since not a white inhabitant was within 20 miles of this town. There is now upwards of 20,000 active and industrious inhabitants in this township, with four mills, six pair of French burr stones, two breweries, many saw-mills, &c. Ten steam-boats, some of them upwards of 700 tons, plying between this and Lake Michigan, Detroit, Goderich, Sandwich, Chippewa, and Buffalo, &c. with one of the most productive soils in the world, that will yield 18 to 20 barrels of the finest white wheat per acre, without any manure, from 10 to 15 years to the consideration of the intending settler.

come. No rent, tithes, taxes, &c., to pay, except 6d. per acre per year, the government tax for making roads, bridges, &c., after the land has been reclaimed seven years. In the township are two large Protestant churches, four Methodist meeting-houses, two Presbyterian and two Quaker meeting-houses, a Roman Catholic chapel, three endowed schools, two newspapers (published three times a week), a ladies' boarding-school, an excellent commercial and classical academy, and an agricultural society has also been established here; all creeds live on very friendly terms, much united, and endeavouring to forward each other's views and interest by mutual good offices.

About the central part of the north coast of Lake Erie, the eccentric but just and philanthropic Colonel Talbot has founded a settlement which reflects credit on his head and heart. Ever since the year 1802 this benevolent man has persevered in opening the fine country around him to the English emigrant. The Upper Canada Company have their land in this district. The scenery around which, on the river Maitland, is more English-like than any other in America.

Extensive roads are now making in every direction, and the London district offers a most eligible spot for

Exclusive of 302,420 acres (472½ square miles) given over to Colonel Talbot for settlement, in the London and Western Districts.

The foregoing detail will afford a more complete and accurate view of the progressive state of the colony, than pages of descriptive writing; the reader will perceive the increase of population in each district for a series of years, then its actual amount at present—the quantity of land cultivated and occupied by that population, the stock on the land, and the value of the property sunk therein; to this I add, in order to render the view complete, the following table of the number of houses occupied in each district, the sort of houses (indicating comparative stages of wealth) and even the additional fire-places, which luxury or convenience may require; also the number of merchants' warehouses and stores, the number of different kinds of mills, and the vehicles kept for pleasure; let those who peruse these facts remember that the comforts and wealth thus produced, within a few short years, arise from the combination of industry, capital, and intelligence applied to a fertile soil.

Number of Houses, Mills, Stores, &c. in each district, for 1835.

Manufactures, Mines, and Fisheries, in 1836.—The assessment rolls for the year, give the number of grist mills, 599, and saw mills 903, in the province. Woollens for domestic use are manufactured throughout the province. Whisky distilleries, breweries, tanneries, and pot and pearl ash manufactories are very numerous.

Johnstown District. — One steam engine, foundry, one brass foundry, one soap and candle factory.

Prince Edward District. —There are carding machines, six fulling mills, one plaister and one oil mill, one foundry, one air furnace, and 10 carriage factories.

Midland District.—One air furnace, one iron foundry, with a steam engine driving powerful lathes for steam machinery, machinery for making hat bodies,

one paper mill, and six carding and fulling machines.

Niagara District.—Nine fulling mills, 14 carding machines, five spinning mills, and one salt manufactory.

Western District. — Three carding mills, and one iron foundry.

Newcastle District.—12 Fulling mills.

Johnstown District.—Iron and copper mines in Lansdown; a copper mine in Elizabeth Town; two marble and limestone in abundance. Niagara District.—Lead ore has been discovered in Clinton Midland District.—Iron works at Marmora and Madoc. Western District.—Iron ore in abundance, and a good lime stone quarry in Malder.

Ship building is confined to steam vessels and

schooners, for the lakes and rivers. Several of them | 500 acres; 59 patents=47,981 acres. The total No. are annually launched upon the lakes. Steam vessels average from 50 to 500 tons. The schooners from 20 to 100 tons. Provincial statute, 4, Geo. 4. ch. ii. sec. 9, renders it imperative on all masters of vessels to make a report of their arrival at any port of entry, to the collector of customs at such port.

Iron ore of very good quality is abundant in many parts of the province. On the banks of the Grand River are extensive beds of gypsum; stone for lithographic purposes is found in some of the districts.

Lead ore has been discovered in the Niagara district, and a lease been granted to John Lea (plumber) of all that he may raise. Specimens of lead and zinc ore have been exhibited in the Midland district, but little is known of their locality or value.

There are no regularly established fisheries, but many hundred barrels of white fish are taken annually. Salmon, trout, pike, black and white bass, maskinorge and sturgeon, are caught in large numbers, and of a large size. They are either taken by seines or speared.

Number of grants of land in Upper Canada in 1836. Under 100 acres, 1662. Total granted thus, 134,603 acres. Number of grants above 100 and not exceeding 500, 1951 acres = 382,858. Grants exceeding of grants 3672 = 565,442 acres. Average price of Crown lands in 1836: per acre, 9s. currency; ditto. Clergy ditto. 13s. do. do.; ditto of school ditto. 12s.

The total number of grants which have passed the great scal, commencing from the year 1792, amount to 8,986,423 acres, exclusive of 1,069,262 acres to the Canada Company.

The total quantity of surveyed lands remaining ungranted amounts to 1,576,326 acres, exclusive of 302,420 acres given to Col. Talbot for settling, the greatest portion of which is located, but no return yet made.

Statements showing the quantity of surveyed lands in the province of Upper Canada, remaining vacant and grantable; Decr. 31st, 1836.

Number of acres in surveyed townships, remaining unlocated, 31st Decr. 1835, 1,624,303 acres. Townships returned, surveyed during 1836. Township of Euphrasy, 51,600 do.-do. of Matchedash, 53,120 do. -do. Ashfield, 52,056 do. Total 1,781,079 acres. Deduct lands located during 1836, 184,753 acres. Total quantity of surveyed lands, remaining vacant and grantable, 31st Decr. 1836, 1,576,326 acres.

Detailed statement of rateable property for the year 1836.

VII. The established church of Upper Canada is within the diocese of the Bishop of Quebec, whose subordinates are the Archdeacons of Toronto and Kingston, who have under them about forty clergymen: the number of churches of the Protestant faith throughout the Province being about fifty. The returns of the clergy, churches, &c. of the Episcopalian, Presbyterian, and Roman Catholic persuasions are very complete.

Independently of a clergyman of the Established

Church to each parish, there are ministers of several other persuasions. Of the Presbyterian Church, in connexion with the Church of Scotland, there were recently in Upper Canada, 21 ministers and preachers; of the United Synod of Upper Canada, 20; of the Roman Catholic clergy, 20; namely, one bishop and 19 priests, with 35 chapels built and building. The bishop receives 500l. per annum from Government, and the clergy 1,000l. a-year divided among them as a Government appropriation. The Methodist Episcopal

of England, 7,065l.; Ditto of Scotland, 1,541l.; Ditto of Protestant Synod of Upper Canada, 699l.; Roman Catholic clergy, 1,000l.; contingent religious expenses, 639l.; total, 12,047l.

VIII. There are no statistical returns showing the progress of education in Upper Canada similar to those given under Lower Canada; in each district there are boards of education, trustees of public schools, and government schoolmasters.

Return of the number of Schools in Upper Canada.

Name of District.	Where situate.	Remarks.
Eastern Ottawa Johnstown Bathurst Prince Edward Midland Newcastle Home Niagara Gore	Cornwall Hawksbury Brockville Perth Hallowell Kingston Cobourg Toronto Niagara Hamilton	Salary of district school-mrs.90l.stg. The average number of scholars in each school is from 45 to 60. There are school fees, which may average 4l. or 5l. per ann. Each district furnishes a
London Western	London Sandwich	school-house, and keeps it in repair.

Upper Canada College and Royal Grammar school, city of Toronto, in the Home district—Principal, 600l.; first class master, 300l.; second ditto, 300l.; third ditto, 300l.; mathematical master, 300l.; French ditto, 200l.; writing and arithmetic, 200l.; assistant ditto, 100l.; master of preparatory school, 175l.; drawing master, 100l. The above masters have houses in the college premises.

There are upwards of 100 scholars in the respective forms of the college. The terms at the Upper Canada College are 30l. currency per annum for board and tuition, with some extra college dues. At the York National Central School, which gave instruction in the year ending April, 1833, to 402 boys and 235 girls, the terms for instruction to those who are able to pay is one dollar per quarter, and no family is required to pay for more than two children, no matter how many there be.

This return is confined to the district schools. The common schools are not regularly returned, but they amount to several hundred, and instruct at least 20,000 children, male and female. In addition to 901. sterling provided by the Legislature, for the salary of a classical master (which insures in each district a school in which the common branches of an academical education are taught), 225l. sterling per annum is allowed for the maintenance of common schools in each district. This last sum having been found totally inadequate, the Legislature have for some time past made an additional annual grant of 5,085l. sterling, to be apportioned among the several districts, according to their extent and population. By additional instructions from his Majesty, dated 13th February, 1836, an instrument was completed under the great seal of the Province, incorporating the Upper Canada Academy, at Cobourg, in the Newcastle District, for the general education of youth in the various branches of literature and science, on christian principles, and appointing certain Wesleyan ministers and others to be a board of trustees for managing the same.

The territorial appropriations, with a view to provide means of public instruction, are truly munificent.

The number of acres of land originally reserved in

Upper Canada for purposes of education amounted to 467,675, of which 170,719 acres were alienated by grant to individuals, and in lieu thereof 272,600 acres were appropriated to a similar purpose, giving a surplus over and above the quantity deficient of 101,881. There were also alienated, as a per centage to surveyors, 19,282 acres. Since this reservation 225,944 acres have been re-invested in the crown in lieu of scattered reserves granted as an endowment to the University of King's College, and 66,000 acres have been set apart for the benefit of Upper Canada College; after which there yet remains 258,330 disposable acres for the benefit and extension of education. The legislature also grants from 4,0001. to 8,0001. per annum. In 1836, the amount voted was 8,0551.

The state of the gaols in the Province is thus returned in the Blue Books—

If the foregoing return be correct, it exhibits a considerable increase in the number of prisoners, even allowing for the augmented population since 1828. The principal increase is in the misdemeanours; but the felon list is also much extended since 1828. Considering, however, the population of the colony, the number of prisoners is very small.

The prisoners are allowed bread, beef, pork, potatoes and salt, average cost for each prisoner, 3s. 6d. per week. No clothing allowed, but bedding where necessary. Average cost per annum, 15s. to 20s. per head. Prisoners are allowed to work at their own trade for their own benefit.

X. The government of the colony has been administered since 1791, by a Lieutenant-governor, an Executive Council (five members), a Legislative ditto (30 members), and a House of Assembly or Representatives (sixty-two members). The Executive Council members are chosen by the Crown and the Lieutenant-governor. The presiding councillor is the Archdeacon of the province.

The Legislative Council is not composed (as in many chartered governments) of the same body that constitutes the Executive Council of the government, it is, in fact, a deliberative assembly distinct from the executive department, and composed of members from various districts of the province, who hold their office for life, whose duties are exclusively legislative, and in which all that is done is openly and publicly discussed, and proceeded in according to the same formalities as are observed in the representative branch of the legislature.

The House of Assembly has representatives for counties forty-six; for towns four; namely, Toronto, one; Niagara, one; Kingston, one; and Brockville, one: Lincoln county returns four members; the other twenty-six counties two each; excepting Haldimand one; Kent one; Simcoe one; Lennox and Addington one each; Prescott and Russel one; Carlton one; and Lanark one. The proceedings of the House are in English, and not as in Lower Canada, in French; the journals regularly printed, and the debates in form after the manner of the British House of Commons. The elective franchise, &c., is the same as in Lower Canada, as are also the other points not mentioned in this section.

The law is administered by a Court of Queen's Bench, with two puisné judges, and in each of the eleven districts there is a district judge; there are also quarter sessions, &c., as in England. The magistrates amount in number to nearly 500, dispersed over each district, according to its population and extent.

Upper Canada is now in a very different position to defend itself from an incursion across the frontier by the Americans as compared with its condition during the last war; it has at present about sixty regiments of enrolled and embodied militia, with a colonel, lieutenant-colonel, and major, about nine captains, ten lieutenants, and ten ensigns to each regiment, with upwards of 50,000 as gallant rank and file as could be turned out in any part of the united kingdom.

Militia Return to Colonial Office for 1836.—Officers, 1,757; non-commissioned officers, 1,600; rank and file, 39,131: total, 42,488. Included in the above, are 18 troops of cavalry and 5 companies of artillery; the latter have three light field-pieces, and the former are armed, but not completely.

XI. The general revenue for the purpose of supporting the government in Upper Canada, and administering the laws, is raised by a duty of 21 per cent. on all goods and merchandise imported by sea, at the ports of Quebec or Montreal; wines, liquors, and certain articles of luxury, have a specific duty laid upon them. This duty is paid by the importer at the Custom-house Quebec, Upper Canada receiving one third of the sum collected each year. This amount, with a duty upon shop and tavern licences for vending spirits, distillers, hawkers, pedlars, and auctioneers, and a duty upon certain imports from the United States, which are also paid by the importer, form the public resources of the province, and is at the disposal of the Provincial Legislature, for the payment of public officers, and for such general purposes as may be deemed essential to the welfare of the people and the interest of the province.

It will be observed that the largest part of the income of Upper Canada arises from the duties paid in Lower Canada, at the ports of Montreal and Quebec. The casual and territorial revenues of 13,032l., includes for 1836, 7,795l. of duties on crown timber; 2,961l. proceeds of sales of lots in the military reserve, Toronto; 2,645l. patent and surveying fees on grants of land and leases; 581l. sales of crown lands; 864l. crown's proportion of seizures; 383l. rents of mines, ferries, &c., and the remainder of fines, &c. The internal revenue of the province, consists of duties levied on spirits, both on the distillation and sale; of the importation of salt (6d. per bushel) from

the United States; on licences to auctioneers, inn- | the expense of collection is 3821.. leaving net 1,2351. keepers, pedlars, hawkers, &c.; and some tolls, levied at the Burlington Bay Canal. There are 840 innkeepers, who pay each from 3l. to 10l., the duty amounting to 3,6431.; and 443 shopkeepers, licensed to sell spirituous liquors, who contribute 1,5051.; the number of stills, in gallons measure, is 5,846, paying 7301.; and three steam-boats to pay 151., being a total currency on those four items of 5,394l—gross, or deducting the allowance to inspectors, 565l—5,329l. Salt, imported from the United States, yields 1,617%; and

The hawkers and pedlars on foot, pay 51. annually; and those who travel with one horse, 10*l*.; two horses, 15*l*.; the gross amount of revenue from this source is 520.—(collector's allowance, 26l.); net 494l.; levied on—41 foot pedlars, 30 one-horse pedlars, there being only one pedlar or hawker with two horses. The number of auctioneers is 23, who pay yearly 5l. for a license, together with duty on sales; which, for 1832 amounted to 2511.

The following Yearly Statement is collated from the Blue Books.

837	1				

A revenue is also derived from the lands sold to the Upper Canada Company, the first instalment of

the 29th July 1827, amounted to 20,000l.; in 1828, 15,000l.; in 1829, 15,000l.; in 1830, 15,000l.; in 1831, 16,000l.; in 1832, 17,000l.; in 1833, 18,000l.; and in lieu of sundry fees, &c. 1,7761.; being a total in seven years of 117,776l. In 1834, the amount payable by the Company will be 19,500i., and every subsequent year 20,000i., until the whole sum of 348,680%. be paid in 1842.

Return of all local revenues raised and appropriated under the authority of any municipal, or other body, not accounted for in the general revenue of the colony:—Provincial Statute 4th Will. IV. c. 23, erected the town of York into a city, and incorporated it under the name of the "City of Toronto." By the said Act, the mayor and common council are authorized to levy a tax on property in the city and liberty, not exceeding in any one year 4d. in the pound in the city, or 2d. in the pound in the liberties. The magistrates of several towns are allowed by Acts of the Legislature, to levy rates for the improvement of the streets, &c., not exceeding 901, sterling per annum.

The following is extracted from a Return of Rateable Property in the City of Toronto and Liberties, furnished by the Clerk of the Common Council, being for the year 1836.

Name of Ward.	No. of Acres for Cul- tivation.	No. of Town Lots.	No. of Houses.	No. of Merchants Shops.	No. of Storehouses.	No. of Horses.	No, of Cattle.	No. of Carriages, &c., kept for pleasure,	Total Value in Ster.	Property.

Amount of tax at 3d. in the pound sterling, 2,445l. 17s.

The expenditure of the above, is devoted solely to the improvement, &c. of the city. During the year a common sewer has been completed through the centre of the main street, and communicating with the bay. Side-paths have been laid down, and the principal street in, and approaches to, the city macadamized and paved.

The letter postage includes the British and sea postage, as well as the internal rates in the provinces.

The nett proceeds, after defraying the expenses of the establishment in the provinces, and the conveyance of the mails, &c., are remitted to the General Post Office, London

The sums received for the transmission of newspapers and pamphlets by post, have, ever since the establishment of the post-office in British North America, been the emolument of the deputy postmastergeneral, out of which he allows to his sub-deputies a commission for collecting, of from 10 to 20 per cent., which allowance is in addition to their salaries or commission as postmasters.

For 1827 and part of 1828, materials cannot be found for making up a perfect statement of the sums received for the transmission of newspapers.

Gross amount of Newspaper Postage paid by each Proprietor of Newspapers in the Canadas, since 1827.

The foregoing return is collated from the Journals lishing, as their names are omitted from the lists. of the House of Assembly, and the latest year printed in the return for 1834, 48 journals are named, some is for 1834. There are several journals mentioned in different years; but they appear to have ceased pubyear or more duration: four are published at Quebec,

Niagara, St. Catherines, St. Thomas, Cobourg, and Perth; and one journal at each of London, Sandwich,

eight at Montreal, eight at Toronto, four at Kingston, | Dundas, Brantford, Port Hope, Belleville, Brockville, three at Hamilton; two at each of the towns of Prescott, Cornwall, Stanstead, Sherbrooke, and St. Charles.

The Post-office receipts for Upper and Lower Canada for five years, is thus shewn—the increase indicates augmented Traffic.

The local taxes or district rates are collected from each individual, at the rating of one penny in the pound, according to the quantity of land and other property he may possess, agreeable to the assessed value fixed by law, viz.-

Every acre of arable, pasture, or meadow land, 11.; every acre of uncultivated land, 4s.; every town lot, 501. Every house built with timber squared or hewed on two sides, of one story, with not more than two fire-places, 20%; ditto for every additional fire-place, 41. Every house built of squared or flatted timber on two sides, of two stories, with not more than two fire-places, 301.; ditto for every additional fire-place, Every framed house under two stories in height, with not more than two fire-places, 351.; ditto for every additional fire place, 54. Every brick or stone house of one story, and not more than two fire-places, 401.; every additional fire-place, 101. Every framed, brick, or stone house of two stories, and not more than two fire-places, 601.; ditto for every additional fire place, 10l. Every grist mill, wrought by water, with one pair of stones, 1501.; ditto with every additional pair, 50l. Every saw-mill, 100l. Every merchant's shop, 2001. Every store-house, 2001. Every stone-horse, 1991. Every horse of the age of three years and upwards, 8l. Oxen of the age of four years and upwards, 4l. Milch cows, 3l. Horned cattle, from two to four years and upwards, 41. Every close carriage with four wheels, kept for pleasure, 100l. Every open carriage, or curricle, ditto, 251. Every other carriage, or gig, with two wheels, ditto, 20%. Every waggon kept for pleasure, 151. Every stove erected and used in a rooom, where there is no fireplace, is considered as a fire-place.

Every person inserted on the assessment roll is, in proportion to the estimate of his property, held liable to work on the highways or roads in every year, as follows:—If his property be rated at 25l. 2 days; ditto 25l. to 50l. 3 days; ditto 50l. to 75l. 4 days; ditto 751. to 1001. 5 days; ditto 1001. to 1501. 6 days; ditto 150l. to 200l. 7 days; ditto 200l. to 250l. 8 days; ditto 2501. to 3001. 9 days; ditto 3001. to 3501. 10 days; ditto 350l. to 400l. 11 days; ditto 400l. to 500l. 12 days.

For every 1001. above 5001. to 10001. 1 day; for every 2001. above 10001. to 20001. ditto; for every 3001. above 20001. to 30001. ditto; for every 5001. above 3500l. ditto.

Every person possessed of a waggon, cart, or team of horses, oxen, or beasts of burthen or draft used to draw the same, to work on the highways three days. Every male inhabitant, from 21 to 50, not rated on the assessment roll, is compelled to work on the highways three days. Persons emigrating to this province, intending to become settlers, and not having been resident six months, are exempt; and all indigent persons, by reason of sickness, age, or numerous family, are exempt at the discretion of the magistrates.

Any person liable may compound, if he thinks fit, by paying 5s. per day for each cart, &c., and 2s. 6d. for each day's duty; to be paid within 10 days after demand made by an authorized surveyor, or the magistrates can issue their distress for double the amount and costs. Members of the House of Assembly, for townships, are paid 10s. per day during the sitting of the House, from an assessment upon the inhabitants, apportioned according to the foregoing assessment scale. Members for towns are not paid. A police tax of 1001. per annum is raised from the inhabitants of York, according to the same assessment scale.

The taxes applicable to local purposes, levied and collected under the denomination of rates and assessments by authority of Provincial statute 59 George III. c. 7; and for paying the wages of the Members of the House of Assembly, by authority of 43 George III. c. 2, amounted during the present year, in the 12 districts respectively, to the following sums:-Eastern, 1782l.; Ottawa, 490l.; Johnstown, 1471l.; Bathurst, 882l.; Prince Edward, 1205l.; Midland 27231.; Newcastle, 17521.; Home, 28041.; Niagara, 21801.; Gore, 27481.; London, 2767; Western, 10321.; total, 21,842l.

Resolutions for raising 500,000l, for making roads, &c. [Journal of House of Assembly.]

1st. Resolved. That for the purpose of providing the ways and means for payment of the interest on the sum of 500,000l., to be expended on the public highways in this province, that the statute labour, now by law required to be performed, be commuted for a certain sum to be paid in lieu thereof.

2nd. Resolved, That the sum at which the commutation be fixed be 2s. 6d. for each day.

3rd. Resolved, That the following additional rates be imposed on the inhabitants of this province, the proceeds whereof to be applied to the payment of the interest of the said sum of 500,000l. :-

Every horse (not being a stallion used for covering mares), gelding, or mare, over three years old, 1s. 3d. Every stallion used for covering mares, 2s. Every single horse pleasure waggon, 2s. 6d. Every twohorse pleasure waggon, 5s. Every two-wheeled carriage used for pleasure, 5s. Every four-wheeled open carriage used for pleasure, 10s. Every four-wheeled close carriage used for pleasure, 15s. Every fourwheeled carriage used for the conveyance of passengers, 21. 10s. Every still-house, where spirituous i discretion deem expedient, and that the amount of liquors are distilled, 51.

4th. Resolved, That a sum be appropriated to each township, in proportion to the sum levied and paid by such township.

5th. Resolved. That the amount to be levied according to the foregoing resolutions be first paid to the Treasurers of Districts, by collectors of towns and townships, and be by them transmitted to the Receiver General of the Province.

6th. Resolved, That a list containing the names of persons assessed, and the amount paid by each, be delivered to the Treasurer of Districts, by the respective collectors of towns and townships, and by the Treasurer returned to the Inspector General.

7th. Resolved, That each lot of 100 acres of land, situated on any leading road, when this money is expended, and not having a resident thereon, shall be subjected to a tax of 5s. a year as a compensation for statute labour.

8th. Resolved, That the money appropriated to each township be expended under the direction of commissioners, to be appointed by the Lieutenant Governor, or person administering the government of the province.

6th. Resolved, That toll gates be erected on such roads and bridges as the commissioners shall in their

tolls exacted be regulated by such commissioners.

The following are the principal items of expenditure provided for by the Crown funds :- Lieutenant-Governor, 1,034l.; Government office, 210l.; Executive Council, 2001.; Receiver General, 2001.; Secretary and Registrar, 9361.; Inspector General, 2001.; Surveyor General, 366l.; Commissioner of Crown Lands, 500l; Surveyor General of Woods, 500l.

Repairs to Burlington Canal, 6751.; roads and bridges, 3481.; location and subsistence of commuted pensioners, 604l.; ditto of emigrants, 3,017l.; payments for Indian lands ceded to government, 5.9471.: Government proportion of the expense of surveys of Canada Company, 3091.; repairs of Government house, 1,305l.; Upper Canada College, 1,000l.; Central School at Toronto, 3531.; Maps for the Surveyor General, 1801.; Missionaries of the Church of England, 2,5651.; Ministers of the Church of Scotland. 1,5411.; Ministers of the United Presbyterian Synod of Upper Canada, 6991.; Roman Catholic Priests, 1,500l.; House rent for Lord Bishop of Quebec, 180l.; Pensions, 1,598l.; Salary of Governor of Upper Canada, 3,0001. and house, no fees (salary paid by Province); Chief Justice, 1,5001. no house; two Puisne Judges, 9001. each.

The expenditure of the Province is thus given in the Blue Books—

the minimum; no good ever accrued from paying scantily the servants of a private person—and in the case of the public servants, I have seen enough in the ! Prench, Dutch, and Portuguese colonies, to compel me to impress strongly on the minds of my countrymen, the necessity of paying the officers of the government salaries, not merely sufficient to keep them honest, but such as will hold out a temptation for the greatest virtue, and the highest talent to take office. The salaries in Upper Canada of the public functionaries, appear to me barely adequate to the end which ought ever to be kept in view-honesty and ability.

The following sums were paid by the province in 1836:—Civil Establishment, 14,820l.; Contingent Expenditure, 4,909l.; Judicial Establishment, 5146l.; Contingent Expenditure, 911.; Ecclesiastical Establishment, 11,407l.; Contingent Expenditure, 639l.; miscellaneous expenditure, 176,503l.; pensions, 2444l. Total, 215,9621. The expenditure from the revenue of Upper Canada by its Legislature, for the improvement of the navigation of the river St. Lawrence

The taxation is small. The public salaries are at | (commenced in 1834), amounted, in 1836, to 207,000l. and the whole estimated expense is 315,000l. stg.

In the British parliamentary estimates for the year ending 31st March, 1839, the following sums were voted for the expense of the Indian Department of Upper and Lower Canada :-

Estimate of the probable expenditure of the Indian Department in Lower and Upper Canada, for its establishment and pensions, from 1st April, 1838, to 31st of March, 1839, 19,153l. 12s.

Lower Canada.—Secretary, Quebec, 224l.; Interpreter, Three Rivers, 96l.; Missionary, Restigouche, 69l.; Missionary, Lorette, 46l.; Schoolmaster, Lorette, 181.; Superintendent, Montreal, 2161.; one Interpreter, Montreal, 361.; two Missionaries, Montreal (461. each), 921.; one Missionary, Montreal, 411.; three Schoolmasters, Montreal (201 each), 621.; total, 9651.

Upper Canada.-Chief Superintendent, Toronto, 350L; Assistant Superintendent, River St. Clair, 128L; Interpreter Superintendent, River St. Clair, 961.; Superintendent, Coldwater, 2161.; Interpreter, establishment, 1,8521.

Retired Allowances, Pensions, and Gratuities. Lower Canada.-L. J. Duchesnay, late Superintendent at Quebec, 801.; G. Maccomber, late Interpreter, 361.; J. B. De Niverville, ditto, 551.; Madame de Montigny, widow of Capt. Montigny, 271.; Madame D' Eschambault, widow of Capt. D'Eschambault, 701.; Madame Vincent, widow of Louis Vincent, Schoolmaster, 101.; one Chief of Indian Tribes, for wounds in action, 211.; three Warriors of Indian Tribes, for wounds in action (151. each), 451.; total, 3461. J. G. Chesley, late resident at St. Regis, a gratuity of 781.

Upper Canada.-Col. Givens, late Chief Superintendent, 371l.; J. B. Clench, late Superintendent at Colborne, 100l.; Alexander M'Donell, retired Assistant Secretary, 85*l.*; David Price, retired Store-keeper, Clerk and Interpreter, 79*l.*; Benjamin Fair-child, retired Interpreter, 50*l.*; Sarah Elliott, widow of Col. M. Elliott, 74*l.*; Catherine Brant, widow of Capt. Brant, 851.; Hester Hill, widow of D. Hill, Mohawk Chief, 181.; Timothy Murphy, superannuated blacksmith, 391.; two Warriors of Indian Tribes, for wounds in action (15l. each), 30l.; total, 933l. Gratuities: George Ironsides, late Superintendent, Amherstburg, 1081.; James Winniott, late Superintendent, Brentford, 541.; Jacob Marten, late Interpreter, Brentford, 201.; total, 1821.

Amount for retired allowances, &c., in Lower and Upper Canada, 1,2791.; amount of gratuities, ditto, ditto, 2601.; ditto of effective establishment, 1,8521.; total, 3,3921. Expense of Indian Present, Stores, &c. 15,762l. Grand total, 19,155l.

This estimate is less by 344l. than that voted last year. The saving arises from a reduction in the number of officers employed in the department. In future years the saving will amount to 6041. there being placed on this estimate a charge of 260l. for gratuities to some of the officers whose situations have been abolished

As considerable interest is felt respecting the debt which Upper Canada is incurring for public works, I subjoin the following detail, as printed in the proceedings of the House of Assembly in 1833. The total amount outstanding of debentures in provincial currency is 138,833l. at an interest of five and seven eightlis per cent. per annum; 52,666l. in debentures, bearing six per cent. have been redeemed-namely, 25,000l. for the militia; 16,000l. for the public service in 1824; 3,000*l*. of the Burlington Canal; and 8,666*l*. of the Welland Canal: of the debentures outstanding the several amounts are, Burlington Canal, 5,000l.; Welland ditto, 16,334l.; Burlington ditto, 4,500l.; Welland ditto, 50,000l.: Kettle Creek Harbour, 3,000l.; Welland Canal, 25,000l.; Burlington, ditto, 5,000l; Oakville Harbour (loan to Mr. Chisholm), 2,500l.; roads and bridges, 20,000l.; Kettle Creek Harbour, 2,500l.; Port Hope Harbour, 2,000l.; and Cobourg Harbour Loan, 3,000l. Total, 191,500l. The interest is paid half yearly, as the debentures fall due, and their amount varies from 25 to 100l.

In 1833, the Provincial Legislature authorised the borrowing of money by debentures to the extent of 70,000l., to be applied to the improvement of the St. Lawrence, but only to bear five per cent. interest, and not the usual interest of six per cent.; the consequence was, that the money would not be lent in either of the Canadas, or in the United States; Mr. Dunn, the Receiver-General, was then sent to England, and subsequently authorized to negociate a loan with the house of Thomas Wilson and Co. (paying

Coldwater, 961.; total, 8871. Amount of effective | interest five per cent. in London, or six per cent. in Canada), to the extent of 200,000%. for the purpose of redeeming the debentures that have been issued from year to year for the Welland Canal, &c., as stated in the preceding page. The Upper Canada legislature have also sanctioned the borrowing of 350,000l, for making the St. Lawrence navigable for ships from Montreal into Lake Ontario; of 50,000l. to pay the debts due by the Welland Canal, and to keep it in order; and of 45,000l. for making roads and bridges in the province; these sums, together with the existing Upper Canada debt, 258,1381, will make the whole debt, including minor items, upwards of 800,000.

The following is a report of the Finance Committee of the House of Assembly of Upper Canada. [From H. A. papers, January 19, 1837.]

To the Honourable House of Assembly:

The Finance Committee, to whom were referred the public accounts sent down to your honourable house in the present session, have taken into their consideration the public debt of the province, with the amount required for the payment of interest thereon, together with the permanent and unavoidable charges upon the public revenues, as also the amount of the ordinary resources of the province, for the purpose of submitting the same, in as compendious and explicit a manner as possible, as their first report.

They find the public debt, on the 1st January last, to amount to 587,6711, of which 178,3501, is due in this province, bearing an interest of six per cent. and 409,321 in England, payable there at an interest of five per cent. The amount of the loans contracted in England are, in currency, 666,6661.; of which were drawn on the 1st January, 409,3211.; leaving still to be drawn to meet the several appropriations of the legislature, 256,3451.; which, with 10 per cent. premium, will make the sum of 283,0791. Of the public debt, the following sums have been appropriated for the purposes hereinafter respectively named:—St. Lawrence Navigation, 253,000l.; Welland Canal, 209,500l.; Burlington Canal, 29,091l.; Inland waters, Newcastle District, 16,0001.; Tay Navigation, 1,0001.; Desjardin's Canal, 12,000; Kettle Creek Harbour, 6,5001.; Port Hope Harbour, 2,0001.; Cobourg Harbour, 4,0001.; York Harbour, 2,0001.; River Trent Bridge, 4,6251.; Brantford Bridge, 1,500; Dunnville Bridge, 1,250; Paris Bridge, 1,500%; West Gwillimbury Bridges, 5001.; Roads in the vicinity of York, 45,0001.; Bank of Upper Canada, 25,000/.; total, 594,466/.

All or most of the objects for which the above outlay has been made are such as, in the opinion of this committee, will eventually pay principal and interest, and be a productive source of revenue to the province; and cannot therefore be considered in the light of a debt contracted and chargeable on the funds of the province, for which no specific return is expected.

In a new country like Canada, with a limited revenue, great public works can only be constructed upon the credit of the province; and such credit should be freely extended, when it can be safely calculated that the proceeds of the works will shortly pay the interest and eventually redeem the principal. Specific ways and means should, however, be provided to meet the interest, when it cannot be borne from the ordinary revenues. The amount of interest payable on the present debt is 10,086l. in Upper Canada and 20,466l. in England, in all 30,5521.; and when the balance of the loan effected in England shall be drawn, the whole amount of interest payable will be 43,420% annually. According to the estimates and the information obtained by your commissioners, the probable amount

required for the public expenditure, in the year 1837,

will be 299,220. as follows, viz.

Interest on the public debt, 40,000.; permanent appropriation for the administration of justice, 7,223/.: required for civil expenditure, 9,8921.; contingencies of the Legislature, 11,000l.; common schools, 3,150l.; district school masters, 1,2001; militia pensions, 900%; officers of the Legislature, 890%; maintenance of light houses (by law), 600l.; ditto (additional sum required), 1,000%; Adjutant-General of Militia, 650%; Inspector-General, 4061.; Receiver-General, 7781.; six pensioners, 1201.; improvement of the St. Lawrence, 97,0001.; Provincial Penitentiary, 5,0001.; amount appropriated by acts of last session, 104,938/.; amount appropriated by acts of present session, 9,473%; redemption of debentures, 5,000%. The balance to be drawn on the loans in England, with the probable premium thereon, is 283,0791.; probable amount of revenue to be received from Lower Canada, 53,000/.; ditto from Upper Canada, 28,0001.; total, 364,0791. -the sum required for the year 1837, 299,2201.; balance for the present year at the disposal of the Legislature, 64,8591. The permanent charges upon the revenue of the province, including the interest upon the loans, the contingencies for the support of the Legislature, light houses, &c. are in round numbers, 86,000/. The ordinary resources to meet this expenditure will be, received from Lower Canada, 53,0001.; ditto from Upper Canada, 28,000/.; total, 81,000/. Leaving to be provided to pay interest in 1838, 5,0007.

Security for the discharge of duties in Upper Canada, 1836. Receiver-General, 80,000l.; Commissioner of Crown Lands, 10,000l.; Agent for sale of clergy reserves, 10,0001.; Secretary to Colonial Corporation, 2,0001.; Sheriffs, 2,0001.; Inspectors of Licenses, 1,0001.; Collectors of Customs, 2,0001.

As the Post Office Department in the colonies requires considerable attention, an extract is given from a report made to the House of Assembly of Upper Canada by the Finance Committee, and printed in the journals for 1836. Appendix, Vol. I. No. 52.

"Your committee have not the means of ascertaining whether the statements laid before them as computed by Mr. Stayner, the Deputy Post Master General at Quebec, are or are not correct. They have been obtained with great difficulty after the delay of a year had taken place from the date of the address of the House to the late Lieutenant Governor requesting information, they enter into many minute and important details, and as reported herein they contain the greatest fund of information on the subject of the financial affairs of the post office of the Canadas ever laid before the Legislature. From a perusal of their contents it will be seen, that in 1834 the number of post offices in the Canadas was 234, or three less than in 1833; the number of miles of post roads only 3,988, or seven less than 1833; the wages to carriers, 10,371%; the salaries, 3,467%; the contingencies, 1,0051.; the dead letters, 1,5291.; the gross revenue, 30,6321., of which 12,0921. were remitted to London.

"The salaries in both provinces are stated in the returns, of which the above is an abstract, at 3,4671. Elsewhere the emoluments of the post masters in Upper Canada alone for the same year are made to be 4,7321. Hence it is evident that the above sum of 30,6321. is not the gross postage."

The gross letter postage of Upper Canada in 1832 is given at 14,009/.-in 1833, 16,510/. and in 1834, 17.680/. or 48.199/. in these three years.

The gross newspaper postage for this province

for 1832, was 1,336/.--for 1833, 1,433/, and for 1834 1,231*l*, or in these three years, 4,000*l*.

"Nearly the whole of the newspaper postage, 4,000/., went to Quebec and formed a perquisite of Mr. Stayner's office there. Of the gross letter postage reckoning in the proportion that the whole revenue derived from the Canadas bears to the whole revenue derived from Upper Canada, which is the greatest part, upwards of 20,000% of specie have been taken out of the province and sent to London chiefly as profit or surplus revenue.

"Mr. Stavner states that he has remitted to London of surplus postage collected in both Canadas, as follows:-In 1832, 12,519/.; 1833, 10,833/.; 1834, 12,0921.; or in three years, 35,4441. a very small part of which was British postage. The inland postage of letters from Nova Scotia and New Brunswick, from both Canadas, in 1834, was only 5621. Mr. Stayner transmitted to Washington, as United States revenue, in and for 1834, 22,351 dollars.

There were collected in the Canadas, in 1834, of Inland British American postage on letters forwarded to England by the Falmouth packets, via Halifax, 161. 4s. 6d.

"Among the papers laid before the house are detailed statements of the expense of conveying the mails in both Canadas in each of the following years, viz. 1832, 8,644/.: 1833, 9,896/.; 1834, 11,203/. And Mr. Stayner states the contingent expenditure of the department, which is chiefly in the Lower Province, for printing, advertising, mail locks and keys, seals and stamps, &c. at, for 1834, 1,8741.

"There is also a large and costly establishment of clerks, accountants, sorting clerks and other officers, the greater part of whom could be dispensed with in case the general post office of Upper Canada were placed at Toronto.

"Mr. Stayner gives his salary and emoluments as Deputy Post Master General, as follows:-In 1832, 3,1231.; 1833, 3,311; 1834, 3,122; to which we may add the allowance made him for his expenses to London of 8421.=10,3981. 10,3981. of income in three years to one office, residing out of Upper Canada, deriving his chief emoluments from the industry of her population, and yielding them a most unsatisfactory return. This is a state of things that is surely susceptible of improvement.

"The patronage of the department is enormous. The largest gross amount of letter postage in Upper Canada were collected, as follows: at (year 1834.) Toronto, 4,3661.; Kingston, 1,3141.; Hamilton, 5821.; Brockville, 5061.; Amherstburgh, 4531.; Bytown, 3951.; Belleville, 3831.; London, 3371.; Niagara, 330/.: Prescott, 314/.

"The emoluments of the post-masters of the following offices, in 1833 and in 1834, were as follows:

	,		•		
Toronto	£738	£713	Prescott	£137	£138
Kingston	470	503	Brockville	118	118
Queenston	411	438	Cobourg	102	118
Hamilton	175	184	Amherstburgl	110	103
Niggara	159	146	1		

"The postage collected at Queenston in 1834, by the post master, who is also the high sheriff of the district, amounted to 721. He receives and distributes the United States mail on that frontier. The whole of the emoluments of the post masters of Upper Canada, in 1833, was 4,4281; and for 1834. 3,7321."

XII. The maritime trade of Upper Canada is carried on through the ports of Quebec and Montreal, and

thence conveyed to the upper province. There is | lumber, pot and pearl ashes, pork, and tobacco from therefore no mode of ascertaining the amount of the imports and exports. The province receives one third of the duties levied at Quebec and Montreal, which amounted in 1836, to 50,7191. sterling.

A considerable trade is carried on along the American frontier, on the lakes and River St. Lawrence. Numerous steam vessels and schooners are constantly running during the navigable season, between the different ports belonging to the province and the United States, on lakes Ontario, Erie and Huron.

The imports consist of woollens, cottons, linens, hardware, castings, coal, leather, earthenware, groceries, wines, spirits, and almost every description of British manufacture.

the western districts.

XIII. Amount of paper currency in circulation in 1836. [B. B.]-There are three banks in the province, chartered by acts of the Legislature. "The Upper Canada Bank," capital, 200,000l. "The commercial bank of the Midland District," capital, 200,000l., and the "Gore District bank," capital, 100,000%. There are notes also in circulation, belonging to three private banks, viz. "The Agricultural Bank," "the Farmer's Bank," and the "Bank of the People." Notes of the bank of Lower Canada are also in partial circulation. The gross amount of Government Debentures, outstanding at the close of the year 1836, is as follows: In Upper Canada 176,850l. currency, or 159,165l. The exports consist principally of wheat, flour, sterling. In England 241,600l. sterling.

The property insured during the last year amounted to 337,1931. 19s. currency; upon which the premium charged amounted to 2,3161. 9s. The amount of losses paid by the company, 1,304l. currency. A small claim on the company, amount not yet ascertained, remains to be settled.

XIV. Some of the land in Upper Canada has been

purchased by the British Government from the Indians, who receive their payments annually in clothing, ammunition, &c., and such articles as they require. The purchases in 1818 were, October—Lake Huron, 1,592,000 acres, at 1,2001. per annum; the Mississagua, 648,000 acres, at 522l. per annum. In November, same year, the Rice Lake of 1,861,200 acres, at 740%. per annum; in April, 1819, the Long Wood of 552,190 acres, at 600l. per annum; in February, 1820, the Mohawk purchase of 27,000 acres, at 450l. per annum; being 4,680,390 acres, at an annual charge of 3,5121., which is defrayed by an appropria-

Return by the St. Lawrence Inland Marine Assu- | tion of part of the amount received for fees on the grants of land to emigrants.

No person, except United Englishmen, Loyalists (on the separation of the United States from Great Britain, those who preserved their allegiance to the British Crown and fled to Canada, were entitled to 200 acres of land each, by Act of Parliament), or those entitled by existing regulations to the Government free grants, can obtain any of the waste Crown lands otherwise than by purchase. The sales take place under the direction of a Commissioner on the first and third Tuesday of every month in the different districts. The lands are put up at an upset price, of which notice is given at the time of advertising the sale, and the conditions are one-fourth of the purchase-money paid down; the remainder at three equal annual instalments, with interest at 6 per cent. payable on and with each instalment: when this is completed, a patent for the lands is issued, free of The clergy reserves when sold are, as to terms, 10 per cent. down, and the remainder in nine annual instalments of 2 per cent. each, with interest. There are occasional sales of town lots, &c. The general size of a township is 69,000 acres—twelve miles by nine, say with nine lines of nine miles each (called concession lines), 400 rods apart, upon each of which a narrow line is reserved for a road. There are also two cross or check lines, each at right angles to the concession lines, and three miles apart, upon which the corners of the lots are marked, eighty rods apart; thus 400 rods deep, with eighty rods front, gives 200 acres to each lot, with a road in the front and rear of the farm.

It is difficult to ascertain the quantity of lands settled or ungranted in the province. In 1830, according to a document in the Surveyor-general's office, the surveyed township appeared thus-Granted prior to 1804, 4,500,000 acres; ditto since 1804, 3,800,000 acres; to be settled by Colonel Talbot, 302,420 acres; Total granted, 8,602,426 acres. Remaining ungranted, 1,537,439 acres; Crown and clergy reserves two-sevenths, 4,142,750 acres; Total, 5,680,189 acres. Although a great part of the Crown reserves have been sold to the Upper Canada Company, and a very valuable part of them given to the University (see Education), it is estimated that there are still upwards of 5,000,000 acres of good land open for settlement, without going north of the back line, where 7,000,000 or 8,000,000 acres of excellent soil may yet be found.

Statement shewing the quantity of surveyed Lands remaining vacant and grantable, 31st December, 1835. Quantity remaining unlocated 31st December, 1834, 1,527,164 acres; ditto unlocated in 1835, 121,346 acres; total, 1,405,818.

Townships returned as surveyed in 1835.—Ross, 43,627 acres; Pembroke, 5,663; Westmeath, 48,925 acres; Somerville, 20,270; total, 118,485 acres. Total quantity vacant and grantable, 1,624,303 acres.

Exclusive of the lots remaining ungranted in the surveyed townships before mentioned, the rough estimate by Mr. Richards, the Commissioner of Land, at present available, in round numbers, is — in townships not surveyed from Luther to Zero, 730,000 acres; in the Newcastle district, and joining the Home ditto, 550,000 acres; in the western ditto, west of the Upper Canada Company, 350,000 acres; in the London ditto, north of ditto, 340,000 acres; in ditto, not yet purchased from the Chippewa Indians, 2500,000 acres. Total 4470,000 acres

2,500,000 acres. Total, 4,470,000 acres.

The area of Lake Superior is about 35,000 square miles; of Lake Huron, 20,000 ditto; of Lake Michigan, 21,000 ditto; of Lake Erie, 10,000 ditto; and, including Lake Ontario, the surface covered by these five lakes is upwards of 100,000 square miles, or 64,000,000 acres!

XV. Copper and iron is abundant in various parts of the province; the latter particularly, at Charlotteville, about eight miles from Lake Erie. It is of that description which is denominated shot ore, a medium between what is called mountain and bog ore, and the metal made is of superior quality. At the Marmora Iron Works, about 32 miles north of the Bay of Quinté, on the River Trent (which are situate on an extensive white rocky flat, bare of stones, and apparently in former times the bottom of a river, exhibiting, like many other parts of Canada, different ridges and water-courses), the iron ore is rich to an excess, some specimens yielding 92 per cent.; it is found on the surface, requiring only to be raised up. There is abundance of the requisite materials of limestone and pine.

The forest trees most prevalent are beech, maple, birch, elm, bass, ash, oak, pine, hickory, butternut, balsam, hazel, hemlock, cherry, cedar, cypress, fir, poplar, sycamore (vulgo, button wood), white wood, willow, and spruce. Chesnut, walnut, and sassafras, though frequent at the head of Ontario, are seldom met with north of the Lake. The valuable sugar maple is common in every district. The butter nut is plentiful; the kernel is nutritious and agreeable to the taste, the young nut makes an excellent pickle, the bark dyes a durable brown colour, and an extract from it makes a mild and safe cathartic.

An immense quantity of oak and pine timber is annually sent down to Montreal and Quebec. Tobacco and hemp are in process of general cultivation; and the potatoe of Europe, conveyed to its original continent, thrives luxuriantly. Wheat is the staple of the province, and bears a higher price than any other in the Montreal and Quebec markets. All the English fruits, vegetables and grains flourish luxuriantly, and yield in abundance their treasures with the smallest possible attention.

There are no means of ascertaining the number of sheep or goats.

Produce and Price of Produce.—Tobacco is produced in the western district of an excellent quality. Every species of agricultural produce is cultivated; but there are no means of ascertaining the correct quantity of each. Wheat is brought to the market, and is a principal export of the province. The other description of produce is generally cultivated for home consumption.

The price of wheat per bushel varies in the several districts, from 3s. 9d. to 4s. 6d. currency, during the year, depending in a great measure on the facility of its transportation to market. The average price of oats during this year (1836) was 1s. 3d. per bushel; ditto barley, 3s. to 3s. 6d. ditto; ditto hay, 2l. 10s. per ton; ditto potatoes, 1s. 3d. to 1s. 6d. per bushel; ditto flour, 1l. 2s. 6d. to 1l. 5s. per barrel.

Prices in Upper Canada.—Horned cattle, from 131. to 181. per yoke; horses, 101. to 251. each; sheep, 15s. each; swine, 11. 5s. each; milk, $2\frac{1}{2}d$. per quart; fresh butter, $7\frac{1}{2}d$. to 1s. per lb.; salt ditto, 6d. to $7\frac{1}{2}d$.; cheese, 6d. to 9d.; wheaten bread, 6d. to 8d. per loaf of four lbs.; beef, 3d. to 5d. per lb.; mutton, $4\frac{1}{2}d$. to 7d.; pork, 3d. to 5d.; rice, $3\frac{1}{2}d$. to 4d.; coffee (green) 10d. to 1s.; tea, 2s. 6d. to 5s.; sugar, 6d. to $8\frac{1}{2}d$.; salt, $1\frac{1}{2}d$.; wine, 5s. to 15s. per gallon; brandy, 5s. to 8s.; beer, 1s. to 1s. 3d.; tobacco, 10d. to 1s. 3d. per lb.

Wages for Labour.—Domestic, 11.5s. to 21. per month; prædial, 21. to 31., and 41. to 51.; the former with board, and the latter without board; trades, 6s. 3d. to 7s. 6d. per day.

The above are the average prices at the close of 1836. During the winter months, every article is in advance; but this return may be taken as the average prices throughout the year.

Manufactures.—It appears from the Assessment Rolls that there are in the province 551 grist mills, and 843 saw mills. The domestic manufacture of works is very common. Whiskey distilleries, breweries, tanneries, and pot and pearl-ash manufacturies are very numerous. In Johnstown District there is 1 steam-engine foundry, 1 brass foundry, and 1 soap and candle factory; in Newcastle District, 16 fulling machines and 1 foundry for castings; in Niagara District, 9 fulling mills, 14 carding machines, 5 spinning mills, and 1 salt manufactory; in Midland District, 2 air furnaces for small castings, 1 large furnace with

powerful lathes attached for finishing steam and mill machinery, a sash manufactory worked by steam, machinery for making hat bodies, 7 machines for carding and fulling, and 1 for making and finishing woollen cloths.

A fresh water tortoise or land turtle, is found on the shores of the lakes, and not bad eating; seals have been seen on the islands in Lake Ontario, and there are reports of a cracken, or large serpent, having been observed on the north shore of the same lake.

In fine fish the waters of Upper Canada are unequalled; the sturgeon weighs from 75 to 100 lbs., and is capital eating; the shell-back species have been taken in Lake Ontario. The mosquenonge, a rather rare fish, weighing from 50 to 60 pounds, is preferred to our salmon. The trout of the upper

lakes attains the size of 80 or 90 pounds, and resembles the salmon in colour, but is not so highly flavoured; the white fish resembling the shad, is plentiful; the pike of Ontario weighs from three to ten pounds; the pickerel not so round, is shorter, flatter, and deeper; there are three species of bass; the perch weighs about a pound, and is a good pan fish; among the other species are dace, chub, carp, mullet, suckers, billish, lake herrings and eels, the latter are not caught, I believe, beyond the Falls of Niagara, where they may be observed endeavouring to ascend the slimy and perpendicular rock, where it is overarched by the water.

The following Table of Distances of Post Towns from Halifax up to Fort Erie in Upper Canada, will convey an idea of the different positions or settlements treated of in the foregoing pages.

Proposed postage in Upper Canada, by House of Assembly, 1 to 50 miles, 4d.; 50 to 150 miles, 8d.; 150 to 300 miles, 10d.; 300 to 400 miles, 1s.; 400 to 500 miles, 1s. 4d.; above 500 miles 1s. 6d. Newspapers, one halfpenny each.

Property annually created, and if not consumed turned into moveable or immoveable Property.—Animal food for 320,000 mouths, at 4l. each per annum, 1,280,000l.; fish for 320,000 mouths, at 1l. each per annum, 320,000 mouths, at 3l. each per annum, 960,000l.; butter, milk, cheese and eggs, for 320,000 mouths, at 2l. each per annum, 640,000l. Luxuries, viz. Wines, Spirits, Ale, Tea, Coffee, Sugar, &c. for 320,000 mouths, at 5l. each, per annum, 1,600,000l. Food for Horses, Cows, &c. 1,000,000 animals, at 2l. each per annum, 2,000,000l. Clothes and Furniture worn out for 320,000 mouths, at 3l. each per annum, 960,000l. Domestic Manufactures, &c. annually produced, 2,000,000l. Income from business, or Profits on Professions, at 10l. each per annum, 3,300,000l. Waste by Fire, Loss, bad seasons, &c. 100,000l.

Moveable Property.—36,530 horses, at 10l. each, 365,300l. 157,594 horned cattle, at 4l. each, 630,376l. 300,000 sheep, at 1l. each, 300,000l. 250,000 swine, at 1l. each, 250,000l. Poultry, value 20,000l. Housefurniture, at 20l. each house, 63,880l. Clothing and equipage of 320,000 persons at 5l. each, 1,500,000l. Machinery and farming implements, 100,000l. Bullion and coin, 200,000l. Ships, boats, timber and other merchandise, 10,000,000l.

Immoveable Property.—1,128 houses, at 50l. each, 5,640l. 1,000 Saw and Grist Mills, at 200l. each, 200,000l. 1,630,965 acres of arable land, at 5l. per acre, 8,154,825l. 3,541,162 acres of land occupied but untilled, at 1l. per acre, 3,541,162l. 13,000,000 acres not granted, at 5s. per acre, 3,250,000l. Roads, Canals, Dykes, Bridges, Wharfs, &c. 5,000,000l. Forts, Gaols, Churches, Barracks, &c. 1,500,000l. Manufactories, Mines, Quarries, &c. 2,500,000l.

Total annual Production of Property, 13,160,000l. Total Moveable Property, 13,429.556l. Total Immoveable Property, 24,151,627l. Total Moveable and Immoveable, 37,581,183l.

CHAPTER III.—NOVA SCOTIA.

Section I. Nova Scotia proper connected with the S. E. part of the continent of North America, by a narrow isthmus (eight miles wide), is situate between the parallels of 43. and 46. of north latitude, and the meridian 61. and 67. west longitude; it is bounded on the north by the Strait of Northumberland, which separates it from Prince Edward's Isle; on the N. E. by the Gut of Canseau, which divides it from the island of Cape Breton, on the S. and S. E. by the Atlantic Ocean, on the W. by the Bay of Fundy, and on the N. W. by New Brunswick. In length it is about 280 miles, stretching from S. W. to N. E., but of unequal breadth, varying from 50 miles at Black Rock Pier, to 104 miles at Bristol, and embracing a superficies of 15,617 square miles, or 9,994,880 acres.

II. Although the territory, known under the title of Nova Scotia, was probably first visited by the Cabots in their voyage of discovery in 1497 (and the ancient authorities state such to be the case), the earliest authentic account we possess of its European colonization was by the Marquis de la Roche, who by the orders of Henry IV. sailed from France in 1598, with a number of convicts from the prisons, whom he landed on the small and barren Island of Sable, situate about 50 leagues to the S. E. of Cape Breton, and 35 of Canseau, about ten leagues in circumference, and interspersed with sand-hills, briarplots, and fresh-water ponds.

After cruising some time on the coast, the Marquis was compelled by stress of weather to return to France, leaving on Sable Isle forty unfortunate convicts who had been landed on this barren spot, where after seven years hardships twelve only were found alive, in a most wretched and emaciated state, on the French monarch having sent Chetodol, the pilot of the Marquis De la Roche, to look after and bring them back to France.

The next visitation of Nova Scotia (or, as the French called it Acadia, this name was given to Nova Scotia, New Brunswick, and part of the State of Maine;) was by De Monts and his followers, and some Jesuits, in 1604, who essayed for eight years to form settlements at Port Royal, St. Croix, &c. but were finally expelled from the country by the English governor and colonists of Virginia, who claimed the country by right of the discovery of Sebastian Cabot, and considered the French colonists of De Monts as encroachers or intruders on the charter granted to the Plymouth Company, in 1606, and which extended to the 45. of north latitude; the right of occupancy being then considered invalid and the doctrine admitted—

" A time it was-to all be it known,

When all a man sailed by or saw, was his own." Eight years elapsed after the forcible expulsion of the French colonists from Port Royal and other parts of Acadia, before the English began to think of settling on the peninsula, but in 1621 Sir William Alexander applied for and obtained from James I., a grant of the whole country, which he proposed to colonize on an extensive scale; it was named in the patent

Nova Scotia, and comprised within the east side of a line drawn in a north direction from the River St. Croix to the Gulf of St. Lawrence.

The Nova Scotia baronets were created by Charles I.; they were to contribute their aid to the settlement, upon the consideration of each having allotted to him a liberal portion of land; their number was not to exceed 150; they were to be endowed with ample privileges, and pre-eminence to all knights called Equites Aurati, but none of them were to be baronets of Nova Scotia, or of Scotland, till they had fulfilled the conditions prescribed by His Majesty, and obtained a certificate of performance from the governor of the colony. The patents were ratified in parliament.

Within about a year after the sealing of his patent, Sir William Alexander despatched a number of emigrants to take possession of his grant, who, after wintering in Newfoundland, arrived in 1623 at Nova Scotia, where they found many French settlers, the descendants of those who had remained at Port Royal and other places, to whom were added adventurers from the St. Lawrence and France; under these circumstances the English emigrants thought it prudent not to attempt to take possession of the country, they returned to England, and war breaking out soon after, between England and France, efforts were made by Sir William Alexander and his friends to drive the French from Nova Scotia, but for several years all the efforts of De La Tour (to whom Sir William Alexander had assigned or leased his grant) and others were ineffectual until Oliver Cromwell sent Major Sedgewick, with an armed force in 1654, and Nova Scotia for the third time fell into the possession of the English, nominally at least: Port Royal being taken by Sedgewick's troops, while French settlers were established in different parts of the country; these were, however, finally subdued, and the protector Cromwell granted the claims of Charles La Tour as heir to his father, who received the colony from Sir William Alexander. Cromwell thought fit to associate with La Tour, Thomas (afterwards Sir Thomas) Temple, and William Crowne Temple purchased La Tour's share, re-established the different settlements, and expended 16,000%, in repairing the fortifications, but while the colony was emerging from distress and obscurity, it was ceded to France by the treaty of Breda in 1667.

For 20 years succeeding the treaty of Breda, the colony enjoyed repose, and some progress was made in establishing fisheries and extending the fur trade, but upon the renewal of hostilities in 1689, it was still deficient in means of defence, and Port Royal was taken by Sir William Phipps, with a squadron from Massachusets; the French, as usual still held themselves masters of the other parts of the peninsula; the English, however, retained a nominal possession, sometimes fighting for a district, at others ravaging the French settlements; but by the treaty of Ryswick, in 1696, the colony was once more restored, or rather left unmolested in the possession of

France; but on the breaking out of the war again in 1701, preparations were made in England and Massachusets for the total subjugation of Nova Scotia to the British arms, with a distinct avowal on the part of the crown that if again conquered it should not be restored to France.

Sir William was born in 1650, at Pemaquid, in New England, he was the son of a blacksmith, and commenced life as a shepherd: at the age of 18 he was apprenticed to a ship-carpenter, subsequently built a small vessel for himself, and in the course of time was successful in raising 300,000l. sterling from a Spanish wreck at the Bahamas. He was knighted by James II. and employed on several important expeditions by England, and by his compatriots, the colonists.

The expedition for the capture of Nova Scotia sailed from Boston Bay on the 18th September, 1710, and after some fighting, Port Royal capitulated on the 29th: the other stations subsequently gave in their adhesion to the British government, and at the treaty between France and England, in 1713, Nova Scotia was finally ceded to the latter power, who changed the name of Port Royal to Annapolis Royal, in honour of Queen Anne-made it a seat of government, and named a council of the principal inhabitants for the management of the civil affairs of the province.

By the 12th article of the treaty between France and England, of the 11th April, 1713, all Nova Scotia. with its ancient boundaries, as also the city of Port Royal, and the inhabitants of the same, were ceded to Great Britain, "in such ample manner and form, that the subjects of the most Christian king shall be hereafter excluded from all kinds of fishing in the said seas, bays, and other places on the coast of Nova Scotia, that is to say, on those which be towards the east, within 30 leagues, beginning from the island commonly called Sable, inclusively, and thence stretching along towards the S. W."

Little further remains to be stated respecting the acquisition of the colony that would be interesting to the general reader, or within the scope of this work : from 1713 to 1749, Nova Scotia was neglected by England. The French pretended to draw a distinction between Acadia and Nova Scotia; and as the country was ceded under the former appellation, they endeavoured to maintain that Acadia was the name of the peninsula which they had alone ceded to Britain, and that the rest of the country lying between New England and the Bay of Fundy, was a part of New France, which, together with Canada, still belonged to them, -but the trick was exposed by the inhabitants of Massachusets.

The designs of the French to acquire by fraud what they could not obtain by force, drew the attention of the British public to the importance of the colony, and encouragements were held out to retired officers, &c., to whom offers of grants of land were made; 3.760 adventurers were embarked with their families for the colony. Parliament granted 40,000l. for their support, and they landed at Chebucto Harbour, when the town of Halifax was soon erected by the new emigrants under the command of their Governor the Hon. Edward Cornwallis. The French settlers (under the name of Neutrals) were still very numerous in the colony, and with the aid of the Indians held the British in constant alarm, and murdered many of the settlers; after various contests and much cruelty on either side, the 'Neutrals' to the number of several thousand, were forcibly expelled from Nova

Scotia, and carried in British transports to Massachusets, Pensylvania, &c., leaving nothing behind them but smoking ruins and deserted villages. I agree with Mr. Haliburton, the historian of his native country (who has written an admirable history of Nova Scotia, which was printed and got up in a most creditable manner, at Halifax, in 1829.) in deploring the cruel events that took place on this distressing occasion, but the blame is to be attributed to the crafty policy of the French Court at Paris, who instigated the Neutrals by every possible means to harass and annoy the English.

In 1758, a constitution was granted to Nova Scotia, consisting of a House of Assembly for the Representatives-a Legislative Council and Governor representing the crown: in the same year the capture of Louisburgh, in Cape Breton Isle, gave additional security to the colony, which now began to improve. In 1761, on the election of a new Parliament in Nova Scotia on the accession of George III, to the crown of Great Britain, the number of representatives returned were 24, namely, two for each of the counties of Halifax, Lunenburgh, Annapolis and King's; four for Halifax township, and two for each of the townships of Lunenburgh, Annapolis, Horton, Cornwallis, Falmouth and Liverpool. By the treaty of Paris, 10th February, 1762, France resigned all further claims on any of her former possessions in North America. Nothing of any consequence has since occurred in Nova Scotia to require a detailed notice.

New Brunswick and Cape Breton were separated into two distinct governments in 1784: the latter was re-annexed to Nova Scotia (of which it now forms a county) in 1819. The several Governors, since the British acquisition, were-

At Annapolis Royal .- 1710, Col. Vetch, governor; 1714, F. Nicholson, ditto; 1719, R. Phillips, ditto; 1722, J. Doucett, ditto; 1725, L. Armstrong, ditto; 1739, J. Adams, ditto; 1740, Paul Mascarene, ditto.

At Halifax.—1749, E. Cornwallis, governor; 1752,

T. Hopson, ditto; 1754, C. Lawrence, Lieut.-Gov.; 1756, C. Lawrence, Gov., and R. Monkton, Lieut.-Gov.; 1760, J. Belcher, ditto; 1763, M. Wilmot, Gov.; 1766, M. Francklin, Lieut.-Gov.; 1766, Hon. Lord W. Campbell, Gov.; 1772, M. Francklin, Lieut. Gov.; 1772, Lord W. Campbell, Gov.; 1773, F. Legge, Gov., M. Franklin, Lieut. Gov.; 1776, M. Arbuthnot, Lieut.-Gov.; 1778, R. Hughes, ditto; 1781, Sir A. S. Hammond, ditto; 1782, John Parr, Gov., and Sir A. S. Hammond, Lieut.-Gov.; 1783, E. Fanning, ditto; 1792, J. Wentworth, ditto; 1808, Sir G. Prevost, ditto; 1811, A. Croke; 1811, Sir J. Sherbrooke, ditto; 1816, Lieut.-Gen. the Right Hon. George, Earl of Dalhousie, ditto; 1820, Sir J. Kempt, ditto; 1828, Sir P. Maitland; February, 1834, Lieut. Gov. Sir Colin Campbell.

III. The most remarkable natural feature on this peninsula of the North American continent is the numerous indentations along its coast.

A vast and uninterrupted body of water impelled by the trade wind from the coast of Africa to the American continent, strikes the Nova Scotia shore between 44. and 45. N. latitude, with a force almost adequate to its total annihilation—only a barrier of 15 miles in breadth between the Atlantic Ocean and the Gulf of St. Lawrence seems to have escaped such a catastrophe: while a space of nearly 100 miles in length and upwards of 40 in breadth has been swallowed up in the vortex, which, rolling its tremendous tides of from 60 to 70 feet perpendicular height up the beds of the adjoining rivers, has converted them

into inland seas, traversing the province from west to curious. The palm tree, the bamboo, the cactus may east for more than half its length.

The combined influence of the same powerful agent and of the Atlantic Ocean has produced (though in a less striking manner) the same effect upon the south shore. Owing to the operation of these causes, the harbours of Nova Scotia for number, capacity and safety are unparalleled in any other part of the world: between Halifax and Cape Canseau are 12 ports capable of receiving ships of the line, and there are 14 others of sufficient depth for merchantmen.

Respecting the interior of the colony, it may observed that of 15,617 square miles, the superfi contents of Nova Scotia, one third is supposed to occupied by lakes of various shapes and sizes, spread out that there is no point in the province miles from navigable water. The surface is undu ing, there being scarcely more than half a mile time of level ground, but the elevation is inconsid able, the highest land (Ardoise hill or Arthur's Se being only 810 feet above the level of the sea. Th is a range of high lands on the west coast, between St. Mary's Bay and Argyle, and another more tended and lofty on North Coast, skirting the Bay Fundy, between Annapolis and Windsor, or indeed the head of Minas basin. The scenery through the province is beautifully picturesque, owing to great variety of hill and dale, and the numerous riv and lakes scattered throughout the country. [Colonial Library, vol. vi.]

The harbour of Halifax has not perhaps a super in any part of the world. It is situate in 44. 40. latitude, 63. 40. W. longitude, nearly midway between the east and west extremity of the peninsulafrom its situation being directly open to the Atlan and its navigation scarcely ever interrupted by (as Quebec is annually), it is our chief naval stat in North America, and affords safe anchorage for l ships. Several islets exist at the entrance betw Sambro Head and Devil's Island, rendering the na gation apparently rather intricate, but even a stran with proper precaution has nothing to fear. channels east and west of M'Nabs island are guar by York redoubt, Sherbrooke tower, East battery, several others. The city of Halifax is built on east side of a small peninsula on the declivity of hill, which rises gradually from the water's edge; length being about two miles, and its breadth ab half a mile, with wide streets crossing each other right angles, and containing nearly 2000 houses, a population not far short, including strangers, 20,000.

IV. Nova Scotia is divided into four geolog divisions, extending from S. W. to N. E. nearly, running in a longitudinal direction with the grea diameter of the country. The south side of N Scotia, bordering on the Atlantic and forming a row strip from Cape Sable to Cape Canseau, i primary district and composed principally of granite. gneiss and mica slate. The second division is three to four times the breadth of the first, and extends also the whole length from Cape St. Mary to Chedabucto Bay; it is composed of slate, greywacke, and greywacke slate. The third is a trap district, and forms a narrow slip from Briar island to Mina basin, including the whole of the North Mountains, and the islands, &c. on the Nova Scotia shore of the Bay of Fundy. The fourth is a red sandstone district, and extends from the Gut of Canscau, along the Northum-berland strait. The fossil remains found in the mountain limestone, transition slate, &c. are extremely

curious. The palm tree, the bamboo, the cactus may be dug from the rocks and coal seams. All indicating that Nova Scotia at one time enjoyed a tropical climate. [See Dr. Gesner's valuable work on the Geology of Nova Scotia.]

]

* By G. R. Young, Esq., of Nova Scotia.

Marble, alabaster, porphyry, &c., abound. Beds of rich iron ore have been found in various directions; the sulphuret of lead has been found in narrow veins among the limestone at Guys' river; the copper ore is rich, and doubtless many other minerals will hereafter be discovered.

The soil of Nova Scotia is of various qualities; there are extensive alluvial tracts, producing as rich crops as any soil in England would do; some of the uplands are sandy and poor, while, singular enough, the tops of the hills are productive to a high degree.

On the south coast the land is so rocky as to be difficult of cultivation, but when the stones are removed, excellent crops are yielded. The banks of rivers and the heads of bays on the north coast afford many fine fertile tracts.

V. The temperature of Nova Scotia is milder in winter, and the heat less intense in summer than is the case at Quebec; the air is highly salubrious, 80 years being a frequent age in the full use of bodily and mental faculties; many settlers pass 100 with ease and comfort. There are no diseases generated in the colony, which is also free from intermittent and other fevers. The summer heat is moderate and regular, with a soft S. W. wind, changing materially on any inclination N. or S. of that point. The autumn is a delicious season, and there is seldom any severe

remove the prevailing idea in England that Nova Scotia is a region of snow and fog, I may state, that the orchards of the province are equal to those of any part of America; plumbs, pears, quinces, and cherries are found in all gardens, and of the most excellent quality. Cider of superior quality forms an article of export, and peaches and grapes ripen in ordinary seasons without any artificial aid. Frost binds the earth from Christmas to April, with almost invariably an intervening thaw in January, as already described under Lower Canada. The heaviest fall of snow is in February, during the predominance of the N.W. wind. Rain falls most frequently in spring and autumn, and a fog prevails on the S. shore near the mouth of the Bay of Fundy, but does not extend far inland. As the country becomes cleared, or owing to some unweather until the end of December. In order to known causes, the climate is becoming milder.

The following Meteorological Register is for Halifax.

Months.		ermome arenhei		Weather.	Wind.
	Max.	Med.	Min.		
January .	42	20	2	Clear, rain, snow.	N. S. W.
February .	40	18	10	Ditto, ditto, cloudy.	N.W. and variable.
March	52	25	6	Ditto, cloudy, rain.	N.W. and S.W.
April	54	30	8	Ditto, rain and cloudy.	Westerly.
May	60	40	20	Clear, little rain.	N. and ditto.
June	68	-50	30	Ditto.	W. and Northerly.
July	80	63	40	Ditto, ditto, and fog.	W. N. and S.
August .	90	70	55	Ditto, ditto, ditto and hazy.	W. and Southerly.
September	79	51	48	Ditto, ditto.	N.W. and S.
October .	68	51	30	Clear.	S.W. N. and N.W.
November.	59	38	18	Ditto, rain, and fog.	W. and S.W.
December .	46	25	7	Ditto and snow.	N.W. and N.E.

The vegetable and animal kingdoms being similar to those of Canada, require no separate description.

VI. When first discovered, Nova Scotia, as well as other parts of America, was inhabited by Indians of a reddish-brown colour, with high cheek-bones, large lips and mouths, long black coarse hair, and fine intelligent penetrating eyes; the males in height from five feet eight inches to six feet, with broad shoulders and strong limbs. The two principal tribes, the Micmacs and Richibuctoos, differing in features and in dialect, were equally savage in their mode of life and manners, but to some extent civilized and made nominal Christians by the early French settlers, who trained the Indians to assist them in their wars against the English; and, in order to infuriate the semichristianized Indians against the English, the French inspired them with the horrible idea that it was the English who crucified Christ!

The wars between the rival contestors for the possession of Nova Scotia, the introduction of the small pox, and, above all (strange to say), the maddening use of spirituous liquors, have swept off nearly every Indian from the face of the country where he was once master; and but few (not 1,000) of the Micmacs still exist. Indolent, when not roused by the stimulus of hunger or revenge, the Indian dreams

away life in a silent monotonous existence: his only wants are food, raiment, and shelter of the humblest kinds; and within a few years more, the remnant of this extraordinary specimen of the human race will have entirely passed away.

I have been unable to find any very accurate early details of the progress of population in the colony. In 1749, about 140 years after the settlement of the colony, the Acadians amounted to 18,000 in number. After the removal of these people from Nova Scotia, in 1755, the British settlers were computed at only 5,000; and in 1764, the number of souls was reckoned at 13,000, including 2,600 Acadians. In 1772, the reported numbers were 19,120; but in 1781, in consequence of a number of persons having quitted the colony, the number was reduced to 12,000. Two years after, 20,000 loyalists arrived, so that the numbers were increased to 32,000; but by the subsequent separation of New Brunswick, Prince Edward's Isle, and Cape Breton into distinct governments, Nova Scotia had of course a diminished population. In 1807, the number of mouths was estimated at 65,000, exclusive of Cape Breton Isle, then 2,515. Two censuses have since been made at intervals of 10 years each, the result of which was as follows.

in the two returns above for 1827 somewhat differ.

I do not know whether the term free blacks in the census of 1817 (and which I do not find in the census of 1827), applies to the aboriginal inhabitants of the colony, or to the residue of a large party of maroons, who were shipped from Jamaica to Nova Scotia, and who becoming dissatisfied, were for the greater part subsequently trans-shipped to Sierra Leone.

Nova Scotia has been so long and so unjustly considered in England a bleak, marshy, and almost uninhabitable country, that it may be necessary to enter into some detail as to its inhabitants and localities; part of the continent of North America.

There has been no census since 1827. The totals | for, as has been truly observed by a native of the colony, the extended and well-cultivated valley of the Annapolis-the diversified and picturesque country of Horton and Cornwallis-the richness and extent of views in the vicinity of Windsor - the unrivalled beauty of Mahone Bay, with its numerous verdant islets-the whole country bordering on the Shubenacadie-the very many spots in the eastern parts of the province—and the extensive townships of Newport and Yarmouth, cannot fail to excite the wonder of strangers, and they exist in a territory which has always been represented as the most uninteresting

Halifax division, containing part of the county of the same name, and the townships of Halifax,

Dartmouth, Preston, and Lawrence town is thus presented at the last census:—

The territorial distribution of the Nova Scotia | ter). There are ten counties, some of which are again government is—1, Eastern division; 2, Middle; 3, subdivided into districts and townships, for the more Western; 4, Halifax; 5, Cape Breton (see next chap-convenient administration of justice.

into three, viz. Halifax, Colchester, and Pictou; and Sydney into Lower and Upper.

The townships are not all of equal extent, nor of equal number in each county; viz. in Halifax District there are Halifax, Dartmouth, Preston, and Lawrence Town; in Colchester District, Truro, Onslow, and Londonderry; in Pictou District, Pictou, Egerton, and Maxwelton; Lunenburg County, Chester, Lunenburg, and New Dublin; Queen's, Liverpool, and Guysborough; Shelburne, Shelburne, Yarmouth, Barrington, Argyle, and Pubnico; Annapolis, Digby, Clements, Clare, Annapolis, Granville, and Wilmot; King's, Aylesford, Horton, Cornwallis, and Parrsborough; Cumberland, Amherst, Wallace, Hants, Falmouth, Windsor, Rawdon, Kempt, Douglas, and Newport; Sydney, Dorchester, St. Andrews, Arisaig, Tracadie. In each township the inhabitants meet as

The only counties divided into districts are, Halifax | in an English parish, and assesses themselves for the support of the poor.

The naval capital of British North America, Halifax, has been before described, and Dartmouth requires no separate account: we may, therefore, proceed to the eastern division, containing the districts of Colchester, Pictou, and the counties of Sydney and Cumberland. The district of Colchester, is a part of the county of Halifax, and is bounded on the northwest by the county of Cumberland, on the west by the Shubenaccadie River, on the south by the district of Halifax, and on the north and east by the district of Pictou. It contains three townships; Truro, Onslow, and Londonderry, besides the settlements of Economy, Stewiack, Tatamagouch, Salmon River, Shubenaccadie, Brookfield, &c.

The population of the district of Colchester, was in 1827.

Castlereagh lies north of the Folly Mountain, between the District of Colchester and the County of Cumberland.

N. B. The year 1827 was very unfavourable to the growth of wheat, and this return may be considered not more than one-third of an average crop.

Pictou, which is the third and last district of the | Halifax, on the east by the county of Sydney, and on county of Halifax, is bounded on the west by the the north by the Gulf of St. Lawrence. It contains district of Colchester, on the south by the district of three townships, Pictou, Egerton, and Maxwelton.

Sydney County has been of late years divided into two districts—the upper and lower; the upper forms a triangle, its south side being 36 miles long, its western 25, and its sea-coast, including the circuit of St. George's Bay, about 50 miles. It includes about one third of the whole county, comprehending the settlements of Antigonish, Gulf Shore, Cape George, Pomquet, Tracadie, and Harbour au Bushee. In an agricultural point of view, it is far superior to the lower district, and notwithstanding the numerous and beautiful harbours, and valuable fishery, possessed by the latter, it is also much more populous.

The Lower District extends on its interior or northern boundary, from Cape Porcupine at the north end of the Gut of Canseau, to the eastern bounds of the district of Halifax, 40 miles; on its western side from the southern boundary of Pictou

district, to the mouth of Ekemseegam Harbour, 30 miles; and on the sea-coast, including the shore of Chedabucto Bay, 120 miles. No part of Nova Scotia, and perhaps few countries in the world, afford so many excellent harbours in the same extent of coast. Mary Joseph, Liscomb, Country Harbour, White-head Harbour, Canseau, and Crow Harbour, are all navigable for the largest ships, and are accommodated with safe and extensive anchorage ground. Ekem-seegam, Little Liscomb, Little St. Lawrence, St. Mary's, Hollands, Beckerton, Fisherman's, Isaac's, Islands, Coddels, Torbay, Molasses, Raspberry, Big Dover, Little Dover, St. Andrew's Channel, Glasgow, George's, Little Canseau, Philip's, Guysborough or Milford Haven, are all accessible and safe for small vessels, and several of them for ships of 400 or 500 tons burthen.

King's County is bounded on the south by the counties of Lunenburg and Hants, on the east by Cumberland, on the north by the Bay of Fundy, and on the west by the county of Annapolis. It contains four townships: Horton, Cornwallis, Parrsborough, and Aylesford.

The common pasturage lands of the county are not

included in the number of acres of cultivated land. The sheriff of this county also states on his return, that the crop of wheat for 1827 was not more than one third of an average crop, with the exception of the Wellington Dyke, the produce of which was considered a fair crop.

Yarmouth Town, from its local advantages, and the enterprising spirit of its inhabitants, promises to become a most flourishing and wealthy place—there were, in

Date.	Souls.	Houses.	Horned Cattle.	Horses.	Sheep.	Swine.
1790 1808 1822 1827	1300 2300 4000 4350	200 340 570 620	1425 2000 4000	92 224 220	1330 3000 8000	370 900 1500

Of these there were 40 families belonging to the Church of England, amounting to 200 souls; and families of Catholics, amounting to 40; and 720 families of Dissenters of different denominations. There are 10,000 acres of land, 1,000 acres of dyked

marsh, and 2,000 of undyked marsh, under cultivation of different kinds. From which are annually produced, amongst other articles, about 5,000 tons of hay, 120,000 bushels of potatoes, 100,000 pounds of butter and cheese. The three latter have most deservedly a high reputation. There are in the township a court-house (including within it a jail), an Episcopal church, and a Congregationalist, Baptist, and Methodist meeting-house; 18 small school-houses, 14 grist mills, and 620 dwelling-houses. The registered vessels belonging to and employed from Yarmouth, were, in 1790, 26 vessels, 544 tons; 1808, 41 vessels, 1,880 tons; 1828, 65 vessels, 3,000 tons; 1833, 102 vessels, 6,901 tons.

About 20 voyages are made annually to the West Indies, and the rest of the shipping is employed in coasting and fishing. The duties collected at this place, and paid into the Provincial Treasury, are upwards of 1,000l. a year.

idea of the actual state of the colony than any descriptions, however elaborate and minute. The great extent of land under cultivation—the produce (though the returns here stated are all under the mark, as a tax was dreaded) thereof-and the stock thereon, will all demonstrate that Nova Scotia is not the barren.

foggy land it has so unjustly been represented.

VII. The established Church is Episcopalian; the number of people of different religions at the last census were—Church of England, 28,659; do. Scotland, 37,227; do. of Rome, 20,401; of Methodists, 9,408; Baptists, 19,790; Lutherans, 2,968; Dissenters from the established Church, 4,417; do. of Scotland, 405. Quakers, 158; Jews, 3; Universalists, 51; Sandima-

The foregoing details will convey a more perfect | nians, 23; Swedenborgians, 3; Antinomians, 9; Unitarians, 4; Doubtful, 313. The foregoing does not include Cape Breton.

The established Church is under the management of a Bishop, Archdeacon, and 32 clergymen. Of the Church of Scotland there are 12 ministers. Of the Roman Catholic Church, a Bishop and 14 Priests. There are 19 Wesleyan and 36 Baptist Missionaries.

About 50,000 acres of land have been granted for the support of religion and schools; the Ecclesiastical establishment as supported by the Home Government, and expense thereof from April 1834 to March 1835-Bishop of Nova Scotia (salary 2,0001.) Archdeacon (3001.) President of King's College (501.) Presbyterian Minister (751.)

The expenses of each school including fuel and stationery, averages about $30l.\ \mathrm{per}\ \mathrm{annum}.$

There are besides, in the several counties and districts of the province, as appears by the returns for the year 1836, 564 common schools, and 27 combined common grammar schools, at which 16,559 children received instruction, of which number 1,244 poor children are taught gratuitously. These schools are supported in part by the province, and partly by subscription. The amount paid by the province in the last year on this account was 4,4781. 12s., and the amount raised by the people about treble that sum. There are also about 40 schools in different parts of the country, which are chiefly supported by the society for the propagation of the Gospel.

Dalhousic College, at Halifax, is in constitution similar to the University of Edinburgh; it is not yet in full operation. There is a fine institution, called the King's College, at Windsor, with regularly educated professors, &c., the state of which is very creditable to the colony, as is also the admirable institution of Pictou College.

There are eight newspapers in the province; but their names and relative position I am not cognizant

of

No deaths,-Average weekly cost of prisoners, 1s. 2d. per head.

* No return has been received.

† Destroyed by fire in 1836.

X. Nova Scotia is governed somewhat after the same manner as Upper and Lower Canada, i.e. by a Governor (styled Lieutenant-governor, as in Upper Canada), Council, and House of Assembly. The President of the Council is the Chief Justice of the province; the next in station is the bishop, and there are 10 other members. The House of Assembly is large; 10 counties return 2 members each, Halifax county 4, and town Halifax 2. The following towns return each a member to the Provincial Parliament :--Truro, Onslow, Londonderry, Annapolis, Granville, Digby, Lunenburg, Amherst, Horton, Cornwallis.

Windsor, Falmouth, Barrington, Liverpool, Newport, Shelburne, and Yarmouth. This is independent of Cape Breton, which is connected with Nova Scotia as a county, and returns two members to the provincial House of Assembly.

The laws are administered by a Court of King's Bench and district courts, as in Canada. The laws in force are - 1, the common law of England; 2, the statute law of England; and 3, the statute law of Nova Scotia.

The number of enrolled militia in Nova Scotia and Cape Breton amounted at the last census to 21.899.

The Colonial Office Blue Book for 1836 gives the | Cape Breton, officers, 234; non-commissioned ditto return for Nova Scotia at—officers, 1,063; non-com-missioned ditto and rank and file, 22,488; and for commissioned ditto and rank and file, 28,376; grand total, 29,673. According to counties—Halifax, officers, 164; rank and file, 3,093. Colchester, officers, 95; rank and file, 1,829. Pictou, officers, 70; rank and file, 2,456. Sydney, officers, 115; rank and file, 2,541. Cumberland, officers, 63; rank and file, 1,217. Hants, officers, 82; rank and file, 1,680. King's, officers, 87; rank and file, 1,583. Annapolis, officers, 137; rank and file, 3,123. Shelburne, officers, 106; rank and file, 2,285. Queen's, officers, 30; rank and file, 652. Lunenburg, 104; rank and file, 2,029.

The law enacts that every male, from 16 to 60, shall be enrolled as a militia-man, excepting the members of the Legislature, lawyers, magistrates, surgeons, and officers of the civil and military departments. Every regiment, if capable, is divided into battalions, which consist of not less than 300, nor more than 800 men. Every battalion is again divided into companies, which consist of not less than 30, nor more than 80 men; and the whole are under the superintendence of military inspecting field officers, who review them on the days of regimental meeting.

The King's troops consist of artillery and engineer detachments, and three regiments of infantry. Halifax is the chief naval station for the West Indies and North America, the commander-in-chief being a vice-admiral, with a suitable fleet. The forts protecting Halifax town and harbour are strong.

XI. The income of the Nova Scotia Government is principally derivable from duties levied on the importation of foreign goods at the different ports, as will be seen by the accompanying return for the year ending December, 1833, which, while it shews the extent of revenue, indicates also the amount of trade carried on at the different ports of the colony, and the quantity of articles imported.

The following is an abstract of dutiable goods imported in the province of Nova Scotia, between the 31st of December, 1832, and the 31st of December, 1833, for which the duties have been paid or secured at the Excise Office (including the island of Cape Breton), under the Acts of the provincial Legislature.

Another item is the rent of the coal mines, which is upwards of 4,000l. per annum. The lighthouse dues amount to an annual average of 2,000l. per annum.

The gross revenue of the colony in 1821, was 31,430l.; in 1825, 37,000l.; and since 1827, the Blue Book afford the details in the annexed table.

Casual and territorial revenue of Nova Scotia in 1836, 6,9041., of which 30001. was for rent of reserved

mines in Cape Breton and Pictou, 1,5151. duties on 16,836 chaldrons of coals, 4501. advanced by the General Mining Association, 1,0071. from Commissioners of Crown Lands, and the remainder for fees, &c.—[Blue Book, 1836.]

There is a local assessment in each colony which amounted as follows in 1836:—Halifax County, 6,034; Pictou, 1,036; Sydney, 270; Guysborough, 355; Colchester, 416; Lunenburg, 493; Annapolis, 2,745; King's County, 1,136: Yarmouth, 373; Juate-au-Corps, 109; Richmond, 98; Cape Breton County, 327; Hants, 693; Queen's County, 356: total, 14,441l. It is levied by grand jury presentments in each county, assessments by order of sessions, and for licenses, &c. It is expended for the relief of the poor, for the repair of roads and bridges, and to defray Colony charges. There are no direct taxes levied by the Government of Nova Scotia.

The quantity of timber shipped from the colony in 1833, was:-square timber, 38,191 tons, at 15s. per ton, 29,6431.; deals and boards, 9,984,000, value, 24,2801.; lathwood, 228 loads; staves, 2,714,000; shingles, 3,042,000; handspikes, 2,300; oars, poles, &c. 3,894; masts and spars, 642; hoops, 228,150; from Cape Breton, value, 1,972l.; total worth, 62,447l. The total value of the produce of the mines exported, was 105,329l.; and of the fisheries, 127,455l.

XIII. By the old rule, currency was converted into sterling, by the deduction of a tenth; 1001. currency, being thus nominally equal to 90% sterling; and the 11. note of 20s. currency, having been formerly equal the Nova Scotia Incorporated Bankin to 18s. sterling. By the same rule, sterling was con- 31st December 1836, was 43,9931. 7s.

verted into currency, by the addition of a ninth; but the English shilling being now made by law equal to 1s. 3d. currency, sixteen English shillings become equal to the Bank or Treasury Note of 20s. currency.

The new rule consequently to reduce currency into sterling, is to deduct a fifth instead of a tenth; and to reduce sterling into currency, add a fourth instead of a ninth.

Gold coins are seldom seen in the ordinary transacactions of the community; paper money which passes readily every where except at the custom-house, having superseded them. The Queen's duties, are there commonly paid in Doubloons at 31. 6s. sterling each, or dollars at 4s. 4d.

The dollar and its parts have nearly disappeared, in consequence of a fictitious value having been given to English shillings and sixpences, which may now be said to be the only coins in general circulation.

The English shilling formerly was only worth 1s. $1\frac{1}{2}d$. currency, but it is now made equal to 1s. 3d. currency; the former value of the quarter-dollar, which it has displaced.

Nova Scotia Paper Currency in 1836. [B. B.]-The amount of Treasury Notes in circulation on the 31st day of December 1836, chiefly in notes of 11. issued under an Act of the Province, was 53,9711. 13s. sterling; the amount of notes in circulation, issued by the Nova Scotia Incorporated Banking Company, on

A private banking company, have also notes out to a very considerable amount. These companies are prohibited by law, from issuing notes of a less value than 5l. currency each, and are bound to redeem them in specie on demand; but the treasury notes are inconvertible, though to a limited extent they may be funded on interest. Course of exchange in 1836, from 10 to 14 per cent. premium; bills on the United States 3 to 5 ditto.

The following estimate will also shew the produce of the province.

Estimated Value of Property annually created in Nova Scotia and Cape Breton, and, if not consumed, converted into Moveable or Immoveable Property.— Wheat, 200,000 bushels, at 6s. per bushel, 60,000l.; other grain, 500,000 bushels, at 3s. 6d. per bushel, 87,500l.; potatoes, 4,000,000 bushels, at 1s. per bushel, 200,000l.; hay, 200,000 tons, at 10s. per ton, 100,000l.; animal food for 200,000 mouths, at 200 lbs. each per annum, at 1½d. per lb. 666,666l.; fish for 200,000 mouths, at 150 lbs. each per annum, at 1½d. per lb., 187,500l.; cheese, butter, and milk for 200,000 mouths, at 1d. per day for 365 days, 304,166l.; vegetables, fruit, eggs, &c. for 200,000 mouths, at 3d. per day for 365 days, 912,500l.; luxuries, viz. sugar, tea, coffee, &c. for 200,000 mouths, at 3d. per day for 365 days, 912,500l.; clothing for 200,000 persons, at 3l. each

person, 600,000*l*.; furniture for 60,000 families, at 5*l*. each, 300,000*l*.; income from trade and agriculture for 60,000 families, at 20*l*. each, 1,200,000*l*.; sundries not included in the foregoing, at 5*l*. each family, 300,000*l*.; loss by waste, fire, bad seasons, &c. 150,000*l*.; total annually created, 6,893,332*l*.

Value of Moveable Property: Horses, 14,000, at 10l. each, 140,000l.; horned cattle, 120,000, at 5l. each, 600,000l.; sheep, 200,000, at 1l. each, 200,000l.; swine, 100,000l. each, 100,000l.; clothing, personal, 200,000, at 10l. each, 2,000,000l.; Furniture and Domestic Utensils for 60,000 families, at 20l. each, 1,2000,000l.; ships, tim-

ber, merchandize, machinery, and cash, 10,000,000*l*.; total moveable property, 14,240,000*l*.

Value of Immoveable Property: Land cultivated, 1,300,000 acres, at 4l. per acre, 5,200,000l.; good land uncultivated, 5,000,000 acres, at 10s. per acre, 2,500,000l.; waste lands, 2,000,000 acres, at 1s per acre, 100,000l.; houses, about 60,000, at 20l. each, 1,200,000l.; government buildings, forts, churches, &c. 1,000,000l.; mines, forests and fisheries, 2,000,000l.; roads, canals, bridges, wharfs, and dykes, 3,000,000l.; total immoveable property, 15,000,000l.; total moveable and immoveable property, 29,240,000l.

CHAPTER IV.—CAPE BRETON AND SABLE ISLANDS.

SECTION I. This singular and valuable island, though forming a part of the government of Nova Scotia, necessarily requires a brief separate description. Cape Breton is situate between the parallels of 45.27. and 47.5. N. lat. (including Madame, Scatari, Boulardie, St. Paul's, and other minor isles), and 59.38. and 61.50. W. long.; bounded on the S. and E. by the Atlantic Ocean (distant from Cape Ray in Newfoundland on the E. 57 miles), on the N. and N.W. by the Gulf of St. Lawrence, and separated from the adjoining peninsula of Nova Scotia by St. George's Bay, and the strait or gut of Canseau, which is in length about 20 miles, and in breadth one mile; the whole island being in its greatest length from N.E. to S.W. 100 miles, and the greatest breadth from S.E. to N.W. about 80 miles, comprising an area of about 2,000,000 acres, exclusive of the surface covered by lakes and rivers.

II. The island was discovered by Cabot, during the voyage mentioned in the first chapter; but whether named by him after Britain, or by its subsequent visitor Verazani (then in the service of France), after Brittany, is not known. While in possession of the French, it was called L'Isle Royale. In 1714, a few French fishermen from Nova Scotia and Newfoundland settled on its shores for the convenience of the cod-fish trade, their residence being principally confined to the summer months; while in winter it was visited by the fur-hunters or purchasers of skins from Nova Scotia and other places.

Nova Scotia and other places.

In 1715, Louis XIV. in order to detach Queen Anne of England from her alliance with the united powers of Europe with whom he was contending, offered her Newfoundland, Hudson Bay, and Nova Scotia, preserving to France, Canada, Prince Edward's Island, and Cape Breton. The attention of the French Government was now actively bestowed on the latter as a means of extending the cod fishery, and still maintaining the command of the navigation of the Gulf of St. Lawrence; hence the colonization of Cape Breton, and the erection of the strong fortification of Louisburg (named after the French King) in 1720, on the S.E. coast of the island.

The French were not long on Cape Breton before

they commenced instigating the Indians to attack the English settlers at Cape Canseau and in Nova Scotia, and the war of 1744, in Europe, was followed up with perseverance and ability by the garrison of Louisburg in its attacks on Nova Scotia. The Massachusets Government sent aid to Annapolis, then besieged by the French and their Indian allies. The Indians of Passamaquoddy, Penobscot, Pigwogat, and others aided the New England colonists. A furious and savage war was carried on between both parties, and the Government of Massachusets determined on attacking Louisburg, which the French had been 25 years fortifying, and though not then completed, at an expense of 30,000,000 livres.

The capture of this place will be found at full length in my "Colonial Library," vol.

III. Cape Breton is of a shape nearly triangular, its shores indented with many fine deep havens, broken with innumerable coves and islets, and almost separated into two islands by the great inlet of the sea, termed Bras d'Or, which ramifies in the most singular and romantic manner throughout the isle. These natural divisions of Cape Breton are also in striking contrast, the one to the north being high, bold, and steep, that to the south low, intersected by water, diversified with moderate elevations, and gradually rising from the interior shore of the Bras d'Or until it presents abrupt cliffs towards the ocean. In this latter division the highest land does not exceed 800 feet, but the highlands in the north division are higher, bolder, and more continuous; Smoky Cape, exceeding 1,800 feet in altitude above the level of the sea. The Bras d'Or would appear to have been an irruption of the ocean, caused by some earthquake or convulsion, admitting the water within the usual boundary of the coast. Its entrance is on the east side of the island, facing Newfoundland, and divided into two passages by Boulardie Island. The south passage, called Little Bras d'Or, is about 23 miles long, and from a quarter to three miles wide, but rendered unnavigable for large vessels by a bar at its mouth. The north passage, Great Bras d'Or, is 25 miles long, two to three wide, with a free navigation, and above 60 fathoms soundings. The Bras d'Or itself is the union of these

two branches, which form the great lake in the centre of the island, with several fine bays, where the timber ships for England usually load, at a distance of 40 miles from the main ocean. The length of this noble sca-water lake is about 50 miles, its greatest width 20, with a depth varying from 12 to 60 fathoms, every where securely navigable, and by reason of its numerous bays and inlets affording the benefit of inland navigation to almost every farm in the country. Several fresh-water lakes exist in different places, the largest are Lake Marguerite, in the north division, which is about 40 miles in circumference; the Grand River and Mire lakes in the south, the latter, together with its river, intersecting the island on its S. E. coast for 30 miles, in the rear of the site of the ancient fortress of Louisburg.

Sydney, the capital of Cape Breton, in latitude 46. 18., longitude 60. 3., is the only military post in the island, and is beautifully situated a few miles south of the entrance of Bras d'Or, upon a narrow but somewhat elevated tongue of land, about one mile in length and half that space in breadth, its line of direction north and south, nearly 11 miles from the mouth of Spanish River. On the east side of the small promontory is a basin three miles in circumference, while the main channel runs on the west side, and then opens a fine harbour, affording a secure anchorage for large frigates. The operations of the mining company are improving Sydney, which it is asserted has suffered materially from the annexion of the island to Nova Scotia. From Sydney to Louisburg the shore presents abrupt cliffs, low beaches, bays, rivers, and a few islands. [See " Colonial Library."

The lighthouses on the shores of Cape Breton and Nova Scotia are thus stated in the B. B. Colonial Office:—

Lighthouses on Sambo Island, mouth of Halifax harbour, 1 fixed light; at M'Nutt's Island, mouth of Shelburne harbour, 2 lights, 1 above the other; at Briar Island, 1 fixed light; entrance of Annapolis Gut, ditto; Coffin's Island, mouth of Liverpool harbour, 1 revolving light; Island Gut of Causo, 2 lights, 1 above the other; Seal Island, 1 fixed light; Meagher's Beach, Halifax, 1 light; entrance Pictou harbour, 1 fixed light for 8 months; Cross Island, near Lunenburgh; entrance Sydney harbour, 1 fixed light.

IV. The extensive coal and iron mines which peculiarly mark the geological character of Cape Breton, will be found detailed at considerable length in my "Colonial Library," vol. vi. The island can enumerate, from sandstone downwards, the whole of the rocks which constitute the transition and primitive formations.

The coal fields of the island contain immense deposits of gypsum, of a very superior quality for agricultural purposes, and now becoming an article of considerable traffic with the United States, who know how to appreciate its value. It constitutes a cliff several miles in extent, and in some places 30 feet in height. The gypsum in the lower part of the cliff is sufficiently compact for architectural purposes, and that near the surface appears well adapted for potter's moulds, stucco, flooring, &c. It is very conveniently situated for export, as vessels of great burthen may approach close to the cliff. It also occurs abundantly in various other places.

The natural salt springs which also have their source in the new red sandstone, are well worth the attention of capitalists. Situate so near to the veins

of coal, so necessary in the manufacture of salt, and in the very heart of the best fisheries of North America, these promise fair to become, at a future day, a productive source of wealth to the proprietors, and of incalculable benefit to the fisheries.

V. Cape Breton in this respect resembles much its neighbouring peninsula, with perhaps more moisture from its insular position. The fog which is swept along the shores of Nova Scotia by the S.W. wind, and along the S. E. coast of Cape Breton as far as Scatari, is then blown off to sea: it never extends far inland, being dissipated by the reflected heat. The climate is exceedingly healthy, and the water excellent; two things of paramount value to the settler. The seasons may be thus indicated: in June the blossoms of the indigenous shrubs appear, apple trees are in full bloom in the beginning of July, when strawberries are in perfection; hay is made in July and August; in the latter month raspberries and oats ripen, as do also currants and gooseberries, wheat in September, and apples and plums hang on the trees until the approach of winter in October and November.

VI. We have no accurate census of the island; the number of mouths are estimated at 30,000, of whom the greater part are emigrants from the Highlands of Scotland and their descendants; these are chiefly employed in agriculture; the next most numerous are the original European colonists, or French Acadians, an industrious people, employed in the fisheries and in building small vessels; the remaining colonists consist of English and Irish settlers, disbanded soldiers, and American loyalists, who were located here after the American war. The Mic Mac tribe, whose ancestors once tenanted the whole isle, are now reduced in number to about 300, who have embraced the Roman Catholic religion, and are becoming civilized to some extent; they have lands assigned to them amounting to 10,000 acres. [See Nova Scotia for statistics.]

VII. The imports in 1832 were in value 78,0001., consisting chiefly of British manufactures; the exports were—timber to England, 9,500 loads; coal to the United States, &c., 22,911 chaldrons; pickled fish, 21,000 barrels; dried fish, 44,000 quintals; oil, 2,500 barrels; live stock, 820 head; oats, 6,000 bushels; potatoes, 13,000 ditto; total value, 80,0001.

The following details of the trade of Cape Breton I have received from the London Custom House.

Sydney, port of Cape Breton.

^{*} Mds. signifies 1,000 feet.

The trade in coal is rapidly increasing at Cape Breton, as also at the port of Pictou: the quantity mined at Pictou, in 1832, was 12,020 chaldrons, and at Cape Breton mine 30,840 chaldrons.

The mines are leased to the General Mining Association, at the fixed rent of 3,000*l*. per annum. The following description of a new source of employment for British industry and capital will doubtless prove interesting.

The General Mining Association, as tenants of the Crown, and of his late Royal Highness the Duke of York, are lessees of all the mines and minerals of every description in the province of Nova Scotia Proper, and in the island and county of Cape Breton.

The operations of the association commenced there in the year 1827, and have hitherto been confined to the working of coal mines, and the discovery of iron ore.

The coal mines opened and at work are three in number—the Albion, the Sydney, and the Bridgeport mines.

The Albion mines are situated on the banks of the East River, in the district of Pictou, or Poictou, and distant about eight miles and a half from the town of that name, a port of safe and easy access on the Gulf of St. Lawrence. A light-house has lately been erected on the coast, near Pictou.

The East River is only navigable for burthensome craft to within six miles of the Albion mines; so that vessels arriving for coal receive their cargoes from barges, which load at the mines, and are towed down to the deep water by one of the steamers belonging to the Association. A rail-road, now in progress, will, when completed, obviate this inconvenience, as well as any breakage which the coal might sustain by transhipment; and will at the same time materially reduce the cost of shipping it.

The strata are similar in their formation to those of the Staffordshire coal fields, and, like the latter, produce a coal which, good and serviceable as it is for household use, is, however, from its peculiar pro-

poses of steam and manufactures; and especially for ney mines consists of about 300 persons and occupies the manufactures of iron, on account of the absence of sulphur in its composition.

In September 1833, the steam-boat "Royal William," of 180 horse power, and 1,000 tons burthen, arrived in London, having performed the voyage from Quebec to Pictou, and from Pictou to London, by steam. The fuel used was, from Quebec to Pictou, English coal, from Pictou to Cowes, Albion coal, and from Cowes to London, again English coal, taken in at Cowes. The captain and the engineers gave a most decided preference to the Albion coal over the English, and pronounced it to be the best fuel they had ever tried for generating steam. This is a very important fact, considered in connection with the immense and growing extent of steam navigation in the United States, which will find thus near at hand a supply commensurate with that extent of fuel, so valuable for its purposes, and to which it will be applied when further experience shall have satisfied the Americans of the superiority of such a coal for steam navigation over wood, and of the economy to be derived from the use of it.

The following return shows the quantities of coal shipped from the Albion mines, from the beginning of 1828 to 1836, distinguishing the number of chaldrons in each year:-In 1828, 4,467; 1829, 5,841; 1830, 6,426; 1831, 8,345; 1832, 12,020; 1833, 19,890; 1834, 14,927; 1835, 18,161; 1836, 36,322; 1837, 36.697: total number of chaldrons, 163,096.

The coal is raised from four shafts by the aid of steam-pumping and winding engines.

The establishment at the Albion mines consists of upwards of 400 persons employed in and about the mines, the foundery, the rail-road, steam-boat, and barges, the brick-kilns, &c., and their several appur-tenances. The number of dwelling-houses and of buildings required for these various works is little short of 100; and the small town of New Glasgow owes its birth and existence to the presence and operations of the General Mining Association in this part of the country.

The Sydney and Bridgeport mines are both in the island of Cape Breton, which is separated from Nova Scotia by the Gut of Canseau.

The Sydney mines are situated on the north-west entrance, of Spanish River, or Sydney harbour, a harbour equal, if not superior, to any in British America, and which is accessible in all winds. It is here that the most extensive operations of the Association are carried on. The coal of this field is similar in quality to the Newcastle coal. It is well suited for all the purposes of good fuel, but most particularly for domestic use. It is highly bituminous, ignites readily, gives a strong lasting heat, and leaves but little ash. A rail-road, which cost 40,000%, and on which three locomotive engines are employed, is finished from the pits to a point of the harbour, where vessels of any burthen can load with ease, and well sheltered from

perties, most remarkable for excellence for the pur- the prevailing winds. The establishment at the Syd-50 houses, including the buildings required for the works. The quantities of coal shipped from these mines from the year 1827, to 1837, are as follows: In 1827, 8,776 chaldrons; 1828, 10,266; 1829, 9,903; 1830, 11,898; 1831, 13,882; 1832, 19,949; 1833, 15,302; 1834, 11,693; 1835, 15,459; 1836, 31,486; 1837, 35,154; the total in chaldrons being, 183,768.

The Bridgeport mines are situated on the southern shore of Indian Bay, one mile and three quarters from the harbour where vessels load, and which is perfectly secure for shipping in the most boisterous weather. The southern head of Indian Bay, which is called Cape Table, bears by compass from Flint Island northwest by west, distance eight miles and a half, and the northern head of the bay bears from the light-house on Flat Point at the entrance of Sydney harbour south-east, distance four miles. Vessels may run safely into four fathoms water between the northern and southern heads.

The coal from these mines is of excellent quality. of the same description as the Sydney, and not at all inferior to it. A rail-road has been laid from the pits to the shipping place, and along which the coal is carried and deposited at once in the holds of the vessels.

This establishment employs about 150 persons the houses and buildings exceed 20 in number, exclusive of wharfs, saw-pits, &c. The following quantities of coal have been shipped from the Bridgeport mines from the year 1829, when they were first opened, to 1837 :- In 1829, 1,325 chaldrons; 1830, 3,425; 1831, 6,851; [1832, 10,890; 1833, 9,805; 1834, 7,142; 1835, 8,434; 1836, 12,550; 1837, 13,121; total in chaldrons being, 73,543.

The extent and power of the veins or seams of coal already discovered in Nova Scotia, render them as it were inexhaustible; and when the capabilities of the mines opened by the Association, are fully developed, they will be equal to supply any demand.

The capital of the General Mining Association is 400,000l. divided in 20,000 shares of 20l. each. Of this sum 340,000l., or 17l. per share, have already been subscribed, of which 240,000l., or 12l. per share. have been applied to the operations in Nova Scotia. On the other hand, the Association posseses in Nova Scotia considerable property in mines, machinery, implements, steam-boats, and other craft, wharfs, and houses, and about 14,000 acres of land.

VII. The staple products may be considered fish, coal, gypsum and timber. Of the former it may be observed, every river, creek, and bay teems with the finny tribe of every variety. The extent of coal and gypsum has been already stated; and as to timber, it exists in immense forests, equal in quality to any grown on the shores of the Baltic; live cattle, butter, cheese, potatoes, oats, &c., are becoming increased articles of export to Newfoundland.

SABLE ISLAND.

This scene of numerous and melancholy shipwrecks,-forty vessels having been wrecked on it in the course of a few years, and in one year 200 people perished on its shores,—lying directly in the track of vessels bound to or from Europe, is about 85 miles distant from Cape Canseau; in length about 30 miles, by 11 in width, shaped like a bow, and dimi-

nishing at either end to an accumulation of loose white sand, being little more than a congeries of hard banks of the same: its west end is in N. lat. 43.56.42. W. long. 60.71.15. East end N. lat. 43.59.5. W. long. 59.42. A sum of 800l. is devoted to keeping on the island a Superintendant from Nova Scotia, with a party of men provided with provisions, &c. for

the purpose of affording prompt aid to any shipwrecked mariners of whatsoever nation, who may be driven on its inhospitable shores. [See Colonial

Library.]
THE MAGDALEN ISLANDS, in the Gulf of St. Lawrence, are 18 leagues N. W. of Cape Breton, the same northward of Prince Edward Isle; 36 leagues from the nearest point of Newfoundland; 75 ditto from the French settlements of Miguelon and St. Pierre, and 180 ditto eastward of Quebec. With four exceptions they form an almost continuous chain of land about 42 miles long, and nearly N. E. and S. W. Amherst Island, the most southern of the chain, is nearly oval. having about 51 and 31 miles for its axis, with an elevation in one place of an isolated hill 260 feet above the level of the sea. Its harbour is the best in the chain, with a narrow, but straight entrance over a

soft ooze bar, for vessels drawing 11 to 12 feet water. Continuous spots of sand almost connect Amherst with Grindstone Island, whose diameter is about 5 miles. Cape Abright, the next in succession, is about 9 miles long and 3 broad. Then follows Entry and Coffin Islands. The population consists of nearly 200 families, the greater part of whom are French Acadians-fishermen. Lieutenant Baddely, who examined the islands, thinks them of igneous origin; first, by reason of the form of the hills of which they are composed; secondly, on account of their porphyritic, amygdaloidal, vesicular or lava-like structure; thirdly, the geological appearances of the sandstone, clays, &c., shewn in their displacement, in their redness, and even in their friability. In some places the soil is a rich black mould as at St. Vincent's, and other volcanic islands in the West Indies.

CHAPTER V.—NEW BRUNSWICK.

SECTION I. New Brunswick, as an eastern section ! of the continent of North America, is situate between the parallels of 45. 5. and 48. 4. 30. north latitude, and the meridians of 63, 47, 30, and 67, 53, longitude west of Greenwich; bounded on the north by the Bay of Chaleurs, in the Gulf of St. Lawrence (separating it from the district of Gaspé), and by the River Ristigouche, which in its whole course, from its source to the estuary in the Bay of Chaleurs, divides the province from the county of Bonaventure, in Lower Canada; on the south it is bounded by the Bay of Fundy and Chignecto Inlet, which nearly insulate Nova Scotia, the latter being divided on land by a short boundary line (drawn from Fort Cumberland to Bay Verte, in Northumberland straits, an arm of the Gulf of St. Lawrence), which separates the county of Westmoreland, in New Brunswick, from that of Amherst in Nova Scotia; on the east by the Gulf of St. Lawrence and Northumberland Strait, which separates it from Prince Edward's Island; and on the west by the United States territory, commencing on the south coast at Passamaquoddy Bay in the Gulf of Fundy (embracing the islands to the northward of 44.36., such as the Grand Monan, Deer, and Campo Bello), proceeding northward along the River Scodie or St. Croix; the River Chiputnetikooh to a chain of lakes, thence from a boundary line commencing at a monument on Mar's Hill, 100 miles west of Fredericton, in latitude 45. 57. N., longitude 66. 46. W., and running northerly to about four or five miles west of the River St. John, to the source of the Ristigouche River; the whole province containing 27,704 square

miles, or 17,730,560 acres.

II. The early details of this colony are comprised in those of Nova Scotia, of which it formed a part, and which the reader will remember to have been finally ceded (after conquest) to Great Britain, by the treaty of Utrecht in 1713, but until the final extirpation of the French power in North America, in 1758 and 1759, Great Britain could not be said to have peaceable possession of New Brunswick, since which time it has remained in our possession. In 1785 the present limits of New Brunswick were fixed, and the territory was separated from the province of Nova

Scotia-erected into a separate government, under the administration of Col. Carleton, and a Legislative Assembly was summoned at St. John's.

The dreadful fire at Miramichi, on the E. coast, in 1825, was one of the most terrible natural conflagrations of which we have any record in the history of the world. [See History of the British Colonies, vol. iii., or Colonial Library, vol. vi.]

III. New Brunswick is generally composed of bold undulations, sometimes swelling into mountains, and again subdividing into vale and lowlands, covered with noble forests, and intersected by numerous rivers and lakes, affording water communications in every direction to the pleasing settlements, scattered throughout the fertile alluvial spots, termed intervales. The greater part of the territory, namely about 14.000,000 acres, is still in a state of nature adorned with abundance of timber, and fine extended prairies: an idea of the country will, therefore, be better conveyed to the stranger by examining its appearance, by counties, which are in general distinctly divided by water courses, or other natural indications.

New Brunswick is divided into ten counties-viz.: Gloucester, Northumberland, Kent, Westmoreland, St. John's, Charlotte, King's, Queen's, Sunbury, and York. Gloucester, Northumberland, and Kent were originally comprised under one county, named Northumberland, and extending over an area of 8,000 square miles, having a river frontier from the source of the Ristigouche to Dalhousie Harbour, at the head of the Bay de Chaleur, and thence a seaboard along the south side of the bay and the gulf coast to Shediac Island.

The New Brunswick shore, along the Gulf of St. Lawrence, is low and sandy, covered with trees of a stunted growth, and skirted with extensive marshes, large deep mosses and long sand beaches, formed by the conflicting currents of the gulf, and the different rivers that pierce the shore. The coast line of the magnificent Bay de Chaleur (which is 85 miles long, and from 16 to 30 broad,) commencing in 47.58. N. Lat. 64.30. W Long. is similar to the gulf shore, but in some places there are perpendicular cliffs of some height.

New Brunswick population, from Journals of Assembly for 1834.

In person the inhabitants of New Brunswick are generally tall, well-proportion and athletic; those born in the province exceeding in stature the Europeans from whom they are descended.

The following recent census of the State of Maine, which adjoins New Brunswick and with whom in particular the boundary question is in dispute, may be inserted as of interest at this moment:—

Census of Maine.—The population of this state, from the census taken in March last, amounts to 472.151. exclusive of the Madawaska settlement and foreigners. In 1830, it was 399,402, making a gain of 72.689; add to this amount 3,300 for the Madawaska settlement, and 10,000 for foreigners not included in the recent census, and the gain is 83,989. Since 1830, York county has gained 2,071, Cumberland 7,506, Lincoln 2,890, Kennebec 9,886, Oxford Waldo 7,027, Somerset 7,157, Penobscot 20,164, Hancock 3,632, Washington 6,918. population of Somerset is now 42,963. Three counties only in the state have had a greater relative gain than Somerset: they are Penobscot, Washington, and Waldo. Penobscot has gained 64 per cent, Washing. ton 32, Waldo 24, and Somerset 20 .- From the Vindicator of July 21, 1837.

There are not any parsonage houses to any of these churches, nor glebes attached.

* 2 chapels. † 1 chapel. ; 1 chapel, building will contain 700. † 1 chapel, building will contain 170. † 1 chapel, building will contain 150. † 1 chapel, building will contain 180. † 1 chapel, building will contain 85. ¶ included in St. John's.

The established church is within the diocese of the Bishop of Nova Scotia, and under the government of an archdeacon with 26 clergymen (there are 26 churches), to whose support the Society for Propagating Christian Knowledge largely contribute; of the Established Church of Scotland there are five pastors; of the Romish Church, a bishop and twelve priests; of the Presbyterian Church of Nova Scotia, three; of the Wesleyan Missionaries 15; and of the Baptists 16.

Church of England.—The form in which the return is required, does not admit of a complete return of the state of the church. There are many congregations held in school-houses, and other unconsecrated buildings, at various, and sometimes great distances from the clergymen's residences, without which accommodation, in the present state of the province, hardly any country parish would be effectually served; of these congregations a complete statement has not yet been obtained, but the returns made for this year to the archdeacon, specify 47 congregations, besides those which meet in churches and chapels, and comprize from 3,300 to 3,800 persons. In returning the value of the living, the fixed income from glebe is only given.

The income of the clergyman is in all cases derived from the Society for the Propagation of the Gospel in Foreign Parts, and was formerly 200l. sterling, to each rector, but this has been lately subjected to a reduction of 25 per cent. The Society's allowance to the rector of Douglas, is 75l.; to the rectors of Dumfries and Westmoreland, 100l. each. The curate at St. John's, 75l.; the Curate at Fredericton, Kingston, St. Stephen and Chatham, 50l. each.

In addition to the income derived from the Society, some clergymen have received contributions from their parishioners, but no complete return for the year 1836, has been obtained. Probably they have not much exceeded the amounts reported for 1835. The present rector at Portland, who has no salary from the society, received 1831. 10s. from the people.

The curates noticed in the return, receive as follows from the people: first curate at St. John's, 1801.; St. Andrew, 901.; Chatham, 401. 10s.; St. Stephen, 451.; Fredericton, 1251. currency.

Abstract.—No. of livings, 25; rectors, 24; curates, 6; parsonage-houses, 13; glebes, 27; churches, 42; chapels built or building, 9; the churches will accommodate 13,490; number of persons generally attending, from 5,760 to 6,000; to which may be added, for congregations that meet in unconsecrated places, 3,300 to 3,800; making a total of attendance as shewn by the returns received, from 9,060 to 9,800.

Church of Scotland .- It may be observed generally, that this church is rapidly on the increase in the province; up to 1830, there were only two churches in connexion with the Established Church of Scotland. Now there are 13 churches supplied by 10 ordained clergymen, who all occasionally preach to large congregations, assembling in school-houses and chapels. Besides there are several churches just now in the course of creation, and there are a few lately finished. which will be shortly filled up by ministers from Scotland. The gross number of Presbyterians in the province cannot be less than 20,000. The average attendance in the churches at present regularly served, is at the lowest calculation 5,500. By adding the congregations assembling occasionally in schoolhouses and chapels, this number would be greatly increased.

The income of the clergymen is chiefly derived from pew-rents and collections. The Colonial Society of

Glasgow, has in two or three instances, where the case was urgent, made a grant of 50*l*. sterling for three years. The Scottish establishment receive no pecuniary aid from Her Majesty's Government, with the exception of 50*l*. from the casual revenue, to one of the ministers of St. John. A small grant of wilderness land only, has been recently made to each church by the home government.

Wesleyan Methodists.—The ministers of the Wesleyan Methodists connexion, are supported by voluntary contributions, and the Wesleyan Methodists Society in England. There are 14 missionaries in the province, 28 chapels, and 73 congregations, with an

average attendance of 9,590.

There are several other denominations of Christians; viz. Roman Catholics, Baptists, Independents, &c., but no returns have been received relative to them.

VIII. Grammar schools supported by legislative aid, are in active operation in several districts, and an excellent college has been established under the paternal auspices of Sir Howard Douglas; 6,000 acres of contiguous excellent land are appropriated for the use of this noble institution, which has the power of allowing the matriculation of students, without subscribing to the thirty-nine articles, except on taking degrees in divinity for the Church of England. Schools on the Madras system are established in each settlement, with a legislative allowance of 201. each; they are under the superintendance of the governor and board of trustees. Several excellent private seminaries exist in different parts of the province.

* This College is endowed by His Majesty's Royal Charter, and receives from H. M's. casual revenue the yearly sum of 1,000. sterling, and from the province treasury, so long as H. M's. grant is paid, the sum of 990. The College is also in the receipt of 1801. sterling per annum, arising from land-rents. This school is connected with the college, and is supported out of its funds.

King's College, Officers of the College other than Professors: the registrar and treasurer, salary 100l.; steward (including allowance for fuel), 100l.; porter and beadle (without board), 40l.; gatekeeper, 10l.; forrester, 5l.; Monsieur Thomassin, French instructor to the college and collegiate school, 60l.

Scholarships on the foundation, two; one for 251.; one for 201.

Degrees conferred in the year 1836: five degrees of Bachelor in arts; one degree of master in arts.

By Acts of the Provincial Legislature, the grammar schools at St. John and St. Andrew's, are incorporated, and 135l. sterling is appropriated from the provincial revenue towards the support of the former school, and 90l. sterling towards the support of the latter. By another Act, 90l. sterling are appropriated for the support of a grammar school in each county in the province, on condition that the inhabitants subscribe 115l. for the like purpose. It is under these Acts that the enumerated schools have been established.

By an Act of the Provincial Legislature, provision is made for the support of parish schools, to the number of seven in a parish, provided that they do not average more than five to each parish in the several counties, by a grant of 20l. currency per annum, to each school; on condition that the inhabitants erect a school house, and subscribe 20l. more. In addition to the schools thus established and endowed by the Legislature, there are a number of respectable private schools in which all branches of education are taught, but as they receive no pecuniary encouragement from government, they have not been called upon to make any returns of their respective establishments.

1 1

X. The constitution of New Brunswick is assimi- | battalions. 7. Gloucester county, two battalions. lated to that of the other North American colonies, differing thus far from that of Upper or Lower Canada, that the Lieutenant-Governor's executive council of twelve have also a legislative capacity.

The House of Assembly contained 28 members, thus contributed-City of St. John, two: county of ditto. four-Counties, Charlotte, four; King's, two; York, four; Westmoreland, four; Queen's and Sunbury, two each; Kent, one; Northumberland, two; and Gloucester, one. The number of representatives has since been increased. The provincial parliament sits for about two months, during the winter, at Fredericton, and is regulated in its proceedings after the manner already described.

The laws are administered by a supreme court and minor tribunals. The former has a chief justice and three puisne judges. There are also courts of chancery, vice admiralty, and for granting probates of wills, &c. The number of barristers and attornies practising in the province are, 15 at Fredericton, 19 at St. John's, and 37 at other stations. There are 50 public notaries.

The militia of the province of New Brunswick is distributed in regiments, as follows: 1. York county, five battalions. 2. St. John City, two battalions. 3. St. John's county, two battalions. 4. Sunbury county, four battalions. 5. Westmoreland county, four battalions. 6. Northumberland county, two thus-

8. Kent county, two battalions. 9. King's county, three battalions (with cavalry attached). 10. Queen's county, two battalions. Making a total of 10 regiments and 29 battalions. Each battalion has a lieutenant-colonel-major; 11 to 15 captains; 15 to 17 lieutenants; 10 to 16 ensigns, and the usual staff. The strength of the militia in 1836 was, Field officers, 51; captains, 300; subalterns, 580; staff, 90; sergeants, 471; drummers, 26; rank and file, 19,260.

Each regiment is trained three days in the year, one of which is the general training, or day of inspection, and the other two are company drills.

The province makes an allowance, for adjutants, not exceeding each 15%, per annum; and for sergeantmajors, a sum not exceeding 71. 10s. per annum each: for the care of arms, a sum not exceeding 201. to each battalion; and a bounty of 30s. per man, per month, when embodied for actual service; but not to exceed 51. to each man on the whole. Provision for the services of the adjutant-general to the amount of 751. Quarter-master-general, 501. has been made for the year 1836. [B. B.]

XI. The revenue of New Brunswick is principally derived from duties levied on the importation of goods at the several ports of the province.

In 1820, the gross revenue of the colony was about 30,000l.; in 1825, about 40,000l.; and since 1827.

Balances due from other banks, 5,1871. 13s. $1\frac{1}{2}d$.; bills of other banks incorporated in this province, 839l.; amount of all debts due, including bills of exchange and all stock and funded debts of every description, except the balances due from other banks, 60.8241. 7s. 2d.; real estate, 997l. 17s. 2d. Total amount of resources of the bank, 83,6731. 4s. 83d.

Property annually created, and if not consumed turned into moreable or immoreable Property .- Animal food for 100,000 mouths, 200 lbs, each per annum, at 4d. per lb. 333,3331.; fish for 100,000 mouths, 150 lbs. each per annum, at 1\frac{1}{4}d. per lb., 93,750l.; bread and other vegetables for 100,000 mouths, at 3d. per day for each, 456,2501.; butter, milk, cheese, and eggs for 100,000 mouths, at 1d. per day for each, 152,0831.; luxuries, viz. wines, spirits, ale, tea, coffee, sugar, &c. &c. for 100,000 mouths, at 3d. each per day, 456,250l.; food for horses, cows, &c. &c. &c. 300,000, at 11. each, 300,0001.; clothes and furniture worn out for 100,000 mouths, at 31. each, 300,0001.; domestic manufactures, &c. annually produced, 300,0001.; income from business, or profits on professions, 1,000,000l.; waste by fire, loss, bad seasons, &c. 50,000l.; total annual production of property, 3,441,666/.

Moreable Property: Horses, 12,000, at 101. each, 120,000l.; horned cattle, 90,000, at 5l. each, 450,000l.; sheep, 120,000, at 1l. each, 120,000l.; swine, 80,000, at 11. each, 80,0001.; poultry, 75,0001.; house furniture, &c. 1,000,0001.; clothing and equipage, 300,0001.; machinery and farming implements, &c. 500,000l.; bullion and coin, 30,0001.; ships, boats, timber, and other merchandize, 2,500,0001.; total moveable property. 5.175.000l.

Immoveable Property: Houses, 20,000, at 101. each, 100,000l.; saw and grist mills, &c. 250,000l.; arable land, 500,000 acres, at 51, per acre, 2,500,0001.; land occupied, but not untilled, 3,000,000 acres, at 11. per acre, 3,000,0001.; land not granted, 13,000,000 acres, at 5s. per acre, 3,250,000l.; roads, canals, dykes, bridges, wharfs, &c. 1,000,000l.; forts, gaols, churches, barracks, &c. 500.000l.; manufactories, mines, quarries, &c. 800,000l.; total immoveable property, 11,400,000l.; total moveable and immoveable property, 16,575,000l.

CHAPTER VI.—PRINCE EDWARD ISLAND.

St. John's) is situated in a kind of recess or bay of the Gulf of St. Lawrence, between the parallels of 46. and 47. 10. north latitude, and of the meridians 62. and 65. west of Greenwich, bounded on the west and south by New Brunswick and Nova Scotia, from or 2,134 square miles, most favourably situate for which it is separated by Northumberland Strait; on the east by Cape Breton Isle, from which it is distant the capital of Prince Edward Island, is distant from 27 miles, and on the north by the Gulf of St. Law the Land's End in England 2,280 miles; from St. rence and Magdalen Islands. The breadth across the John's Newfoundland, 550; from St. John's New

SECTION I. Prince Edward Island (formerly called strait between Traverse and Cape Tourmentine is only nine miles. In length Prince Edward Island is about 140 miles on a line through the centre of the territory; in its greatest breadth 34 (in some places not more than 15 miles,) with an area of 1,360,000 acres, commerce, agriculture or fisheries. Charlotte Town. Brunswick, by sea 360 (across Nova Scotia), from Halifax, by the Gut of Canso, 240; (by Pictou 140 miles), from Pictou, 40; from Miramichi, 120; from Quebec, 580; and from Cape Ray, the nearest point of Newfoundland, 125 miles.

II. This island was discovered by Cabot, 24th June 1497, being the first land seen after his departure from Newfoundland; it was named by this celebrated Navigator St. John, and not being formally claimed or settled by England, the French seized upon it as a part of the territory of New France or Canada, and in 1663, leased or granted it together with the Magdalen, Bird and Biron Islands to the Sieur Doublett, a captain in the French navy, to be held as a feudal tenure of the company of Miscou.

The island remained as a fishing station to the Sieur and his associates (two fishing companies,) until after the treaty of Utrecht in 1715, when it began to be colonized; and in 1758 there was said to have been 10,000 settlers; but this is doubtful, as the French Supreme Government at Quebec discouraged colonization everywhere, except around the strong fortifications which they had erected in various parts of their North American dominions.

In 1758, on the capitulation of Louisbourg, Prince Edward Island, which had formed the granary of that fortress, was taken possession of by the English.

At the conclusion of the peace in 1763, on the arrangement of the conquests made from France, this island, together with Cape Breton Isle, were annexed to the government of Nova Scotia. A great number of the Acadian French on the island were still so hostile to the English that they were included in the order to remove those of Nova Scotia, a large number were in consequence shipped off to the neighbouring continent; to the South colonies, and to France; in which latter place they were ill received and upbraided for their continual hostilities which had led to the total extinction of the French dominion in North America. Prince Edward Island was included in the general survey of the British empire in America in 1764, and which the commencement of the first American war put a stop to on the continent. The survey of the island being completed in 1766, various schemes for its cultivation and settlement were proposed; amongst others, the Earl of Egmont, then first Lord of the Admiralty, proposed settling it on a feudal plan (his lordship being lord paramount,) with a certain number of baronies to be held of him; each baron to erect a castle or stronghold, to maintain so many men at arms, and with their under-tenants to perform suit and service according to the custom of the ancient feudal tenures of Europe. Upon the rejection of the Earl of Egmont's impracticable scheme, it was determined to grant the whole island to individuals on certain conditions prescribed by the then Board of Trade and Plantations; but the number of applications being so great, it was thought proper that the different townships should be drawn by way of lottery, which was accordingly done with the exception of two townships, (these were Nos. 40 and 59, then partly occupied by a fishing company with the consent of government) some tickets being a prize of a whole township, others half, and others a third; many of the fortunate holders being officers of the army and navy, who had served during the preceding war. The conditions of settlement were-26 townships (each township contains about 20,000 acres) to pay 6s. per annum for each 100 acres; 29

ditto to pay 4s. for ditto; and 11 townships 2s. for ditto; and the grantees were to settle their lands in the proportion of one settler to each 200 acres, within ten years from the date of their grants, otherwise the same were to be void.

The mandamuses to the Governor of Nova Scotia, (to which the island was then annexed) issued for each township, to the holders of the fortunate lottery tickets, under the King's sign manual, bear date for the greater part, August 1767; and thus, with exceptions scarcely worthy of note, the whole island containing 1,360,000 acres, was given away in one day. [For an account of the effects resulting from this arrangement, see Colonial Library, vol. vii.]

III. The general appearance of Prince Edward Island, is extremely picturesque, though destitute of those bold, and in many instances, romantic features that characterise several parts of the adjacent continent; in general the surface rises as in New Brunswick, into gentle undulations, without any absolutely flat country, but no were reaching the elevation of mountains; the principal high lands being a chain of hills, traversing the island nearly north and south from De Sable to Grenville Bay; with this exception there are few inequalities to interfere with the ordinary agriculture, to the pursuit of which even a sailor

is attracted, by the rich verdure which clothes the country to the water's edge. The island is divided into three counties. [See

Colonial Library, vol. vi.]

IV. Prince Edward Isle is a pastoral country,neither limestone, gypsum, coal nor iron have yet been discovered, but in many places the earth and rivulets are deeply impregnated with metallic oxides; the soil is in general a light reddish loam—in some places approaching to a tolerable strong clay-in most districts more or less sandy, but where the latter inclines to a dark colour, it is very fruitful. Red clay is a reddish sandstone, but occasionally, at intervals of several miles, a solitary block of granite is met with; in fact, the whole island seems to have been left dry in latter ages by the waters of the gulf of St. Lawrence, which are evidently continually on the decrease.

V. The climate is neither so cold in winter nor so hot in summer as that of Lower Canada, while it is free from the fogs which rush along the shores of Cape Breton and Nova Scotia. People 100 years of age, without ever knowing a day's sickness, are numerous in the island.

VI. We have no correct estimate of the progressive increase of the population; when taken from the French the island is supposed to have contained 6,000 Acadians, a great number of whom were afterwards removed, as stated under Nova Scotia. Scotchmen form more than one half of the whole population; those from the Hebrides are best suited to the island. The Acadian French are estimated at about 5,000; but of the Mic-mac, or native Indians, once so numerous, there are probably not more than 30 families on the island. In 1802, the number of inhabitants was, males, 10,644; females, 10,007; total, 20,671. In 1822, males, 12,140; females, 12,460; total, 24,600. In 1825, males, 14,140; females, 14,460; total, 28,600. The two last censuses were as follows, viz.-Census of the Population taken under the authority of the Acts George IV, cap. 7, A.D. 1827; and William IV. cap. 7, A. D. 1833.

With the exception of Charlotte Town, nearly all the inhabitants of the island are employed in agriculture. The number of persons employed in commerce are about 1,000.

By a Colonial Act 11th George IV, c. 5, all persons solemnizing marriages are required to return certificates thereof to the surrogate of the island, within six calendar months from such solemnization. Those so recorded in the surrogate's office this year were -the number of marriage licenses issued by the

Lieutenant Governor, as ordinary, were 90.
VII. The established religion of the colony is Episcopalian. A large number of the inhabitants are of the Kirk of Scotland, or Romish faith, and there are several Missionary establishments.

There is one public school in Charlotte parish, Queen's County, supported by a grant from the colonial government of 3001. currency. There are two schoolmasters receiving 1501. currency each. There is also one free school, having ten male and eight female scholars, who are taught on the Lancastrian system; the government make a grant of 251. and 104. annually for its support. The schoolmaster receives 251. annually.

The number of private schools are about 40.

By a Provincial Act, 4th Will. IV. cap. 1, for the encouragement of education, the masters of all district schools, having passed the necessary examination, before a board established for that purpose, are entitled to receive from government an annual allowance, varying from 5l. to 20l., according to their several qualifications.

IX. The state of crime in the colony, is thus shewn. There are three gaols; viz. Queen's County Gaol, situate in Charlotte Town; King's County Gaol, situate in George Town; and Prince County Gaol, situate in St. Eleanor's. No return has been made for the two last-named gaols, but the return of the first, viz. Queen's County, is as follows: number of prisoners the prison is capable of containing in separate cells, 10; ditto, when more than one prisoner sleeps in one cell, 80; total number of prisoners who have been in gaol throughout the year, male, 112, female, 8; total 120. Number of debtors, male, 65; female, none. Number of misdemeanors, male, 38; female, 3. Number of felons, male, 9; female, 5. Number of tried prisoners, male, 12; female, 8. Number of untried prisoners, male 35; female, none. Cases of sickness and death—cases of sickness in the year, 6; greatest number of sick at one time, 2; deaths, 1.

X. Prince Edward Island has its own Lieutenantgovernor, Council, and House of Assembly, constituted after the manner described in the preceding chapters; its military protection is under the control of the Nova Scotia Commander of the Forces. The Council consists generally of nine members appointed by the King's mandamus; and the House of Assembly of eighteen members, elected by the people as in the other colonies-four for each county, and two for each of the towns of Charlotte, George and Prince towns. The form of procedure is that of the British Parliament. The Executive and Legislative Council consists of nine members, including the Bishop of Nova Scotia, Surveyor-General, Attorney-General, Colonial Treasurer, Town-major, Collector of Customs and Imposts &c. There is a Court of Chancery regulated after that of Westminster, over which

the Governor presides; and the jurisprudence of the colony is managed by a Chief Justice. The laws are English. The militia consists of a troop of cavalry in each county, two companies of artillery, and 11 regiments of foot; the whole comprizing 329 officers, and 4,545 non-commissioned officers and rank and file. The regular troops are derived from Nova Scotia, and consist of one Captain, one Subaltern, and rank and file, relieved every year from Halifax.

XI. The first revenue attempted to be levied for the support of the government, as before stated, was the quit-rents; these failing in their extent, a Parliamentary grant was applied for and obtained.

The revenue of the island in 1821, was 2,0521.; in 1822, 2,311l.; in 1823, 2,019l.; in 1824, 2,052l.; in 1825, 2,479l.; in 1826, 4,935l.; and since then the income has been thus :-

and expenditure for the year 1833 :-

Receipts at the Treasury for 1833.—By balance in the treasurers' hands, 9,268l.; by impost duty for past year as under,-Charlotte Town, 3,9351.; Richmond Bay, 23l.; Bedeque, 192l.; Cascumpec, 28l; Three Rivers, 225l; Tryon and Crapaud, 1l.; St. Margaret's, 17l.; Port Hill, 75l.; New London, 89l.; Colville Bay, 2001.; Belfast, 1931.; St. Peter's, 841.; total, 5,0681. Light duty, 771; tavern and retailer's of spirituous liquor, licences, 301/.; hawkers and pedlars, 81.; gross receipts at post office, 3271.; fines and penalties, 701.; rent of Hillsborough ferry, opposite Charlotte Town, 611; assessment under Road Compensation Act, 701.; wharfage, 381.; from securities of late treasurer, 511.; one year's land assessment, 1,4501.; interest received on bonds, 1311.; treasury notes received from commissioners, 5,000l.; total, 21.9524.

General Abstract.—1833, Jan. 5th., to amount of treasury notes in circulation at this date, 11,500l; Dec. 13th., further issue of treasury notes under Act 3 Will. IV., c. 13, 5 000l.; total, 16,500l. 1834, Jan. 20th., by balance in the hands of the treasurer as above, 8,165l.; by balance due by the sureties of 500l.; advance for a new block for Charlotte Town

The following documents shew the items of receipt | the late treasurer, 339/.; balance, 7,994/.; total, 16,500%.

Expenditure for 1833 -Roads and bridges, 3,5451.; schools, 6741.; agricultural societies, 2001.; crown prosecutions, &c. 334l.; crown officers' fees, 80l.; inland mails, 199l; foreign mails, 436l.; militia, 72l.; annuities, 56l.; destroying bears and loupcerviers, 641.; coroners and jurors' fees, 651.; house of assembly, 972l; legislative council, 204l.; executive council for salary of messenger, &c. 40%; colonial secretary's and lieutenant-governors' fees, 3441; printing and stationery, 4281.; market-house, 381.; sheriff's allowance and gaol expenses, 264%; extra work work on Poplar Island Bridge, 801.; forming a census, &c. 1881.; Ellis River Hards, 651.; repairs of Hillsborough ferry-house, 241; advance for building government-house, 1,4001; advance for building an academy, 6001.; building court-house and gaol in Prince County, 2401.; ditto in King's County, 2871.; drawback, 91.; commissioners for issuing treasury notes, 60l.; printing treasury notes, 95l.; public surveys, 134l.; salary of colony agent, 136l.; ditto of collector of impost, Charlotte Town, 260l.; ditto of sub-collector of customs, 1701.; ditto of treasurer,

Wherf, 500l.; road compensation granted, 77l.; lunatics, 89l.; assayer of weights and measures, 15l.; salary of wharfinger, 40l; Prince Town wharf, 9l.; rent of government house, 150l.; advance for building Georgetown wharf, 30l.; refunded to J. Stewart, 38l.; Lieutenant-governor Young, 300l.; repairing-houses, 40l.; contingencies, 201l.; total, 13,759l.; balance, 8,165l.; grand total, 21,925l.

The expenditure of the past year thus appears considerably to exceed that of any former year, the total amount being 13,759l. 6s. $5\frac{1}{2}d$.; this great increase only be accounted was contemplated by the House of Assembly at its for the two last yes to meet the expenditure which was occasioned by the

appropriations for the erection of the New Government House, Academy, and other Public Buildings, together with a larger amount than usual for the service of Roads and Bridges, and for additions to the wharfs at Charlotte Town and George Town, but in making such additional appropriations a Revenue to redeem that issue of Treasury Notes was anticipated, and will be derived under the Act levying an assessment on land. There is a very great deficiency in the amount of revenue derived from imposts, which can only be accounted for from a falling off in our exports, occasioned by the failure of our agricultural produce for the two last years, and from the advanced prices of foreign articles.

No returns for 1826 or 1827.

of shipping built in the colony;—during the year 1833 there were 32 vessels launched and registered many of them small, but in the aggregate showing a tonnage of 4,006. In 1836 the number was 41, tonnage 4,749. The number of vessels employed in the foreign and coasting trade belonging to the island in the same year was, foreign, five vessels—tons, 1,169; men, 45; coasting, 124 vessels, tons, 6346; men, 359. During the year ending Dec. 1832, there were transferred from the island to other ports, 32 vessels, with a tonnage of 3,202.

XIII. Amount of paper currency in circulation in 1836. In 5l. notes, 2,350l.; in 2l. notes, 3,396l.; in 1l. notes, 4,534l.; in 10s. notes, 3,732l.; in 5s. notes, 768l.; total 14,780l.

Of the last issue of 5,000l., the treasurer is directed by the act to pay off and cancel annually, notes to the amount of 1,000l., until the whole 5,000l. shall be redeemed; of this sum, 1,000l. has been redeemed this year, and there remains 3,000l. unredeemed. There is no bank in the island.

XIV. Considerable attention is now directed to agriculture and timber.

Comparatively speaking, there is also a good deal | County, grist mills, 15; ditto saw mills, 11. Queen's County, grist mills, 16; ditto saw mills, 16. Charlotte Town Royalty, grist mills, 2. [B. B.]

Prince Edward Island is admirably adapted for in-The mills in the island in 1836, were, King's dustrious emigrants with small capitals. Crop after County, grist mills, 13; ditto saw mills, 2. Prince crop of wheat is raised without manuring—the barley is excellent, and oats much superior to any other of American growth; the potatoes and turnips cannot be exceeded any where; and peas and beans are equally good. Cabbage, carrots, and parsnips, are produced as good as any in England; in fact, all the produce of English gardens will thrive equally well. The No. of acres granted, 138,500; ditto sold, 1,255; remaining ungranted, 4,000.

The climate is particularly favourable to sheep; they are not subject to the rot, or any disease common to sheep in this country: they are small, but of excellent flavour; the common size is about 60lbs. the carcase. Hares and patridges are plenty, and are free for any person to kill; and in the spring and autumn, great plenty of wild geese, ducks, and other water fowl.

Statistical Return of Land, Produce, Stock &c., taken under the authority of the Act William IV. cap. 7.

The fisheries of Prince Edward Island have not been sufficiently attended to; the herring fishery is of great importance; it commences early in the spring, when the bays and harbours, particularly on the north side of the island, are no sooner clear of ice than they are filled with immense shoals of those fish, which may be taken in any quantity: they are larger, though not so fat, generally, as those taken off the western coasts of Ireland and Scotland, and partake more of the character of the Swedish herring. Alewives or Gasperaus, although not so plentiful as the herring, appear in great quantities. Mackarel are extremely numerous on the coast and in the harbours, from June to November. Cod are caught in great plenty in every part of the Gulf of St. Lawrence, more particularly on the coast of Prince Edward Island, the bay of Chalcur, and in the Straits of Belleisle. Trout is found every where extremely fine, and often very large; the halibut taken, sometimes weigh 300lbs. Sturgeons are common, in the summer months, in all the harbours, some messuring six to seven feet in length. Perch are found in all rivers and ponds that have a communication with the sea.

254

The lobsters are in great abundance, and very large and fine. In Europe this kind of shell-fish is only taken on the sea-coast amongst rocks; at Prince Edward Island they are taken in the rivers and on shallows, where they feed on a kind of sea-weed, called by the islanders eel grass, and a person wading into the water half-leg deep, might fill a bushel basket in half an hour. Many schooners are annually laden with oysters for Quebec and Newfoundland.

The plenty of fish, and the case with which it is procured, is of great assistance to the inhabitants, and in particular to new settlers, before they have time to raise food from the produce of the land.

The present mode of obtaining land in Prince Edward Island is, either by lease for a long term of years at 1s, to 1s. 6d. per acre per annum — one or more years free, then 3d. per acre, and increasing yearly at that rate to full rent; or by purchase at from 10s. to 20s. and upward per acre. This is to be understood of woodland that it is wholly unimproved. Some proprietors have had farms fall into hand with more or less of cleared land on them; these of course are let or sold at an advanced sum, but commonly for less than the cost of clearing. Emigrants who might not choose to sit down on a wood farm, would have many opportunities of purchasing the leasehold. or freehold, and improvements of partly cleared farms; and it would be wise in those possessing the means to do so.

The proprietors, with a view to escape the oppressive effect of a quit rent or a land tax, now offer their estates on the following terms:-

1st. Proposed terms for conducting sales of lands in the Island of Prince Edward.

Each township belonging to the undersigned will be surveyed as the demand for lands arise, roads laid out in the most judicious direction, and the land be parcelled out in lots of 100 or 200 acres each, with a frontage on the road of 10 chains to each 100

An up-set price will be set on each lot, regard being had to quality and location, varying from 6s. 3d. Halifax currency to 20s. Halifax currency per acre; the great body of lands to be offered at the lesser or intermediate prices, and the higher for those lots only of the first quality, as to soil and convenience of location. The government demand, for ungranted lands in the island, 20s. Halifax currency per acre. average price of land sold by the British North American Land Company last year, was 9s. per acre. The timber lands, sold in New Brunswick to Americans in large tracts, brought from 10s. to 15s. per acre. tract, belonging to the heirs of Sir John Wentworth. situate in the district of Pictou, in the province of Nova Scotia, sold in 1835, from 15s. to 20s. per acre; and the undersigned have the best authority for asserting their lands to be equal in soil, and more eligible for settlement, than any of the above referred to. By the British Packet, which arrived in December, one of the undersigned has received a proposal from a resident in the island, for the purchase of 500 acres of his estate, at the price of 20s. currency per

Sale to be offered on the following terms and conditions: -The purchaser, on paying 25 per cent. of the price, to be let into possession of the land, under an agreement to pay the interest annually, and to be entitled, on one half of the purchase money being paid, to have a deed in fee simple. The agreement to be in writing, and signed by both parties. Before ing into possession, the buyer to execute a warrant sharey in ejectment, to be acted upon, if failure te mie in the payment of interest or purchase ry. To secure the other half of the purchase ry, the purchaser to give a mortgage over the with a power of sale contained in it, and to exea warrant of attorney in ejectment, both to be existing, or to be hereafter imposed upon land. in conformity with the agreement.

As the purchaser is to receive the balance, if a sale id take place, over the money owing by him, it saids and legal expenses should be avoided. The power of sale and warrant are insisted upon to save

ecemany expense.

The proprietor to be bound in the said agreement and mortgage, to receive the balance of the purchase ey, with the interest due, whenever tendered.

The purchaser to pay the remaining moiety in five el instalments, with interest, charged at the rate of the per cent., due at the time of each instalment being paid; on failure of payment, the proprietor to the right of selling the lot.

If the proprietor, in default of payment by the purcheer, determine to sell, four months' notice, by avertisement in an Island newspaper, must be pretienly given; and, upon a sale being made, the belone (if any) after deducting expenses, to be paid

by the proprietor to the owner. After the four sthe notice, the proprietor to have the power of wing, at any future time, by public or private sale...

The purchaser, after he obtains his deed, to have the right to sell at any time to a third party; but the proprietor to have the option of accepting the new surchaser as his debtor for the balance of purchaseconey due, or of retaining for such balance the liability of the first purchaser.

The buyer to take the land subject to the payment of quit rent, and any tax now imposed, or that may

ereafter be imposed, upon the land.

2nd. Terms of settlement proposed to the present tenantry. The occupying tenants to have the option | of purchasing their farms at 20 years' purchase in every case, supposing the rents to be is. per acre; if more rent be paid, this sum and proportion to be adopted as the maximum; and to be allowed the same liberal conditions for paying the purchase-money as already stated; or they may continue to hold on lesse, as may be most agreeable to them.

It is impossible to fix a standard to meet the cir-

cumstances of each individual case.

The proprietors bind themselves, absolutely, not to exceed the years of purchase above proposed with any tenant; but they are ready to open a negociation with each of them, and to take into favourable consideration the circumstances which the tenant is of opinion entitle him to a deduction.

The proprietors have the clearest evidence to prove that many settlements have been effected in past years by the tenants upon these terms, and that they will be most acceptable at the present time to the

great body of the tenantry.

3rd. Terms proposed to Emigrants and New Set-tlers for leases. To those who, in place of purchasing, prefer to remain as tenants, to emigrants, and to new settlers, the lands will be let in lots of 100 acres each, upon the following terms :-

Leases will be granted for 61 years certain, or the longest of three lives, to be named when the lease is executed, or for 99 years, upon the following rents:

First and second year No rent.

Third year		()s	3d.	per acre l	
Fourth year		0	6	per acre ditto ditto ditto	Ē
Fifth year		0	9	ditto	` \
Sixth year		l	0	ditto	ज्
	 41 .				

And to continue for the remainder of the term, at the rent of 1s. per acre, or 5l. sterling for 100 acres. The tenant to pay the quit rents, and all taxes now

The rents to be paid by the tenant, either in money, or in grain, salted beef, pork, or butter, raised from the land, at the market price, to be delivered either is interest, as much as that of the proprietor, that at Charlotte Town, or at some other shipping port, as may be decided upon by the proprietor; and a written or printed notice to be given to the tenant, or left at his usual place of abode, at least one month previous to the day of payment. The grain and other articles named, to be delivered in good marketable or shipping condition.

The rent to be paid in labour, if the proprietor require it; but the tenant to have the option of paying in money, or produce raised from the land.

The tenant, at any future time during the continuance of the lease, to have the right of purchasing upon the same terms as before detailed. This will appear as a condition in the lease.

The term day, for the payment of rents, to be the

20th of November in each year.

The undersigned hereby agree to be bound, absolutely, to the terms above stated, for the period of five years from the 1st of May next.

Average prices of various produce and merchandize in 1836.—Horned cattle, 7l. each; horses, 18l.; sheep, 10s.; swine, 11. 10s.; milk, per quart, 4d.; butter, fresh, per lb., 1s.; butter, salt, 10L; cheese, 9d.; wheaten bread, $2\frac{1}{2}d$.; beef, 3d.; mutton, 3d.; pork, 3d.; rice, 3d.; coffee, 1s. 3d.; tea, 3s. 9d.; sugar, 6d.; salt, per bushel, 1s. 9d.; wine, per gallon, 12s.; brandy, 12s.; beer, 1s. 2d.; tobacco, per lb., 1s. 9d.

Wages for Labour .- Domestic, per month, from 15s. to 1l. 10s.; prædial, from 1l. 10s. to 2l.; trades,

from 4/, to 6/.

Estimated Value of Property annually created in Prince Edward Island, and, if not consumed, converted into moveable or immoveable property.-Animal food for 33,000 mouths, 200 lbs. each per annum, at 4d. per lb., 110,000l.; fish for 33,000 mouths, 150 lbs. each per annum, at 111. per lb., 30,9371.; bread and other vegetables for 33,000 mouths, at 34, per day for each person, 150,606l.; butter, milk, cheese, and eggs for 33,000 mouths, at 1d. each per day for 365 days, 50,1871.; luxuries-viz. wines, spirits, ale, tea, coffee, sugar, &c., for 33,000 mouths, at 3d. each per day for 365 days, 150,606l.; food for horses, cows, &c., 100,000 animals, at 11. each per annum, 100,0001. clothes and furniture worn out for 33,000 mouths. at 3l. each per annum, 99,000l.; domestic manufactures, &c., annually produced, value 100,000%; income from business, or profits on professions, &c., at 10% each, 330,000%; waste by fire, loss, bad seasons, &c., value 25,0001.; total annual production of property, 1,146,336/.

Value of Moveable Property: Horses, 6,299, at 10/ each, 32,990/.; horned cattle, 30,428, at 5/. each. 152,140/.; sheep, 50,510, at 1l. each, 50,510l.; swine, 20,702, at 11. each, 20,7021.; poultry, value, 25,0001.; house furniture, &c., value 500,000l.; clothing and equipage, value 165,000l.; machinery, farming implements, &c., value 100,000l.; bullion and coin, value 10,000l.; ships, boats, timber, and other merchandize, value 1,000,000l.; total moveable property,

2,056,3421.

101. each, 55,0001.; saw and grist mills, &c., 75, at 200l each, 15,000l.; land arable, 100,000 acres, at 51. per acre, 500,0001.; land occupied, but untilled, 400,000 acres, at 1l. per acre, 400,000l.; land not granted, 900,000 acres, at 1s. per acre, 45,000l.;

CHAPTER VII.—NEWFOUNDLAND AND THE LABRADOR COAST.

SECTION I. Newfoundland Isle, lying on the N. E. side of the Gulf of St. Lawrence, between the parallels of 46.40. to 59.31. N. latitude, and the meridians of 52.44. to 59.31. longitude W. of Greenwich, is bounded on the whole eastern shore by the Atlantic Ocean; on the N. E. and N. it is separated from the coast of Labrador by the Strait of Belleisle (which is about 50 miles long, by 12 broad), on the N. W. by the Gulf of St. Lawrence, and on the S. W. it approaches at Cape Ray towards Cape Breton Isle, so as to form the main entrance from the Atlantic Ocean into the Gulf of St. Lawrence. Its extreme length, measured on a curve from Cape Race to Griguet Bay, is about 420 miles; its widest part, from Cape Ray to Cape Bonavista, is about 300 miles; and, excluding its broken and rugged shores, the circumference may be stated at 1,000 miles—the whole comprising an area of 36,000 square miles.

Newfoundland is the nearest part of America to Europe, the distance from St. John's, in Newfoundland, to Port Valentia, on the west coast of Ireland, being 1656 miles, and which might be traversed every month throughout the summer, if steam packets were established, in from eight to ten days.

II. The history of this island begins, according to tradition, with its possession by Biorn, a sea king, or pirate of Iceland, who was driven thither, and is said to have taken shelter near Port Grace Harbour, about the year 1001. It is doubtful, however, whether his party ever colonized the island, if so perhaps they had become extinct before its second discovery by John Cabot, the Venetian, who obtained a commission to make discoveries from Henry VII, and during his first voyage, 24th June, 1497, observed a headland, which, as a lucky omen, he named Bonavista, which name it retains to the present day. Cabot brought home with him three of the natives, who were clothed in skins, and speaking a language which no person understood.

Robertson and Pinkerton were of opinion that Newfoundland was first colonized by the Norwegians, and the latter thought the red Indians degenerated savages from the Norwegian settlers, whom Eric, Bishop of Greenland, went to Winland, in 1221, to reform.

The Newfound Island having been afterwards visited by Cotereal, a Portuguese, and Cartier, the French navigator, who reported most favourably on the abundance and excellency of its cod fishery (owing to which it was called Bacalao, the Indian name for that fish), soon attracted fishermen from European nations to visit its coasts: still no permanent settlement was made, and the fate of the early attempts at this object were such as, for a length of time, to deter future adventurers. Besides several others, Mr. Hoare, a merchant of London, fitted out a ship, and attempted to pass the winter there in 1536, but the crew, to

avoid starvation were obliged to resort to the most horrible expedients, and indeed would all have perished had they not luckily found a French ship, in which the emaciated survivors returned to England, giving deplorable accounts of their sufferings. Not deterred by this failure, however, and his own first attempt in 1578, Sir Humphrey Gilbert, the enter-prising half brother of the famous Sir Walter Raleigh, having obtained a patent from Queen Elizabeth for six years, granting him possession of 200 leagues round any point he chose to settle on, sold all his estates in England, and fitted out five small vessels. in which he embarked with 200 people in 1583. Sir Humphrey landed in the Bay of St. John's, and took quiet possession of the country, in the presence of a vast concourse of fishermen, being the crews of 36 vessels of different nations. This unfortunate adventurer was, however, not destined to realize his hopes: being anxious to take possession of as much country as possible, before the expiration of his patent, he proposed to prosecute his discoveries to the south: but his crews mutinied, and part of them returned home; of those who followed him above 100 were lost, in a gale, on board of one of the ships, off the Sable Island, or bank, and disheartened by their adverse circumstances, the others insisted on his steering homeward, which Sir Humphrey reluctantly consented to, remarking that he had but suspended his scheme until the next spring, 'when he would fit out an expedition royally.' His ship, however, foundered in a storm on the passage home, and thus ended this disastrous expedition.

In 1585, according to our next accounts, a voyage was made to Newfoundland, by Sir Bernard Drake, who claimed its sovereignty and fishery in the name of Queen Elizabeth. Sir Bernard seized several Portuguese ships laden with fish, and oil, and furs, and returned to England; but, owing to the war with Spain, and the alarm caused by the Spanish armada, several years clapsed before another voyage was made to the island.

A fresh attempt was made at a settlement in 1610. but this was also abandoned, as well as several subsequent ones. The attempt in 1610 was made by virtue of a patent granted by James I. to the Lord Chan-cellor Bacon, Lord Verulam, the Earl of Northampton, Lord Chief Baron Tanfield, Sir John Doddridge, and 40 other persons, and under the designation of the "Treasurer and Company of Adventurers and Planters of the Cities of London and Bristol for the Colony of Newfoundland." The patent granted the lands between Capes St. Mary and Bonavista, with the seas and islands lying within ten leagues of the coast, for the purpose of securing the trade of fishing to our subjects for ever. Mr. Guy, an intelligent and enterprising merchant of Bristol, who planned this expedition, settled in Conception Bay, remained there two

years, and then returned to England, leaving behind ! ome of his people to carry on the fishery, the attempt et planting being laid aside.

In 1614, Capt. Whitburn was sent out with a comission from the Admiralty to empannel juries, and investigate the abuses complained of by the fishermen; be held a Court of Admiralty on his arrival, and immediately received complaints from the masters of 170 vessels. In two years from this period, Whitburn was appointed chief over a little colony of Welshmen, formed by Dr. William Vaughan on the south part of the island, named by him Cambriol (now Little Britain), and which he purchased from the patentees before mentioned.

And what may be considered the first permanent colony, was established in 1623 by Sir George Calvert, afterwards Lord Baltimore, in order that he might enjoy the exercise of his religion, which was Roman Catholic. The settlers fixed their head quarters at Ferry Low, spreading by degrees over all the bays in the south-eastern peninsula. Lord Baltimore de his son governor over the colony, which he called Aralon, and soon after proceeded thither himself, and it increased and flourished under his management: how his lordship contrived to set aside the former patentees is not known.

Avalon was the ancient name of Glastonbury, in Somersetshire, where it is said Christianity was first preached in Britain: Lord Baltimore transferred the name to his new colony under the idea that it was the first place in North America where Christianity was established.

So important did the settlement of this colony now appear to the authorities at home, that we find the commissions directed to the Lord Treasurer, and others, 'to erect a common fishery, as a nursery for somen; and the first regulation for "governing of His Majesty's subjects inhabiting in Newfoundland, or trafficking in bays," &c. (a very interesting document) was issued by Charles I, and bears date 1633, about which time Lord Falkland sent a colony from Ireland to Newfoundland.

In 1654, Sir David Kirk obtained a grant from Parliament of certain lands in Newfoundland, and proceeded thither with a few settlers; at this time, notwithstanding the constant bickerings between our people and the French, who had established a colony at Placentia, there were settlements effected in fifteen different parts of the island, altogether amounting to 300 families: yet, strange to say, that for many years after this the Board of Trade and Plantations did every thing in their power to prevent any settlers colonising on the island, and authorised the commission of various acts of cruelty on those who had settled !

Shortly after the accession of William III., on war breaking out with France, one of the causes for which was set forth that, " of late the incroachments of the French upon Newfoundland, and His Majesty's subjects' trade and fishery there, had been more like the invasions of an enemy than becoming friends, who enjoyed the advantages of that trade only by permission." The French settlement was attacked, in September, 1692, by Commander Williams, but owing to the spirited conduct of the French governor, the expedition succeeded in doing no more than burning the works on Point Vesti. On the other hand, in 1696, the Chevalier Nesmond, with a strong squadron of French ships, aided by the force on the island, made a descent on the town and harbour of St. John. but having totally failed, he returned to France. Before the close of that year the French were, however, more successful, for another squadron arriving under Brouillan, he, in concert with Ibberville, attacked St. John's, which being now short of military stores, and in a very defenceless state, was compelled to surrender. The French however, did not retain it. but having set fire to the fort and town, sent the garrison on parole to England.

The French admiral appears to have done nothing further, in consequence of a misunderstanding with Ibberville, who commanded the troops, and who followed up his success by destroying all the British settlements, except those of Bonavista and Carbonia Harbour, failing before which, he returned to Placentia.

To retrieve these losses, a British squadron under Admiral Nevil, with 1,500 troops, commanded by Sir. John Gibson, was dispatched, but the cowardice of one commander and the ignorance of the other disappointed the anticipated results; in the meantime the peace of Ryswick put an end to hostilities by replacing things in the position they were in prior to this war, and Sir John Norris was appointed governor to see that the stipulations were properly observed. The government of Newfoundland was at this time an object of ambition, and we find it always conferred on some distinguished officer of the royal navy. Many Acts of Parliament were enacted to regulate the fisheries, conferring privileges on fishing ships, and prohibiting the importation of fish taken by foreigners in foreign ships.

Shortly after the declaration of war against France. in May 1702, Sir John Leake was dispatched with a small squadron to take possession of the whole island, and arriving from England in August, he partially effected the object of his mission, by destroying the French settlements at Trepassey, St. Mary's, Colinet, Great and Little St. Lawrence, and the Island of St. Peter's; and, burning the fishing-boats, he returned to England at the end of the year with twentythree prizes.

In the following year Vice-admiral Graydon, being ordered with a squadron to protect the plantations, arrived off the coast of Newfoundland August 2.1 .: but owing to a fog, which continued with great density for thirty days, his ships were dispersed, and could not be brought together till the 3d, of September. He now called a council of war, as to the practicability of attacking the strong hold of the French at Placentia, and it was decided that it would not be prudent to do so with the force at his disposal, on which he returned to England, without effecting more than protecting the trade, by the presence of his flect: the Admiral was severely and justly consured for his conduct.

The miscarriage of Graydon, encouraged the French to attempt the conquest of the whole island; and the garrison of Placentia having been strongly reinforced from Canada, in the year 1705, five hundred men were dispatched under the command of Subercase, and made a resolute attack on Petty Harbour, a port within nine miles of St. John's, where they were repulsed; the French, however, devastated the different settlements, destroyed Fort Forillon, and spread their ravages coastwise as far as Bonavista.

In the year 1706, Captain Underdown, with only ten ships, destroyed many of the French vessels in the harbours along the coast, notwithstanding that the French had as many as ten armed vessels on that station, and by his activity and success gave a severe blow to their trade. Although Parliament earnestly entreated the Queen to 'use her royal endeavours to recover and preserve the ancient possessions, trade and fisheries of Newfoundland,' little attention was paid to this humble address, the whole disposable force being assigned to the Duke of Marlborough at that time, in the midst of his victorious career. The French, however, notwithstanding their repeated disasters on the continent, still continued to persevere in their endeavours for the expulsion of the English from Newfoundland, and accordingly, St. Ovide, the King's Lieutenant at Placentia, having effected a landing without opposition, or without being discovered, within five leagues of St. John's, attacked and completely destroyed that town, on the 1st of January 1708.

Costabelle, the French commander-in-chief, next directed his force on Carbonia, the only settlement of consequence remaining in the hands of the English, but, on this occasion he was not so fortunate, and was even obliged to abandon the enterprise, after destroying all the buildings within their reach.

The news of this misfortune produced great excitement in England, as the possession of the fisheries had ever been considered a point of immense importance, and an expedition was ordered, under Captain G. Martin and Colonel Francis Nicholson, to attempt the conquest of the island; but, owing to the strong force of the French, they could effect no more than the destruction of a few fishing stations. From this time until the treaty of Utrecht, the French remained in peaceable possession of Newfoundland: by this treaty, however, the island, as well as the adjacent ones, were declared to belong wholly to Great Britain. The French being allowed to catch and cure fish on certain conditions, and to occupy the islets of St. Pierre and Miquelon, with a garrison of fifty men each.

The final conquest of all their American colonies in the seven years' war, made the French glad to receive back this privilege again at the peace of 1763. But as the French have now set up an exclusive (instead of a concurrent) right to a large extent of the coast fishery, and proceeded to drive away, BY FORCE, British vessels engaged in fishing on the very shores of their own island, I give here the following extracts from the treaties between England and France, from 1713 to 1814.

Negotiations respecting Newfoundland .- Treaty of Utrecht, 1715.-Art. 13. "The Island called Newfoundland, with the adjacent islands, shall from this time forward belong of right wholly to Great Britain; and to that end the town and fortress of Placentia, and whatever other places in the said island are in possession of the French, shall be yielded and given up, within seven months from the exchange of the ratifications of this treaty, or sooner, if possible, by the most Christian King, to those who have a commission from the Queen of Great Britain for that purpose. Nor shall the most Christian King, his heirs and successors, or any of their subjects, at any time hereafter, lay claim to any right to the said island or islands, and to any part of it, or them. Moreover, it shall not be lawful for the subjects of France to fortify any place in the said island of Newfoundland, or to erect any buildings there, besides stages made of boards, and huts necessary and usual for drying of fish; or to resort to the said island beyond the time necessary for fishing, and drying of fish. But it shall be allowed to the subjects of France to catch fish, and to dry them on land, in that part only, and in no other besides that, of the said island

of Newfoundland, which stretches from the place called Cape Bonavista to the northern part of the said island, and from thence running down by the western side, reaches as far as the place called Point Riche. But the island called Cape Breton, as also all others, both in the mouth of the river St. Lawrence, and in the gulph of the same name, shall hereafter belong of right to the French, and the most Christian King shall have all manner of liberty to fortify any place or places there."

Treaty of Paris, 1763.-Art. 5. "The subjects of France shall have the liberty of fishing and drying on a part of the coasts of the island of Newfoundland, such as it is specified in the 13th article of the Treaty of Utrecht; which article is renewed and confirmed by the present treaty (except what relates to the island of Cape Breton, as well as to the other islands and coasts in the mouth and in the gulph of St. Lawrence): and his Britannic Majesty consents to leave to the subjects of the most Christian King the liberty of fishing in the gulph of St. Lawrence, on condition that the subjects of France do not exercise the said fishery but at the distance of three leagues from all the coasts belonging to Great Britain, as well as those of the continent, as those of the islands situated in the said gulph of St. Lawrence. And as to what relates to the fishery on the coasts of the island of Cape Breton out of the said gulph, the subjects of the most Christian King shall not be permitted to exercise the said fishery but at the distance of fifteen leagues from the coasts of the island of Cape Breton, and the fishery on the coasts of Nova Scotia or Acadia, and everywhere else out of the said gulph, shall remain on the footing of former treaties."

Art. 6. "The King of Great Britain cedes the islands of St. Pierre and Miquelon, in full right, to his most Christian Majesty, to serve as a shelter to the French fishermen: and his said most Christian Majesty engages not to fortify the said islands; to erect no buildings upon them, but merely for the convenience of the fishery; and to keep upon them a guard of fifty men only for the police."

Treaty of Versailles, 1783.—Art. 4. "His Majesty the King of Great Britain is maintained in his right to the island of Newfoundland, and to the adjacent islands, as the whole were assured to him by the 13th article of the treaty of Utrecht; excepting the islands of St. Pierre and Miquelon, which are ceded in full right, by the present treaty, to his most Christian Majesty.

Art. 5. "His Majesty the most Christian King, in order to prevent the quarrels which have hitherto arisen between the two nations of England and France, consents to renounce the right of fishing, which belongs to him in virtue of the aforesaid article of the Treaty of Utrecht, from Cape Bonavista to Cape St. John, situated on the eastern coast of Newfoundland, in fifty degrees north latitude: and his Majesty the King of Great Britain consents, on his part, that the fishery assigned to the subjects of his most Christian Majesty, beginning at the said Cape St. John, passing to the north, and descending by the western coast of the island of Newfoundland, shall extend to the place called Cape Raye, situated in forty-seven degrees fifty minutes latitude. The French fishermen shall enjoy the fishery which is assigned to them by the present article, as they had the right to enjoy that which was assigned to them by the treaty of Utrecht.

Art. 6. "With regard to the fishery in the gulph of St. Lawrence, the French shall continue to exercise

it, conformably to the fifth article of the treaty of | not go beyond this line. His Majesty is firmly per-Paris."

Declaration of his Britannic Majesty .- 1. "The King having entirely agreed with his most Christian Majesty upon the articles of the definitive treaty, will seek every means which shall not only ensure the execution thereof, with his accustomed good faith and quetuality, but will beside give, on his part, all possible efficacy to the principles which shall prevent even the least foundation of dispute for the future.

"To this end, and in order that the fishermen of the two nations may not give cause for daily quarrels, his Britannic Majesty will take the most positive measures for preventing his subjects from interrupting, in any manner, by their competition, the fishery of the French, during the temporary exercise of it which is granted to them upon the coasts of the island of Newfoundland; and he will for this purpose, cause the fixed settlements, which shall be formed there, to be removed. His Britannic Majesty will give orders that the French fishermen be not incommoded in cutting the wood necessary for the repair of their scaffolds, huts, and fishing vessels.

"The thirteenth article of the treaty of Utrecht, and the method of carrying on the fishery, which has at all times been acknowledged, shall be the plan upon which the fishery shall be carried on there: it shall not be deviated from by either party; the French fishermen building only their scaffolds, confining themselves to the repair of their fishing vessels, and not wintering there; the subjects of his Britannic Majesty, on their part, not molesting in any manner the French fishermen during their fishing, nor injuring their scaffolds during their absence.

"The King of Great Britain, in ceding the islands of St. Pierre and Miquelon to France, regards them as ceded for the purpose of serving as a real shelter to the French fishermen, and in full confidence that these possessions will not become an object of jealousy between the two nations; and that the fishery between the said islands and that of Newfoundland shall be limited to the middle of the channel.

"MANCHESTER. "Given at Versailles, the 3rd September, 1783."

Counter Declaration of his most Christian Majesty. "The principles which have guided the King in the whole course of the negociations which preceded the re-establishment of peace, must have convinced the King of Great Britain, that his Majesty has had no other design than to render it solid and lasting, by preventing as much as possible, in the four quarters of the world, every subject of discussion and quarrel.

"The King of Great Britain undoubtedly places too much confidence in the uprightness of his Majesty's intentions not to rely upon his constant attention to prevent the islands of St. Pierre and Miquelon from becoming an object of jealousy between the two

"As to the fishery on the coasts of Newfoundland. which has been the object of the new arrangements settled by the two Sovereigns upon this matter, it is sufficiently ascertained by the fifth article of the treaty of peace signed this day, and by the declaration likewise delivered to-day, by his Britannic Majesty's Ambassador Extraordinary and Plenipotentiary; and his Majesty declares that he is fully satisfied on this head.

"In regard to the fishery between the island of Newfoundland and those of St. Pierre and Miquelon, it is not to be carried on by either party, but to the middle of the channel; and his Majesty will give the most positive orders that the French fishermen shall

suaded that the King of Great Britain will give like orders to the English fishermen.

"Gravier de Vergennes.

"Given at Versailles, the 3rd September, 1783." Treaty of Paris, 1814. - Art. 8. "His Britannic Majesty, stipulating for himself and his allies, engages to restore to his most Christian Majesty, within the term which shall be hereafter fixed, the colonies, fisheries, factories, and establishments of every kind which were possessed by France on the 1st January, 1792, in the seas, and on the continents of America, Africa, and Asia, with exception, however, of the islands of Tobago and St. Lucie, and the Isle of France and its dependencies, especially Rodrigues and Les Sechelles, which several colonies and possessions his most Christian Majesty cedes in full right and sovereignty to his Britannic Majesty, and also the portion of St. Domingo ceded to France by the treaty of Basle, and which his most Christian Majesty restores in full right and sovereignty to his Catholic Majesty.

Art. 13. "The French right of fishery upon the Great Bank of Newfoundland, upon the coasts of the island of that name, and of those adjacent islands in the St. Lawrence, shall be replaced upon the footing in which it stood in 1792."

Treaty of Paris, 1815 .- Art. 11. "The treaty of Paris of the 30th of May, 1814, and the final Act of the Congress of Vienna of the 9th of June, 1815, are confirmed, and shall be maintained in all such of their enactments which shall not have been modified by the articles of the present treaty."

In order to elucidate the meaning (if indeed such be required) of the treaties between Great Britain and France, on the subject of an exclusive or concurrent right of fishing on the Newfoundland coasts, the following extracts from the treaties on the same subject, between England and the United States are

Treaty of 1783 .- Art. 3. "It is agreed that the people of the United States shall continue to enjoy unmolested the right to take fish of every kind on the Grand Bank, and all other banks of Newfoundland. also in the gulf of St. Lawrence, and at all other places in the sea where the inhabitants of both countries used at any time heretofore to fish; and also that the inhabitants of the United States shall have liberty to take fish of any kind on such part of the coast of Newfoundland as British fishermen shall use (but not to dry and cure the same on that island), and also in bays and creeks of all other of his Britannic Majesty's dominions in America; and that the American fishermen shall have liberty to dry and cure fish in any of the unsettled bays, harbours and creeks of Nova Scotia, Magdalen Islands, and Labrador, so long as the same shall remain unsettled; but so soon as the same or either of them shall be settled, it shall not be lawful for the said fishermen to dry or cure fish at such settlements without a previous agreement for that purpose with the inhabitants, proprietors or possessors of that ground."

In 1818, the United States' Plenipotentiary knew too well the value of the privileges of fishing on the coasts of our territory not to make it an important branch of his negociations; thus-

"Whereas," says the convention, "differences have arisen respecting the liberty claimed by the United States for the inhabitants thereof, to take, dry, and cure fish on certain coasts, bays, harbours and creeks of his Britannic Majesty's dominions in America; it is agreed between the single contracting parties, that

the inhabitants of the said United States shall have for ever, in connexion with the subjects of his Britannic Majesty, the liberty to take fish of every kind on that part of the southern coast of Newfoundland which extends from Cape Ray to the Rameau Islands, on the western and northern coast of Newfoundland, from the said Cape Ray to the Guiperon Islands, on the shores of Magdalen Islands, and also on the coasts, bays, harbours and creeks, from Mount Jolly, on the southern coast of Labrador, to and through the Straits of Belleisle, and thence northwardly, indefinitely along the coast, without prejudice, however, to any of the exclusive rights of the Hudson's Bay Company."

The practical effect of the claims enforced by the French of exclusive rights on our coast, and which as justly may be claimed on the coast of Sussex, is the virtual cession of the larger and better half of Newfoundland to France, for from Cape Ray to the Quirpon islands, not ten British settlers are to be found, although the land is well adapted for cultivation and pasturare.

III. Little is known of the interior of this vast island, which stands on an immense bank, in length about 600 miles, with a breadth of about 200 miles, and with soundings varying from 25 to 95 fathoms.

There are two banks, the outer one lies within the parallels of 44. 10. and 47. 30. N. latitude, and the meridians 44. 15. and 45. 25. W. longitude, with soundings from 100 to 160 fathoms. This bank appears to be a continuation of the Great Bank, and a succession may be observed the whole way to Nova Scotia.

Newfoundland is in shape nearly triangular, the apex thereof being to the northward, and the base extending east and west from Cape Ray to Cape Race. Like the Nova Scotia shores, and for a reason similar to the one given under that chapter, the coast is every where indented at intervals of two or three miles, by broad and deep bays, innumerable harbours, coves, creeks, and rivers. The island all round is rocky, (with pebbly beaches), generally covered with wood down to the water's edge, and with some lofty headlands on the S. W. side.

Beginning at the south-east part, Newfoundland is formed into a peninsula of 26 leagues in length, and five to 20 in breadth, by two large bays, the heads of which are separated by an isthmus not exceeding four miles in width. This peninsula has five large bays, and several smaller ones, and is that part of the island named by Sir George Calvert, afterwards Lord Baltimore, Avalon.

To the north of Avalon, and on the eastern side of the island, lies Trinity Bay, between 47.55. and 48. 37. north latitude. This bay nearly divides the old province of Avalon from the rest of Newfoundland; separated from the Bay of Bonavista by a narrow neck of land; it has on the north side Trinity Harbour, Ireland's Eye, and Long Harbour; to the south west, Bull's Bay and Islands, and Tickle Harbour; to the south Chapel Bay; to the east and north-east Heart's Delight, Heart's Content, &c.; and from thence through the Harbours of New Pelican and Old Pelican, we pass Break-heart Point, leading to the Point of Grates.

Round this point, about three miles from Conception Bay, lies the small island of Baccalao, an insulated rock, where an extraordinary number of birds congregate to hatch their young—these are called Baccalao birds; and from their continual scream being heard a considerable distance at sea, and serving as a warning to mariners during the constant

fogs, the different governors (in former years) have issued proclamations imposing severe penalties on such as should molest them.

Conception Bay ranks as the first district in Newfoundland, not only from its numerous commodious harbours, coves, &c., but from the spirit and enterprise of its inhabitants. Harbour Grace is the principal town of this district; Carbonear, or Collier's Harbour is the next in importance, but its harbour, though spacious, is not considered at all seasons secure; besides these there are several considerable settlements, as far up the bay as Holy Rood, fornsed by the deep inlets, separated by perpendicular rocks, which run out into the sea for two or three leagues, though they are not a mile in breadth. The scenery on this part of the coast is majestic, wild, and calculated to strike the beholder with awe.

The Cape of St. Francis, the eastern boundary of Conception Bay, is distant seven miles from St. John's Harbour; four leagues lower is Torbay, a fishing station; and three leagues further is St. John's. The harbour is one of the best in the island, being formed between two mountains, the eastern points of which leave an entrance, called the Narrows.

From the circumstances of the harbour being only accessible by one very large ship at a time, and from the numerous fortifications and batteries erected for its protection, St John's is a place of considerable strength. The Narrows, which is the only assailable part, is so well guarded that any vessel attempting to force an entrance would be inevitably sunk. There is a signal post on the top of a lofty hill, on the right of the entrance of the Narrows, which telegraphs to the town the arrival of every vessel that passes, where from, and the length of passage.— There are about 12 fathoms water in the middle of the channel, with tolerably good anchorage ground. The most lofty perpendicular precipices rise to a considerable height upon both sides, but the southern shore has rather the greater altitude, only from a comparison with the opposite rocks. There is a light shewn every night at Fort Amherst on the left side of the entrance, where there is also a signal post, whence the ships that pass are hailed, and signals made to the hill before-mentioned, which repeats them to the Government House and the Town: other batteries of greater strength appear towering above the rocky eminences towards the north. At about two-thirds of the distance between the entrance, and, what may properly be termed the harbour itself, there lies a dangerous shelf, called the Pancake, opposite the Chain Rock, so named from a chain which extends across the strait at that place, to prevent the admission of any hostile fleet. Mariners on entering the place ought to beware of approaching too near the rocks, on the larboard-hand inside the light-house point. Fort Townshend is situated immediately over the town, and was the usual residence of the governor. Fort William is more towards the north; and there is also a small battery perched on the top of a single pyramidical mount, called the Crow's Nest. The south-east limits of St. John's Bay is formed by Cape Spear, about four miles from the Narrows. Petty Harbour is a fishing station of some importance, as is also the Bay of Bulls about seven leagues from the mouth of the harbour. This last is difficult of access on account of some sunken rocks, but once in vessels are land locked and ride in safety. [For topography, &c., see "Colonial Lib-rary," vol. vi.]

Of the Labrador coast we know yet less than of the

adjacent island of Newfoundland, to whose government it belongs. It may be said to extend from 50 to the 61st degree of north latitude, and from 56 (on the Atlantic) to 78 (on Hudson's Bay) west longitude, the prevailing features being rocks, swamps, valleys, and mountains.

IV. The prevailing rock on the Labrador coast is gneis. On this at Lanse à Loup, a bed of old red sandstone is super-ground, about 200 feet thick, and extending above half a mile inland. Here also, as on every other part of the coast of Labrador visited, the appearance of the cliffs, and of the land near them, and the rolled masses inland, which have evidently been exposed to the action of the sea, seem to prove that this has considerably receded. The sandstone is generally red and white, in alternate stripes, and presents a remarkable mural front to the sea. Near the surface it was strongly marked with iron. The whole of the rock was composed of white quartz and yellow felspar: and the grains were generally as fine as oatmeal, though occasionally coarser, even to the extent of half an inch in diameter. Both coarse and fine bear marks of being a mechanical deposit, being perfectly distinct, without the least appearance of amalgamation; only a few exceptions occurring to this remark.

Over the red sandstone was a thin stratum of red compact felspar, containing vegetable impressions, and also horizontal. Above this were varieties of secondary limestone, arranged in parallel strata several feet thick, and full of shells. Detached masses of primitive limestone were also found; and a few miles from the shore the secondary formations generally disappeared, leaving gneis and mica slate on the surface.

The geology of the contiguous island of Newfoundland is of the same features as that on the Labrador coast. The former abounds, it is said, with minerals of the former abounds, it is said, with minerals of the former abounds, it is said, with minerals of the fogs, &c., VI. In consect conception Bay contains mines of several sorts, at the head of Chapel Cove there is a coal mine, a lime kiln was erected in that neighbourhood some years back and worked with tolerable success. There is a estated to be an iron mine on the northern side of Belleigh, and another at Harbour Grace; and many of them affirm that there is a copper mine near St.

John's, which has actually been worked by Cornish miners brought out for that purpose. There is also a quantity of that mineral called marcasite, copperas stone, and horse gold (and which some of the earlier discoverers mistook for the genuine metal) found about Catalina Harbour. Coal has been found on the banks of the Humber, and there are excellent gypsum quarries near Cape Ray. Although a large part of the island consists of plains, studded with rocks, and termed "barrens," there is a considerable extent of alluvial soil capable of growing wheat and other grain. Springs of fresh water everywhere abound, and the island is well adapted for the pasturage of horned cattle on an extensive scale.

V. The climate of Newfoundland varies according to the locale of the island, whether north or south, and the weather, although severe, is less fierce than that of Lower Canada, while during a long winter the brilliancy of the Aurora Borealis and the splendid lustre of the moon and stars give peculiar beauty to the atmosphere.

The longevity of the inhabitants is the best proof of the salubrity of Newfoundland, in no country is old age attended with greater bodily vigour and mental animation. There are instances of fishermen 100 years of age being actively employed in the arduous duties of their calling.

duties of their calling.

On the coast of Labrador the winter is extremely severe, the thermometer often falling 300 below the freezing point, and although the houses of the Moravian Missionaries are heated by large cast iron stoves, the windows and walls are all the winter covered with ice, and the bed clothes freeze to the walls; rum is frozen in the air as rapidly as water, and rectified spirits soon become thick like oil. [For an account of the fogs, &c., see "Colonial Library," Vol. VI.]

VI. In consequence of the extensive fisherics carried on along its coasts, the population of Newfoundland necessarily fluctuates, and it is difficult to obtain an exact census. In 1806, the number of mouths were estimated at 26,505. I have obtained two more recent censuses, the one for 1822 from the House of Commons Library, the other for 1827-8 from the Colonial Office.

Population of Newfoundland in 1822-3, and in 1827-8.

		1822-3.			1827-8.

			* King's i	roops, 340				60088	·! ;

In 1822, marriages, 516; births, 1,675; deaths, 735. In 1827, marriages, 442; births, 1,879; deaths, 696. It will be readily conceived, by the great disproportion in number of births over the deaths, how rapidly the population is increasing.

A more complete census than either of the foregoing was taken in 1825, and for which I am indebted along with other documents to the Firm of Robinson, Brooking & Co. It is thought that in all the southern districts the population has decreased since the peace, but in the neighbourhood of St. John's, where the soil is more fertile, and where there is a more abundant stock of capital afloat, population has increased.

Population of Newfoundland, as per census taken in the year 1825.

Allowing for passengers, 960, the total would be 55,719.

The marriages within the year were 500, the births 1800, and the deaths 750.

The number of French on our coast of Newfoundland, and from which Englishmen are excluded, is said to amount to 12,000.

When Newfoundland was first visited after the general discovery of the continent of America, it was found to contain two distinct races of men—the one termed Red Indian, the other the Esquimaux; both are now almost extinct, the former perhaps entirely so, as recriminating hostilities were waged between them and the early settlers, who shot and speared each other whenever an occasion presented itself. The destruction of the Red Indians was not owing solely to the European, but in fact, mainly to the exterminating war carried on against the former by the Mic-Mac Indians, who arrived in the island, in considerable numbers, from Nova Scotia and Cape Breton.

The [B. B.] at the Colonial Office for 1836, gives the following census of European population:—

Total			41467	32238	73705

The area in square miles has not been ascertained; the boundary of each district towards the interior.

having never been correctly defined. The population to the square mile cannot be ascertained or calculated, the interior of the island not being settled or inhabited. The population is dispersed along the margin of the sea coast; except about St. John's, very few buildings are to be found, beyond one mile from the sea.

Although the agriculture of this colony is progressively increasing, yet there are comparatively few persons employed in it exclusively, the population being nearly all employed in the fisheries. Almost every family, however, have a small quantity of land in cultivation.

The commerce cannot be ascertained accurately, as it is carried on mainly in vessels, which, as well as their crews, belong to other countries. Accurate returns of the births, marriages, deaths, &c., could not be procured, as no register of burials is kept in the Roman Catholic Church.

The Esquimaux, who are thinly scattered on the Labrador coast, are similar to the Greenlanders, the language of the latter affording a dialect for the former; in summer they live in tents prepared like those of the Greenlanders, but in winter their habitations are constructed in a different manner: chusing a large drift of snow, the Esquimaux digs a hole in it corresponding with the dimensions of the intended house; pieces of snow, three feet long, two in breadth, and one foot thick, are then cut and placed in the form of an arch over the hole; instead of a window an aperture is cut in the arch, and a slab of clear ice admits sufficient light; the entrance to the dwelling is long, winding and very low, and another slab of thick ice forms the door. In the middle of the house is an elevation of snow 20 inches high, covered with skins and used as the sleeping place. Such is the extraordinary construction of an Esquimaux's dwelling for nine months of the year.

It is very probable that the number of the Esqui-maux on the Labrador coast, notwithstanding the ex-creasing.

VII. Return of the number of Churches, Livings, &c., of Newfoundland in 1836. [B. B.]

Besides two Dissenting places of worship at St. John's, one of which is Congregational and the other Wesleyan, there are 27 in the different scattered settlements of the Colony, all of them Wesleyan. The Protestant Episcopal Clergymen in this colony are all Missionaries appointed by the Society P G.F., by whom they are paid. The Archdeacon receives 3001. per annum from Government, in addition to his stipend from the Society.

There are, in fact, no parishes (as the term is generally understood) in this Colony. The respective Clergymen of the different religious persuasions, have each a district appropriated to his spiritual charge, quite distinct (as to limits and extent) from each other. Nor can they be made to correspond, so as to admit of their being brought into the view required by this return.

There has usually existed a very commendable harmony of religious feeling between the different persuasions, the Wesleyans, Roman Catholics, Congregationists, and Dissenters generally being more numerous than the Episcopalian Church, over which there is an archdeacon; the Romish Church has a bishop.

VIII. The following table relative to education is poor of our North American Colonies; and it fully derived from a most praiseworthy institution, established for promoting sound knowledge among the

deserves the warmest encouragement and support.

^{*} No account of the funds or expenses of these schools are kept in the colony, the contributions for the most part being made in England, where also the management of the affairs of the schools is entirely conducted.

Since the establishment of the Presentation School, the female scholars have been withdrawn, and a proportionate increase of boys has taken place. This school is conducted by five ladies of the nuns of that order, without any remuneration; the superior superintending under the Catholic bishop for the time being. The school, it is said, has hitherto been supported by Dr. Fleming, the present bishop; but the Colonial Legislature has, this year, voted the sum of 1001. per annum for its support, for the five years ending 6th May, 1841.

The Education Act passed in the last session of the Legislature having been only partially brought into operation, no returns of the schools established under it can yet be made.

The salaries of the masters, mistresses, and teachers of these schools (amounting to about 1,500*l*. per annum) are paid out of the funds of the society, towards which the Legislature has voted the sum of 300*l*. for each of the five years ending the 6th May, 1841.

X. The island affairs are administered by a House of Assembly, consisting of 15 members, chosen by the people. The qualification for an elector is universal household suffrage—that of a representative, being a householder of two years' standing. A Legislative and Executive Council is added to the House of Assembly.

Newfoundland has had a resident governor ever since the year 1728, and amongst the distinguished officers who have held that office, we find the names | licenses, &c.

of Rodney, Osborne, Byng, Hardy, Graves, &c. Civil and justiciary courts were early established; and a superior court was added about 1750. In 1832, a representative government was given to Newfoundland, similar to that enjoyed at Nova Scotia.

The laws are in English, and administered by circuit courts. There is no militia in the island, and the police are few in number.

XI. The revenue is derived from custom duties,

Comparative Yearly Statement of the Expenditure of Newfoundland.

To Elsewhere, in 1834, value, 7,119l.; 1835, 2,314l.; 1.36, 13,946l.

There is a considerable portion of shipping belonging to Newfoundland, and registered in the island.

I have only the following years :-

Colonial shipping tonnage, belonging to and registered at Newfoundland—In 1826, 20,548 tons; 1827, 22,105 tons; 1828, 25,385 tons; 1829, 27,319 tons; 1830, 29,465 tons; 1831, tons; 1832, tons; 1833, tons; 1834, tons; 1835, tons; 1836, tons.

The principal imports consist of bread, flour, pork and beef, butter, rum, molasses, wine, brandy, and

gin, coffee, tea, sugar, oatmeal, salt, pease and beans, lumber, &c.

We may now proceed to examine the extent of the fisheries, and first with regard to the quantity caught and exported at several intervals. In 1790, the export of fish from the island was, quintals 656,000; in 1800, quintals 382,000. The following is a consecutive return laid before Parliament in 1828, and its value is enhanced by specifying the countries to which the fish were exported.

Fish caught and exported from Newfoundland .- Periods ending 10th of October in each year.

XIII. Course of exchange varies according to circumstances, and to the demand for bills to make remittances to England in payment of spring supplies; it is generally highest in the fall of the year. The demands for bills is governed in a great measure by the success or failure of the fisheries, particularly the seal fishery; in the former event, remittances are made in Oil, in the latter, in Bills. The par of exchange is 15 one-third per cent. premium. In the course of 1836, it rose to 3 above, and fell to 2 5-6th below.

The Bank of British North America, have a branch at St. John's.

British money and Spanish dollars, the latter established by the governor's proclamation (1825) at 4s. 4d. sterling, but passing current at 5s. [B. B.]

XIV. Domestic poultry succeeds very well; land and water wild fowl are found in great abundance, particularly bustards, wild geese, and wild or eider ducks; partridges, snipes, plovers, curlews and black-birds, are also in great abundance, as well as eagles, kites, hawks, ravens and jays.

The partridges are like ptarmigans, (of an excellent flavour) larger than those in Europe, and always perfectly white in winter. The most remarkable of the sea birds which visit the coast of Newfoundland and the lord and lady of the teal kind; the saddleback, gull, tinker, razor-bill, the loon, whabby, and ice hird.

Besides the great staple of the island, fish, (see commerce) the numerous lakes and ponds which abound produce divers kinds of excellent trout and eels of a great size; the lobsters are uncommonly large and equally good, and the muscles better flavoured than in Europe. There are no oysters, but lance, herrings, mackarel and salmon are in great abundance, besides these, place, sole, hallibut and thornback are found on the coast. The capelin, which is perhaps the most delicious fish in the world, arrives periodically in such shoals as to change the colour of the sea, near the coves and beaches, and two persons may easily fill a common sized boat in a couple of hours. This fish remains on the coast about six weeks, and is considered the best bait for cod. The herrings also arrive in the spring and autumn in prodigious shoals.

Potatoes and cabbages are the most valuable productions of the island, growing in plots or gardens attached to the fisherman's houses. Turnips, carrots, parnsnips, peas, radishes and most garden roots yield abundantly. Red, black and white currants, gooseherries and strawberries grow in great perfection; and a smaller kind of strawberry is found wild in the woods; raspberries grow everywhere, and that species of cherry called the Kentish comes to great per-

fection; other sorts as well as damsons, grow abundantly in favourable seasons, besides these apples and pears are sometimes raised in perfection.

The plains are almost covered with low stunted bushes which bear a great variety of wild berries. The snake root, capilaire and wisha capucoa, are indigenous, when in blossom the latter plant is beautiful. It is made by the inhabitants into a decoction and used after the manner of tea, and said to be extremely wholesome in spring. Another remarkable plant found in the woods is the Suracinia, a full description of which is given in Dr. Thornton's Temple of Flora. Sarsaparilla is also found in the island.

The swamps abound with a great variety of reeds and flowers, many of the latter extremely beautiful, such as wild roses, violets, &c., but the season for enjoying them is short, for they all come together and last but a few weeks, which gives rise to the saying common in Newfoundland, "a short feast and a long famine." The timber grown on the Island, though generally of no great magnitude, is rendered very useful for the purposes of the fishery, and vessels of considerable size, varying from 60 to 200 tons each, are built chiefly with native wood. The Juniper (or Hec-ma-tic), Witch Hazel, Black-birch, and Black-spruce, are the most esteemed for these purposes; the common fir is not esteemed for building, but very well adapted for casks and other common uses in the fishery.

Kelp is extremely abundant all round the coast, and with other seaweeds is used for manure. The Zoophyta or animal flowers forming the link between the animal and vegetable kingdoms, may also be frequently met with.

It will be observed from the foregoing returns, that the codfishery is the most important. [For a description of the codfishery at Newfoundland, see *Colonial Library*, vol. vi.]

That the cod fisheries of Newfoundland are to England more precious than the mines of Peru and Mexico, and in truth, if we consider that the vast quantities of fish annually drawn from the banks and adjacent coast, it will be found that as the mere representative value of gold, its worth far exceeds that of the precious metals, to say nothing of the importance of the subject in a maritime, commercial and political point of view.

The total value of the trade of Newfoundland, may in fact be estimated at 2,000,000*l*. sterling per annum, independent of its great importance in a maritime point of view; while it should be remembered, that it is upheld by no bounties (as that of France), nor protected by any exclusive rights.

Another fishery of great importance to the island and to England, is that of seals for the sake of their skins and oil, which, though of comparatively recent commencement, was carried on during the last four years to the following extent:—

Seal Fishery of Newfoundland.

From a recent St. John's paper, I take the following statement of the outfit for the seal fishery at that port, of undermentioned years.

Return for 1830-8 inclusive.

Years.	Vessels.	Tons.	Men.		
1830	92	6198	1935		
1831	118	8046	2578		
1832	153	11462	3294		
1833	106	8665	2564		
1834	125	11029	2910		
1835	126	11167	2912		
1836	126	11425	2955		
1837	121	10648	2940		
1838	110	9300	2826		

In round numbers there were in 1831, seals caught 744,000; 1832, 538,000; 1833, 438,000; 1834, 401,000. In the spring of 1838, there were 221 vessels with 227,758 seals; value, 100,391*l*.

Manufactures, Fisheries, &c. in 1836. [B. B.] There are two corn mills at St. John's, and one at Brigus. The number of ships built in the colony are 24, of 1,578 tons burthen; 107 registered according to law. A copper mine was discovered, and worked for a short time, some years ago (1776–7), near shoal bay, about 15 miles to the southward of St. John's. Some quarries of limestone have also been found, in one of which, at Canada Harbour (on what is called the French shore), the stone is of excellent quality.

The number of ships employed in the fishery cannot be correctly ascertained. The number of boats are 6,159. Quantity of fish in 1836, as follows:—Dried cod fish, 860,354 quintals, value 517,457l.; pickled fish, 1,665l.; salmon, 1,847 tierces, 6,264l.; herrings, 1,534 barrels, 955l.; mackerel, 79 casks, 99l.; caplin, sounds, and tongues, 2,037 casks, 749l.; seal and cod oil, 2,306,736 gallons, 241,502l.; whale oil, blubber and oil, dregs, 83,512 gallons, 4,445l.; seal skins 384,321 number, 34,930l.; total, 808,066l.

Produce, &c. of Newfoundland in 1836. [B. B.]

Very little of the agricultural produce of this colony is brought into the market, it being for the most part consumed by the growers. The average value of the only crops which the soil and climate afford, may be stated as under, viz. oats, 3s. per bushel; potatoes, 2s. 6d. ditto; turnips, 2s. 6d. ditto; hay, 4l. per ton.

Average prices of various Produce and Merchandize in 1836. [B.B.]

Wages for Labour.—Domestic males, 131. to 201. per year; ditto females, 71. to 101. 10s. per year; prædial, males, 121. to 171. per year; trades, 4s. 6d. to 6s. per day.

Property annually created, turned into Moveable or Immoveable Property. — Animal food for 80,000 mouths, 200 lbs. each per annum, at 4d. per lb., 266,666£; fish for ditto, 150 lbs. each per annum, at 1d. per lb., 50,000l.; bread and other vegetables for ditto, at 3d. per day for each, 365,000l.; butter, milk, cheese and eggs for ditto, at 1d. per day for each, 120,166£; *Luxuries, viz.—wines, spirits, ale, tea, coffee, sugar, &c., for ditto, at 3d. per day each, 365,000l.; food for horses, cows, &c., 40,000, at 1l. each, 40,000l.; clothes and furniture worn out for 80,000 mouths, at 1l. each, 80,000l.; domestic produce, value 500,000l.; income from business, or profits on professions, &c., 100,000l.; waste by fire, loss, bad seasons, shipwreck, &c., 10,000l. Total, 1,896,832l.

Moreable Property: 1,000 horses, at 10l. each, 10,000l.; 10,000 horned cattle, at 5l. each, 50,000l.; 10,000 sheep, at 1l. each, 10,000l.; 20,000 swine, at 1l. each, 20,000l.; poultry, 2,000l.; house furniture, &c., for 15,000 houses, at 10l. each, 150,000l.; chling and equipage for 80,000 mouths, at 5l. each, 400,000l.; machinery and farming implements, &c., 20,000l.; bullion and coin, 60,000l.; ships, boats, timber, and other merchandize, 200,000l. Total, 922,000l.

Immoveable Property: 15,000 houses, at 10t. each, 150,000t.; warehouses, mills, &c., 100,000t.; 100,000 acres arable land, at 5t. pcr acre, 500,000t.; 200,000

acres land granted, but untilled, at 1l. per acre 200,000l.; 1,000,000 acres land not granted, at 5s. per acre, 250,000l.; roads, canals, dykes, bridges, wharfs, &c., 50,000l.; forts, gaols, churches, barracks, &c., 300,000l.; manufactories, mines, quarries, fisheries, &c., 1,000,000l. Total, 2,550,000l. Total moveable and immoveable property, 5,368,832l. The statistics of the island are so vague, that the above imperfect estimate could only be made; it is, however, given for the purpose of promoting further inquiry.

CHAPTER VIII.—HUDSON BAY TERRITORIES.

SECTION I. It is difficult to convey an idea of the territories included within this denomination; they may be said to extend between the meridians of 60. and 140. W. (upwards of 4,000 miles) and from the 50th of N. latitude to the Pole.

II. The geography of this large extent of country will be found detailed at considerable length in my "Colonial Library."

III. Hudson Bay was discovered, in 1610, by Henry Hudson, who commanded a vessel fitted out by the English Russia Company for the purpose of exploring a N.W. passage round the continent of America. He was left by his mutinous crew with his son and seven other persons to perish in that inhospitable region. The same company subsequently fitted out several expeditions for exploring these seas, particularly by Button, Fox, James, and Gillam, who made voyages between 1612 and 1668, when the latter, who had been aided by Charles II., at the suggestion of Prince Rupert, passed the winter of 1668 in a river which he named Rupert River, where he built Fort Charles, which he garrisoned, and in the following year returned to England. During his absence, the king had granted to Prince Rupert and the company associated with him their celebrated charter, dated May 2, 1669, which secures to them all the trade and commerce within the entrance of Hudson's Straits, together with all the countries upon the coast, and confines of the said coast and straits, &c. And under this grant the company have held possession up to the present day, its legality having been established by the opinions of eminent lawyers, except during a short period (from 1697 to 1714), when the settlement was occupied by the French.

IV. The human race is scantily but widely diffused over this region. The natives who inhabit the country round Hudson's Bay may be divided into three distinct classes—the Southern Indians, the Northern Indians, and the Esquimaux; the first occupy the entire country to the north of Upper Canada, and their territory lies between that province and the south coast of Hudson's Bay, and that part of the west which lies between Churchill River and Lake Athabasca; these are composed of many tribes, some of whom bring the produce of their hunting to the company's factories, and others take it to trading houses, now established nearer their own homes; they are of a middle size and copper colour, of strong and healthy constitutions, and subject to few diseases: they seldom live to a great age, but generally enjoy all their faculties to the last. They excel in hunting, and are capable of enduring great fatigue, cold, and hunger. They are frequently employed by the factors to procure provisions, and though long used to firearms, they are still so expert with the bow and arrow

as to kill 50 or 60 geese in a day, generally shooting them on the wing.

The Northern Indians occupy the country from the 59th to the 68th degree of north latitude; their territy, of 500 miles in length, is bounded on the south by Churchill River, on the west by the Athabasca Indians, on the east by Hudson's Bay, and on the north by the Dog-ribbed or Copper-coloured Indians, which latter, although speaking the same dialect, never visit the factories, but trade through the intervention of their neighbours, and are described by Hearne as a hospitable and harmless tribe.

The Northern Indians are well proportioned, and about the middle size; they have a peculiar cast of expression, different from any other tribes in the country; their foreheads are low, noses aquiline, chins long, eyes small, and cheek-bones high; their hair, like other tribes, is black, straight, and coarse: the men have little beard, and that they remove by plucking it out; they do not possess that activity of body and liveliness of disposition met with among the other tribes of Indians, who inhabit the west coast of Hudson's Bay.

The Esquimaux, who inhabit the northern coast of Hudson's Bay, seldom approach the fort at Churchill river, a small sloop being periodically dispatched to Knapp's Bay, Navy Bay, and Whale Cove, to trade with them. We have no data as to the numbers of these races: for minute descriptions see "Col. Lib."

The company's settlements around the whole of Hudson's Bay, which is 750 miles long and 600 broad, are only four—namely, at the mouth of Churchill River, 59. N. latitude; on an island between two branches of Nelson's River, in 57½ N. latitude; on the River Albany, in 52. 18. N. latitude; and at the mouth of a small river on the south side of James's Bay. These are all fortified positions; the first named Prince of Wales's or Churchill Fort, the second York, the third Albany, and the fourth Moose Forts. The company have at present in their employ about 1,000 Europeans and their descendants by Indian wives. Under the protection of these are some smaller settlements such as Severn House, in 56. 12. N. latitude, and East Main on Rupert River, in 53.24. N. latitude,

The Hudson's Bay company have nearly 1,000 persons in their employment, and recently they have formed a location for their retired officers, &c. on the Red River, where, according to a census taken during the year 1833, the population of the settlement was 3,070, of whom 1,750 were Catholics and 1,320 Protestants. Very little money is to be seen in the country, all trading being generally carried on by barter. The country is sufficiently fertile. A considerable trade in furs, &c., is carried on by the company.

BOOK IV.—POSSESSIONS IN ASIA.

CHAPTER I.—HINDOSTAN.

SECTION I. The total British territory under the immediate government of the East India Company is 514,190 square miles (i. e. ten times the size of England!); and the extent in square miles of British territory in India, and of territories protected by Great Britain, is 1,128,800\frac{3}{4}.—Parliamentary Return, 1831.

II. The earliest authentic European account of Hindostan is derived from Alexander's army, which the Macedonian chief pushed across the different rivers of the Punjaub, without however reaching the Ganges; at this period a considerable portion of India was subject to the Persian monarchy. Subsequently the Hindoos became tributaries to the all-pervading sway of the disciples of Mahomet, and finally subjects of the victorious Moslems, who, headed by Timur or Tamerlane, extended their conquests from the Irtish and Volga to the Persian Gulf, and from the Ganges to the Archipelago. A century after the death of Tamerlane, the Portuguese appeared on the coast of India, having effected a passage to the eastward by doubling the Cape of Good Hope, and thus completely changed the European route of commerce with the eastern hemisphere, which had previously been carried on by the Red Sea and Egypt, or by the Black Sea and Constantinople. The example of the Portuguese was followed by the Dutch, French, and English. Within less than a century after the death of Timur, or Tamerlane, the Portuguese, under Vasco de Gama, arrived in India, and found the west coast of Coromandel divided between two great sovereigns-the king of Cambay and the Zamorin; by aiding the petty princes who were dependent on the latter, the Portuguese soon acquired a paramount influence on the Malabar shore, and at the commencement of the sixteenth century secured themselves in, and fortified Goa, which they made the capital of their settlements and commerce in the eastern seas, extending over the east coast of Africa, the coasts of Arabia and Persia, the two peninsulas of India, Ceylon, the Moluccastheir trade even stretching to China and Japan. this period they levied tribute on 150 native princes, and claimed and exercised a power to sweep from the Indian seas every European vessel that sailed without their permission. Of this mighty dominion scarcely a vestige now exists. The annexation of Portugal to the crown of Spain, and the war waged against the Hollanders, induced the Dutch, who had heretofore been content with the carrying trade between Lisbon and the north of Europe, to examine India; and at the commencement of the seventeenth century they became formidable rivals of the Portuguese, stripping them first of Malacca and Ceylon, then driving them from various settlements on the Malabar coast, and finally usurping their place on the shores of Coromandel. The enterprising spirit of the English was not long behind in establishing a trade in the eastern hemisphere, and they were followed by the French,

who became the most powerful rivals of the former after the dominion and trade of the Portuguese and Dutch had declined.

The first charter for the incorporation of the East India Company, was granted by Queen Elizabeth on the last day of the sixteenth century, and was one of exclusive trade in the Indian seas for fifteen years with promise of renewal. [A full historical detail of the acquisition by the East India Company of the British territories will be found in my "History of the Colonies" and "Colonial Library."]

We now proceed to examine the details relative to the stipendiary princes—subsidiary and protected states—and feudatory and tributary chieftains of British India.

A large portion of the British dominions in the east is made up of the possessions of princes who either themselves, or their descendants, now enjoy stipends paid to them out of the public revenues. princes first became connected with us by subsidiary alliances, and ceded territories in return for military protection; others lost their dominions by the chances of war; while some territories were taken under our control from the absolute incapacity of the rulers, or their tyranny, which in mercy to the unhappy sufferers we could no longer permit to exist. The princes of the first and last classes are formally installed on the Musnud, allowed to exercise sovereignty over the tenants on their household lands,they are exempted from the jurisdiction of the British courts of law, have their own civil and military functionaries, with all the insignia of state, and a British envoy usually resident at their court, whose duties chiefly relate to their pecuniary affairs, or the ceremonials of sovereignty. The following is an abstract in round numbers of their stipends.

When granted	Titles of Princes.	Stipend. Rupees.
1803 1801 1798 1770 1795 1799 1818 1803 1803 1806	Emperor of Delhi and Family Soubhadar of the Carnatic Families of former Soubhadars Rajah of Tanjore Soubhadar of Bengal, &c. Total 1,01,92,557 or at 2s. the S. R. 1,019,255/. sterling.

Subsidiary Alliances .- Nearly one half of the Hindostan territory is held by Governments in subsidiary alliance with the British government; the general terms of the treaties with whom are, on the side of the English, protection against external enemies, and on the other, a submitting, in all political relations with foreign states, to the arbitration and | torial assignment in lieu of subsidy.

A very able document, drawn up by Mr. B. S. | final adjudication of the British government; a specific force is furnished by the East India Company, and a territory equivalent to the maintenance of the troops ceded by the former; the subsidizing state is also bound to keep on foot a specific contingent force to act in subordinate co-operation with the subsidiary. The protecting power is not to interfere with the internal administration of the protected state, but in cases of exigency it reserves the right in general to assume the whole of the resources of the protected state. The subsidiary force is liable to be called out to protect the legal succession to power, but not to be employed between the head of the government and its Zumendars or chiefs.

The following is given as a list of the princes, the military protection of whose territories is undertaken by the British government, together with the amount of subsidy paid by each, or the revenue on the terri-

* Some accounts give the area of Oude at 17,008,000 acres, of which about one tenth is jungle and forest.

Two of the foregoing (Oude and Mysore) can scarcely he styled stipendiary, the former being almost entirely dependent on the British government, and the latter recently ordered under the direct management of Madras presidency, owing to long misgovernment. Sindiah's territories should also of right be excluded as, to a great extent, he is independent of our authority. The charges include revenue collection, political, judicial and police, maintenance of provincial battalions, customs, mint, &c.; the balance remaining after these deductions goes to the purpose for which the territories were granted-namely, the military protection of the government which assigned

Protected States.—Besides the foregoing governments, there are several minor principalities with whom engagements of treaties have been entered into agreeably to the peculiar circumstances of each, but with general stipulations applicable to all; namely, that the Protected State maintain no correspondence of a political tendency with foreign powers without the privity or consent of the British government, to whom the adjustment of its political differences is to be referred; they are perfectly independent in their internal rule, but acknowledge the supremacy of the British government. When the interests of both powers are concerned, the troops of the protected state act in the field in subordinate co-operation to the British forces, the latter being empowered to avail themselves of natural or other advantages in the allied country against an enemy when necessary. No asylum for criminals or defaulters is permitted, and

every assistance required to be given to affect their apprehension in the state. Europeans not to be employed without British permission. According to the resources of the protected state, a tribute is required, or a military contingent to be kept in readiness, or service to be rendered according to the means of the protected power. The states thus protected, but without subsidiary allowances, are-

British Feudatory Chiefs.—These chiefs so far differ from the former class, that, while the protected chiefs had treaties concluded with them as independent princes, the feudatory have had their allegiance transferred to Great Britain by their feudal superiors or by the events of war. In most cases, the lands which they held as a life tenure have been converted by our government into a perpetuity, and the chiefs are permitted a supreme control on their own lands. Among the number of these chiefs may be mentioned the Putwurdhan family, of which there are nine chiefs; the Soubahdar of Jansi, Chief of Julaon and Calpee; family of Angria (the Mahratta pirate); numerous tributaries in Kattywar and in Gujerat; the Rajahs of Shorapoor and Gudwal; the Seedee of Jinjeera, and other Abyssinian chiefs. The Parliamentary Return of the area of Protected and Allied States is as follows :-- " Dominions of the Rajahs of Travancore and Cochin, 9,400 square miles; Nizam, 108,800; Rajah of Mysore, 29,750; King of Oude, 25,300; Dowlat Rao Scindiah, 42,400; the Rajah of Berar, including Nagpore, 64,270; Jeswunt Rao Holkar, 17,600; the Guicowar, including the detached Pergunnahs belonging to the British in Kattywar and Guzerat, 36,900; Rajah of Koorg, 2,230; Nabob of Kurnool, 3,500; Rajah of Sikhim, 4,400; Nabob of Bhopal, 7,360; Rajahs of Sattara, Colapore, Sewuntwarree, and the principal British Jaghiredars, 21,600; Rajah of Cutch, 6,100; Soubedar of Jhansi, Rajah of Duttea and others, commonly known as the Bundlecund chiefs, 19,000. Territories under British protection west of the River Jumna, comprehending Jhodpore, Bikanier, Jessulmeer, Khotah, the Seikh country, the hill districts of Sirmoor, and other small states, 165,000. Of Assam, Jynteea, Cachar, and Muneepore, the boundaries are so undefined that it is difficult to form even an approximation to their superficial contents, but it is estimated at 51,000. Total, 614,610 square miles.

British Allies .- Independent of the foregoing states, the E. I. Company's government have general treaties with other surrounding nations, viz. with Cochin China, Siam, Caubul, Nepaul and Ava, the intercourse of the Company is principally of a commercial nature, but they have residents established at Nepaul and Ava.

With the Imaum of Muscat, and with other chiefs on the western shores of the Persian Gulf, the Company have treaties for commercial purposes, and with a view to the suppression of the slave trade, and of piracy in the Gulph. In order to secure the fulfilment of the provisions of these treaties, the Company have established political agents on the shores of the Persian and Arabian Gulfs.

The area of the kingdoms and principalities of India has been computed by Captain J. Sutherland after a novel manner; the boundaries of each state having been marked off on a skeleton map, drawn on paper of equable texture, the whole were cut out with the greatest care, and weighed individually and collectively, as a check in the most delicate balance of the Calcutta Assay Office; the weights were noted to a thousandth part of a grain, the balance being sensi-ble to the tenth part of that minute quantity. Before setting to work on the states, an index, or unit of 100 square degrees, cut from the same paper, was first weighed, to serve as a divisor for the rest. The weighing process commenced in the driest part of the day, taking the whole of the papers together; thus the continent of India weighed 127,667 grains troy: the sum of the *individual* weights of the separate states 127,773 grains troy: the addition was proved to proceed from the hygrometric water absorbed towards the evening, and corrections were applied to endeavour to neutralise this source of error: the following data must, however, only be considered as an approximation to truth in the absence of better information, owing to the imperfect data of maps of India. By Captain Sutherland's weighing process, the area of the native states, in alliance with the British government, is 449,845 square miles. That of the territory under British rule, with the remaining small states and Jagerdars, 626,591, giving the superficial area of India, 1,076,591 square miles, which nearly agrees with Hamilton's estimate of 1,103,000.

Captain Sutherland classes the native states of India under the three following heads, viz.-

1st. Foreign; Persia, Kabool, Senna, the Arab tribes, Siam, and Acheen: 2d. External on the Frontier; Ava, Nepal, Lahore, and Sinde: 3d. Internal (to which the following areas refer), which according to the nature of their relations, or treaties, with the British, he divides into six classes.

Gwalior . square miles, 32,944
 Amity and friendship.

SIXTH CLASS.

34. Sattara . square miles, 7,943 35. Kolapúr 3,184

Protection, with the right of the British Government to control internal affairs.

Of the above states Captain Sutherland enumerates four as Mahomedan (i. e. with Mussulman rulers I presume), viz.: Hydrabad, Oude, Bhopal, and Tonk: of the Hindoo States eight are Mahratta, viz. : Sattara, Gwalior, Nagpúr, Indore, Banda, Kolapúr, Dhar, and Dewas: nineteen are Rajput, viz.: Oudipur, Jeypúr, Judpúr, Búndi, Kotah, Cutch, Alwar, Bhikanír, Jesalmír, Kishenghur, Bánswára, Pertábgúrh, Dungerpur, Kerolé, Serowé, Rewah, Dhattea, Jhansé, and Terhi: six are of other Hindoo tribes, viz.: Mysore, Bhurtpoor, Travancore, Sawantwari, Cochin, and Dholpur. Besides these allied states, there are the following inferior Rajships and Jágérdars, viz.: Chota-Nagpur, Singujer, Sumbhalpur, Oudipoor, Manipur, Tanjore, the Baroach family, Ferozpur, Merich, Tansgaon, Nepani, Akulkote, and those of the Sagar and Nerbudda country, together with Sikhim, and the States of the Northern Hills.

An account of some of the Petty States lying North of the Tenasserim Provinces .- Of the numerous petty states north of the Tenasserim provinces, those only of Zimmay, Labong, and Lagon, on the east bank of the Salween, and the slip of country on the west bank, inhabited by a wild, barbarous, but independent tribe of mountaineers, called Red Kayeons, have hitherto been visited by Europeans. Of the vast extent of country between the Salween and Cambodia Rivers, we know little or nothing, though it is hoped the expected opening of an overland trade between the frontiers of China and the Tenasserim provinces, will extend our knowledge of the intermediate countries. The country is extremely fertile in our territories, abounding in rivers; and with a population of but three to the square mile!

The town of Zimmay (or Changmai), is situated in Lat. 20. N. and Long. about 99. E.; that of Labong, is distant from Zimmay only 10 miles S. E.; Lagon about 50 S. E. from the same. The several states are named after these towns, but their respective boundaries are not well defined, and together with those of Moung-pay, and Moung-nam, appear to be the patrimony of one family.

About 50 years ago, when the whole of this country was under the dominion of Ava, seven brothers succeeded, with the assistance of Siam, in throwing off the Burmese yoke, ejected them from the abovenamed towns, and having been confirmed in the government of them by Siam, have continued tributary to that kingdom, and successfully resisted all the attempts of Ava to regain possession. The elder brother was invested with the title of "Chow-tchee-Weet, or " Lord of Life," with the supreme authority over the others; and the title has descended to each brother successively alive, till it reached the youngest, whom Dr. Richardson, found on his first and second visits, but who died at the advanced age of 73 years, during his third visit. It is now in abeyance in the family, and awaits the decision of the court of Siam .-From the Madras Herald, 31st Sept. 1837.

Before closing the subject, it may be desirable to mention an independent chief of great talent, wealth and power, with whom the British government is on terms of friendly alliance. I allude to Runjeet, or Runajit Sing, whose country includes not only what is called the Punjab, and the whole of the beautiful and important valley of Cashmere, but also considerable tracts of territory beyond the Indus from Tatta on the south to Thibet on the north, and from Caubul on the west to beyond the Sutlej on the east. This formidable potentate possesses a large army (see Military Section), an immense arsenal at Umritzar,

and a vast treasury (his annual revenues are estimated at 1,80,00,000 rupees) at Govind Garrow.

The following are the names of the Governors-general of British India: Col. R. Clive, from June 1758 to Jan. 1760; J. L. Holwell, Jan. 1760 to July 1760; H. Vansitart, July 1760 to Nov. 1764; J. Spencer, Dec. 1764 to May 1765; Lord Clive, May 1765 to Jan. 1767; Harry Verelst, Jan. 1767 to Dec. 1769; J. Cartier, Dec. 1769 to April 1772; Warren Hastings, April 1772 to Feb. 1785; Sir J. Macpherson, Feb. 1785 to Sept. 1786; Marquess Cornwallis, Sept. 1786 to Oct. 1793; Sir J. Shore, Oct. 1793 to March 1798; Marquess Wellesley, May 1798 to July 1805; Marquess Cornwallis, July 1805 to Oct. 1805; Sir G. Barlow, Oct. 1805 to July 1807; Earl Minto, July 1807 to Oct. 1813; Marquess Hastings, Oct. 1813 to Jan. 1823; Lord Amherst, Aug. 1823 to April 1828; Lord W. Bentinck, June 1828 to 1834; Lord Auckland, 1835. The principal events which occurred under each of these rulers, will be found in my Colonial Library, vols. viii. and ix.

III. No language would do justice to the varied and magnificent scenery of Hindostan, partaking as it does of the richly luxuriant and wildly beautiful; here interminable plains, intersected with deep and mighty rivers: there inaccessible mountains, whose immeasurable summits are wreathed in eternal snow; on the one hand an almost boundless landscape, verdant with the softness of perpetual spring; on the other alpine steppes, ruggedly romantic, and fringed with vast and towering forests: mountainous ranges or ghauts on this shore, presenting a stupendous barrier to the Indian ocean, while on that, a low and sandy alluvium seems to invite the further encroachments of the deep and stormy Bengal Bay. Indeed the features of British India are so varied that, to convey an exact idea of their peculiarities, would require volumes, and a survey of the country. The sea-coast line (extending from Cape Negrais to the frontiers of Sinde) is 3,622 English miles, with a territorial breadth (from Surat to Sinde) of 1,260 The leading geographical features of Hindostan are the Himalaya Mountains, along the northern and eastern frontier; a range of ghauts, rising at the southern point of the peninsula, running north along the coast until receding at the parallels of 20. to 22., when they branch off in ridges of different elevations across the continent of India, until lost in the table land of Malwa and Allahabad; while on the eastward the mighty Ganges, and on the westward the nearly equal Indus, roll their impetuous and lengthened torrents from the Himalaya snows to the sultry coasts of Bengal and Cutch, giving off in their progress an infinity of tributaries, which are ramified in every possible direction over the whole peninsula.

The sca coast of Bengal province is, for many miles, scarcely elevated above the level of the sea, and where the sacred Ganges and mighty Burrampooter, with their hundred mouths, rush to join the parent fountain, a vast extent of country (30,000 square miles) called the Sunderbunds, extending for 180 miles along the bay of Bengal, is an interminable labyrinth of salt water lakes, rivers, and creeks, interspersed with mangrove islets of shifting mounds of sand and mud.

Calcutta, on the banks of the Hooghly, latitude 22. 23., longitude 88. 28., distant from the sea 100 miles, and from the Sandheads about 130 miles, has a very intricate navigation through the banks of the sand and mud which occasionally shift their beds in the Hooghly river as well as in the other branches of

the Ganges. It is, however, very favourably situated for internal navigation, as the Ganges and its subsidiary streams permit the transport of foreign produce to the north-west quarters of Hindostan over a distance of upwards of 1,000 miles, and the day may not be far distant when the Indus and the Ganges navigation will be united by a canal. Diamond harbour, about 30 miles below Calcutta on the east bank of the Hooghly, has a draught of water sufficient for the largest Indiamen, but ships of 600 tons anchor quite close to the grand promenade (entitled the Strand road and Esplanade) of the 'City of Palaces.'

This metropolis and commercial emporium of the east (now containing nearly a million of inhabitants), was so late as 1717, a small straggling village, with a few clusters of huts, to the number of ten or twelve, the inhabitants of which were husbandmen, endeavouring to reclaim the surrounding forests and swamps, which extended even to where Chandpal Ghaut now stands. The city is divided into streets at right angles with each other, with large and handsome squares throughout, particularly in the European part of the metropolis, each square having in its centre an extensive tank or reservoir of the Ganges water, with verdant sloping banks planted with evergreen shrubs. The residence of the Governor-general, constructed by the Marquess Wellesley, is of equal magnitude to any palace in Europe.

is of equal magnitude to any palace in Europe.

The stupendous fortification of Fort William was commenced by Lord Clive, after the battle of Plassy, and has cost the East India Company 2,000,000l. sterling. Situated on the margin of the river Hooghly (about one-fourth of a mile below Calcutta), and on a level with the surrounding country, which is a perfect flat for many miles, it does not make an imposing appearance, indeed its strength is scarcely perceptible; nevertheless it is superior in strength and regularity to any fortress in India, and requires from 10,000 to 15,000 men to defend the works. The form is octagon, five sides being regular and three next the river according to circumstances. The river flows up to the glacis, the citadel towards which has a large salient angle, the faces of which enfilade the whole sweep of the water; indeed the guns of the faces bear upon the city, until crossed by the fire of the batteries parallel to the river. This salient angle is defended by several adjoining bastions and a counterscarp that covers them. The bastions on the five regular land sides have all many salient orillons, behind which are retired circular flanks extremely spacious, and an immense double flank at the height of the berme; the double flank would enable the besieged to retard the passage of the ditch, as from its form it cannot be enfiladed; the orillon is effective against ricochet shot, and is not to be seen from any parallel; the berme opposite the curtain serves as a road, and contributes to the defence of the ditch like a faussebrave. The ditch is very wide and dry, with a cunette in the middle, which receives the water of the ditch by means of two sluices that are commanded by the fort. The counterscarp and covered way are excellent; every curtain is covered by a large half moon without flanks, bonnet, or redoubt, but the faces each mount 13 pieces of heavy ordnance, thus giving a defence of 26 guns to these ravelins. The demi-bastions which terminate the five regular fronts on each side are covered by a counterguard, of which the faces, like the half moons, are pierced with 13 embrasures. These counterguards are connected with two redoubts constructed in the place of arms of the adjacent reentering angles, the whole faced, and palisaded with great attention to neatness as well as strength. The advanced works are executed on an extensive scale, and the angles of the half moons being extremely acute, project a great way so as to be in view of each other beyond the flanked angle of the polygon, and capable of taking the trenches in the rear at an early period of the approach. The interior of this admirable fortress is truly beautiful,—large grass-plots surrounded by rows of shady trees, beneath which are well gravelled promenades,—with here and there piles of balls, bombshells, and parks of artillery. The barracks are spacious, and will contain 20,000 men.

The length of course of some of the principal rivers to the sea is in English miles—Indus, 1,700; Ganges, 1,500; Sutledj (to Indus 900), 1,400; Jhylum (ditto 750), 1,250; Jumna (to Ganges 780) 1,500; Gunduck (to Ganges 450), 980. In the Deccan and south of India—Godaveri, to the sea, 850 miles; Krishna, 700; Nerbudda, 700; Tuptee, 460; Cavery, 400. Taking the limit of the Ganges and Jumna to the west and south, and the Brahmaputra and Megna to the east, the country, completely intersected by navigable rivers, may be computed to cover an area of not less than forty square degrees.

The quantity of alluvial matter which these vast rivers carry down to the ocean is immense.

The Rev. Mr. Everest has furnished us with some interesting observations and experiments on the river Ganges, which he recently made at Ghazepore, in the province of Benares.

Velocity of the stream in feet in an hour.—July 3rd 6,810. 7th, 11,520, 23rd, 21,000; August 8th, 4,200, 22nd 34,560; September 6th, 21,600, 24th, 13,320; October 8th, 10,800, or 20,200 average of the four months—equivalent to about four miles an hour.

Drpth of the river.—June 22nd, 19 feet 6 inches; 30th, 22 feet 6 inches; July 7th, 25 feet 6 inches; 14th, 28 feet; 23rd, 30 feet; August 1st, 35 feet 6 inches; 8th, 44 feet; 13th, 47 feet 6 inches; 22nd, 42 feet; 31st, 36 feet; September 6th, 38 feet; 15th, 37 feet 6 inches; 24th, 28 feet 6 inches; October 1st, 26 feet 6 inches, or an average of 33 feet for the four months.

Insoluble matter contained in a given quantity of Ganges water.

J	Wine quart.	Cubic foot.
July 3rd,	l grain	30 grains.
7th,	8	240
23rd,	10	300
August 8th,	58-10	1740
13th,	37	1110
22nd,	26	780
September 6th,	17	510
24th,	8	240
October 8th,	6	108

On an average 19 grains of insoluble matter for every wine quart, during the four rainy months, that is from the 15th June to 15th October, to which must be added for soluble matter, say two grains, making the whole equal to 21 grains, or about 630 grains of soluble and insoluble materials carried into the sea in every cubic foot of water of this magnificent river.

The principal mountain ranges are the Himalaya, the eastern and western Ghauts, and the Vindhya chain, which run through the centre of the peninsula parallel to the course of the Nerbudda. The Himalaya range, or, as its name signifies, the abode of snow, elevates its lofty peaks from 20,000 to 27,000 feet

above the level of the sea, forming an alpine belt 80 miles in extent, from Hindostan to Tibet. The principal chain of the Himalaya, running from north-west to south-east, rises in a ridge, with an abrupt steep face against the plains of 6,000 feet in height; there is then a slope from the crest of the ridge towards the north. The mountains on the side of the snowy range consist of a series of nearly parallel ridges, with intermediate vallies or hollows; spurs are thrown off in all directions into the hollows, forming subordinate vallies. There is nothing like table land (perhaps in the whole of the mountains, with the exception of Nipal), and the valleys are broad wedge-shaped chasms, contracted at bottom to a mere water course; for this reason the quantity of level ground is inconsiderable. On the flank of the great chain there is a line of low hills (the Sewalik), which commence at Roopur, on the Sutlej, and run down a long way to the south, skirting the great chain. In some places they run up to and rise upon the Himalava, in others they are separated by an intermediate valley. Between the Jumna and the Ganges they attain their greatest height, viz. 2,000 feet above the plains at their feet, or 3,000 above the sea, rising at once from the level, with an abrupt mural front. To the east of the Ganges and west of the Jumna the Sewalik hills gradually fall off. They are serrated across their direction, forming a succession of scarcely parallel ridges, with a steep face on one side, and a slope on the other; the slope being, like that of the great chain, towards the north, and the abutment towards the south. These hills may be considered an upheaved portion of the plains at the foot of the Himalaya, and formed of the debris of the mountains, washed down by rains and other natural causes. They are covered with vast forests of saul, toom, and fir, and are unin-habited, and, as on the Himalaya, the dip or slope being towards the north, and the abutment towards the south, the great mass of vegetation has a northern exposure, and the south faces are generally naked. 20,000 feet have been barometrically measured and trigonometrically confirmed; at this height huge rocks, in immense detached masses, lie scattered about or piled on each other as if realizing the Titanic fable of giants climbing to heaven. Beds of decayed sea shells are found, and lichens and mosses, the last link in vegetable life, struggle through a stunted existence beneath the verge of perpetual snow. At 16,800 feet north side, campanulas and ammonites have been found by enterprising Englishmen; at 13,000 feet the birch, juniper and pine appear, and at 12,000 feet the majestic oak rears its spacious head, towering amidst the desolation of nature. The cultivated limits of man have not passed 10,000 feet on the south slope, but on the north side villages are found in the valley of the Baspa river at 11,400 feet elevation, who frequently cut green crops, and advancing further the habitations of man are found as high as 13,000 feet, cultivation at 13,600, fine birch trees at 14,000, and furze bushes for fuel thrive at 17,000 feet above the level of the ocean!

[A minute account of the topography of each district, its scenery, rivers, natural curiosities, &c. will be found in the Second Edition, vol. i., of my History of the British Colonies; in vols. viii. and ix. of my Colonial Library, and in vols. i., ii. and iii. of Eastern India, forming a condensed account of Dr. Buchanan's Survey of Behar, &c.]

Hangarang Pass	14710	١.,	40		170	90	60	Dies	apples and grapes in abundance.
ti engarang rass					1				Between Hang and Sungnam; summit composed entirely of limestone; no snow in October, though a few hundred feet above it laid in patches.
Majang La	17700	31	45	90	70	06	54	Chinese Tar-	Ridge crossed on the road from Shipki to Garu; a few traces
	-,,,	l			1			tary	of snow in October.
Nako	11075	31	55	94	78	36	31		
									Tartar village in Hangarang on the left bank of the Spiti; barley grows some hundred feet higher than the village, osiers and poplars are visible near the village.
Skalker Fort	10272	32	00	02	78	82	18	Ditto	Fort, horder of Rishar, right hank of Sniti
Lasseha Pass	13628	32	02	56	78	32	96	Ditto	Pass from Skalker fort to Surma village; no snow in October, but ink froze at 10 A. m. !

The aspect and general features of the rivers, mountains &c. of Hindostan, will be seen in my Colonial History.

IV. Primitive formations in which granitic rocks bear the principal proportions, occupy, it is thought, not only the great Himalaya northern chain, but also three-fourths of the entire peninsula, from the valley of the Ganges below Patna to Cape Comorin; although these rocks are frequently overlaid by a thin crust of laterite, a ferruginous clay considered as associated with the trap formation. The transition formations have not as yet been clearly distinguished; the secondary formations described are—

1. The carboniferous group. Coal occurs extensively in the grits bounding the southern slope of the Himalaya, but it has been questioned whether this formation is the older coal or only lignite associated with nagelflue, as on the slope of the Alps; it has been particularly described, however, where the river Tista issues from this chain, (88° 35' east longitude,) and there, undoubtedly, bears all the characters of the older formation; its strata are highly inclined, whereas the tertiary beds and even most of the secondary in this part of India are horizontal. The coal district on the river Damuda (100 miles north-west of Calcutta) extends on the banks of the river 60 miles, and appears from its fossil lycopodia to be undoubtedly the older coal; it reposes apparently on the surrounding primitive rocks, but it is not improbable that it extends across the delta of the Ganges to Sylhet, 306 miles, at the eastern extre-mity of Bengal. Tertiary rocks prevail in Sylhet, and it is doubtful whether the Sylhet coal be not really modern lignite. I believe no carboniferous limestone has been discovered.

2. Next to coal is a great sandstone formation, which, beginning at the Ganges on the east, first shews itself supporting basalt on the Raj-Mahal hills; it again prevails throughout the interval between the confluence of the river Soane, and of the Jumna with the Ganges, and then stretches across the west-southwest through the Bundlecund district to the banks of

the Nerbúdda, (which flows into the Gulf of Cambay as far as 79° east longitude,) where it is overlaid by the extremity of the great basaltic district of northwestern India, near Sagar, the red sandstone shews itself again emerging from beneath the north-west edge of this basaltic district, at Neemuch, near the west source of the Chumbul, and at Bang, in the valley of the Nerbudda.

In both places, as also along the central portion of the platform before described, stretching through Malwa, it is frequently covered with a thin crust of gray argillaceous limestone, supposed to represent English lias, but nearly destitute of organic remains, the general absence of which in the secondary rocks of India is remarkable. A primitive range extending from near Delhi to the head of the Gulf of Cambay separates the secondary rocks of Malwa from those of the great basin of the Indus; but on the west border of this ridge, through Ajmeer, the redstone again shows itself, containing rock-salt and gypsum. diamond mines of Panna, in Bundlecund, and of the Golconda district, are situate in this formation, the matrix being a conglomerate bed with quartzose pebbles.

3. Tertiary rocks are found at the foot of the first rise of the primitive rocks of the Himalaya, in the north-west of Bengal, where the Brahmaputra issues from them at the passes of the Garrow hills. Cerithiæ turritelli, remains of crocodiles, sharks, lobsters, &c. are here found, and further east nummulite limestone prevails at Sylhet.

The great basaltic district of the north-west of India extends from Nagpúr, in the very centre of India, to the west coasts, between Goa and Bombay, occupying the whole of that coast to its termination at the Gulf of Cambay, thence penetrating northward as far as the 24th parallel of north latitude.

The soils of Hindostan vary of course with the geological characters of the country; in the deltas of rivers, consisting of a rich alluvium; and in countries of a trap formation: a stiff clayey and tenacious surface, highly fertile when irrigated, prevails. In

Lower Bengal the fertility of the soil seems to be inexhaustible, owing perhaps to its saline qualities; for several centuries it has been in unceasing cultivation as the granary of India, rudely tilled, without the application of scientific principles to agriculture, and yet there seems to be no diminution in its fertility; as we ascend the Ganges the quality of the earth of course varies.

The following is an analysis of three specimens of soil from sugar cane fields; the first was from a vilage on the Sarju, ten miles north of the Ganges, at Buxar; the other two from the south of the Ganges near the same place. Numbers one and two require irrigation, three was sufficiently retentive of moisture to render it unnecessary; there is a substratum of Kankur throughout the whole of that part of the country, and to some mixture of this earthy limestone with the surface of the soil the fertility of the latter is ascribed; the sugar cane grown yielded a rich juice.

The earths were not further examined, but the two first consisted chiefly of sand; the third somewhat argillaceous. All were of a soft, fine ground alluvium, without pebbles, the analysis confirmed the quantities ascribed to each specimen.

100 100 100

The soils vary of the Hydrabad district, with the facility with which the rock of which they are formed decomposes; it is generally siliceous. The analysis of a garden soil at the cantonment of Secundarabad which had not received such manure, shewed specific gravity 1.70. Four hundred and eighty grains contained water of absorption, 10 grains; stones contained water of absorption, 10 grains; stones contained water and felspar, 255 grains; vegetable fibre, 2; siliceous sand, 154=431 grains. Of minutely divided matter separated by infiltration, viz. carbonate of lime, 7; vegetable matter, 7; oxide of iron, 2.5.; salt, 4; silica, 20; alumina, 8; loss, 10.5. Total, 480. The richest soil in this district, and the most spontaneously productive is that arising from the decomposition of the clay slate.

The soil of Bengal is extremely shallow, and a compound of saltish mud and sand, the former derived from the inundations of the rivers washing down the richest particles of the surface in the upper provinces, and the sand probably being the reliquiæ of the occean which is here retreating from the land. The Regur or cotton ground, which extends over the greatest part of central India, is supposed to be a disintegration of trap rocks; it requires neither manure nor rest, slowly absorbs moisture, and retains it long, and it has produced the most exhausting crops in yearly succession for centuries. The saltpetre or nitrous soil is general in Bahar. The Rabur soil which is found in the Saugor and Nerbudda country is of two kinds: the one of a black and the other of a brown yellow: the first mentioned is cultivated for 30 years without a fallow, the latter,

after 20 or 25 years work, requires 12 years rest. A Rabur soil examined by Dr. Spry, was, when examined from the fallow, in hard lumps, imparting soapy impression to the touch, with an earthy smell when breathed on, and a slightly adhesive quality applied to the tongue: specific gravity 1.908; colour dark brown. 200 parts yielded on examination, water of absorption, 21; carbonate of lime, 15; loss by burning, 3; oxide, or protoxide of iron (strongly attracted by the magnet) 11; alumina, 8; siliceous sand, 131; loss, $\mathcal{M}=200$. The Rabur land when first brought into cultivation from fallow, yields of wheat 10, and of gram 12 fold of spring crops. An analysis of the different soils shews very little heating or vegetable matter in them. Manure is seldom applied, and its efficacy in the tropics has been doubted. The alluvial soils are of all others the most fertile, tilled with the least difficulty, and requiring no fallow if occasionally subjected to inundations of rivers containing much sediment. All the soils of India have in general a powerful absorbing quality; hence their fertile properties. [See Colonial Library, vol.

V. The temperature of so wide an extent of country as British India, and of such different degrees of elevation is, of course, very varied. In Bengal Proper, a vast quantity of rain, (amounting to 70 or 80 inches) falls in the rainy season, coming in with June and continuing to the middle or end of October.

Influence of the Moon in producing rain (Calcutta) in each year.

		ur Months h Year.	For each Year.			
Years.	Inches of Rain within 7 days of New Moon,	Inches of Rain beyond that pe- riod.	No. of rainy days within 7 days of New Moon.	No. of rainy days beyond that period.

Total	25.31	9,24	45	23		

From these observations as well as others, made by the Rev. R. Everest, it appears that rain fell most abundantly on the 2nd, 5th, 6th, and 7th days before the new moon, and the 6th day after it.

The rainy season in Bengal is succeeded by what is termed the cold season, which lasts from November to the middle of February, when the hot season begins and continues to the middle of June. During the cold season the air is clear, sharp and bracing in some degrees. Thermometer 65. to 84. mean 72.; barometer medium 29. to 96.

On the north-east frontier of Bengal, where the country begins to be elevated above the level of the sea, the climate, when the land is cleared, is described to be very fine.

Tirhoot, a district of Bahar, between 27 and 28 fertile, and almost every Europea degrees north latitude, extending in a south-east table is produced in perfection and direction 160 miles, and bounded to the north by a Tirhoot. The following shows the-

lofty chain of mountains separating it from the alpine kingdoms of Nepal, is placed in a happy medium free from the fogs of Bengal and the dry parching winds of the north-west provinces. The soil is luxuriantly fertile, and almost every European fruit and vegetable is produced in perfection and in abundance in Tirhoot. The following shows the—

Barometrical Pressure and Temperature at Tirhoot.

The western provinces under the Bengal Presidency, viz. Allahabad, Agra, Delhi, &c. are temperate, but hot winds blow during a part of the warm season, when the wealthier natives sometimes resort to underground habitations to escape their torrifying effects.

The climate of central India is mild, and approaches much to that of the south parts of Europe, or to the table land of Spain; although the mercury may rise to 100, during the day, the nights are bland and invigorating.

The English dominions among the hills and along the Kumaon province are blessed with a delicious climate, the rigours of the winter solstice being mo-

derated by great solar radiation, while the summer heats are tempered by the contiguous eternal snowtopped Himalaya. Indeed, during the summer season, the vicinity of the frozen region causes a continued currency of atmosphere, which sets in daily as regularly as a sea breeze on a tropical shore, and with a nearly similar invigorating freshness. At Saharunpoor, in 30° latitude, and 1,000 feet above the sea, the climate is similar to the southern parts of Europe; the mean temperature throughout the year is about 73°, and monthly mean temperature at Scharunpoor (1,000 feet above the sea), January, 52 degrees; February, 55; March, 67; April, 78; May, 85; June,

90; July, 85; August, 88; September, 79; October, 74; November, 64; December, 55. At Mussoori (7,000 feet high), January, 39 degrees; February, 40; March, 52; April, 60; May, 72: June, 73; July, 66; August, 65; September, 61; October, 60; November, 52; December, 40.

Mr. Trail thus describes the climate of the Bhot mehals (districts) of the Kumaon territory:—"During full half the year, the surface is wholly covered with snow, beginning to fall about the end of September, and continuing to accumulate to the beginning of April. In open and level situations, where the bed of snow is in some years 12 feet deep, it is dissipated early in June; in the hollows not till the middle of July. During the five months of absence of snow, the thermometer ranges at sun-rise from 40 to 55 degrees, and at mid-day from 65 to 75 degrees in the shade, and from 90 to 110 degrees in the sun. At Hawil Bagh in Kumaon, 3,887 feet above the sea, the range of the thermometer during the year was

7	A.M.	2 p.m.	7	A.M.	2 р.м.	7	A.M.	2 р.м.

Mar.	46	61	July	72	78	Nov.	42	60
April	54	66	May June July Aug.	72	79	Dec.	34	52

"The heat of course diminishes as the height increases; and at Almora town, in 29° 30' (5,400 feet high) the difference is two or three degrees less than the above average. During the cold season, on the contrary, from the greater evaporation, the thermometer before sunrise is always lowest in the vallies, and the frost more intense than on the hills of moderate height (that is, below 7,000 feet), while at noon the sun is more powerful. The extremes in 24 hours have been known 18 and 51 degrees. The snow does not fall equally every year; the natives fix on every third year as one of heavy snow, but in general it does not lie long, except on the mountain tops and ridges. On the Ghagar range, between Almora and the plains, snow remains so late as the month of May. At Masuri, 6,000 to 7,000 feet high, the mean animal heat is only 57 degrees F.; indeed, at 4,000 feet elevation, the hot winds cease, and vegetation assumes a European character. The quantity of rain falling at Almora is from 40 to 50 inches per annum."

Southern India.—The climate is influenced by the N.E. and S.W. monsoons, and by the elevation of the country, the low lands being extremely hot, with dense exhalations, and the upper dry, cool and healthy, as on the Mysore table land. The thermometer ranges in the Carnatic higher than in Bengal (to 100 and 106 degrees F.); but the moisture or evaporation not being so great, the heat is less severely felt; but, on the other hand, the cold season is of very short duration.

In Travancore, owing to the proximity of the ocean, and the waters on either side of the peninsular promontory, the climate is moist, but not oppressive, as the sea breeze blows from one quarter or another the whole year round.

The climate of the Neilgherry hills resembles in the higher parts that of the great intertropical plateaus of America, which have become the centres of civilization in the new hemisphere, with the additional advantage, that it is not subject to an inconvenience attending the latter, namely, the sudden changes and cold piercing winds occasioned by the variety of lofty mountains. The mean temperature at Oolocumund is rather more than that of London; but the annual range is very small, and the heat never sufficient to

bring the more delicate European fruits to perfection. At Coimbatore the temperature during the cold season is — minimum 31 degrees F., maximum 59 degrees F.; in April 65, in May 64 degrees. There are no sultry nights, a blanket being agreeable at all

seasons of the year.

Bangalore (lat. 12.57 N., long. 77.38 E.) is one of the healthiest and gayest stations in India, and remarkable for the wholesomeness of its atmosphere. The thermometer seldom rises above 82 or falls below 56 degrees F. The vine and cyprus grow luxuriantly; apple and peach trees yield delicious fruit, and strawberries are raised in the principal gardens. The monsoons, which sometimes deluge the Malabar and Coromandel coasts, have their force broken by the lofty Ghauts; and the tableau of Mysore (on which Bangalore is situate) is constantly refreshed by genial showers, which preserve the temperature of the air, and the lovely verdure of the fields throughout the entire year.

The Malabar and Canara coasts are not unhealthy (tropically speaking), except in the marshes beneath the Ghauts, where the miasm, as in all similarly situated places, is very deleterious.

In the Mahratta country, the north-western parts towards the Ghaut mountains, which attract the clouds from the Indian ocean, are visited with profuse rain, which sometimes continues three or four weeks without intermission, while to the S. and E., perhaps not 30 miles distant, not a drop of rain has fallen during the same period.

As we proceed to the N. and W. peninsula, the climate approaches to that described under the western provinces of the Bengal Presidency, except in the neighbourhood of the sea. In Guzerat the westerly winds are burning hot in May, June, and July. Candeish has a luxurious climate, like Malwah; and Poonah, a central station in Upper India, 2,500 feet above the level of the sea, 100 miles from Bombay, and 75 miles from the nearest sea coast, is delightfully situate within 30 miles of the Ghauts.

The following data shews the improving climate of India, and which civilization will yet much further ameliorate.

His Majesty's Troops serving in Bombay Presidency.

On the whole, it may be said that the climate of the British possessions on the continent of Asia is essentially of a tropical nature, though varying in intensity, and sometimes verging into that of the temperate zone, either by reason of the peculiarities of the soil, or its elevation above the level of the sea. The following table affords a comparative view of the monthly and yearly mean temperature of the air of Calcutta, Madras, Bombay, and the Neilgherry mountains (8,000 feet high), compared with the temperature of the city of London, and the fall of rain in England.

Comparative View of the Monthly and Yearly Mean Temperature of the Air of Calcutta, Madras, Bombay, and the Neilgberry Mountains, &c.

VI. We have no census of British India previous | Remarks on the foregoing Estimate, from the letters of to our occupation of the country, and little information since that that can be relied on for minute correctness. I have searched the various public offices in India and England, and now proceed to detail, as connectedly as possible, the result of my inquiries. The earliest document I have obtained relates to the Bengal Presidency, in 1789. I give it from the manuscript return, with its comments.

Estimate of the Population of the Provinces of Bengal and Bahar; the Company's Possessions in Orissa; and the Province of Benares, formed from Estimates trans-mitted by the Collectors of the three former, and Resident in the latter, in answer to a reference made to them by desire of Lord Cornwallis, in July, 1789.

Districts.	Men.	Women.	Children.	Total.

the Resident at Benares, and several Collectors of Bengal, Bahar, and Orissa.

BENARES.—The estimate of this province, formed by Mr. Duncan, is stated to have been made "according to the grain produce, allowing nine maunds on an average for the consumption of each person, children included;" excepting, however, the city of Benares and its vicinity, the population of which was estimated by Aly Ibraham Khan to be 1,000,000, but the Resident, deducting two-fifths, computes it to be 607,000

BAHAR. - The computation in this district was made conjecturally by Mr. Law, who supposes the number of inhabitants "to exceed rather than fall short of a million." Mr. Seton has endeavoured to obtain more accurate information, but has not yet been able to procure it, or to distribute the number computed by Mr. Low among the men, women, and This distribution is, therefore, stated in children. equal proportions, which is nearly corresponding with the general average.

BEERBHOOM.—The estimate of this district, formed by Mr. Keating for Beerbhoom, and Mr. Hesilrige for Bishenpoor, is stated to have been founded on calculations made by some of the principal inhabitants. The children in this instance are stated to be below ten years of age.

BHAGULPOOR. - The estimate of this district. formed by Mr. Davis, is calculated on the number of villages, and houses, or families, allowing four persons to each family or house, and twenty houses to each village. He adds, that the hill people of the Jungleterry were numbered in Mr. Cleveland's time, and found to be about 9,000. The children in this estimate are said to be below fifteen.

BURDWAN.—The calculations in this district, made by Mr. Mercer, is also founded on the number of villages, and houses, or families, allowing four persons to each house; but he divides the villages into three classes, and computes the first class to contain 200, the second 50, and the third 5 houses.

CALCUTTA. -The different gentlemen who have held the office of collector of this town, and the 55 villages adjacent to it, having been unable to furnish any estimate of the population, the number specified has been assumed at nearly the average of different estimates furnished by intelligent natives to the compiler of the foregoing general estimate, a few years since, when he held the office of collector of Calcutta.

CHITTAGONG.—The estimate of this district was furnished by Mr. Bird; but he does not explain on what grounds it was formed.

DACCA.—The same remark is applicable to the estimate of this district, furnished by Mr. W. Douglas.

DINAGEPORE.—Also to the estimate of this district, furnished by Mr. Hatch.

JESSORE.—Ditto to the estimate of this district, furnished by Mr. Hinckell, which is, however, detailed for each mehall

MIDNAPORE.—Ditto to the estimate of this district,

furnished by Mr. Burrowes, and also detailed.

MOORSHEDABAD.—Ditto to this estimate, furnished
by Mr. J. E. Harrington, also detailed.

MYMENSING.—The different collectors of this district having been unable to procure materials for any computation, the number specified is stated conjecturally, on a general consideration of the relative assessment and extent of this district.

NUDDEA.—The estimate of this district, furnished by Mr. Redfearn, appears founded on a calculation of the number of houses or families, and an average allowance of seven or eight persons to each house; the proportions varying in different mehauls.

PERGUNNAHS (24).—Mr. Champain, who gave the estimate of this district, states it to be conjectural; he also observes, that the children included are under

16 years of age.

Pumza.—Mr. Heatley states the estimate of this district to have been formed "on the average of an actual investigation of three small villages, multiplied by 5,800, the number of villages in the district," which, he adds, is a very low scale, and that "the general opinion swells the amount to 1,500,000 inhabitants." He also observes, that the girls are considered adult at 11 or 12 years of age, and the boys at 20.

RAMOHUR.—Mr. Leslie states this estimate to have been the result of inquiries made by him; but does not explain the mode of inquiry.

RANGAMATTY. — This estimate, which includes Bisny, Currubary, and Rangamatty only, was furnished by Mr. H. Baillie, and is stated to be founded on the reports of the oldest inhabitants of each village.

RAJSHAHY.—This estimate, which respects Zillah Rajshahy as it stood in the year 1792, previous to the late new arrangement, is taken from a pergunnah estimate furnished by the Zemindar, deducting a fourth for an apparent over-rate, on comparison with other districts.

RUNGPORE.—Mr. Macdowall, who furnished the estimate of this district, does not explain on what grounds it is founded; but it is detailed for each pergunnah.

SALT DISTRICTS.—The estimate of these districts is taken from detailed estimates furnished by Messrs. Hewett and Dent, but they do not explain the grounds of their calculations.

SHAHABAD.—Mr. W. A. Brooke, who furnished the estimate of this district, does not state the grounds of it

SIRKAR SARUN.—Mr. Montgomerie states his estimate of this district to be conjectural.

SILHET.—The estimate of this district, furnished by Messrs. Willes and Smyth, is founded on a calculation of the number of houses, and persons in each house, the proportion differing in different mehauls.

TIPPERAH. — This calculation, received from Mr. Macquire, is stated by him to have been furnished by the Zemindars of the different pergunnahs.

TIRHOOL.—This estimate is stated in detail by Mr. Bathurst, but without any specification of the grounds on which it has been formed.

The credit due to the census of 1789 may be judged of from the foregoing comments; I rather think that the number of inhabitants is considerably understated. The next census embraces nearly the same division of districts. I obtained it in India from Dwarkanaut Tagore, a Hindoo of an enlarged mind, a most generous disposition, and a truly British spirit. Dwarkanaut Tagore was then at the head of the salt and opium department at Calcutta, and had perhaps the best means of judging as to its correctness of any man in India; he considered it as a fair estimate for 1820 or 1822. The calculations are founded on the number of villages and houses in each district; but we have no census of any part of British India on which reliance can be placed: in some places the population is estimated on the rudest data. It is essential to a knowledge of the condition of the people and for the purposes of good government that a complete census should be made of every district.

Provinces, Districts, square Miles, Villages, Houses, and Population of the permanently settled Provinces of Bengal, Behar, and Orissa, in 1822.

	Total	153792	154268	7781240	39957561

Statistics of Calcutta.—The following are the results of a census of Calcutta taken by Captain Birch, Superintendant of Police, down to January 1st, 1837. Males and Females. English 3,133; Eurasians (these born of European and native parents) 4,746; Portuguese 3,181; French 160; Chinamen 362; Armenians 636; Jews 307; W. Mahomedans 13,677; B. Mahomedans 45,067; W. Hindoos 17,333; B. Hindoos 120,318; Moguls 527; Parsees 40; Arabs 351; Mugs 683; Mudrasses 55; N. Christians 49; Low Castes 19,084. Total Population, Males 144,911; Females 84,803; total 229,714.

Puckah Houses 14,623; Tiled Huts 20.304; Straw ditto 30,567. Total Houses 65,495; Police Force 1,358.

In the year 1800, according to the report of the Police Committee furnished to Lord Mornington, the population was 500,000. In 1814, according to the calculation of Chief Justice Sir Hyde East, it amounted to 700.000.

Both of which calculations must have been erroneous, unless they include the suburbs of Cossipore and Garden Reach; which we believe they did.

In 1821, five assessors were appointed, by whose calculation the population of Calcutta amounted to as follows:—

Upper North Division, Christians, 5; Mahomedans, 6,602; Hindoos, 64,582. Lower North ditto, Christians, 5,816; Mahomedans, 16,865; Hindoos, 25,570; Chinese, 244. Upper South ditto, Christians, 4,476; Mahomedans, 7,510; Hindoos, 18,153; Chinese, 170. Lower South ditto, Christians, 2,841; Mahomedans, 17.185; Hindoos, 9,898. Total population, 179,917.

But the Magistrates in their report, calculated as follows:—

Upper-roomed Houses, 5,430 multiplied by 16=86,880; Lower ditto ditto 8,800 multiplied by 8=70,400; Tiled Huts 15,792 divided by 4 and multiplied by $5\frac{1}{2}=21,714$; Straw ditto 35,497 divided by 4 and multiplied by $5\frac{1}{2}=51,558$. Total 230,552.

But making certain allowances, their definite calculation was:

utitali was .	
Resident Inhabitants	205,600
Influx daily : .	100,000
In 1831, Captain Steel made it	187,081
Captain Birch's calculation is .	229,714
 And the daily influx about . 	150,000
	229,714

The above calculations do not include Kidderpore, Garden Reach, Seebpore, Howrah, Sulkea, Cossipore, or the other side of "the Ditch."

Duration of individual life, reckoning from the year 1827 to 1835, inclusive. In 1827 the 15 deaths were at the ages of 28, 60, 41, 1, 2, 17, 45, 1, 1, 37, 60, 60, 1, 40, 62. In 1828, 15 deaths at the ages of 21, 34, 76, 1, 19, 64, 1, 1, 5, 37, 50, 1, 25, 15, 35. In 1829, 12 deaths at the ages of 24, 30, 10, 48, 16, 56, 30, 22, 1, 30, 75, 1. In 1830, 14 deaths at the ages of 50, 40, 70, 1, 2, 20, 15, 9, 42, 40, 35, 1, 67, 7. In 1831, 17 deaths at the ages of 60, 1, 31, 50, 85, 1, 7, 1, 1, $0\frac{1}{3}$, 32, 55, $0\frac{1}{4}$, 4, 4, 4, 4, 4, 4, 4, 2, 50. In 1832, 17 deaths at the ages of 30, 1, 22, 1, 1, 45, 2, 1, 27, 1, 36, 73, 1, 50, 50, 54, 55. In 1833, 23 deaths at the ages of 7, 1, 1, 60, 40, 53, 55, 87, 45, 30, 85, 14, 38, 25, 40, 30, 20, 40, 20, 56, $0\frac{1}{4}$, 65, 30. In 1834, 16 deaths at the ages of 35, 75, $0\frac{1}{4}$, 47, 50, 56, 26, 62, 50, 39, 28, 16, 6, 58, $0\frac{1}{4}$, 74. In 1835, 7 deaths at the ages of 23, 87, 20, 61, 62, 41, 16.

Of the Armenian population there have been several accurate statements which are interesting in a statistical point of view. In 1814 the Armenians in Calcutta were:—Males, 269; Females, 195; total, 464. In 1815, M. 272; F. 208; total, 480. In 1836, an accurate census by Johannes Avdall Esq., (a much respected Armenian) gave M. 290; F. 215; total, 505. The Adults of all ages are 313. The No. of houses in which the 505 Armenians reside are 101, which exactly apportion 5 individuals to each.

The stationary condition of the population is owing, it is alleged, to the few marriages that take place. The duration of life is short.

The proportion of Musselmans to the Hindoos in Lower Bengal in the principal Mahomedan city and district is thus shewn:—

Population of the City and District* of Moorshedabad for 1829.

	Numb	er of			er of itants.	
Division	Mussulman,	Hindoo.	Total.	Mussulman,	Hindoo.	Total.
City District	14281 70453	A 7	40118 168111	APPENDY.	90086 465224	146176 821950
Total.	84734	123495	208229	412816	555310	968126

* Proportion of sexes in the City. Mussulmans, Males, 28,442; Females, 27,648; Hindoos, Males, 4,438; Females, 45,648. Ditto in District. Mussulmans, Males, 188,036; Females, 168,696; Hindoos, Males, 241,710; Females, 223,514. Ratio of inhabitants per house 4,73.

North Western Provinces.—In the return of the population of India by districts, as laid before Parliament in 1831, there are no data for ascertaining the inhabitants of each district in the Upper or Western Provinces, under the Bengal Presidency: Mr. Ewing, in his Police Report in 1826, gives a rough calculation of 32,206,806 for the Benares and Bareilly Provinces, the area of which (excluding Delhi, which is not given,) is 66,510 square miles, (the reader will find the area of each province in the table at page, but besides this area, there are 29,800 square miles of ceded districts on the Nerbudda, and 55,900 square miles of districts ceded by the Rajah of Berar

in 1826, making a total of 85,700 square miles, of the population of which there are no returns. From Assam I have just received the following data: territory, 400 miles long, and 65 broad at the broadest part; population, 830,000; revenue, S. R. 3,50,000. adopted,-

I give the accompanying return recently received from India, as a simple form, which the Court of Directors ought to require from every Collectorate in India; where more detail were practicable it might be

I give the area and population from separate manuscripts at the India House, which do not agree in the names of the districts.

[†] Gangam is exclusive of the Zemindaries, Jaradah, Vizianagaram, and Daracote, in which no census appears to have been taken in that year, thus accounting for the apparent decrease.

[‡] This includes Ramnad, 2500; and Dindigul, 2624 square miles.

Population of Delhi, October, 1836.

Grand Total	66168	64504	130672

The grand total is 1,630,662 in 28,006 houses; less than five to a house.

Neither the palace or the suburbs of the city are included in the foregoing: their population is about 50,000 of both sexes.

The census of the Bombay Presidency is less to be depended on than that of Madras; combining Colonel Sykes's information with the scanty intelligence laid before Parliament, I make up the following return, as the nearest approximation to truth which is at present attainable.

A census of the city of Agra, taken in 1829, by Mr. Macsween, the magistrate of Agra, gives the following results: — Houses, 21,014; shops (some attached to the houses and some distinct), 5,513; temples and ustuls, 153; musjeeds, 107; churches, 2; other public buildings, 235; male inhabitants, 52,211. This census does not include the suddur bazar, the fort, and bullock establishment. A new census of the whole district is preparing. The Agra Ukbar of October 31, 1832, gives the following as the number of houses and inhabitants of Agra:—Houses, 29,788, viz. pukha, 25,536; and kutcha, 4,252: inhabitants, 96,597, viz. Hindoos, 65,018; men, 25,085; women, 29,933; Moosulmans, 31,579; men, 16,059; women, 15,520.

Divi-	Collectorates.	Square miles.	Villages.	Houses.	Popula- tion.	Remarks.
Deccan. It is difficult to say how near any of the foregoing the Seiks, 3,000,000; Nepaul, 2,000,000; Cashmere, returns, except those for Madras, approximate towards correctness; the estimated population of 422,990 square miles here given is 89,577,206, leaving 91,200 square miles of British territory, of the population of which no account can be traced; but if we allow the low rate of 90 mouths to the square mile, it will make the population of the British territories about 100,000,000. Now to this vast number we are to add the inhabitants of the protected and allied states; the area of which is greater than that of the British territory by 100,000 square miles; and allowing an equal amount of population to the British territories, it will give a grand total of 200,000,000 inhabitants, directly and indirectly under the sway of Great Britain, and subject to the government of the Honourable East India Company! The number of whites, or Europeans, does not, including all the military, amount to 100,000.

The following estimate has been made of the population of the allied and independent states:-Hydrabad, 10,000,000; Oude, 6,000,000; Nagpoor, 3,000,000; Mysore, 3,000,000; Sattara, 1,500,000; Gaickwar, 2,000,000; Travancore and Cochin, 1,000,000; Rajpootana and various minor principalities, 16,500,000; Scindia's territories, 4,000,000; &c., 1,000,000; Sinde, 1,000,000; total, 51,000,000. This, of course, is but a rough estimate by Hamilton.

VII. The government of British India possesses a feature which has rarely or never been found in any nation or in any age, I allude to its toleration of every mode or form of religion in which different sects may choose to adore the Creator; to its protection against hostility, forcible opposition or oppression by one rival sect against another, and to its auxiliary pecuniary aid when solicited by any congregation or com-munity. An account of the Hindoo, Mahomedan, and Parsee forms of religion, and of the different sects of Christians, will be found in my "Colonial Library" and " History of the Colonies."

We may now proceed to observe how far the established church extends, premising that every aid has been afforded by the E. I. Company's Government which could promote the cause of true religion and its concomitants-charity, peace, and happiness. The following detail shews, first, the state of the Established Church in Bengal, according to the latest return in 1830, and the expenses incurred there, from the date of Calcutta being made a Bishop's See in 1814 to 1831.

The new charter authorized the Crown to erect the archdeaconries of Madras and Bombay into bishopricks (subordinate to the metropolitan of Bengal), with salaries of 24,000 S. R. annually each, exclusive of 500l. each for outfits, passage money, &c., and independent also of the expenses incurred in visitations. Pensions of 800l. a year are assigned after 15 years office as bishop, and if he die within six months after his arrival in India, one years' salary shall be paid to his representatives.

The following extract from a public letter from Bombay, dated 20th January, 1830, to the Court of Directors, will shew what has been done in reference to the Roman Catholics, who, at the cession of Bombay, were to enjoy all the rights and immunities of their faith:—

Par. 27. Having called for information in regard to the Catholic churches, &c. within the limits of this Presidency, we beg to lay the result before your Honourable Court.

The Bishop of Bombay states, that he has within the Island of Bombay under his jurisdiction five churches, including the new church at Colaba, built by the Hon. Company, and two chapels, that the number of priests are thirteen, exclusive of his vicar, General Fr. Luiz Maria, and Bishop Prendergast, who lives with him. That all these churches, except that at Colaba, have sufficient funds to keep them in good order, and to support their priests; that those funds were left by pious benefactors; that at Surat he has two churches under his jurisdiction, and two priests, one of whom, as chaplain to the servants of the Hon. East India Company, receives 40 rupees per month, and the other nothing. That both the churches have sufficient funds to keep them in good order, and to support those priests. That at Broach and Baroda he has two chapels without any fund whatever, the chaplains there receiving from the Hon. Company an allowance of 30 rupees each per month. That he has a chapel at Kaira without any fund, and that the chaplain receives from the Hon. Company an allowance of 40 rupees per month. That he has small chapels at Mhow, Dhoolia, Candeish, Malwan, and Rutnagherry, and the respective chaplains receive 30 rupees per month from the Hon. Company. That the chapels at Poona and Aurungabad ought to belong to him, but for the want of priests he has consented to the archbishop sending priests there: the bishop requests an allowance of 15 rupees per month on account of each of those small chapels, for keeping them in order, and an addition of 10 rupees per month to the allowance of the chaplains attached to them

The senior magistrates of the police states that there are 12 Roman Catholic churches on the Island of Bombay, but in regard to the number of Priests, &c., he refers Government to the Bishop of Antipholi, and the Archbishop's Vicar General in Bombay, as he has no means himself of furnishing information thereon.

The Collector of Ahmedabad reports that there are no Roman Catholic churches within his collectorate, and that the whole number of persons of that religion residing within his jurisdiction does not amount to above 40 souls.

The Collector of Broach reports that there is only one Roman Catholic church and one Priest in his Zillah: that the church was built by subscription, and the Priest receives a monthly allowance of 30 rupees for his support. That the annual repairs of the church, and other monthly contingent expenses

thereof, such as clerks, pay, &c. are borne by subscription lately made by some Roman Catholics residing there.

The Collector of Kaira reports that there are two Roman Catholic churches in his Zillah, to which but one l'riest is attached: that both churches are in the vicinity of Kaira, one close to the head cutchery in the suburbs of the town of Kaira, for performing the duty of which the Priest is allowed 40 rupees per month from the Government: the other is situated in the camp, for performing the duty of which the Priest receives private voluntary contributions.

The Collector of Surat reports that there are two Roman Catholic Churches at Surat—the first was erected in 1624, a Sunnud was granted in the year 1729, by the Emperor of Delhi, and the Nawaub of Surat paid monthly a sum of rupees 126 2 0 in support of it: this was continued until the date of its coming into the possession of the Hon. Company, when it ceased; it is now supported by the rent of three houses, yielding, when occupied, an aggregate monthly sum of 45 rupees. At present they have fallen much into decay, and two are without tenants, these belong to the church. The second church is supported by Government, the Priest receives a monthly sum of 40 rupeees, besides the subscriptions obtained occasionally from private individuals; it is said to be in a flourishing condition. The number of Roman Catholics who attend these two churches does not exceed 120 persons. There are few Roman Catholics, and no churches in any other part of his

The Collector in the Southern Concan reports that there are six churches in his Zillah, viz.:—one at Malwan, estimated annual expense 557 Rs. of which Government contributes 540 Rs.; one at Vingoorla, estimated annual expense, 58 Rs.; one at Viziadroog; one at Rutnagherry, estimated annual expense, 540 rupees contributed by Government. This church was built in 1822 by the Portuguese inhabitants, with the assistance of 200 Rs. from Government; one at Hurnee; one at Korli, to which Government contributes 237 Rs.

Mr. Reid states that the number of Roman Catholics is very inconsiderable, and consists principally of a floating population from Goa and Bombay. At Korli, opposite the Fort of Reodunda, and at Viziadroog and Hurnee, few old Portuguese residents are to be found. To Malwa, Vingoorla and Rutnagherry they have been attracted since the establishment of the British Government, and consist of English writers and their families, farmers of the Government, Liquor Farms, and a few stone cutters and mechanics; the total number does not exceed 1,000 souls.

The Collector of Ahmednuggur states that there are no churches nor any established Priest in any town in his collectorate. That the Roman Catholics of Ahmednuggur, about 50 persons, met in a place of worship on Sundays and other days, and have been contemplating building a church, inviting a clergyman, and requesting ground from Government for the site of a church and burial place, and the Collector expresses a hope that when such application is made, we will afford them suitable assistance.

The principal Collector of Dharwar reports that there are 11 churches in his collectorate, viz: one at each of the following places, Rhanapoor, Nundagurh, Shawpore, Belgaum, Kittoor, Beedee, Machgurh, Darwur, Azrah, (in the Kolapoor territory) Hallkurnee, and Bellgoondee. That there are three Priests to those churches, one senior and two junior, all na-

are under charge of the senior Priest, to whom the other two Priests are required to report proceedings; the next four under one of the junior Priests, and the remaining three under the other, the whole are sub-ject to the Archbishop of Goa. They derive their principal support from the Portuguese Government. the senior Priest is allowed a salary of 300 Goa rupees per annum, and the two junior Priests 250 rupees each: they also receive fees for baptisms, marriages. funerals, &c. for little more than a year and a half the senior Priest, who officiates at Belgaum, received an allowance of 25 Rs. per month from the British Government, but this has been discontinued since the removal of the 1st Bombay European regiment. The members of the four churches under the immediate superintendence of the senior Priest, amount, including men, women, and children, to 1,300 souls: those of the other four churches to about 600; the remaining three churches to about 700; making together 2,600.

The whole of these are descendants of a body of Roman Catholics, who, about a century ago, removed from below the Ghauts and settled there. Their chief employment is distillation of spirits; besides the above there are at present at Belgaum, in her Majesty's 41st regiment of foot, 279 men, 43 women, and 44 children, Roman Catholics, and 2,500 (sepoys, pioneers, drummers, fifers, and camp followers) among the native troops, besides some of the same description, under the junior Priests at Dhauwar and Kelapoor.

The acting Collector of Poona reports that there is one church and two Priests under his collectorate, and that the only Catholic inhabitants there, are a few servants and followers attached to the Camp at Poona. He does not report the sources from which they derive their support, but from the Accountant-general's statement it appears, that one of them receives an allowance from Government of 50 Rs. per month, and the other 25 Rs.

The Collector of Khandesh reports that there are two small churches in his collectorate, one at Malligaum and the other at Dhoolia; there is only one Priest in Khandesh who resides at Dhoolia: he proceeds to Malligaum once in six or seven weeks to perform mass, he receives 30 Rs. per month from the Government, which is considered as a salary for performing mass on public days; in addition to this, he is generally paid by individuals one rupee for each baptism, and one for each burial, and five rupces for each marriage; but these are not established fees, they are dispensed with, when the parties are in low circumstances; for all extra masses on account of individuals for their departed friends, or other purposes, half a rupee is paid; the amount of those fees may average about 12 rupees per mensem. The priest in Khandesh is not at all content with his allowances, as he could obtain more than double the sum in Bombay, but, he understands, he has been sent up to Khandesh much against his inclination. There are about 200 Roman Catholics in Khandesh, some of whom are very respectable men, and who serve the Government as accountants, English writers, &c.; others are personal servants and cooks of European gentlemen. An addition of 10 Rs. per month has

tives of Goa. That the four first mentioned churches lately been granted to him to defray the expense of are under charge of the senior Priest, to whom the his proceeding to Malligaum.

The Collector in the Northern Concan has handed up a statement, shewing the number of Roman Catholic churches, the number of the Priests belonging to them, the sources whence they derive their support, and the number of the Roman Catholic houses and subjects in his district, to which we beg to draw your Honourable Court's attention.

That the Roman Catholic faith is rapidly losing ground in his Zillah, there can be little doubt. Upwards of 1,200 families, Coolies, left the church during the raging of the cholera, and returned to the worship of their forefathers; from what he has observed, however, the change was merely in name, the greater number calling themselves Christians are in fact idolaters; some, it is said, worship the Hindoo gods secretly in their houses, although they attend the church, and almost all conceive the images of the saints as gods, and worship them in that light.

Few, very few of the Christians, resident in his Zillah, are descended from the Portuguese families, they are generally converted Koombies, Bundarees, Coolies, and a few Brahmins; and the most extraordinary circumstance is, that most of them still adhere to the former prejudices of caste, and rarely intermarry, and in some parts will not eat together, notwithstanding which they are considered as brethren of the Church of Christ.

The cause of this ignorance must originate in the extremely depressed state of the clergy, and this is caused by the wretched pittance obtainable in each parish, no families of respectability would think of educating any member for such a station. The vicars of Salsette, in their petition to government, dated in December, 1836, stated that the churches are almost "all in great decay, and going to ruin; and there is nothing left for their repairs. The parishioners are so very poor and miserable that they can scarcely maintain themselves and families." Some of the churches are little better than a heap of ruins.

Considering the description of the Priests generally, the collector hardly knows whether the want of them in many places is a disadvantage or not, if men of education and character could by any means be appointed, the advantage would be certain. The statement now forwarded shews 13 Priests officiating over 24 churches or parishes, in the Island of Salsette, the Priest at Tannah having the charge of four churches. The Priest of Agasee in the Mahim Talooka has charge of the churches of Tarapoor and Dahnoo, or rather parishes (for the church at the latter place is completely destroyed), a distance of 20 coss, but at present there are not many Christians in those two parishes.

Heretofore the Roman Catholics were in ecclesiastical matters subject to the rule of the Portuguese Bishop at Goa, and ministered to by an uneducated clergy. Now there are two Vicars Apostolic at Bengal and Madras (one an Englishman and the other an Irishman), subject to the Pope in religious matters. They have several European priests officiating under them, and are recognized by Government. There are, it is said, a large number of Roman Catholics in the Madras territories; and one-half of the European soldiers are of that persuasion.

Statement shewing the number of Roman Catholic churches at Madras, St. Thomas's Mount, Pulicat, Covelong, and Periapalliam, the extent of their respective congregations, and the mode in which they are supported.

Name and Situation, and Congregations—all classes.	Under what Jurisdiction.	How supported, and to what amount.	Remarks.
Blessed Virgin Mary, in Madras Black Town, about 12,000.	Capuchin Mission.	By its own fund to the amount of 57,000 pagodas & two houses, besides other sums, forming an aggregate of about 20,000 pagodas, allotted for certain specific objects.	Built in 1785 by public contributions; the fund exclusively belonging to the church was originally acquired by the compensation of 13,000 pagodas, made by Government on account of the demolition of a church in the fort which the Portuguese inhabitants built, and the rest by legacies, donations, &c., for the maintenance of the priests, charity, eshedic in the contract of the priests, charity, eshedic in the contract of the priests.
St. John, in Madras Black Town, about 1,500.	See, St. Thomé.	By the estate of the late Mr. John D'Monte. The Priest re- ceives 10 pagodas per mensem from the rents of several houses appropriated to charitable pur- poses.	schools, &c. This church was established at the particular instance of a large body of Roman Catholics, who, annoyed at the conduct of the Capuchin friars, petitioned Government and founded it in 1815 under the auspices of the See of St. Thomé. A range of bazari belongs to the church, the rent of which goes towards the liquidation of a debt contracted for its benefit, to the amount of 3,560 times.
Blessed Virgin Mary, in Parcherry, about 10,000.	Ditto.	By the See of St. Thomé.	Built by the headmen and other christian pariahs of the place, and the assistance of one Thomas D'Sonze, Esq., an opulent Por- tuguese merchant.
St. Peter, in Royapooram, about 10,000.	Ditto.	By its own fund, about 40,000 rupees.	Built by the christian boatmen from funds raised by their own contributions, &c. The original amount of these contributions was about 70,000 rupees, 30,000 of which went towards the building of the church.
	Capuchin Mis-	By the Capuchin Mission.	Built lately by the Capuchins.
pooram, about 1,000. St. Roche & Lazaro, near the Monegar Choultry, about 200.	Ditto.	Ditto ditto	Built by the Capuchins having their bury ing ground there.
St. Andrew, in Vepery, about 4,000.	Ditto.	By its own fund.	Built by Father Felix, a Capuchin fries from his own funds.
St. George, in Madeveram, about 100.	Ditto.	No fund or priest.	A small chapel, built by public contribu- tions from the Catholics who have lander property at Madeveram. Foundation lai
St. Thomas's Cathedral, in St. Thomé,	See St. Thomé.	By its own fund.	for a larger building. Erected by the King of Portugal when th See of St. Thomé was established. Fun about 20,000 pagodas, besides four house and two gardens, partly the endowment of the King of Portugal, and the rest from legacies, &c. The See is under the imme diate patronage of that Monarch.
St. Rita, in St. Thomé,	Ditto.	By its own fund, about 1,200 pagedas.	No Minister attached to it. Service i occasionally performed.
St. Domingo, in St.Thomé, about 15,000.	Ditto.	By the rent of two houses be- longing to the church.	portornou.
Madre de Deos, in St. Thomé,	Ditto.	By its own fund 500 pagodas, and the rent of a garden.	·
St. Lazaro, in St. Thomé,	Ditto.	By the bishoprick. A garden belongs to the church.	On Tuesdays this church is opened, and divine service performed, when charitable
Blessed Virgin Mary, in Luz, about 1,500.	Ditto.	By its own fund about 500 pagodas, and a house and gar-	donations, in candles, oil, and other commodities, are obtained to a considerable

Bleased Virgin Mary, in Little Mount, about 100.	Ditto.	By the rent of Paddy Fields, &c. belonging to the church.	No Minister is attached to it. Service i occasionally performed.
Blessed Virgin Mary, in St. Thomas's Mount,	Ditto.	By its own fund about 2,500 pagodas, and two houses be- longing to the church.	An allowance is also granted by Government on account of the European troops in the cantonment.
Blessed Virgin Mary, in St. Thomas's Mount, about 5,000.	Ditto.	No. fund.	Built by public contributions. Service i occasionally performed.
St. Francis Havier, in St. Thomas's Mount.	Ditto.	Ditto.	Ditto ditto
Blessed Virgin Mary, in Covelong, about 500.	Ditto.	By its own fund about 64,000 rupees, bequeathed by the late Mr. John D'Monte.	A Portuguese seminary is also supporte at Covelong out of the interest arising from the same fund.
St. Anthony, in Poona- mallie, about 1,500.	Ditto.	By its own fund about 2,500 pagodas, bequeathed by the late Mr. J. D'Monte.	
Blessed Virgin Mary, in	Ditto.	No fund.	Built by the catholic inhabitants of th
Pulicat, about 2,000. Blessed Virgin Mary, in Wallajahpettah, about 500.	Capuchin Mission.	Ditto.	place. Service is occasionally performed. Built by public contributions. Service is occasionally performed.
Blessed Virgin Mary, in Periapalliam, about 100.		Ditto.	Ditto ditto

N.B. As some of the churches derive support from the rents of houses and lands belonging to the estate of the late Mr.

D'Monts, the amount allowed to each depends upon the actual receipts realized from time to time.

Madras, is as follows: The church situated in Armenian St. called Queen of Angels. The chapel situated at Royapooram, called Mother of Affliction. The chapel situated at Wallajapettah, near Triplicane, called Lady of Purification. The church situated at Vipery, called St. Andrew. The chapel situated near Monigar Chultry, called St. Roque and St. Lazar. The chapel situated at Big Parcherry, near the mint, called Lady of Assumption, formerly under the controll of the Capuchins, is from 1824, under the controll of the acting Bishop of St. Thomé. The church situated at Royapooram called St. Peter, formerly under the controul of the Capuchins, is from 1826 under the controul of the said acting bishop. The chapel situated near the market, erected in 1815, now called St. John's church, by order of the then acting Bishop of St. Thome for the use and benefit of the Rev. Father Eustaquio, a Capuchin Friar, stands under the controul of the present acting bishop. The funds which the Capuchin Friars possess amount to about 180,000 rupees, most of which is the acquirement of their predecessors, and the rest legacies by will of several testators, to which the superior for the time being of the said Capuchin church, situated in Armenian-street, is the executor. The interest of these funds are for the support and maintenance of the Capuchin Friars, charitable purposes, pious works, and decorum of the said church, situated in Armenian-street, under the superintendence of the said superior. The chapel of the Mother of Affliction is supported by the Capuchins; the chapel of the Lady of Purification by the revenues thereof, and by alms of the public. church of St. Andrew by the revenues thereof, and from rent of the houses belonging to that church. The chapel of St. Roque and Lazar by the Capuchins. The chapel of the Lady of Assumption by the revenues thereof, and by alms of the public. The church of St. Peter by the funds thereof, which are under the controul of the Marine Board, acquired by boat people, and the church of St. John by the funds of the late Mr. John de Monte, who was a benefactor of the said church, and from revenues thereof.

As to the number of Europeans or their descendants who attend these churches and chapels on Sunday and other festival days, I cannot exactly say; but to the best of my knowledge and belief I think they may be in all, including the soldiers of the garrison of Fort St. George, to about 700, including countryborn, Malabar, Pariahs, and boat people, who may be about 10,000; but since a division of Roman Catholics has taken place in 1815, among the country born, a part of these, to about 400 or 500, frequent the church of St. John, and the rest to the Capuchin church to a greater number. The Pariahs of Parcherry and boat people to their own churches, where a small body of country born to about 200, in Parcherry, frequent the Chapel of Assumption; and about 100 in the Church St. Peter. The Pariahs of Wallajapettah in their own chapel, where a small body of country born to about 50, frequent there, and at Vipery about 200, among country born, excluding Malabar Sepoys and Pariahs, who may be about 2,000.

Statement of the Roman Catholic churches, their vicars, and their respective funds.—Cathedral of St. Thomé, the Acting Bishop Fr. Manuel da Ave Maria; about 20,000 pagodas, four houses to be rented, and two gardens. Church of Santa Rita at do. under do.; about 1,200 pagodas, and a house to be rented.

The controul of the Capuchin Friars in and about | Church of St. Domingos, do. no vicar; two houses to adras, is as follows: The church situated in Arme-S. de Jesus; a garden and 500 pagodas. Church of Lazarus, do. do.; a cocoa-nut tree garden. Church of Discanço, Rd. Antonio F. dor Arcanjos; supported by the estate of the late Mr. J. de Monte. Church of Luz, Rd. Fr. Francisco das Dores: about 500 pagodas, a house to be rented, and a garden. Church of Little Mount, no Vicar; a garden of paddy fields. Church of St. Thomas's Mount, Rd. Antonio Rozario Cardozas; about 2,500 pagodas, and two houses to be rented. Church of Covelong, Rd. Luis Rubeiro; about 64,000 rupees, but there is a seminary to be supported also with the same fund. Church of Poonmalay, Rd. Antonio Joze Pires; pagodas 2,500. Church of Pulicat, no vicar; no fund. Church of Vepery, Rd. Fr. Felix; no fund; at present in charge of Rd. Muhille. Church of Periapauleum, no vicar; no fund. Church of Madaverum, no vicar; no fund. Church of Wallajawpettah, no vicar; no fund. Church of Capuchins, of Madras, Rd. Fr. John Baptista; about 30,000 pagodas, and two houses. Church of St. John at Madras, Rd. Domingos J. A. Pereira; supported by the estate of Mr. J. De Monte. Church of Parchery at Madras, Rd. Jannario Saldanha; no fund, but is supported by the Cathedral fund. Church of Royaporam, no vicar; about 20,000 pagodas (boatmens' funds). Church another, at Madras, no vicar: supported by the Capuchins.

The Roman Catholic establishments which now enjoy the protection and support of the E.I. Company, include four apostolical vicars, with authority direct from the Pope; nominated by the Society De Propaganda Fide, and stationed at Pondicherry, Verapoly, Bombay, and Agra. There is also a prefect of the Romish mission at Nepaul. These apostolic vicars have under them in their several dioceses a number of priests; most of whom are natives of India, and have been educated in Indian seminaries by European ecclesiastics.

There are also two archbishops and two bishops, presented by the King of Portugal. The archbishops are of Goa, who is the Metropolitan and Primate of the Orient; and of Cranganore, in Malabar. The bishops are, of Cochin in Malabar, and St. Thomas at Madras. The latter includes Calcutta in his diocese: where he has a legate, who has under his superintendence 14 priests and 10 churches, viz. in Calcutta, one; in Serampore, one; in Chinsurrah, one; in Bandel, one; in Cosimbazar, one; three at Chittagong; in Backergunge, one; and in Bowal, one.

The priests and churches under the presidencies of Madras and Bombay are very numerous, exclusive of those which were formerly Syrian churches, and have been, as already mentioned, incorporated with that of Rome.

The Roman Catholic Bishop of Bombay, who, with his Vicar-general, resided on the island, has under his jurisdiction there five churches, inclusive of a new church on the island of Colabar, and two chapels. There are connected with these establishments 13 priests, exclusive of the bishop and his vicar. All the churches, except Colabar, have sufficient endowments for their support and that of their priests.

The principal church, which is dedicated to N.S. da Esperança, formerly stood on the Esplanade; but in the year 1804 it was removed at the company's expense, and a new one erected by Salliah Mahomed Fuzeel. This building cost about 4,000l. In 1831 it was discovered that the work had been badly executed. and the church was then ready to fall, in consequence

of which the company made a further grant of 14,000 that colleges have been established at Delhi and Agra. rupees, nearly 2,000/., towards its repair.

At Surat there are two churches under the jurisdiction of the Bishop of Bombay. The oldest was erected in the year 1624; and it is a remarkable circumstance that for many years this church enjoyed a monthly income of 126 rupees, 2 anas paid by the Nabob of Surat, by virtue of a Sunnud from the Emperor at Delhi. This endowment ceased to be paid when Surat came entirely under the controul of the company; but the church is still in possession of freehold property, yielding a monthly sum sufficient for its support. The second church is wholly supported by the company, who pay the priest his monthly stipend of 40 rupees. The stated worshippers in these two churches somewhat exceed 100.

The other Roman Catholic churches under the Presidency of Bombay are as follow: one in Broach,; which was crected and is still supported by voluntary subscription, excepting a monthly stipend of 30 rupees to the priest, paid by the company; one at Baroda, supported in the same way; the church of N. S. los Remedios at Bassein, to the re-edification of which, in the year 1832, the company contributed liberally; a church at Poonah, with two priests, who enjoy stipends paid by the company; one at Malwa; one at Vingorla; one at Viziadroog; one at Rutnagherry, erected in 1822, with the aid of a grant from the company, and one at Hurree.

The following statement exhibits the several missionary stations formed by the London, Baptist, and Wesleyan Societies, with the date of the year when the mission was established at each station, and the number of missionaries resident at each.

London Society.—Calcutta, A.D. 1816, missionaries, 4; Chinsurah, 1813, 1; Berhampore, 1824, 2; Benares, 1820, 4; Madras, 1805, 4; Tripassore, 1826, superintended by the Madras missionaries; Vizagapatam, 1805, 2; Cuddapah, 1822, 1; Chittoor, 1827, 1; Belgaum, 1820, 2; Bellary, 1810, 4; Bangalore, 1820, 2; Salem, 1827, 1; Combaconum, 1825, 1; Coimbatoor, 1830, 1; Nagercoil, 1806, 2; Neyoor, 1828, 2; Quilon, 1821, 1; Surat, 1815, 3; Darwar, 1829, superintended by the Belgaum missionaries.

Baptist Society.—Calcutta, 1801, missionaries, 7; Patna, 1832, 1; Digar, 1809, 1; Monghyr, 1816, 2; Sewry, 1807, 1; Cutwa, 1804, 1; Luckyantipore, 1831, 1; Khane, 1831, 1; Bonstollah, 1829, 1. The above is exclusive of the mission family at Serampore, which is in the Danish territory.

Wesleyan Society.-Madras, four Europeans, with native assistants; Bangalore, 4; Negapatam and Melnattam, 1.

VIII. It was stipulated at the last renewal but one of the E. I. Charter, that 10,000l. should be annually devoted from the surplus territorial revenue of India, to the purpose of education; hy the following extract from a parliamentary return in 1832, it will be seen that the company have doubled, and in some years trebled the amount laid down in the act, although there was no surplus revenue in India :-

In 1824, 21,884l.; 1825, 66,563l.; 1826, 27,412l.; 1827, 45,313/.; 1828, 35,841/.; 1829, 38,076/.; 1830, 44,330%.

As an instance of the efforts making for the diffusion of intelligence throughout the British dominious. I may quote the testimony before Parliament of the Hon. Holt Mackenzie, who states that since the renewal of the last Charter, the Bengal Government have established a college at Calcutta for the Hindoos, and reformed very much the old Moslem College;

for both Hindoos and Moslems; the Hindoo College at Benares has been reformed; at the several institutions it has been the object of Government to extend the study of the English language, and good books have been supplied, &c.; that seminaries have bee established in different parts of the country, and schools established by individuals who have been aided by Government. The Calcutta School Book Society, from 1824-25 up to the 30th April, 1833, printed 13,000 copies of 24 Sanscrit works; 5,000 copies of seven Arabic works; 2,500 do, of five Persian authors; 2,000 do. of four Hindu do., and several other works were then in the press. The printing charges of the Society for the foregoing period was 105,425 rupees.

The late Colonel Mackenzie received from the East India Company 10,000l. for his collections on the history of the Hindoos of the Southern Peninsula. The money paid by the East India Company for Dr. Morrison's Chinese Dictionary, was 12,000l. sterling!

With respect to Bombay, Major-General Sir Lionel Smith, a veteran and distinguished King's officer, observes in his evidence before Parliament (6th Oct. 1831), 'Education is in such extensive progress, that I hardly think it could be more extended-education is also going on in the Deckan; the encouragement given by Government consists in a very liberal establishment, under the direction of an officer of very great attainments in the native languages, Captain Jarvis.

For the army, also, the Company have established schools, and libraries have been sent out to India for the use of the troops; and it is in frequent evidence before Parliament, that great pains are taken with the native regimental seminaries. 1 might quote similar testimony with respect to Madras, but perhaps the best proof that I could adduce is the statement made by that indefatigable friend of India, Sir Alexander Johnson, in his late able Report laid before the Royal Asiatic Society, namely, that in Madras, the proportion of the inhabitants who have been taught reading, writing, and the rudiments of arith-

metic, in their own language, amount to one in five!"

Progress of Education in Bengal.—The Calcutta Madrissa, or Mahomedan College was founded in 1781, by Warren Hastings, who provided a building for it at his own expense, amounting to 57,745 rupees, but which was afterwards charged to the Company. Bengal Government also, at the recommendation of Mr. Hastings, assigned lands at the estimated value of 29,000 rupees per annum, for the support of the institution, to promote the study of the Arabic and Persian languages, and of the Mahomedan law, with a view, more especially, to the production of well qualified officers for the courts of justice.

In 1791, the government of the College was placed in the hands of a Committee of Superintendence, consisting of the acting president of the Board of Revenue, the Persian Translator to Government, and the preparer of reports.

The students are divided into classes, and the following sciences to be taught:-Natural Philosophy, Theology, Law, Astronomy, Geometry, Arithmetic, Logic, Rhetoric, Oratory, Grammar.

Not more than two months' vacation allowed to the students in one year. Every Friday to be set apart for purifications and religious worship. The salaries of the preceptors and officers to be-Head Preceptor, 400 rupees per month; first Assistant, 100; second ditto, 80, third ditto, 60; fourth ditto, 30.

Each student in the five classes to receive an allowance of 15, 10, 8, 7, or 6 rupees per month, according to his class. The number of students to be regulated by the committee, and all surplus funds to be employed in the purchase of books.

In a voluminous report in 1819, of a retrospective view of the resources and expenditure of the institution, the latter amounted, from the year 1794 to the year 1818, a period of 25 years, to the sum of 4,94,197 rupees. 30,000 rupees per annum, is now granted to the College out of the public treasury, instead of the institution depending upon the uncertain produce of the lands which were originally granted to it as an endowment. The public examinations which take place every year, demonstrate the progress of the College.

In 1827, the study of Arabic, Mahomedan Law, and Mathematics was extended, and a Medical class instituted. The examinations were in Arabic, Logic, Rhetoric, Philosophy, Euclid, Arithmetic, Algebra and Medicine. In 1828, an English Class was established; Skeletons and Anatomical Models and Surgical works provided. All applications for Law offices under Government were to be accompanied by certificates from the College, and a preference given to those who had acquired the English language and produced testimonials of good conduct in the College. In 1830, No. of Students 99; examined 85.

Benares Hindoo Sanscrit College, established by Jonathan Duncan, Esq., the resident at Benares in 1791, as a means of employing, beneficially for the country, some part of a surplus which the public revenues yielded over their estimated amount. The expense for the first year was limited to 14,000 Rs. In the following year it was augmented to 20,000 Rs.; at which amount it has been continued down to the present time. The object of this institution was the preservation and cultivation of the laws, literature and religion of the Hindoos, (and more particularly of their laws) in their sacred city; a measure which it was conceived would be equally advantageous to the natives, and honourable to the British Government among them.

The establishment originally consisted of a head pundit or rector; eight professors; nine students who enjoyed salaries; with book-keepers, writers, peons, &c. The Governor-General was constituted visitor, and the resident his deputy. Besides the scholars on the foundation, and a certain number of poor children who were to receive instruction gratis, the institution was open to all persons who were willing to pay for instruction: the teachers and students to hold their places during the pleasure of the visitor. All the professors, except the professor of Medicine, to be Brahmins. The Brahmins to have preference in succession to the office of rector, or to professorships. Four examinations in the year to be held before the resident. Each professor to compose annually for the use of his students, a lecture on his respective science. Examinations into the most sacred branches of knowledge to be made by a committee of Brahmins. Courses of study to be prepared by the professors. The internal discipline to be in all respects conformable to the Dherma Shastra, in the chapter on education.

The prescribed course of studies in this college to comprehend,

Theology, Ritual, Medicine including Botany, &c., Music, Mechanic Arts, Grammar, Prosody, and Sacred Lexicography, Mathematics, Metaphysics, Logic, Law, History, Ethics, Philosophy, and Poetry.

The Calcutta Hindoo Sanscrit College, dates its establishment from 1821. For the support of this institution, the annual sum of 30,000 rupees has been allowed by Government, and 1,20,000 rupees has also been allotted for the erection of a college. The establishment consists of 14 Pundits, a Librarian and servants, 100 scholars on the foundation, and a Secretary.

The sum of 1,200 rupees is reserved for distribution in prizes at the public examination, and a school for Hindoo children is connected with the college.

In 1823, the Bengal Government formed a General Committee of Public Instruction at Calcutta, for the promoting of education and of the improvement of the morals of the natives of India.

The annual sum of one lac of rupees, which, by the 53 Geo. III., c. 155, was appropriated to the purposes of education, was placed at their disposal. The schools at Chinsurah, Rajpootana, and Bhaugulpore, were placed under the controul of this committee, and the separate grants which had been made to those schools, amounting together to 16,800 rupees per annum, were discontinued from the 1st January, 1824.

The total amount placed at the disposal of the General Committee of Public Instruction in the years from 1821-22 to 1825-6 was, S.R. 4,78,400.

Agra College.—In 1822, the Governor-General in Council sanctioned the institution of a college at Agra; the sum of 42,501 Rs. was for the erection of the college; an expenditure of 15,420 Rs. authorised, and the number of students in the college was, in 1826, 117; 1827, 210; in 1830, 203; of whom 73 received stipendiary allowances.

Delhi College, similar to the foregoing by its adaptation to useful instruction. In 1827, the number of students was 204; in 1828, 199; and in 1829, 152; the reduction being owing to a discouragement of necuniary or stipendiary grants to pupils

pecuniary or stipendiary grants to pupils.

Vidalaya or Anglo-Indian College.—"This highly interesting and promising institution," it is stated, "owes its origin to the intelligence and public spirit of some of the opulent native gentlemen of Calcutta, who associated together in 1816, and subscribed a capital sum of Rs. 1,13,179, to found a seminary for the instruction of the sons of Hindoos in the European and Asiatic languages and sciences." It was placed under the superintendence of the General Committee, as the condition of pecuniary aid, to the amount of 300 rupees per month, for house-rent, afforded to it out of the Education Fund. This institution has a growing popularity and decided superiority, on its present footing, over any other affording tuition to the natives in the English language; a select library of books has been sent from England, and some additional philosophical apparatus. number of scholars, all male, is stated at 200; and so long, the committee add, as such a number, all respectably connected, "can be trained, in useful knowledge and the English language, a great improvement may be confidently anticipated in the intellectual character of the principal inhabitants of Calcutta." In order to secure the continued attendance of the more promising pupils, and to enable them to complete their course of study, a limited number of scholarships has been endowed by the Government. The number of pupils were in January, 1826, 196; in 1827, 372; July, 1826, 280; 1828, 437 (of whom 100 received gratuitous education). The number is still on the increase.

English College.—The Government sanctioned the establishment of a distinct English College, for the

admission of a certain number of the more advanced pupils from the Hindoo and Mahommedan colleges, for gratuitous instruction in literature and science, by means of the English language; for which purpose the Education fund could afford an income of Rs. 24,000 per annum.

The Bishop's College, near Calcutta.—A grant of land, of about 20 acres, was made by the Government in India for the purposes of the College, to which a farther grant has since been made. It stands about three miles below Calcutta, in a fine situation, on the opposite bank of the river Hooghly, which is there much wider than the Thames at London. The spot is peculiarly favourable for privacy and retirement; and "the scenery is such," Bishop Middleton observes, " as to gratify and soothe the mind."

The foundation stone of the college was laid, on the 15th of December, 1820, by Bishop Middleton. The Incorporated Society for the Propagation of the Gospel in Foreign Parts, transmitted to Dr. Middleton the sum of 5,0001. to enable him to commence the work; 5,000%. were contributed by the Society for Promoting Christian Knowledge; 5,000l. more were voted by the Church Missionary Society; and the British and Foreign Bible Society had added 5,0001. This sum of 20,000%, was augmented by collections in all the churches in England and Wales, in consequence of a "King's Letter." which amounted to 45,0001. with which the building has been completed.

The college consists of three piles of buildings, in the plain Gothic style. These buildings form three sides of a quadrangle; the fourth, or south side, being open to the river, which in that part flows nearly from E. to W. The pile which fronts the river consists of the chapel college to the E., divided by a tower from the hall and library on the W. The buildings on the E. and W. sides of the quadrangle contain the apartments for a principal and two professors, with lecture rooms and rooms for the students. The whole is formed on the plan of combining comfort and convenience with an elegant simplicity.

Bishop's College is under the immediate direction of the Society for the Propagation of the Gospel; but the statutes are so framed as to afford opportunity both to the Government in India and to the religious societies connected with the Church of England, of obtaining, under certain regulations, the benefits of the college for such students as they may place there.

For the regular supply of students, the Society for the Propagation of the Gospel has adopted the measure stated in the following extract from a late report : -"Ten theological scholarships and ten lay scholarships have been formed by the society for native or European youths educated in the principles of Christianity; and the sum of 1,000%, per annum has been appropriated to this special purpose. The ordinary age of admission is 14.

The Christian Knowledge Society assists in this plan of scholarship; having placed the sum of 6,000l. at the disposal of the Gospel Propagation Society for the purpose of endowing five scholarships, to be called, in memory of the founder of the college, "Bishop Middleton's Scholarships." This grant is also intended to provide a salary for a Tamul teacher in the college, that being the language chiefly used in the society's missions.

The Church Missionary Society voted a grant of 1,000l. per annum for several years, on account of the importance of the institution, and of the co-operation it afforded to their department of labour in India.

In 1830, the Directors of Bishop's College had upwards of 50,000% in the 31 per cents., as a fund towards the support of that institution. There are upon that foundation a principal, two professors, eight missionaries, two catechists, and a printer.

The College Council consists of three professors, and attached to the college are four European missionaries.

The foregoing abstract of the colleges in Bengal is sufficient to convey an idea of the good intentions of the Government in furthering education. There are various primary and elementary schools; viz. at Chinsurah, where there are 1,200 scholars; at Ajmeer, in which school there are 200 boys; Boglipoor school, 134 pupils; Cawnpore, 75 scholars; Allahabad, 50 ditto (it is proposed to establish an English college at Allahabad); Dacca, 25 schools and 1,414 pupils; Mynpoory College, Etawah, 40; Bareilly, 131 schools, 300 seminaries, with 3,000 pupils; and an established college, with 50 students. The following statement respecting Bareilly is full of interest:

In 1827, the local agents in Bareilly, Messrs. S. M. Boulderson, J. Davidson, and C. Bradford, were required to report "what schools, colleges, or seminaries of any description whatever, existed in the towns or villages" of that district. In reply, they informed the Education Committee, that in the town of Bareilly there were 101 schools in which Persian was taught. and 20 in which the children of the Malinjims were taught accounts; besides which there were 11 persons who taught Arabic, and two who taught the science of medicine; that in the villages round about Bareilly there were nine Hindu schools and 13 Persian; and in other parts of the district 108 Persian and 105 Hindu schools.

"In these schools," the local agents observe, "science of any sort is rarely studied. Works in the Persian language, such as the Bostan, Golistan, Zalicka, Madhooram Aboolfuzul, Secundernameh, Tusha Kheeleefa, Bahardanisli, are read with a view to facility in writing Persian; besides this, the scholars are instructed in the simplest rules of arithmetic. In the colleges, the works read are in the Arabic language. The course of study includes Surf, Neho, Mautick, Laws of Composition, Fikha Kikmut, under which are included medicine, mathematics, and natural philosophy, the Buddus, and the explanations of the Khoran; besides these, there are schools in which the children of Mahajans and those intended for putwarries are taught accounts; those who study the Hindoo sciences read the Vedas, the Shastres, the Poorans, Beakam Jotuh Chelum Naryul, Ojoosh Bed, Memansa, Neari. have not heard that there are any establishments for such scholars in the villages.

"In the schools in which Persian is taught, the boys read manuscript copies of the different books, and learn to write on boards.

"Hindoos and Mussulmans have no scruples about reading together. The teachers are almost always Syeds, Sheiks, Moguls, Patans or Kaits.

"The teachers are paid from three to seven rupees a month by the person at whose house they sit; they also get their meals twice a day; and surance, that is, a kubba, razaee, toshak and bolaposh. Kubba and razee are regularly given every year, whether the old one be worn out or not; the tushak and bolaposh are sometimes given, sometimes not. Summer clothing is also sometimes given, but rarely. Those who do not pay a teacher for attending at their own houses, send their children to the houses of those who entertain one, and pay the teacher from four anas to one rupee

monthly, according to their means; besides this, the master gets other perquisites, such as 'jummajee' offerings, presented on Thursday evenings by each boy, from four gundahs to one and five anas; aghazee' offerings, presented on beginning a new book, from five anas to one and a half rupee; 'edic,' presented on holidays, from one ana to one rupee. The boys begin to study at six years of age sometimes, but seldom till 20; in the colleges, from 14 to 25, sometimes 30, sometimes much less, it depending upon the talents and inclination of the students. Those who learn Persian, viz. boys till the age of 14 and 15, never remain under the roof of the master: on the contrary, he generally attends at the house of some person or other, where he instructs the children of the master of the house, and those of others. Schools in which accounts are taught differ in no material respect from Persian ones. Those who teach Arabic have sometimes pupils who come from a distance residing under their roof; but those who live in the same town remain in their parents' house. is considered improper to take any thing from Arabic students, unless from necessity. The schools in the towns are well attended in comparison with those of the villages. We have heard of no schools supported by public grants." In Delhi district there are about 300 elementary schools, in several of which the pre-ceptors receive no pay, but teach "gratis, in hope of Heaven.''

There are a great variety of other colleges and schools in Kidderpore, Burdwan, Moorshedabad, Hooghly, Nuddea, Rajishaye, Calcutta Benevolent Schools (250 pupils of both sexes); infant schools in various districts, under the Committee of Management at Calcutta; Sylhet, Chittagong, Beaspoor, &c., independent of regular schools, and private or missionary seminaries. The missionary societies maintain schools at their respective stations. The following are maintained by them under this Presidency:—

By the London Society.—At Calcutta and out-stations, Bengallee schools, for boys, 11; for girls, 4;—15. At Chinsurah, Bengallee, for boys, 2. At Berhanpore, Bengallee, for boys, 1; for girls, 1;—2. At Benares, Hindu, for boys, 4. By the Baptist Society: at Calcutta and out-stations, for boys, 2; for girls, 22;—24. At Cutwa, for girls, 4. At Sewry, for boys, 4; for girls, 4;—8.

The following is an abstract from a Report of the General Committee of Public Instruction of the Presidency of Fort William, in Bengal, for the year 1836.

Agra College.—No. of pupils, 223; viz. 33 Christians, 31 Mahommedans, and 159 Hindus.

Ajmere.—No. of scholars, 218; viz. 206 Hindus, 9 Mussulmen, and 3 Christians.

Allahabad.—No. of scholars, 122; viz. 85 Hindus, 28 Mahommedans, and 9 Christians.

Bareilly.—At present nothing taught but English. No. of scholars, 60; viz. 9 Mahommedans, and 51 Hindus.

Benares English College.—No. of pupils, 142; viz. 131 Hindus, 10 Mahommedans, and 1 Christian. Total cost of building new college, 14,156 rupees, of which 10,000 were contributed by the General Committee, and the rest by subscription.

Benares Sanscrit College.—No. of scholars, 222.

Bhagulpoor Hill School.—No. of scholars, 79.

CALCUTTA. - Medical College. - Stipendiary students, 49.

Hindu College.—Total No. of pupils, 469; 392 of whom are provided for by the parents, and the remainder by the college.

Muhammedan College. — In 1837, there were 42 paid, and 72 unpaid students.

Sanskrit Collège.—Present No. of scholars, 122; of whom 57 are pay scholars, receiving a monthly pay of 5 or 8 rupees; and 65 out-students, getting no stipend from Government.

Dacca School.—There are in this seminary 149 pupils, of whom 134 are Hindus, 8 Mahommedans, and 7 Christians.

Delhi Oriental College.—Arabic students, 45; Persian students, 64; Sanskrit department, 35.

Ferruckabat School.—No. of scholars, 30; of whom 28 are Hindus, and the other 2 Mahommedans.

Delhi English College.—No. of scholars 108; viz. 74 Hindus, 27 Mahommedans, and 7 Christians.

Gawahatti School.—There are 136 pupils in this school, of whom 91 are Hindus, 43 Mahommedans, and 2 Christians.

Ghazeepoor School—There are 57 scholars in this institution, of whom 5 are Christians, 10 Mahommedans, and 42 Hindoos.

Goruckpoor.—There are 53 pupils, of whom 25 are Hindoos, 21 Mahommedans, and seven Christians.

Mohammed Muhsin's College, Hoogy. — There are 1,013 students belonging to the English department of the College, of whom 31 are Mahommedans, 34 Christians, and the rest Hindoos. In the Arabic and Persian Classes, there are 197 students, of whom 138 are Mahommedans, and 81 Hindoos.

Hoshungabad.—There are 20 pupils, of whom four are Mahommedans, one a Christian, and the rest Hindoos.

Tubbulpore.—There are 17 pupils in the English department, and 64 in the Hindoo class.

Mautmein.—There are 107 pupils, of whom 42 are Christians, 40 Buddhists, seven Hindoos, and one Mahommedan, and the religion of the remainder is not known.

Meerut.—There are at present in this school, 21 Christians, 33 Mahommedans, and 52 Hindoos.

Midnapoor.—There are now 55 students in this school.

Murshedabad College.—There are 80 students in the English department, of whom 58 are Mahommedans, 21 Hindoos, and one Christian. In the oriental department, there are 88 pupils, of whom 82 are Mahommedans, and the rest Hindoos. Monthly income of the College, 1,666 rupees.

Patna.—There are 102 pupils in this seminary, of whom 15 are Christians, 16 Mahommedans, and 71 Hindoos.

Bajohahi.—There are at present 98 receiving instruction.

Saugor.—There are 205 Hindoos, and 11 Mahom-medans in this school.

It is worthy of remark, that when the pupils of the different schools, have to pay for their own books, they are much more regular in their attendance, than if they had them gratis.

A medical college at Calcutta (the project and plan of which was laid by me before Lord W. Bentinck, in 1828, but rejected at the time by the Supreme Government, lest Hindoo prejudices should be offended) is now in full operation, and producing much good.

State of Education at Madras. The reports in detail from this Presidency are not numerous, but to compensate in some measure, we have a more complete return than from any other Presidencies relative to the males and females at each school, distinguishing the Hindoo from the Mussulman scholars as follows:

State of Education under the Madras Presidency, distinguishing the number of Colleges and Schools; the Hindoo from the Mussuiman Scholars, and the Male from the Female Papils,

From Government Returns in 1826.

A summary of the report states, that the schools are for the most part supported by the people who send their children to them for instruction, the rate of payment for each scholar varying in different districts, and, according to the circumstances of the parents of the pupils, viz. from one ana (three-half-pence) to four rupees (eight shillings) a month, the ordinary rate of the poorer classes being generally four anas, and seldom exceeding eight anas. There are endowed schools, or teachers, in the following districts:—

Rajamundry.—69 teachers of the sciences, endowed with land, and 13 receiving allowances in money.

Nellore.—Several Brahmins and Mussulmans receiving 1,467 rupees per annum for teaching the Vedas, Arabic, and Persian.

Arcut.—28 colleges and six Persian schools.

Salem.—20 teachers of Theology, and one Mussulman school.

Tanjore.—77 colleges and 44 schools, supported by His Highness the Rajah.

Trichinopoly. - Seven schools.

Malabar.—One college.

Endowments for purposes of education in other districts have unfortunately been appropriated to other purposes.

The Missionary Societies maintain the following schools, under the Presidency:--

The London Society.—At Madras, and out stations, Tamil, for boys, 14; girls, 2; boys and girls, 2—18. Tripassoor—Tamil. boys and girls, 2; English, boys and girls, 2—1. Vizagupatam—Teloogoo, boys and girls, 11. Cuddipah—Teloogoo, boys and girls, 11. Cuddipah—Teloogoo, boys and girls, 8. Chittoor—Teloogoo and Tamil, for boys, 7; girls, 1—8. Belgaum, and out stations—Mahratta and Tamil, for boys, 12; for girls, 1—13. Respective, with out stations—Canarese, Mahratta, Teloogoo, and Tamil, for boys, with a few girls, 7. Saless—Tamil, Teloogoo, and English, boys, 7. Comboum—Tamil, for boys, 12; for girls, 1—13. Coinbuttoor—Tamil, for boys, 5. Nageroul, with out stations—Tamil, for boys, 5. Nageroul, with out stations—Tamil, for boys, 5. Nageroul, with out stations—Tamil, for boys, 5. Nageroul, with out stations—Tamil, for boys, 5. Nageroul, with out stations—

tions—Tamil, for boys, 46; for girls, 4—50. Neyoor, with out stations—Tamil, for boys, 50; for girls, 1—51. Quilon—Malayalim, for boys, 14; for girls, 10—24. The Wesleyan Missionary Society.—At Madras, 14. Bangalore, 6. Negapattam and Melnattum, 8.

A committee of public instruction has been formed at Madras on the model of that of Bengal, and much good has already been affected by the same.

State of Education at Bombay .- The Government of this Presidency has not been behind hand in promoting the blessing of education. In July, 1828, a circular letter was issued to the several collectors under the Bombay Government, calling upon them to report annually to the Foujdarry Adawlut the No. of schools in their collectorates, the number of boys attending each, and the mode in which education was conducted, also the mode in which printed tracts were sought after and disposed of. In October, 1829, these reports having been received, the Registrar of the Adawlut was instructed to forward to the Government a general report of the state of education in the provinces of the Bombay Presidency, framed from the information conveyed in the statements of the several collectors, and suggesting the means which, in the opinion of the Judges, were most likely to promote and improve the education of the natives of India.

1st. By a gradual extension of schools on an improved principle, either by affording the patronage of Government to native schoolmasters, on condition of their improving their system, or by the establishment of new schools in populous places at the expense of Government; and

2nd. By the gratuitous distribution of useful books such as 'books of arithmetic, short histories, moral tales (distinct from their own false legends), natural history, and some short voyages and travels.'

Periodical examinations the judges recommend to be held with caution, as likely to excite alarm, and when voluntarily submitted to by the schoolmasters, to be accompanied by liberal rewards to the scholars for proficiency, 'as shewing the interest the Government takes in the proceedings, and as a mode of encouragement which would seem upon common principles likely to be attended with a good result.'

This report is accompanied by the following 'Statement of the Schools and Scholars in the different Collectorships.'

Native Education Society.—The committee of this noble institution (voluntarily formed in 1815, and composed in nearly equal proportions of Europeans and natives) at a meeting, 12th April, 1831, stated that its aggregate receipts and disbursements within the year amounted to between 70,000 and 80,000 rupees; that it has constantly on sale more than 40 publications in the native languages, many of them the produce of the Bombay lithographic and other presses, of which former mode of printing favourable specimens are appended to the reports: and that it has under its controul and management the several schools and establishments described in the following paragraphs:—

"In the central school 250 boys have been through a course of study in the English language: 50 have left it with a competent knowledge of the language, consisting of an acquaintance with geography, mathematics, and geometry. In Bombay, the boys in the Mahratta school have amounted to 954, and in Guzzerattee to 427. At present, there are altogether 56 of the society's schools, each containing about 60 boys, amounting in the whole to 3,000 boys under a course of education."

This report contains the following further particulars:-

"Your committee observe that the boys who have made the greatest progress in the English schools are the Hindoos; they are left longer in the schools by their parents than other boys, who, though equally intelligent and quick, are more irregular in their attendance. Few or no Mahomedan boys ever enter the schools."

In 1826, there were in the Society's school at Bombay 367 boys boarders, and 228 girls ditto; and there were of day scholars, 268 Christians and 472 natives. In Surat school 3 Christians and 48 natives, and the regular schools 183 pupils.

There is a Hindoo college at Poona, at which premiums are awarded to the most deserving students. An admirable Engineer College has been formed at Bombay, at which, according to the latest return, there were 86 students entertained and instructed.

* Master paid by government.

In May, 1830, the Education Society reported 25 schoolmasters (11 Mahrattas and 14 Guzzerattees), ready to commence their duties as teachers in the various schools in the Deccan, in Guzzerat, and in the two Concans. They had acquired an accurate knowledge of their own languages, and were so far acquainted with the higher branches of the mathematics as to entitle them to be considered teachers of the second order. Stations were proposed for them by the Society, to which they were sent by the Government.

In 1829, there were 44 students quitting the institution to enter on professional employment, of whom there were—Europeans, 7; Mahratta, 32; Guzzerattee, 5. Mathematical instruments, &c., are supplied by the E. I. Company.

The following very condensed abstract, relative to the number of the schools under the Bombay Presidency (according to circular queries in 1825) and the mode in which the teacher is remunerated, will be perused with much interest.

[The reader desirous of further information on the state of education in India, will find many details in vol. i., second edition, of my "History of the British Colonies," and in my "Colonial Library." Some returns have been ordered to be prepared by Parliament, which will be found in the Appendix.]

Official Returns (Abstract) of the Schools under the Bombay Presidency.

Districts. Number of Schools and Scholars.			Allowances to Schoolmasters, and from what
Distriction	Schools.	Scholars.	Source derived.
Ahmedabad	Villages . 63	Ditto 408 Wannees 1080 Kombees 524 17 other castes 480 In Goga . 157	The manner of remunerating teachers is exceedingly various, each village having a mode peculiar to itself. The more general practice is for each boy to present daily about a handful of flour. A sum of from one to five rupees is also usually paid on his leaving school. The parents also pay about one rupee and a half on the boy being perfect in the first 15 lessons. A similar sum on his acquiring a perfect knowledge of the alphabet, and another similar sum when he is able to write, to cast up accounts, and to draw out bills of exchange. The office of schoolmaster is generally hereditary.
Concan	86 (58 in private dwellings, and 28 in temples).	1500 of all castes including 567 Brahmins and no girls.	Pecuniary payments, amounting to about four rupees a month upon an average (a salary which is stated to be perfectly inadequate for efficient instruction); it is also customary in Hindoo schools, for each child to give two nutwars of rice per month, and the shewoo pice, or two pice, to the teachers on every great Hindoo holiday; but this custom is not invariably observed.
Kaira Dist	139 badly conducted.	in each school,	The boys daily, when they quit the school in the evening, present a handful of grain, seldom exceeding a quarter of a seer; and, when they finally leave the school, make the master a present of two or three rupees. Boys of respectable familes also give half a rupee on first entering the school, and on days of ceremony send him a meal of grain and ghee. They also sometimes beg for him from respect-
Kaira Sudder Station	The education does not extend beyond the rudiments of reading, writing, and arithmetic.		able visitors. Total of income between 40 and 100 rupees. The office confined in Brahmins, though not hereditary. They receive generally seven seers of grain monthly from the parents of each boy, and five rupees in cast when he is withdrawn from school.
Concan Surat Zillah.	Government 1 Charitable . 2 Hindoo 3 Mahom 3	100 } 80 } average about	Fixed pay from Government per month
(exclusive of alienated villages).		3000.	Flour
Zurat Town	Hindoo 42 Pundits . 18 Mahom 20 Moollas 56	66 471	Each master receives about 60 rupees per annum, for 50 boys in grain and money.
Broach Zillah		Not stated.	In the townships they receive their recompense chiefly from the parents. There are, in some cases, fixed allowances of from 30 to 70 rupees. In others a daily present of one quarter of a seer of grain, and payments in money upon the scholars attaining to a certain state of proficiency. In the villages the mode of remuneration is usually similar to that adopted in the townships; but the fixed annual allowances are as low as 20 rupees, and scarcely ever exceed 50 rupees.
Broach Town	16	373	The schoolmaster's allowances are derived from the parents of the children, and consist of a small quantity of grain daily presented by the pupil. A few pice in the course of the month, half a rupee or a rupee at the different stages of advancement. The income of a schoolmaster never averages more than from 3 to 5 rupees monthly, and is precarious.

Districts.	Number of Scho	ols and Scholars.	Allowances to Schoolmasters, and from what
Districts.	Schools.	Scholars.	Source derived.
Kandeish	170	proportion of 1 to 18, the num-	The schoolmaster's allowances are all derived from the scholars, and supposed to average not more than 36 rupees per annum for each school.

Under this Presidency the London Missionary Society maintains the following schools: at Surat, Goojurattee, for boys, 4; girls, 1—5. At Darwan, Tamil, 2.

The following is an abstract of the proceedings of the Bombay Native Education Society in 1838:—
English Gentral School, containing 408 scholars;
Murathee, 3 ditto, 331; Goojratee, three schools, 312; Hindoostanee, New Cazees-street school, 36.

Government Schools in the Murathee Districts, at Poona, 7 schools, containing 484 scholars; Sholapoor, 5 ditto, 374; Ahmednuggur, 4 ditto, 316; Ahmednuggur, 2 ditto, 151; Nassiek, 2 ditto, 133; Dharwar, 4 ditto, 383 ditto; Candeish, 2 ditto, 107; Rutnagerry, 7 ditto, 626; Ditto, 4 ditto, 221; total, 37 schools, containing 2,795 scholars.

Government Schools in the District of Goojrat.—At Surat, 2 schools, containing 147 scholars; Ahmedabad, 2 ditto, 124; Broach, 2 ditto, 204; in the district, 21 ditto, 883; total, 27 schools, containing 1.358 scholars.

Abstract.—On the Island of Bombay, supported by the Society, 4 schools, containing 1,087 pupils; Murathee District Government Schools 37, 2,795; Goojrat District ditto, 27, 1,358; total, 68 schools, containing 5,240 scholars.

The Calcutta Education Press (now the Baptist Mission Press) has been productive of much good; between July 1824 and February 1830, the number of native works produced at this press were,—Sanscrit, 15 finished, 3 in hand; Arabic, 2 finished, 5 in hand; Hindi, 3 finished; Persian 4 finished, 1 in hand.

The total value of the works was Rs. 58,890.

The Calcutta School Book Society had published 38 volumes on important subjects, in the several Indian languages, as follows:—In Sanscrit 3; Bengallee 9; Hindee 3; Arabic 2; Persian 5; Hindostanee 1; Anglo-Bengallee 3; Anglo-Hindee 1; Anglo-Persian 3; Anglo-Hindostanee 2; English 6; total, 38.

Of the foregoing elementary and standard volumes, there were 28,671 copies circulated in 1828 and in 1829, as follows:—Of reports, 651; Sanscrit Books, 177; Bengallee, 10,074; Hindee, 2,452; Ooriya, 200; Arabic, 117; Persian, 1,907; Hindostanee, 1,173; English, 9,616; Anglo-Asiatic, 2,304; total, 28,671.

The Serampore Missionaries have 27 missionary stations, containing 47 missionaries, spread over an immense extent of country.

It is stated in the Serampore account, that since 1825, from 40,000 to 50,000 volumes or pamphlets (not copies of them) have been thrown into circulation by the native press! The English language is making rapid strides in every part of India.

IX. Intimately connected with the education and religion of a people is the state of crime in the country. The official returns on the subject are few, not to the latest, and consequently, most favourable

period, and relating principally to the Bengal Presidency—such as they are, however, they demonstrate the improved condition of the people and the beneficent nature of their government: for assuredly whatever elevates a nation in morality and temporal happiness, well deserves the appellation of beneficent. To begin with the highest class of offences for examination:—

Number of Persons Sentenced to Death, and to Transportation or Imprisonment for Life, by the Court of Nizamut Adawlut of Bengal, from 1816 to 1827.

First Period.	Death Sentences.	Transporta- tion or Imprison- ment for Life.	Second Period.	Death Sentences.	Transporta- tion or Imprison- ment for Life.
1816	115	292	1822	50	165
1817	114	268	1823	77	118
1818	54	261	1824	51	145
1819	94	345	1825	66	128
1820	55	324	1826	67	171
1821	58	278	1827	55	158
Total	490	1758	Total	366	880

Decrease of death sentences on first period, 124; ditto of life transportation or imprisonment, 878; total decrease on six years, 1,002.

The decrease which the foregoing table exhibits will delight every friend of humanity; on death sentences there was a decrease during the first period of 124, and comparing the two last with the two first years, after an interval of ten years, the difference will be more strikingly observed:—in 1816 and 1817, death sentences, 229; in 1826 and 1827 ditto, 122; decrease on two years, 107.

Number of Death-sentences in England and in India for Five Years,

			Sentences and Population.				
Y	ears.		England, 12,000,000	India. 60,000,000			
1823	•		968	77			
1824		.	1066	51			
1825		.	1036	66			
1826		.	1203	67			
1827	•	.	1529	55			
Total in both Countries			5802	316			

Thus, while those of India decreased 22 between the first and last year, those of England increased 561. Let it be remembered that sentences of death in India are not merely sentences, they are in general fulfilled, unless when extraordinary circumstances intervene; the decrease shows, therefore, an actual decrease in crime, not, as would be the case in England, only a decrease of the nominal severity of the law, which in fact is actually taking place from year to year, not only by means of legislative enactments, but also by the unwillingness of jurors to find judgments involving deaths.

Sir R. Rice, in his evidence before the Lords in 1830, says that among a population of 150,000 persons in Bombay, during three years, there was but one execution, and that was of an English serjeant.

The last table gave the returns of the Court of Nizamut Adawlut; the following are those of the Courts of Circuit, specifying the nature of the crimes:—

No. 1.—Sentences for Offences against the Person, passed by the Courts of Circuit in Bengal, at Two Periods.

Offences.	No. of Persons Sentenced.		
	1822 to 1824.	1825 to 1827.

Decrease of crime, . . 646

This is a very great decrease on two years, and in looking at the years preceding those given in the first table, the diminution is yet more gratifying to behold. For instance, adulteries were, from 1816 to 1818, in number 95; felony and misdemeanour, in the same years, 376; shewing a decrease on the former of 75 cases; and on the latter of 269. In the second table there is also a marked improvement in the country.

Burglary.—In 1816 to 1818, 2,853; 1825 to 1827, 1,036; decrease, 1817.

Embezzlement.—In 1816 to 1818, 150; 1825 to 1827, 49; decrease, 101.

Cattle Stealing.—In 1816 to 1818, 203; 1825 to 1827, 31; decrease, 172.

Larceny.—In 1815 to 1818, 1,516; 1825 to 1827, 223; decrease, 1,293.

But if the foregoing Circuit Court returns be most cheering and honourable to the British Government, those of the Magistrates' Courts for the Lower and Western provinces of Bengal are much more so, for the decrease of crime is yet more extraordinary, whether as regards offences arising from revenge, from destitution, from blood-thirstiness, or from immorality. The following shew the sentences of two years; if we had them of a more recent date, I am convinced we should observe a still greater diminution.

Comparative Statement of Offences against Property and against the Person, on which the Magistrates passed Sentence in the Lower and Western Provinces of Bengal, during the Years 1936 and 1937.

Total decrease of crime in one year. . 14,211

In arson, burglary, fraud, larceny, bloodshed, perjury, &c., we see a rapid decrease, amounting altogether in one year to upwards of 14,000!

In India, offences decreased one-half in one year; in England they increased in five years at the enormous rate of upwards of 1,000 per annum! The evidence of Mr. Mangles (Lords, 4th March, 1830), is confirmatory of this assumption:—"Q. Is the police efficient for the prevention of crimes? A. I believe it to be so.—Q. Is it improved? A. Greatly,

certainly.—Q. Are there still robberies to any considerable extent on the navigable rivers? A. Not at all to the extent they were formerly.—Q. Is there a river police? A. There is, I think, near Calcutta and near Dacca, and in other parts, but not very generally. The improvement in the police can be proved beyond all doubt, from the great dimunition in the number of crimes.—Q. Is that the case in the provinces where dacoity prevailed? A. Very greatly.—Q. Can you state in what proportion the number of crimes has diminished? A. I think in the lower provinces the average of dacoities of late years is about as one and a fraction to seven, as compared with the state of things 25 or 30 years ago." Mr. Mangles adds, "In the district of Kishnagur, formerly most notorious for dacoities, that crime has decreased,

certainly.—Q. Are there still robberies to any consi- from an average in former years of 250 or 300, to 18 derable extent on the navigable rivers? A. Not at or 20!"

When commencing these tables, I have shewn the number of persons sentenced to death and transportation, or imprisoned for life, by the Nizamut Adawlut. Exile or incarceration sentences for seven years have thus decreased before this court:—In 1825, 334; in 1826, 137; and in 1827, 65. A decrease, after one year's interval, of 269 sentences.

Another method exists for testing the efficacy of the police and of the laws, which is by looking at the returns of the higher classes of crime, whether murder or robbery with violence. I have, therefore, prepared this table to exhibit the result of the two periods of two years each.

State of Crime in the Lower and Western Provinces of Bengal, at Two Periods of Two Years each.

	Lower Provinces: No. of Sentences.		Decrease of	Western Provinces: No. of Sentences.		Decrease	Total Decreuse in
CRIMES.	1824 and 1826.	1827 and 1828.	Crime.	1824 and 1926.	1827	Lower and Western Provinces.	
Depredations with murder Ditto with torture or wounding Ditto with open violence, but without per-	165 283	96 194	09 80	460 901	271 512	189 389	258 478
sonal injury	330	221	109	63	34	49	158
Murder without depredation	358	196	102	311	255	56	218
Homicide not amounting to murder	303	248	55	311	185	126	181
Affrays with loss of life	86	47	39	180	118	62	101
Total	1525	1002	523	2246	1375	871	1394

Under a mild and equitable system, murders with and without depredation decreased 576 in two years! The number of persons charged with shooting at, stabbing, and poisoning with intent to kill, in England, have thus lamentably increased:—In 1826, 47; in 1827, 82; in 1828, 72; total, 201. In 1830, 80; in 1831, 104; in 1832, 132; total, 316.

Western Provinces.—The number of murders without depredation were, in 1818 and 1820, 496; in 1827 and 1828, 255; decrease, 241. Affrays with loss of life: in 1821 and 1823, 232; in 1827 and 1828, 118; decrease, 114. Homicides: in 1818 and 1820, 377; in 1827 and 1828, 185; decrease, 192. Depredations accompanied by torture and wounding: in 1818 and 1820, 1,000; in 1827 and 1828, 512; decrease, 488. In the Lower Provinces the same offences were, in

1818 and 1820, 319; in 1827 and 1828, 194; decrease, 125. Depredations with open violence: in 1818 and 1820, 545; in 1827 and 1828, 221; decrease, 324.

Mr. Robertson gives, in his pamphlet on the Civil Government of India, published in 1829, several tables to shew the decrease of crime:—Gang-roberies were, in 1807, 1,481; in 1824, 234; decrease, 1,247. Wilful murders: in 1807, 406; in 1824, 30; decrease, 376. Violent affrays: in 1807, 482; in 1824, 33; decrease, 449. Gang-robberies in the district of Kishnagur were, in 1808, 329; in 1824, 10; decrease, 319.

An analytical comparison of crime in England and in the Lower and Western Provinces of Bengal, is exhibited in the following parliamentary table:—

Crime in England and Wales, Lower Bengal, and the Western Provinces. Sentenced to Death, Transportation, and Imprisonment for Life, in Six Years, ending 1827 (the Population of England and Wales, 13,000,000; of Lower Bengal, 40,000,000; of the Western Provinces, 20,000,000).

SENTENCES.	Total Sentences and Executions from 1822 to 1827.			Yearly Averages.			Yearly Averages in proportion to the Population.			
	England	Lower	Western	England	Lower	Western	England	Lower	Western	
	and Wales.	Provinces.	Provinces.	and Wales.	Provinces.	Provinces.	and Wales.	Provinces.	Provinces.	
To death Transportation or imprisonment	6615	168	198	1135	28	33*	1 in 11445	l in 1428571	1 in 606060	
for life	822	465	415	120	77	69		1 in 516129	1 in 289159	
Executions	377	168	198	62	28	33		1 in 1428571	1 in 606060	

While the executions in England are, in proportion to the population, 1 in 200,000, those in the Lower Provinces of Bengal are not more than 1 in 1,500,000; and while all sentenced to death in India experienced the punishment awarded them, in England not the one-eighteenth of those sentenced to die suffered.

Yet has crime augmented in the latter, and diminished in the former country.

Comparison of crime in the Company's Bengal territories (the only place whence we have returns) with offences in England, in Ireland, and in France, with reference to the yearly averages, and the proportion to the population:—

Averages of Sentences, and Comparison with the Amount of Population, in England and Wales, in France, and in Bengal.

The following extract from the Supreme Court's Reports of Calcutta, for February, 1833, adds a further gratifying instance of the decrease of crime in India:—

	1830.	1831.	1832.
Number of offences .	. 2,330	1,304	1,329
Persons apprehended .	. 3,556	1,956	2,023
convicted .	. 625	675	718
Property stolen Rs	. 1,36,383	1,23,714	62,981
recovered .	4,854	33,828	6,793

X. The Government of the British possessions on the continent of Asia is vested at home in two powers with co-ordinate authority—viz. the E. I. Company, and a Ministerial Board, termed His Majesty's Commissioners for the affairs of India, the latter being devised by Mr. Pitt as a check upon the political proceedings of the former.

The Court of Directors.-The more immediate governing power of British India, and consequently the patronage attached thereto, is vested in the Court of Directors, or executive body of the E. I. Company. The capital stock of this Company is 6.000,000l. sterling, which is divided, according to a recent calculation, among 3,579 proprietors, of whom 53 have four votes; 54, three; 347, two; 1,454, one; and 221 hold only 500% stock, and are not qualified to vote, but merely to debate on any question; 396 proprietors hold stock under 500l. and are not qualified to vote or speak, and 220 have not held their stock a sufficient time to enable them to vote. A proprietor of not less than 1,000l. has one vote; of 3,000l., two; of 6,000l., three; and of 10,000l. and upwards, no more than four votes. The stock must be bona fide in the proprietor's possession for 12 months, to enable him or her to vote; a regulation adopted to prevent collusive transfers of stock for particular occasions. The total number of roters is estimated at 2,000, and of the votes about 1,500 are comprised within four miles of the General Post Office. Women as well as men, foreigners as well as Englishmen, if holding stock sufficient, are empowered to vote and debate. A late classification of the votes gave of gentry, bankers, merchants, traders, ship-owners, shopkeepers, &c. 1,836; of women (married, widows, and spinsters), 43; of officers in the King's and E. I. Company's Army, 222; of the clergy, 86; of officers in the Royal Navy, 28; of medical men, 19; of the nobility, 20. The following is said to be the state of the votes of the Court of Proprietors in 1832 :- Peers, 20; Members of Parliament, 10; Directors, 50; clergymen, 86; medical men, 19; military officers, 222; naval ditto, 28; minor, 1; other gentlemen, 1,775; male votes, 2,211; female ditto, 372; total, 2,583. The Proprietors meet as a Court regularly every quarter, and specially when convened

to discuss particular business. The number of quarterly and special Courts held from 1814 to 1830-31, was 212. The powers vested in this Court are—the election of qualified proprietors as their delegates, or representatives, to form a Court of Directors; to frame bye-laws for the regulation of the Company, provided they do not interfere with Acts of Parliament; to controul salaries or pensions exceeding 2001. a year, or gratuities above 6001. It may confer pecuniary rewards on any eastern statesman or warrior, above the latter named sum, subject, however, to the confirmation of the Board of Controul; it can demand copies of public documents to be laid before it for discussion and consideration, but it is prevented in-terfering with any order of the Court of Directors, after the same shall have received the approval of the Board of Controul. The Court of Proprietors did interfere, and with effect, in the case of the maritime compensations, on the ground that their concurrence had not been obtained previously to the application of the Board. The Chairman of the Court of Directors is ex-officio Chairman of the Court of Proprietors. Debates are regulated as in the House of Commons, and all questions and elections are decided by the ballot.

The Court of Directors or Representatives of the foregoing body of Proprietors, consist of 24 persons, qualified according to an Act of Parliament, which provides that each must be a natural born or naturalized subject of Great Britain: possessed of 2,0001. stock, (no matter for what previous period) he must not be a Director of the Bank of England, or the South Sea Company; and, by a bye-law of the Company, he shall be liable to be removed if he should promote his own, or the elevation of any other Director, by promises of reward, collusive transfer of stock, or payment of travelling expenses, receive any pecuniary or other remuneration whatever, for any appointment in his gift or patronage as a Director. Six Directors retire annually by rotation, and are reeligible after 12 months absence, the Proprietors have a review of every Director in the course of four years, and can of course remove if they think fit such as they may deem not fit for the duty which they ought to fulfil. (Nineteen contested elections for Directors took place from 1814 to 1831.) The Court of Directors elect from their own body a Chairman and Deputy Chairman annually, meet once a week, not less than 13 form a Court, and all questions are decided by ballot. The Court in general consists of men of various habits, views, and interests; by a recent analysis there were ten retired civil and law officers of the company; four military ditto of ditto; four maritime ditto of ditto; three private Indian merchants; and nine London merchants and bankers; first election: 11 from 10 to 20 ditto; two from 20 to 30, and two from 30 upwards. The Court of Directors enjoy full initiatory authority over all matters at home and abroad relating to the political, financial, judicial, and military affairs of the company. But its proceedings are subject to certain Acts of Parliament: to the superintendence of the Board of Control, and in several matters to the approval of the Court of Proprietors.

For the despatch of business the Directors are divided into three Committees; Finance and Home, eight Directors; Political and Military, seven; Revenue, Judicial, and Legislative, seven; the duty of each is partly defined by the title, but there is a committee of secrecy, forming the cabinet council of the Company, and consisting of the Chairman, deputy ditto, and senior Director; its functions are defined by Parliament. In reference to the business done by the Court of Directors as compared with the Board of Control, the Select Committee of the House of Commons thus reports in 1832:

As to the proportions of general administration resting on the Board of Control, and the East India Company, its Courts and its Officers respectively, it has been asserted, that, of all the reflections, suggestions and instructions bearing upon the policy of the Indian Governments, contained in the public despatches, nine-tenths, if not a larger proportion originate with the India House, though whatever regards the more important transactions with other States, and whatever is done in England, may be said to be mainly done by the Board of Commissioners. Considering the multifarious nature of the Company's relations and transactions, it is to be expected that the correspondence should be voluminous and complicated, comprehending, as it does, not only all that is originated in England, and transmitted to India, but the record of the proceedings and correspondence of all the Boards at the several Presidencies, with duplicates of the documents relating thereto in India, necessary to put the authorities at home in complete possession of all their acts. The correspondence comes home in despatches, and the explanatory mat-ter in books or volumes. The total number of folio volumes received from 1793 to 1813, 21 years, was 9,094; and from 1814 to 1829, a period of 16 years, 12,414.

From the establishment of the Board in 1784 to 1814, the number of letters received from the Court by the Board of Commissioners was, 1,791: the No. sent from them to the Court was, 1,195. From 1814 to 1831, 1,967 letters have been written to, and 2,642 received from, the board. The number of drafts sent up to the board from 1793 to 1813, were 3,958; from 1814 to 1833, 7,962, making an increase 4,004; in addition, there have been references, connected with servants, civil and military, and others, in this country, amounting between the years 1814 and 1830, to 50,146. Reports made to the Court by its Committees, apart from details and researches made in framing such Reports, 32,902. From 1813 to the present time, nearly 800 Parliamentary Orders have been served on the Court, requiring returns of vast extent.

By the new East India charter the Company have agreed to place their Commercial rights in abeyance while they hold the political government and patronage of India, which is extended by charter to the 30th April, 1854, and in consideration of assigning over all their commercial assets (upwards of 21,000,0001

of these 15 were under 10 years standing from the sterling) for the benefit of the Indian territory, the present dividend of ten and a half per cent. (630,000l.) on the Company's capital stock, is secured on the Indian revenue for 40 years, at the expiration of which period the capital of 6,000,000l. will be paid off at the rate of 1001, for every 51. 5s. of annuity. As a guarantee fund for the proprietors in case of the surplus Indian revenues being unable in any one year to pay the dividends, and in order to provide for the ulti-mate liquidation of the principal, the sum of 2,000,000l. is to be set apart out of the commercial assets, to be invested in the three and a half per cents, there to accumulate as a security fund until it reaches the sum of 12,000,000l.

The business relating to the Indian Government is transacted in England, between the Board of Control and the Court of Directors, as follows: - (Evidence before Parliament in 1832.)

All communications, of whatever nature, and whether received from abroad or from parties in this country, come, in the first instance, to the Secretary's Office at the East India House, and are laid by the Chairman before the first Court that meets after their receipt. Despatches of importance are generally read to the Court at length. The despatches, when read or laid before the Court, are considered under reference to the respective Committees, and the Officers whose duty it is to prepare answers, take the directions of the Chairs upon points connected with them; the draft is prepared upon an examination of all the documents to which the substance has reference, and submitted to the Chairs; it is then brought before the Committee, to whose province the subject more particularly relates, to be approved or altered by them, and, on being passed, is laid before the Court of Directors. After it has passed the Court of Directors, the draft goes to the Board of Control, who are empowered to make any alterations, but required to return it within a limited time, and with reasons assigned for the alterations they have made. Previously, however, to the draft being laid before either Committee by the Chairs, experience has suggested the convenience of submitting it to the President of the Board, in the shape of what is called a previous communication. This is done in communication between the President and the Chairs, in which stage alterations, containing the original views of the President, are made. The draft being returned to the Chairman, is laid by him, either with or without the alterations, as he may see fit, before the Committee.
The draft, when approved of by the Committee, is submitted to the Court, and there altered or approved, as the Court may see fit. It is then officially sent to the Board, who make such alterations as they judge expedient, and return it to the Court, with their reasons at large for the same. Against these alterations the Court may make a representation to the Board, who have not unfrequently modified the alterations on such representation; but if the Board decline to do so, they state the same to the Court and desire the draft may be framed into a despatch, and sent out to India, agreeably to the terms of the Act of Parliament. In the event of a refusal, three Judges of the Court of Queen's Bench finally decided as to the legality of the Board's order.

By the Act of 1784 and of 1833, the Directors are charged with appointing a Secret Committee, whose province is to forward to India all despatches which, in the opinion of the Board of Control, should be secret, and the subject-matter of which can only be divulged by permission of the Board. The Committee

consists of three Members of the Court of Directors, chosen by the Court generally, viz. the Chairman, Deputy Chair, and most frequently Senior Member, who take the oath of secresy, as prescribed by the Act. Their officers are also sworn to secresy; and no one is employed in transcribing secret despatches without the permission of the Board. The Board are empowered by law to issue, through the Secret Committee, orders and instructions on all matters relating to war, peace, or negociations of treaties with the States of India, and the Secret Committee are bound to transmit such order to India without delay. Secret Committee have no legal power to remonstrate against such orders, provided they have relation to the subjects above stated. The Committee have had communication, upon matters stated in secret despatches, with the Board, and at their suggestions alterations have been made; but they have not the same power with regard to despatches sent down in the Secret Department that they have with regard to other despatches; they are not empowered to make representations thereon to the Board, whose orders are in fact conclusive on the Committee. The signatures of the Committee are necessary to ensure obedience to the orders conveyed by them to the Company's servants, with whom the Board of Commissioners have no direct correspondence.

It has been stated that there is another class of subjects not provided for in the Act which establishes the Secret Committee, but which have been necessarily treated through the Committee, and upon which its orders have been more punctually obeyed than in other cases, namely, negociations with European States having settlements in India, and generally all matters connected with war in Europe, which can in any way affect our Indian interests. (Provided for by the Act of 1833, section xxxvi.)

When either war against a Native State, or the carrying forward an expedition against any of the Eastern Islands, has been in contemplation, and the finances of India at these periods exceedingly pressed, or requiring aid from this country, the Secret Committee, in communication with the Board of Commissioners, have taken upon themselves to provide the requisite funds, without intimating the same to the Court at the time. Thus despatches relating to subjects purely financial and commercial, such as the transmission of bullion, and the nature and amount of the Company's investments, have gone through the Secret Committee.

The Board of Control .- The E. I. Company's Home Government, thus briefly described, has been controlled by a ministerial authority since 1784, which is termed the 'Board of Commissioners for the Affairs of India,' or more generally the Board of Control; it consists of such members of the Privy Council as his Majesty may be pleased to appoint, of whom the two principal Secretaries of State and the Chancellor of the Exchequer shall always ex officio form three. The President is also nominated by the Crown, is usually a cabinet minister, and in all changes of Administration retires from office together with the salaried Commissioners and Secretary. The oath which the Commissioners take imposes on them the responsible duty of governing India to the best of their ability and judgment, as much and as completely as if there were no Executive Court or Administrative power. The controlling functions of the Board are exercised in revising all despatches prepared by the Court of Directors, and addressed to the Governments in India; the originating, in requiring the Court to prepare

despatches on any named subject, and in altering or revising such despatch as it may deem fit. The Board is divided into six departments, viz. Accounts, Revenue, Judicial, Military, Sccret and Political, and Foreign and Public; the duties of which are thus defined. (Evidence before Parliament in 1832.)

1. The Accountant's Department. — To examine the accounts of the finances at home and abroad: control the correspondence between the Court of Directors and the Indian Governments, in the departments of Finance, and Mints, and Coinage: also, occasional correspondence in most of the other departments of the Company's affairs requiring calculation, or bearing a financial character.

2. The Revenue Department.— Principally revision of despatches proposed to be sent to the several Governments of India, reviewing the detailed proceedings of those Governments, and of all the subordinate revenue authorities, in connexion with the adjustment of the land assessments, the realization of the revenue so assessed, and the general operation of the revenue regulations on the condition of the people, and the improvement of the country. Besides the land revenue, the detailed proceedings of the local authorities in the salt, opium, and custom departments, come under periodical revision.

3. The Judicial Department. — Examination of all correspondence beteen the Court of Directors and the local Governments, on subjects connected with the administration of civil and criminal justice and police in the interior of India, such as, the constitution of the various courts, the state of business in them, the conduct and proceedings of the judges, and all proposals and suggestions which from time to time come under discussion, with the view of applying remedies to acknowledged defects.

The King's Courts at the three Presidencies, are not subject to the authority of the Court of Directors, or of the Board of Control; but, any correspondence which takes place in relation to the appointment or retirement of the judges of those courts, or to their proceedings (including papers sent home for submission to the King in Council, recommendations of pardon, &c.), passes through this department.

- 4. The Military Department. Attention to any alterations which may be made in the allowances, organization, or numbers of the Indian army at the three Presidencies; to the rules and regulations affecting the different branches of the service; to the general staff, comprehending the adjutant and quartermaster general's department; the commissariat (both army and ordnance); the pay, building, surveying, and clothing departments; and, in fact, to every branch of Indian administration connected with the Company's army. It also embraces so much of the proceedings, with respect to the King's troops, as relate to the charge of their maintenance in India, recruiting them from this country, and the periodical reliefs of regiments.
- 5. The Secret, Political, and Foreign Department.— Examines all communications from or to the local Governments, respecting their relations with the native chiefs or States of India, or with foreign Europeans, or Americans. It is divided into the following branches:—
- i. The Secret department containing the correspondence between the Indian Governments and the Secret Committee of the Court of Directors. Under the provisions of the Act of Parliament, such confidential communications as in the opinion of the local

governments require secresy, are addressed by them to the Secret Committee. Any directions, also, to the local governments, relating to war or negotiation, which, in the judgment of the Board of Control, require secresy, are signed by the Secret Committee; and the local governments are bound to obey those directions in the same manner as if they were signed by the whole body of Directors.

ii. The Political department, comprising all correspondence not addressed to the Secret Committee, or sent through that Committee to the local Governments, respecting the native chiefs or states, with whom those governments are in alliance or communication, or whose affairs are under their political superintendence, or who are in the receipt of pecuniary stipends in lieu of territory.

iii. The Foreign department, including all correspondence relating to communications between the local governments and the several foreign Europeans who have settlements in India or the Eastern Islands; and embracing, in fact, all the proceedings of the local governments in relation to foreign Europeans or Americans, resorting to India.

The proceeding of the local governments, with respect to their residents and political agents, and to any other officers and their respective establishments, through whom communications with native states and chiefs, or with foreigners, may be maintained, are also reported in the several departments in which those officers are respectively employed.

6. The Public Department.—The business of this department comprises the examination of all despatches to and from India upon Commercial or Ecclesiastical subjects, and of those which, being of a miscellaneous character, are distinguished by the general appellation of "Public." The commercial and ecclesiastical despatches, which are considered as forming two branches of correspondence distinct from the "Public," are united with the latter in the same department, only on account of the convenience of that arrangement, with reference to the distribution of business in the establishment of the Board of Control.

The Public correspondence comprises all those despatches which do not belong specifically to any of the branches of correspondence hitherto enumerated. They relate to the education of the natives and of the civil servants; to the appointment of writers and of the civil service generally, and to their allowances; to the several compassionate funds; to the grant of licenses to reside in India; to the press; to public buildings; to the Indian navy and the marine department; to the affairs of Prince of Wales' Island, Singapore, Malacca, and St. Helena; and to various miscellaneous subjects. Some of these being closely connected with the business of other departments, are reported upon in them, although the whole pass through and are recorded in the public department.

The Ecclesiastical despatches contain every thing relating to the appointment of chaplains, archdeacons, and bishops; to their allowances; to their conduct; to the building and repair of churches, or other places used for public worship; and to all questions respecting the affairs of the churches of England and Scotland in India, or that of Rome, so far as public provision is made for its maintenance.

Any papers treating of ecclesiastical or miscellaneous topics, though they are not despatches to or from India, are likewise recorded and reported upon in this department. The cost of the Board of Control is about 30,000l. a year. The salary of the President of the Board is 3,500l. per annum; of each of the paid Commissioners, 1,200l.; and of the Secretary 1,500l., to be raised to 1,800l. after three years' service. The Charter of 1833, authorizes two Secretaries for the Board.

The Domestic Government of India—is divided into three Presidencies, viz. Bengal, Madras, Bombay, and a Lieutenancy at Agra, or rather at Allahabad; the Chief at each Presidency is assisted and partly controlled by a Council of two of the Company's senior civil servants, and the Commander-in-Chief of the army. The government of Bengal is termed the Supreme Government, and the head thereof is styled the Governor-General of India; he is necessarily possessed of much local independence, exercising some of the most important rights of sovereignty, such as declaring war, making peace, framing treaties, to a certain extent forgiving criminals and enacting laws.

The Governor-General's Council consists of five Councillors, three to be servants of the Company of ten years standing, and to be appointed by the Directors; the fourth to be appointed by the Directors also, subject to the approbation of the King, but not from among the East India Company's servants, and with power to sit and vote in Council only at meetings for making laws and regulations. The Commander-in-Chief forms the fifth member, with precedence after the Governor-General.

On all questions of state policy, excepting in a judicial capacity, the Governor-General is independent of his Council; if the Council are dissentient, the Members record in their minutes the cause, which being submitted to the Governor-General, and he still remaining of his original opinion, the discussion is adjourned for 48 hours, when the Governor-General may proceed to execution, first assigning his reasons for dissenting from the Council. The whole of the documents relative to the difference are then instantly transmitted to the Court of Directors and Board of Control; and the Court have the power, should they deem fit, of appointing new Members of Council to succeed the dissentient ones, or of recalling the Governor-General.

The Governor General, in virtue of his commission as Captain-General, may head the military operations in any part of India. He has also the power of suspending the Governors of the other Presidencies, or of proceeding thither and taking the supreme authority in their Councils, in the execution of any of which acts he is subject to the vigilant supervision of the home authorities. The Governors of Madras and Bombay are in a similar manner independent of local control, but for the sake of obtaining unity in foreign transactions, on matters of general and internal policy, or in expending money, they are subject to the authority of the Governor-General, who, on proceeding to either of the Presidencies, may assemble his Council there and sit as President.

Regulations for the good government of the British possessions in India, are passed by the Governor-Genia in Council; they immediately become effective, but are transmitted home and subject to the revision of the Court of Directors and Board of Control; heretofore ordinances for the good government of the Presidency capitals were not valid until publicly exposed for 14 days, then registered by the Supreme (King's) Court; put in force, but subject to a further ordeal at home: by the new Charter, these checks on the Governor-General are removed, and that authority in council can now make laws for the regulation of even

her Majesty's supreme courts. Such is the legislative | department of the Government, the executive is generally exercised by means of Boards, of which in Bengal there are five, (1. Revenue; 2. Customs, salt and opium; 3. Trade; 4. Military; 5. Medical;) at Madras three, (1. Revenue; 2. Military; 3. Medical;) and at Bombay one. Any of these Boards make suggestions or present drafts of regulations in their respective departments to Government; the Boards also receive from their subordinates suggestions, either for their own information or for transmission to the Governor-General in Council; by this means the local knowledge of the inferior officers is brought under the knowledge of the chief executive, and their talents and industry appreciated: indeed, a leading feature in the duties of the Indian Governments is that of noting down every transaction, whether as individual chiefs of departments or as Boards: thus habits of business are generated, combined with a moral check of supervision, no matter what distance a servant may be from the Presidency, or what period of time may elapse, should an enquiry be necessary. All minutes of the Boards' proceedings are laid before the Government monthly, and then transmitted home. The objection alleged to this is that it creates delay; but, as correctly observed by the Court of Directors, in their Letter to the Board of Control, 27th August 1829, the Government of India may in one word be described as a Government of Checks. The Court thus judiciously remark:- ' Now whatever may be the advantage of checks, it must always be purchased at the expense of delay, and the amount of delay will generally be in proportion to the number and efficiency of checks. The correspondence between the Court of Directors and the Governments of India. is conducted with a comprehensiveness and in a detail quite unexampled; every, the minutest proceedings of the local governments, including the whole correspondence respecting it which passes between them and their subordinate functionaries, is placed on record, and complete copies of the Indian records are sent annually to England for the use of the home authorities. The despatches from India are indexes to those records, or what a table of contents is to a book, not merely communicating on matters of high interest, or soliciting instructions on important measures in contemplation, but containing summary narratives of all the proceedings of the respective governments, with particular references to the correspondence and consultations thereon, whether in the political, revenue, judicial, military, financial, ecclesiastical or miscellaneous departments. In the ordinary course of Indian administration much must always be left to the discretion of local governments; and unless upon questions of general policy and personal cases, it rarely occurs that instructions from hence can reach India before the time for acting upon them is gone by. This is a necessary consequence of the great distance between the two countries, the rapid succession of events in India, which are seldom long foreseen, even by those who are on the spot, and the importance of the ruling authorities there, acting with promptitude and decision, and adopting their measures, on their own responsibility, to the varying exigencies of the hour. These circumstances unavoidably regulate, but do not exclude the controlling authority of the Court of Directors. Without defeating the intentions of Parliament, they point out the best and indeed the only mode in which these intentions can be practically fulfilled. Although, with the exceptions above adverted to, a specific line of conduct cannot often be

prescribed to the Indian governments, yet it seems to indicate any other rather than a state of irresponsibility, that the proceedings of those governments are reported with fidelity, examined with care, and commented upon with freedom by the home authorities; nor can the judgements passed by the Court be deemed useless whilst, though they have immediate reference to past transactions, they serve ultimately as rules for the future guidance of their servants The knowledge, on the part of the local governments, that their proceedings will always undergo this revision, operates as a salutary check upon its conduct in India, and the practice of replying to letters from thence, paragraph by paragraph, is a security against habitual remissness or accidental oversight on the part of the Court, or their servants at home. From a perusal of the Indian records, the Court also obtain an insight into the conduct and qualifications of their servants, which enables them to judge of their respective merits, and to make a proper selection of members of Council.'

The duties of the British functionary in India may be gathered from the following detail of the chief stations and offices of the civil servants in Bengal. 'The duties [Evidence before Parliament in 1832.] of Territorial Secretary, in one branch, correspond in a great measure with those of the Chancellor of the Exchequer in this country; he manages the whole financial business of the Government, in concert with the Accountant-general; but the Secretary is the chief officer of the Government in that department; moreover, he has the management of the territorial revenue, and the revenue derived from salt and opium, and he conducts the correspondence of government with the three Boards of Revenue in the upper, lower, and central provinces respectively.

'In relation to the board of revenue, he is merely the ministerial officer of the Government; he is not a responsible officer, and has no direct power over the Board of Revenue.

'If any increase of charge were proposed by any of the Boards of Revenue, or by any person acting under them, that proposal for increase is submitted to the Territorial Secretary before it is acquiesced in and sanctioned by Government—he is the person always addressed. The Boards of Revenue have the power of writing directly to the Governor-General in Council; but that is a mere matter of form, for such letter goes equally through the office of the Territorial Secretary, and is submitted by him to the Governor-General in Council.

'The Territorial Secretary offers his opinion upon the admissibility of any new charge proposed. He has no right or power to do so, but he is generally called upon to do so. The Secretaries are in the habit of giving in papers called memoranda. As the Governor-General or Members of Council lay minutes before the Council Board, so the Secretaries, whenever they have any suggestion to make, submit what are called memoranda.

'One of the Members of the Council is nominally President of the Board of Revenue, he performs no duties.

'The duties of the territorial and judicial departments as regard the judicial department are quite distinct departments. There are two Secretaries; the Judicial Secretary is quite independent of the Territorial; he conducts the correspondence of the Government with the Sudder Dewanny and Nizamut Adawlut; they are the chief criminal and civil courts.

'The police is under his direction, at least all the

correspondence of Government on the subject of the police is conducted by him. Like the Territorial Secretary, he is not a substantive officer, only a ministerial functionary of the government. He writes always in the name of the government; his letters always begin with words to this effect, 'I am directed by the Governor-General in Council to inform you? and this holds good with regard to all other Secretaries.

'The business of a Collector in the lower provinces is the receipt of revenue; the conduct of public sales, in the event of any defalcation on the part of any landed proprietor who is responsible for any portion of the revenue.

'There being a permanent settlement of the land revenue in those provinces, he has not much to do directly with the collection of the revenue; but he has a great number of other duties, as the management of wards' estates (minors' estates); for the Board of Revenue is also a Court of Wards.

'He exercises judicial functions in what are called summary suits, arising from disputes between landlord and tenant, between zemindar and ryot. That is, in disputes connected with the administration of the revenue.

With reference to the extent in which he decides suits. The suits are summary suits; they are not conducted with the formality of regular suits; they are instituted originally in the courts of law, and are referred by the Judge to the Collector for decision; they are of a particular description; they are not conducted with the formality of regular law suits; there is a particular process laid down by the regulations for them.

'It is indirectly in the nature of a reference; it is a claim of the zemindar on the ryot for rent which the ryot disputes or denies; and it is referred to the Collector, as a summary suit, under particular regulations.

All the instances in which he exercises judicial power are referred to him by the court, as far as regards the summary suits referred to; but there are also investigations which partake largely of judicial inquiries, which he conducts independently of the courts, as, for instance, where landholders in coparcery have petitioned to have their estates divided, and to become separately responsible to Government. Such divisions are called Butwarahs.

'The revenue collected remains in the custody of a native Treasurer, who gives heavy security, and who is to a great degree independent of the Collector. Security is given to the Government through the Collector; but the Board of Revenue see that it is sufficient, and the Collector is also responsible.'

Judicial.-We may now proceed to examine briefly the mode in which the administration of justice is carried on. The civil law is administered according to the religious code of the party, whether Hindoo or Mahomedan. A commission is now being issued to examine into the variety of the civil laws existing in the various provinces, and to endeavour to codify them into a general system. The criminal law in India is the Mahomedan code, in which mutilations of the limbs and flagellations to death are not unfrequently ordained; these are commuted by us for imprisonment, &c., and it will be seen in the section on gaols how crime has been diminished in India. There are in the Company's Courts three grades of European Judges, the District, the Provincial, and the Judges of the Sudder Court (there are also Magistrates, who exercise civil jurisdiction under special

appointments, and the Registrars try and decide causes referred to them by the Judge of the district.) The native Judges are divided into two classes. 1st, Moonsiffs, of whom there are several stationed in the interior of every district; and 2ndly, Sudder Aumeems, established at the same station with the European Judge. Native Judges of any sect can try causes as far as 1,000 rupees, and the amount may be increased at the recommendation of the European Judge to 5,000 rupees; this permission has been granted in very many cases, and the decisions have been extremely satisfactory. An appeal lies from the District Native Judges to the District European Judge, from the latter to the High Court of Sudder Adawlut at Calcutta, Madras, or Bombay, and from thence to the King in Council in England.

In the Bengal Presidency, for instance, there is first a high court of Appeal, termed the "Sudder Dewanny and Nizamut Adawlut," or chief civil and criminal court. The functions of this court are cognizance of civil, criminal, and police matters; the remission or mitigation of punishment when the sentence of the law officers is unduly severe, co-revision previous to the execution of any sentence of death, transportation, or perpetual imprisonment, arbitration where the provincial judges differ from their law officers; revisions of the proceedings of any of the courts, with power to suspend provincial judges; it may direct suits for property exceeding 5,000% in value, to be originally tried before it; it may admit second or special appeals from the inferior courts, and its construction of the government regulations is final. The Chief Justice has 6,000l. a year, and the three Puisne Judges 5,0001. each.

The second degree of Courts are the Provincial Courts of Appeal (of which there are six for Bengal), with a Chief and Puisne Judge to each. They have no criminal jurisdiction; try suits exceeding 5,000 rupees in value, if the plaintiff desire their decision (he may prefer it before the Zillah Judge, if the value do not exceed 10,000 rupees), appeals lie from the Zillah Courts, and are final unless in cases of special appeal.

For the Bengal Presidency there are 20 Commissioners of Circuit, who combine revenue with judicial functions. They hold sessions of gaol delivery at least twice in each year at the different Zillah and City stations. The direction and controul of the Magistrates, Revenue Officers and Police are vested in them. The salary of each Commissioner is 4000l. a year.

The Zillah Courts of Bengal amount to 49; some have a judge, magistrate, and registrar; in others less extensive, the duties of judge and magistrate are conjoined, or the duties of magistrate and registrar. The population and extent of a Zillah is various; in Bengal, the average population is about 2,000,000. The total salaries of the European covenanted servants of a Zillah Court range from 30,000 to 44,000 S.R. a year.

These courts have cognizance of affrays, thefts, burglaries, &c., when not of an aggravated character, and power to the extent of two years' imprisonment; commit persons charged with heinous offences for trial before the Commissioners of Circuit; try original suits to the value of 20,000 rupees; decide appeals from registrars (i. e. causes not exceeding 500 rupees in value), Sudder Aumeems (native judges) and Moonsiffs; and by a regulation of 1832 (for the expedition of criminal justice), three Zillah judges may be invested with power by the Governor-General to hold sessions and goal delivery.

These Courts have authority over the Police, and the judges are enjoined to visit the goals at least once a week.

Another and extensive set of Zillah and City Courts have been established last year with native judges of every class, caste, or persuasion, found qualified for the duties enjoined them, to whom liberal salaries have been granted; and by a more recent regulation, native assessors sit on the bench with the European judges.

A plan of judicature similar to the foregoing is in force at Madras and Bombay, and in the N. W. provinces, modified by local usages; in some parts there are Punchayets (native juries) of arbitration and of civil and criminal procedure; in others, native assessors, in civil and criminal matters.

In the administration of civil justice the objects of the Company's Government have been to render it pure in source, speedy in execution, and cheap in practice; in the administration of criminal justice the aim has been first to prevent crime, and secondly to promote the reformation of the offender. The judges are well paid, in order to secure the purity of justice; the courts are numerous, in order that it may be speedily rendered, and the authorized fees are light (particularly in trifling cases) for the cheap attainment of right. In criminal matters, offences are quickly punished,-the death sentences (which are inflicted but for very few crimes) are almost sure to be carried into effect, and it is in evidence before Parliament (in 1832) that prisoners are brought to trial without delay, that the punishments awarded are mild and well proportioned to the offence; that abundant care is taken against unjust convictions, and that extraordinary care is paid to the health and comfort of the prisoners in the goals; the effect of the system is seen in the extraordinary diminution of crime. Measures have been taken for the promulgation of a knowledge of the old as well as new laws.

Laws and Regulations.—In pursuance of the direction, and by virtue of the powers given by the 47th section of the Act of the 3rd and 4th William IV. chap. 85, the Court of Directors of the East India Company, with the approbation of the Commissioners for the Affairs of India, ordain as follow:—

- Copies of all laws and regulations shall be communicated to the several Functionaries appointed to carry them into effect, and shall be preserved in all Courts of Justice, and there be open to the inspection of all persons.
- 2. All laws and regulations shall be translated into the several native languages most commonly spoken, and printed and sold at a low price.
- 3. The Governments of the several presidencies will make such a distribution of copies of the laws and regulations so to be sold as may bring them most conveniently within the reach of all persons, and will notify in a public manner where such copies may be procured.
- 4. The Governments will likewise, on the passing of any law and regulation, publish the title of it, and an abstract of its contents in the Gazettes and such other newspapers as are most generally circulated.

Authentification of Laws and Regulations.—1. The original copy of all laws and regulations shall be signed by the Members of the Legislative Council by whom they shall be passed, and such copy shall be preserved in the archives of the Government of India.

2. Such copies only of the several laws and regulations hereafter passed as shall be printed at the Government Press shall be admitted as evidence in

Courts of Justice. Such copies so printed shall bear in the title page fac-similes of the signatures of the Members of Council by whom the several laws and regulations may have been respectively passed."

There is a Supreme or King's Court at each Presidency, with a Chief and two Puisne Judges at Calcutta, and a Chief and one Puisne Judge at each of the other Presidencies. A Master in Equity, Registrar, an established number of Attornies and Barristers, at the discretion of the Judges. and at Calcutta there is a Hindoo and a Mahomedan law officer attached to the court. The jurisdiction of this Court extends over the local boundaries of the Presidency, with certain exceptions not well defined, and the Courts claim jurisdiction in certain cases beyond the Presidency; such claims have, however, been viewed with alarm, and the extension of the jurisdiction of the King's Court at the present period deprecated. The salaries of the Supreme Court Judges at the three Presidencies are, Bengal, Chief, 8,000l.; Puisne, 6,000i. Madras, Chief, 60,000 rupees; Puisne, 50,000 rupees. Bombay, ditto ditto. Since 1807, there have been six Chief Justices at Bengal, and since 1805 seven Puisne. At Madras since 1815, four Chief, and since 1809, ten Puisne; at Bombay, since 1823, three Chief and five Puisne Judges. The fixed charges were, in 1829, as follow: Bengal, S. R. 383,120; Madras, 378,056; Bombay, 293,874; total, S. R. 955,050, being an excess over 1823 of S. R. 205,826. The salaries and contingent expenses of the Supreme Court at Calcutta annually are 879,000 rupees, and the emoluments of Barristers and Attornies about 771,000 rupees. The same items at Madras and Bombay are-for the first, 650,000 rupees; and for the second, 950,000 rupees; total of Supreme Courts, 3,250,000 rupees. Trial by jury in criminal matters. not in civil; natives are eligible as petty and grand jurors; proceedings are in English, with the aid of interpreters, and in general the civil laws of England are applied. There are at Calcutta and Bombay Courts of Requests, for the recovery of small debts. the Recorders of which are Europeans.

The Police in Bengal, for instance, are divided into stations with a native officer, native registrar, petty officer, and from 20 to 30 policemen well armed. In each district there are from 15 to 20 stations, making altogether in lower Bengal about 500, and in the upper or western Provinces 400. Every village has also its own watchman, armed and paid by the village, and as there are 163,673 villages in lower Bengal, there is a further force of 160,000 men added to the Government establishment. In some Provinces of central India, each village has also a petty officer, whose duty it is to track thieves, and when he traces them to a village, to hand over the search to the trackers of that village.

The head officer at each station receives criminal charges, holds inquests, forwards accused persons that their prosccutors and witnesses to the Zillah Magistrate, uses every exertion for the apprehension of criminals and the preservation of the peace in his district, and regularly reports all proceedings to the European Magistrate from whom he receives orders. The village police, together with the village corporation officers (such as the barber, schoolmaster, accountant, waterman, measurer, &c.), land agents, Zemindars, &c. are all required to give immediate information of crime committed within their limits, and to aid in the apprehension of offenders. There is a mounted police officered by natives, and a river police conducted also by natives.

The police officers are furnished with precise and Number of Civil Servants appointed to the Bengal brief manuals of instructions, and the abuses which prevailed are being rapidly removed; what was good in the native laws has been retained, and what was evil obliterated, and an excellent system still open to improvement has been the result. The general system of police in India, and its gradations of ranks is thus detailed in the recent evidence before Parliament. The lowest police officer is the village watcher. There are several in the village who perform the lower offices. They are under the control of the head of the village; the head of the village is under the control of the Tehsildar, who is a native collector of revenue; the Tehsildar is under the Magistrate, who is the collector. The village watchers are remunerated by a small quantity of grain from the produce of the village, and from certain fees from the inhabitants; and the head of the village has also similar allowances, to a greater extent. The Tehsildar is a stipendiary officer of the Government, employed in the collection of the revenue. There are police officers appointed to towns, called Aumeems of police, who have a jurisdiction also beyond those towns; and there are officers called Cutwals, a kind of high constables, resident chiefly in market towns. There are, in some districts, paid police; and there were formerly various classes of native peons, under different denominations, many of whom have of late years been dismissed as unnecessary.'

The strength of the civil service at each Presidency, according to the Bengal Finance Committee, is as follows :-

	Bengal.	Madras.	Bombay	Total.
Senior Merchants* Junior, ditto Pactors	272 25 41	133 11 16	56 26 30	461 62 87
Writers	177	34	36	247
Total	515	194	148	857
Number of annuitants re- tiring Annually Casualties at Two and a	9	4	3	16
half per Cent	10	4	2	16
Annually Required	19	8	5	32

* The terms here given have been continued ever since the E. I. Company were a mere trading company, new designations are necessary.

Indian Patronage. - The Directors of the Fast India Company have the nomination of Writers, Cadets, and Assistant Surgeons for the Indian service, this with a salary of 300l. a year is the sole reward which they receive for their services, for by their oath they are bound to accept no pecuniary consideration for any appointment whatever. The number of writers, cadets, and assistant surgeons required for the year being made known, the number is divided into 30 shares, of which the Chairman and Deputy Chairman have each two, the President of the Board of Control two, and each Director one. His Majesty's Ministers, through the Board of Control, have the appointment of judges, bishops, officers of the King's army, and a negative of the Court of Directors' nomination of the Governor General, Governors, and Commanders in Chief.

Civil Service since 1790, and the Deaths and Retirements incident to the same.*

Years.	No. in the Service.	Appoints.	Total.	Deaths.	Retire- ments.

* This table from 1790 to 1830, was, I believe, prepared in India, by or for the Bengal Finance Committee; I have compared some of the latter years with the College books at the India House, and find a discrepancy as to the number of appointments: this table and also the succeeding one are given as data to shew the progressive increase or decrease in the civil and military services. It would be advisable to have the Madras and Bombay civil services return as complete as that of Bengal.

Appointments of Cadets and Assistant-Surgeons in each year, from 1796.

home authorities, that of promotion is thus managed. A writer on proving his qualifications in India, is allowed to fix on any branch of the service, (revenue, judicial, or political,) and the principle of succession to office is regulated partly by seniority, and partly by merit, blended so well together, as effectually to destroy favouritism, while a succession of offices is still left open for the encouragement of talent and industry. An Act of Parliament, provides that all situa-tions exceeding in total value 500l. per annum, must be held by a civil servant of three years residence in India; ditto, exceeding 1,500/. a year, by one of six

The patronage of appointment rests only with the | years standing; ditto, exceeding 3,000l. by one of nine years, and of 4,000l. and upwards, by a servant of twelve years sojourn in the East. Thus, for vacancies under each classification, there are a certain number of candidates of the required local experience when the selection depends on the government, but every care is taken to make merit the sole ground for eligibility and success. The salaries of the whole Civil Service are now undergoing reduction and modifications, which it is thought will tend to stimulate the faculties of the functionaries employed.

The Company's civil servants are educated at the East India College of Haileybury, where each student

must enter before he is 20 years of age, and pay 1051. per annum towards defraying the expensive and elaborate education which he receives in every essential branch of oriental and western literature, philology and science, under the superintendance of a College Council, and the most learned professors in England. The test of examinations for a writership is severe. The nominations during the last five years from the College, consisted of sons of noblemen three; of baronets eight; of clergymen fourteen; of East India Directors eight: of Company's civil servants thirty: of ditto, military ditto, twenty-two; of ditto, naval ditto, forty-two; of His Majesty's military and naval officers, twenty-seven; and of merchants, bankers, and private gentlemen, one hundred and ten. The net expenditure of the College of Haileybury, from 1805 to 1830, was 363,4271., of which 96,3591. was for the building; 33,5531. for books, and philosophical instruments, &c.; the salaries paid to professors, amount to 220,730% and the number of students educated was 1,978.

The following are the Rules and Regulations to be observed with respect to the Examination of Candidates for admission to the East India College at Haileybury.

India Board, 16 August 1837.

The Commissioners for the Affairs of India, by authority of an Act passed in the first year of Queen Victoria, intituled, "An Act to authorize the Commissioners for the Affairs of India, and the Court of Directors of the East India Company, to suspend the subsisting Enactments concerning the fourfold system of Nomination of Candidates for the East India Company's College at Haileybury, and for providing, during such suspension, for the Examination of Candidates for the said College," constitute and appoint the Rev. J. A. Giles, late fellow of Corpus Christi College, Oxford, the Rev. J. Isaacson, Fellow of St. John's College, Cambridge, and Thomas Hewitt Key, M. A., of Trinity College, Cambridge, to be Examiners for the purposes of the said Act; and the Examiners are hereby instructed to examine Candidates for admission to the East India College at Haileybury, and to decide whether or not they are duly qualified for such admission.

Each candidate shall produce testimonials of good moral conduct, under the hand of the principal or superior authority of the college or public institution in which he may have been educated, or under the hand of the private instructor to whose care he may have been confided; and the said testimonials shall have reference to his conduct during the two years immediately preceding his presentation for admission.

Each candidate shall be examined in the Greek Testament, and shall not be deemed duly qualified for admission to Haileybury College, unless he be found to possess a competent knowledge thereof; nor unless he be able to render into English some portion of the works of one of the following Greek authors: Homer, Herodotus, Xenophon, Thucydides, Sophocles and Euripides; nor unless he can render into English some portion of the works of one of the following Latin authors: Livy, Terence, Cicero, Tacitus, Virgil and Horace; and this part of the examination will include questions in ancient history, geography and philosophy.

Each candidate shall also be examined in modern history and geography, and in the elements of mathematical science, including the common rules of arithmetic, vulgar and decimal fractions, and the first four books of Euclid. IIe shall also be examined in moral

philosophy, and in the evidences of the Christian religion as set forth in the works of Paley.

It is however to be understood that superior attainments in one of the departments of literature or science, comprised in the foregoing plan of examination, shall, at the discretion of the examiners, be considered to compensate for comparative deficiency in other qualifications; and also that the examination shall be so conducted as to give to each candidate reasonable time to prepare himself for the said examination.

The examiners as above appointed are instructed to meet forthwith, and to divide the duties herein assigned to them amongst themselves in such manner as to give to each examiner some department or branch of examination; but although the examiners are to examine each in his own department, separately, they are to decide collectively, and after due consultation, on the claims of each candidate, and are to certify, under the hands of all and each of them, their decision for his admission to the College of Haileybury, or his rejection, as the case may be.

(signed) John Hobhouse.

The manner in which the patronage exercised in India is controlled by the Home Government of the East India Company, was ably explained by the secretary to the East India Company, in his lucid evidence before the Select Committees of Parliament in 1832, relative to Indian affairs:—

"The records, as now sent home from India, contain the most minute description of the services, the character, and conduct of every individual in the civil establishment. Perhaps I may exemplify it by stating, that when members of council for India are appointed by the Court of Directors, a list of civil servants within a given period of the standing of those servants, from whence it is proposed to select members of council, is laid before the Court of Directors, which list contains a complete statement of the whole course of a servant's progress, from his arrival in India as a writer, to the date at which it is proposed to appoint him to a seat in council. So it is with regard to every other civil servant in the establishment; and, if it would not be troubling the Committee too much, I will take the liberty of reading a letter, which has particular reference to the course now observed with regard to the patronage in India, and the scrutiny which is exercised by the authorities here, or rather the knowledge which they possess of the course pursued by the government abroad. It is an extract of a letter from the chairman and deputy of the Court of Directors to Lord Ellenborough, dated November 1829: 'The Legislature has placed the local governments in subordination to the government at home, it has exacted from them obedience to the orders issued by the constituted authorities in this country. The Legislature has provided, that all the Company's servants in The Legislature India, civil and military, under the rank of Governor-General and Governor, shall, in the first instance, receive their appointments from the Court of Directors; that the members of council shall, excepting in particular cases, be nominated by the Court, and that the Governor-General and Governors shall likewise be appointed by the Court, with the approbation of the King. The Legislature has empowered the Court of Directors to recall the Governor-General and other Governors, and to remove from office or dismiss from their service, any of their servants, civil or military, and as a security against excessive lenity or undue indulgence on the part of the court, it has conferred

upon the crown the power, under His Majesty's sign manual, countersigned by the President of the Board of Commissioners, of vacating appointments and commissions, and of recalling any of the Company's servants, civil or military, from the Governor-General downward. By these provisions, the fortune of every servant of the Company in India is made dependant on the home authorities; and as long as the powers with which the latter are thus entrusted continue to be properly and seasonably exercised, there appears to us to be little ground for apprehension that the Indian functionaries will forget they are accountable agents, and still less that this forgetfulness will be generated by so adequate a cause as an occasional delay here, not in issuing necessary instructions, nor in replying to special references, but in reviewing their past proceedings.

"The Legislature having thus provided sufficient sureties against the independence and irresponsibility of the governments in India, has with a just appreciation of the distance and all the extraordinary circumstances attending the connexion between the two countries, not only left to the governments there the distribution and disposal of all the Company's establishments, civil and military, and the power of suspending from the service such individuals as may be guilty of misconduct, but has delegated to them powers of legislation, and to the Governor-general, individually and temporally, some of the most important rights of sovereignty, such as declaring war, making peace, and concluding treaties with foreign states; and while it has enacted, that the wilful disobeying, or the wilfully omitting, forbearing or neglecting to execute the orders of the Court of Directors by the local functionaries, shall be deemed a misdemeanor at law, and made it punishable as such. the enactment is qualified with the exception of cases of necessity, the burthen of the proof of which necessity lies on the party so disobeying, &c.

"Nor do the powers thus conferred (large as they are) exceed the exigencies of the case. It would be superfluous in addressing your Lordships to enlarge on the magnitude of the trust reposed in the local governments, and the difficulties with which it is encompassed, difficulties so many and so great, as to be almost insuperable, if experience had not shewn that to a great extent at least they may be surmounted. The imposition of the various checks with which the system abounds presupposes the grant of a liberal confidence in those to whom power is delegated. The individuals selected for members of the different councils of government are usually men of mature experience, who have distinguished themselves in the several gradations of the service. At the head of the two subordinate governments are generally placed persons who have recommended themselves to the home authorities by their eminent attainments, extensive local knowledge, tried habits of business, and useful services in India, or persons sent from this country, who, without exactly the same recommendations, are on other grounds supposed to possess equal qualifications. The office of Governor-General has usually been filled by noblemen of elevated rank and character, who in some instances have held high offices of state in England, and who in going to India with the qualities of British statesmen, have there the means of acquiring a personal knowledge of the country and the people whom they are sent to govern; and the allowances of the Governor-General, other governors and members, as well of the supreme as of the subordinate governments, are fixed on a more liberal | E

scale, suitable not to the character of mere executive agents, but to the greatness of discretionary trusts and the weight of their responsibility.

"It is by no means our intention, in submitting the foregoing considerations, to apologize for any want of promptitude or regularity on the part of the local governments in reporting their proceedings to the Court from the obligation of carefully revising those proceedings, and communicating their sentiments thereupon within a reasonable time, and above all of enforcing strict obedience to their orders where no sufficient reason is given for suspending or modifying them: all that we mean to infer is, that when the relative characters, position and powers of the constituted authorities at home and abroad are duly considered, a minute interference in the details of Indian administration was not contemplated by the Legislature, and that as long as a general supervision is watchfully exercised, and no proceedings of importance are kept back from observation, overlooked, or neglected, its intentions are not necessarily defeated by an arrear of correspondence on matters of minor moment.

"It is doubtless indispensable that the home authorities shall exercise the utmost caution and circumspection in the selection of their Indian governors, and in the choice of fit persons for the councils of government; that they shall constantly and vigilantly inspect the proceedings of those governments, as they may affect the interests of the State as well as the characters and prospects of individuals: that commendation and censure be impartially distributed, and that in cases of manifest incompetence or gross misconduct, the extreme measure of removal from office be resorted to. It is incumbent on them to take care that, in our political relations with foreign powers, justice and moderation are uniformly observed, that the discipline and general efficiency of the army are maintained, and that in the business of internal administration, the welfare of the native population is sedulously consulted. It is obligatory on them narrowly to scrutinize and control the public expenditure, to keep a watchful eye over all their servants, to see that distinguished merit is adequately encouraged and rewarded, that the undeserving are not promoted by favour, and that evil doers are not improperly shielded from the punishment due to delinquen-It is also within their provinces to convey to the local governments such instructions as may from time to time be deemed expedient with a view to these or other objects, and to enforce obedience to their orders when transgressed or imperfectly executed without valid reason."

Ecclesiastical.—The Episcopal clerical establishment in India is stated before Parliament, in 1832, (by Mr. Lushington) to be adequate to its purposes; the number of European chaplains in 1817, were, 39; in 1827, 51; and in 1831, they were increased to 76, of whom 38 were at Bengal, 23 at Madras, and 15 at Bombay. The clergy are under the charge of a Diocesan at Calcutta, with 5,000l. a year, and two Bishops (one at each Presidency) with 2,500l. per annum each. The total charge of the establishment in 1827, was 66,943l. sterling. The latest statistical return (for 1827) gives the number of chaplains, stations, and ecclesiastical charges, as follows:—

Presidenc	y.	St	ation	18.	Cł	apla	ins.	,	Charge.
Bengal .			18			27			£40,625
Madras			18			22			20,199
Bombay			2			2			. 6,119

charges also.

In 1830-31, the salaries and allowances paid by the Indian Government, at each Presidency, for the support of the clergy and places of worship, was-Bengal Episcopal sa. rs. 4,25,876; Scotch Church. 20,451; Roman Catholic, 4,000; total, 4,50,327. Madras Episcopal, Mad. rs. 2,06,976; Scotch Church, 11,760; Roman Catholic, 5,346: total, 2,24,082. Bombay Episcopal, Bomb. rs. 1,78,578; Scotch Church, 20,862: Roman Catholic, 820: total, 2,00,280. Grand total, 8,74,669 rupees, or about 85,0001. The cost of building St. George's Church at Madras, has been, 1,85,949 rupees, of St. Andrew's at Madras, 2,21,761, and of St. James's, Calcutta, 63,006 rupees. section on Religion.)

XI. Military Establishment.—Each Presidency has its separate army, commander-in-chief, staff, &c.; but the commander-in-chief of the Supreme Government has a general authority over all the Presidencies. total armed force in British India is about 194,000 men: it may be said to consist of three branches, viz. King's cavalry and infantry; E. I. Company's European engineers, artillery, and infantry; and the Company's Native artillery, cavalry, and infantry.

The European officers serving in British India are at present in number and distribution as follows:

	Corps.	Bengal.	Madras.	Bombay.	Total.
Hon. Comp	any's Engineers	56	37	42	135
•	Europeun Horse	53	35	24	112

Commissari		25	25	13	63
	icers of Artillery	58	57	43	158
	Total	2147	1535	992	4187

The total number of European officers, it will be observed, is 4,487, of whom 752 are in the King's military service. The complement of officers to each regiment is, of Europeans, 1 colonel, 1 lieut -colonel, 1 major, 5 captains, 8 lieutenants, 4 cornets or ensigns; of native commissioned officers there are a subadar and jemadar with each troop or company. The command of stations is given to brigadiers, of whom there are in Bengal 16, in Madras 12, and in Bombay 7. The divisional commands, under general officers, are — Bengal, King's, 2; E. I. Company, 5; Madras, King's, 2; E. I. Company, 3; Bombay, King's, 1; E. I. Company, 2. Total, King's, 5; E. I. Company, 10. On the Bengal establishment there are ninety-nine corps; namely, 3 of horse artillery, 7 of foot artillery; a corps of engineers equal to 3 others in the strength of its officers; 10 of native cavalry; 2 of European infantry; and 74 of native infantry. In each of these the European commissioned officers consist of 1 colonel, 1 lieut.-colonel, 1 major, 5 captains, 8 lieutenants, and 4 second lieutenants, cornets, or ensigns. The total establishment thus is

Since this period the number of stations and chap- 1,980; or 99 colonels, the same of lieut.-colonels and lains has been increased, and consequently the of majors, 495 captains, 792 lieutenants, 396 ensigns, and about 180 supernumeraries of the junior rank, awaiting the process of absorption.

The average number of European officers in Bengal, annually for the last 18 years, has been, 1,754; of casualties 80 per annum, or 1 in 22; of deaths 54, or 1 in 32; and of retirement, &c., 26, or 1 in 67. Madras, total number of officers, 1,346; of casualties 75, or 1 in 18; of deaths 52, or 1 in 26; and of retirements, &c. 23, or 1 in 58. In Bombay, total number of officers, 624; of casualties 34, or 1 in 18; of deaths 26, or 1 in 24; of retirements, &c. 8, or 1 in 78. (For tables of each department of the service. pay, allowances, &c. see Appendix.)

The total casualties of commissioned officers in the E. I. Company's army at the three Presidencies, from 1813 to 1833, has been yearly, 169, 154, 159, 143, 150, 203, 198, 167, 194, 164, 168, 260, 233, 244, 233, 163, 193, 204, 244, 227, 228.

In 1835, the number of high-ranked officers of the E. I. Company's service attached to the Indian army establishment was :-

Rank.	Bengal.	Madras.	Bombay.	Total.
Lieutenant-Generals Major-Generals Colonels	6	10	0	16
	9	9	3	21
	84	51	34	169
In Europe	99	70	37	206
	55	50	29	134
On service	44	20	8	72

The lieut.-colonels at the same period amounted to 206, majors 206, captains 1,030, and subalterns, 2,472. In the Company's army there is no half-pay list, no sinecures, and no pensioners under 25 years' service; until that period is completed, European commissioned officers are not enabled to retire on the full pay of their rank, which is attained by seniority. lieut.-colonel, major, or captain, retires on the halfpay of his rank, if his health requires his relinquishing the service, and a lieutenant having served 13, or an ensign 9 years (including 3 years for a furlough), may retire on ill-health certificates, on the half pay of their rank. There are military funds to which liberal subscriptions are made by the Company's Government; but the charges are principally borne by the officers themselves.

The officers in the Company's service receive commissions from His Majesty corresponding with those which they receive from the E. I. Company; but, westward of the Cape of Good Hope, the Company's officers possess no rank when on service with the King's officers; eastward of it, they take precedence according to date and rank of commission. It is but justice to state, that in no part of the globe can there be found a braver or more gentlemanly community than the officers in the Company's service.

The officers for the East India army are educated at Addiscombe College, and instructed in the oriental languages as well as in military discipline.

Addiscombe Place, near Croydon, was purchased in 1809 of E. H. D. Radcliffe, Esq. for 16,6041. 10s. It was previously the residence of the Earl of Liverpool, and reputed one of the best red-brick buildings in the

county. The land consists of 63 acres freehold and 24 rent hold.

Previous to its conversion into a military seminary the education of the Company's Cadets was conducted at Marlow, at Woolwich, or privately. The number of cadets at Woolwich was limited to 46, and the average expense was 2501. each. The company allowed 200 guineas to each cadet educated privately, and 45 guineas, or half the yearly expense, to each cadet educated at Marlow. The estimated expense for two years of each cadet educated in their own seminary was 1881. 16s. The seminary was originally confined to the education of officers for the artillery or engineer corps, and the regulations for its establishment were framed in obedience to the 44th clause of the Act of the 53rd George III, cap. 55. The establishment and object of the institution were sanctioned by a resolution of the General Court of the 7th April, 1809. It was placed under the superintendence of Dr. Andrew, who was paid at the rate of 801. each per annum for 60 pupils. When the seminary was first established the cadets' subscriptions were at the rate of 301 a year, and they also found certain articles of military clothing.

The successive augmentations which have taken place, are—1st. April 1821, from 30l. to 40l. a year, in addition to the sum of 13l. 16s. 5d. for clothing. 2nd. March 18, 1829, first year, 65l. inclusive of military outfit; second year, 50l. On the 16th January, 1828, the seminary was opened for the education of cadets for general service, exclusive of cavalry. 3rd. On the 14th October, 1835, the Court, considering the payment of the cadets was disproportioned to the value of their education, fixed them at their present rate, which, all expenses included, may be taken at 61l. 18s. per term, or about 240l. for the two years' residence.

The building of the college cost 82,869l., and the total expense, from 1810 to 1830, was 366,154l.; of which 37,136l. was for instructing the cadets in trigonometrical surveys, and the engineering, &c.; 18,752l. for books, stationery, and mathematical instruments. The rewards to cadets for industry and talent amounted in four years to 1,600l.

The annual total expense of the seminary, upon an average of the six years ending Midsummer 1835, may be taken at about 20,000l. of which the company's proportion was between 11,000l. and 12,000l. The number of cadets qualified during this period was—engineers, 58; artillery, 80; infantry, 242.

The plan of this noble institution originated with Mr. W. Abington, of the India House, and by a resolution of the Court of Directors, 11th April, 1809, an honourable tribute was made to his "zeal, attention, and vigilance." The following resolution was passed by the Court of Directors, 22nd November, 1837:—

"That all the time during which cadets actually continue at the military seminary, after attaining the age of 16 and before they pass their public examination (provided they pass within the fixed period of four terms) shall count as a portion of the period which may eventually entitle them to retire upon full pay under the regulations as now established."

The following analysis was quoted in the House of Commons by the Right Honourable R. C. Fergusson, on Friday, the 26th July, 1833, on a motion that one fourth of the cadetships be set apart for Sons of Company's Officers. The Right Honourable C.W.W. Wynn's motion was negatived without a division, a satisfactory proof that the Court of Directors had exercised their right of patronage in an unexception-

able manner. The rules and regulations established for the good government of the college are admirable.

Distribution of the Court's Military Patronage, from 1813 to 1833.

The total number of European troops in India (exclusive of commissioned officers) is 30,975, of whom 19,540 belong to His Majesty's cavalry and infantry regiments. The number of King's troops serving in India from 1813 to 1830, has been annually as follows: 21,490, 20,049, 19,828, 20,432, 18,709, 20,110, 17,680, 16,743, 16,290, 15,876, 16,652, 16,395, 16,683, 16,832, 18,249, 19,612, 20,132, 20,292. The cost of these troops (defrayed by the natives of India, not by the British public) varied from 800,000l. to 1,000,000l. a year, independent of charges at home—(viz. 60,000l a year for half pay, &c.) The E. I. Company are authorized by Parliament to raise annually, in the United Kingdom, a certain number of men for the supply of their Indian Army; and in virtue of this authority, they have recruited and sent abroad during the last 11 years, 17,000 men, of whom 800 were dispatched to the St. Helena regiments. Their depôt is at Chatham, under the command of a few staff officers; the service is a favourite one with the public, and the finest young men in the country annually engage in it; if steady and intelligent, they obtain rank as warrant officers, deputy commissaries, conductors of stores, &c.

Native commissioned officers in the Indian Army according to the latest returns.

Native Doctors		219	100	68	387				
	Total	1913	950	583	3416				

The native officers are in fair proportion to the Europeans. The total number of native officers is 3,416, of whom 387 are native doctors, carefully educated in the European principles of medicine and chirurgery. The native officers are raised from the ranks according to their merit, and are a most exemplary body of men, grey in years and experience, they are well calculated to be the intermediate link between the European and the Sepoy soldier. Their steadiness of

character and dashing bravery in the field (whether Hindoo or Moslem) has been previously shewn, and it is regretted that they are not enabled to attain a higher rank than subordinate to the youngest European Ensign. Killadars or Commandants of forts should be allotted for the veterans—and every General Officer should have one or two native Aide-de-Camps.

The number of native non-commissioned officers and rank and file in India, and the corps to which they belong, are—

* No separate corps of horse artillery.

These troops are composed of Hindoos and Mussulmans, &c. mixed in every regiment, in a greater or less proportion; and in discipline, cleanliness, sobriety, and bravery, they are unsurpassed by any body of men. The native artillery make it a point of honour never to desert their guns, and wherever a British officer will lead, it has rarely or never been found that his se-poys will not follow. The native cavalry are excellent and fearless riders, superior to Europeans, and good swordsmen; they are exceedingly fond of their horses, and take the best care of them : of the whole army, it may be observed that no men are more alive to emulation; a medal is as highly prized by a sepoy as by a British soldier, and hundreds of instances of heroism have been related of them which would do honour to Greek or Roman story. The Bengal army is considered to possess the highest caste men, being principally Rajpoots; the Bombay sepoy is more a man of all-work, and the Madrasites are, perhaps, the hardiest race, but all are extremely tenacious of their rights, and adhere punctiliously to the customs which their religion ordains; any violation of either, particularly of the latter, has ever been attended with serious consequences.

The subsidiary Indian forces and contingents, where they are specified in treaties with the East India Company, are as follows:-Subsidiary. Oude not less 10,000 men; the Nizam, two regiments cavalry and eight battalions of infantry; the Guicowar, two regiments of cavalry and 4,000 sepoys; Nagpore not stipulated; Mulhar Rao Holkar, the strength judged adequate by the British Government; Travancore, three battalions of infantry; Cochin, one battalion ditto, Mysore and Cutch not specified. Contingents of native chiefs; the Nizam, 10 cavalry and 12,000 infantry; Guicowar, 3,000 cavalry; Nagpore, 1,000 ditto; Holkar, 3,000 ditto; Mysore, 4,000 ditto (central India); Joudpore, 1,500 ditto; Ghuffoorkan. 600 ditto; Bhopaul, 600 cavalry and 400 infantry; and Dowlah and Purtumbghur, 50 cavalry and 200 infantry; and Dewap 100 cavalry 100 infantry. following chiefs, not included in the preceding list, are pledged to bring forward troops to the extent of their means when required by the Company's Government: Rajahs of Bhurtpore and Machery; most of the Boondela chiefs; chiefs of Rajpootana and Malwa not enumerated above, and the Rajah of Sattarah. The military force of the Rajpoot States is 7,676 cavalry and 27,788 infantry, of which Kotah alone has 20,700 infantry and 4,200 cavalry. Sindia's army amounts to 10,000 cavalry and 20,000 infantry; Holkar's force, 3,456 cavalry and 2,000 infantry; the

Rajah of Sattarah has 300 cavalry and 5,000 infantry; Runjeet Sing's formidable force as given in the Meerut Observer, is as follows.

The Seick army of the Punjaub was, so late as the commencement of the present century, a mere military confederacy of predatory horse, and that gallant but unfortunate adventurer, George Thomas, considered them the most contemptible troops in Hindostan. The talent of Runjeet Sing, has within the last twenty-five years established the military reputation of the Seicks, and this prince now possesses a regular army, accustomed to war, full of ardour, and jealous of renown; the Scicks possess many qualities which admirably fit them for a military life; they are individually brave and athletic, and are free from those prejudices of caste, which detracts from the military classes of the native soldiery of British India. A Seick will eat of any thing but beef; his religion never requires him to undress at his meals, nor does it prescribe fasts, or inculcate any thing to interfere with the duties of a soldier; like the soldier of Europe, the Seicks are however not averse to the use of fermented liquors, and their Sirdars are notoriously addicted to the vice of drunkenness.

The foreigners or Hindoostanies of the Seick army are men from the provinces of British India, and receive a stipulated monthly pay; many of the Seick soldiers receive rations of grain, besides their pay.

General Abstract of the Seick Army.—Guns in different forts, 108; Ditto Horse Artillery, 58, Ditto Foot Artillery, 142; total guns, 308. Mortars, 6; Jamboorans on Camels, 305; Cavalry regular, 5,200; Ditto irregular, 43,300; total Cavalry, 48,500. Infantry regular, 6,000; Ditto irregular, 17,000; total Infantry, 23,000. Golundaze, 1,500; grand total Army, 73,000. The horse artillery of Runjeet's army, consist of guns of small calibre, and their field equipment resemble that of our late foot batteries; and consequently such artillery would be utterly unable to cope with our horse artillery; still, as these guns are drawn by horses, their fire would be always available, which is not the case with bullock artillery.

In 1798, Tippoo Sultan's field army was estimated at 47,470 fighting men; and his revenues at one Crore of Rupees; Runjeet Sing's army amounts to 73,000 men, and his revenues to one Crore and eighty lakhs of rupees.

The Hydrabad subsidiary force, stationed in His Highness the Nizam's dominions, is furnished from the Madras Presidency, and consists of the following troops: one battalion foot artillery; two troops of horse artillery; a park of heavy guns; two regiments native cavalry; one regiment of Europeans, and seven regiments of native infantry.

The Nizam's regular and irregular troops under the command of British officers are under the immediate control of the supreme Government, and consist as follows: four independent companies of artillery, with large establishments of field pieces and heavy guns; one regiment of engineers; eight regiments of regular infantry; one garrison battalion; one invalid battalion; a body of invalids at Ellichapoor; and five regiments of irregular cavalry.

The payment of the Company's Hydrabad Subsidiary Force is provided for by treaty, and they are paid direct from the British treasuries through the military paymaster. As to the Nizam's troops, they are paid direct by the Nizam's Government, the total expense of which, it is said, amounts to about 42 or 43 lacs per annum.

The general servitude of the officers in the Company's army is thus shewn:—

HINDOSTAN.—EAST INDIA COMPANY'S MILITARY SERVICES.

Presidencies, on the 1st January, 1835.

lote.—This Return includes Provincial Corps; it omits Officers on Furlough to England. In the five years, 1801 until 1805, a portion of the Bombay army is returned as composing the Madras army, because it was employed in the Madras territory.

gun ships; six 10 gun corvettes and brigs;

Indian Marine, although at one time very con-le, is of late much diminished; it is attached to mbay Presidency, and consists of one frigate; and about 500 European seamen, (with a proportion of four warrant-officers to each vessel) and a complened steamers and some surveying vessels. The ment of from 600 to 700 native sea-men. The latest Parliamentary returns of the annual cost of the Ma- | rine Establishment at Bombay is-Marine cruizers, &c. S. R. 11,94,573; marine office establishment, &c. 1,51,105; water, luggage, and ferry-boats, 25,831; dry docks, mooring chains, &c. 80,444; building vessels, purchase of timber, &c., 4,24,741; total, S. R. 18,76,894; or in sterling 211,1281. During the European wars, the Indian navy on every occasion where an opportunity offered, have shewn themselves in nowise inferior in naval tactics and bravery to His Majesty's service, while the extensive and valuable surveys which the officers have made of the islands. rivers, gulphs and bays in the Indian and China seas display their scientific acquirements in pre-eminent degree, and entitle them to the gratitude of every nation trading to the East. It is understood that measures are now in progress to convert the Bombav Marine into an armed steam flotilla.

At Calcutta there is a marine establishment which. though not of warlike nature, is nevertheless of the utmost importance. - I allude to the pilot service, which has no equal in any country in Europe. The service consists of 12 strong, well-fitted and quicksailing vessels, of 200 tons burthen, schooner-rigged, and admirably adapted for withstanding the tempestuous weather from April to October, so frequent off the sand-heads at the mouths of the Ganges and Hooghly, where six or eight of the pilot vessels are constantly stationed, either at anchor or cruising about on the look-out for vessels coming up the Bay and marine is as follows:-

of Bengal; the moment a ship is seen, the pilot schooner makes towards her, puts a European pilot and a European leadsman on board, and then resumes her search for other ships approaching the port of Calcutta.

The service is one of seniority, from leadsman or volunteers (the lowest) to branch pilot (the highest). The number of Europeans in the pilot service is about 130; they are intelligent, skilful and gentlemanly men, well acquainted, from length of service, with the difficult and dangerous navigation of the Hooghly. There are 12 branch pilots, 24 masters, 24 first mates, 24 second mates, and between 70 and 80 volunteers or leadsmen. The salary of a branch pilot is 701. per month; of a master 271.; of a first mate 151.; and of a second mate and volunteer 61. per month. Each ship going up or coming down from Calcutta (a distance of 150 miles) gives a gratuity of about a 100 rupees to the pilot and the leadsman who have charge of the ship. The yearly cost, according to the latest return before Parliament, is in S. rupees -pilot schooners and buoy vessels, 3,68,585; steam vessels 87,454; light-houses &c. 1,08,505; moorings 86,279; which, with various other items amount to S. R. 13,26,346 = 153,856l. sterling per annum. At Madras the marine is small, consisting of 20 Europeans and 265 natives.

The physical or medical branch of the Anglo-Indian service, as regards the number employed in the army

Number and Expense of the Medical Officers (European and Native Doctors) employed at each Presidency, and at Penang and St. Helena, since 1813. N. B. The Civil Surgeons in the E. I. Company's Service not included.

The range of Professional talent is of the highest, |limited knowledge of the botany, zoology, geology, and the valuable additions which the surgeons in the meteorology, &c. of the East, entitle them to the most E. I. Company's service have made to our heretofore honoured considerations. In the medical schools, Hindoo, Mussulman, and Anglo Indian youths are taught Anatomy, Surgery, Practice of Physic, &c., and when properly qualified, they receive appointments as Native Doctors in different regiments, and at the principal stations.

XI. The prosperity of a nation is materially dependent on a just system of finance, the leading principles of which are, that every individual shall contribute to the maintenance of a Government in proportion to the property he possesses, in order to protect him from domestic tyranny or foreign aggression, and that every individual contributing his quota shall have a voice in regulating its disbursement. As the comparative advantages of direct and indirect taxation are now deservedly engrossing a large share of public attention, and the financial system of Great Britain and of our possessions in India is materially different, it will be necessary to enter into some detail, in order that the Indian mode of finance may be more thoroughly understood and appreciated.

In India the ancient system of direct taxation has not been changed. The land in India has been from time immemorial the grand fund of supply to the Government, as will be seen by the proportions of the Indian revenue derived from different sources in 1831-2, the latest year in which the returns have been laid before Parliament complete:—

Direct Taxation. — Land revenue, 10,750,218l.; house tax, 40,000l.; tax on professions, 116,830l.; tolls on ferries, 96,242l.; territories on Nerbudda, 239,347l.; Burmese cessions, 87,266l.; Mysore, Travancore, and Cochin, 342,776l.; Nagpore subsidiary, 77,743l.; Bhurtpore, 24,881l.; Nizam's and Rajpoot Tribute, 78,938l.; Cutch subsidiary, 13,332l.; miscellaneous, 17,996l. Total, 11,885,569l.

Indirect Taxation.—Salt sale & licenses, 2,314,982l.;

Indirect Taxation.—Salt sale & licenses, 2,314,982l.; customs (sea & land), 1,380,099l.; opium, 1,442,570l.; post office, 103,501l.; tobacco, 63,048l.; mint receipts, 60,518l.; stamps, 328,300l.; judicial fees and fines, 70,469l.; Sayer and Abkaree, 764,759l.; marine and pilotage, 45,974.; excise (in Calcutta), 19,106l. Total, 6,593,326l.

Land Revenue of India. - The land-tax of British India is entitled to priority of consideration, no less on account of its financial importance as to amount, than of its influence over the rights and interests of the native inhabitants of the country, and over the general prosperity of the empire. There are three different modes of assessing land in India; and as each has its advocates, and are essentially different in operation, the fairest plan which the Author can adopt in laying a detail of them before the public, will be to give a very brief abstract of the evidence on the subject as laid before Parliament, during the recent discussion on the renewal of the E. l. Company's charter. Thus no favour to any system will be shewn, and the public will be better enabled to form a comparative judgment on their respective merits. The source whence each paragraph is derived verbatim is also given. I have only added copulative conjunctions or articles for the purpose of "dovetailing," as it were, the sentiments scattered through a vast mass of evidence. C.P. is Commons' Paper; Lords' is signified by L.; the figure refers to the number of the paper or question.

Principles of the Land Tax.—Three different modes of assessing the land-tax prevail in British India; 1st, a perpetual settlement with the proprietors of land; 2nd, a temporary settlement with the heads of villages or townships; and 3rd, a definite settlement with each individual occupant or cultivator of the soil (1832, C. P. 2), but the acknowledged basis of every land

revenue settlement in India is the right of a Government to a certain share of the gross produce of every inch of cultivated land; the share may be alienated entirely or partially, or it may be diminished by grants from Government: it may be commuted for a money payment under engagements more or less extended for a series of years, or even for perpetuity; but the groundworks of the land revenue in India is the right of Government to a share of the gross produce of all cultivation (1832, C. P. 29). Land is assessed with reference to the payments of former years, and to the actual state of the cultivation, and of the season. If the cultivation have been increased, the revenue is increased; if land have been thrown up, it is diminished; if it be a bad season, allowances are made for it (1830, L. 2,285); and in case of complaint of over-assessment, it is rectified (1830, L. 1,565), as it is well understood that nothing contributes so essentially to secure the public tranquillity as a low assessment (1831, C. 5,250).

The peculiarity of India in deriving a large proportion of its revenue from the land, is in fact a very great advantage; nine-tenths probably of the revenue of the Government is derived from the rent of land never appropriated to individuals, and always considered to have been the property of Government. This is one of the most fortunate circumstances that can occur in any country; because, in consequence of this, the wants of the state are supplied really and truly without taxation: the wants of Government are supplied without any drain, either upon the produce of the man's labour, or the produce of any man's capital (1831, C. 3,134). But the great difficulty in raising a revenue from the land in India is the difficulty of ascertaining correctly the value of land: approximation is all that can be obtained (1831, C. 3,162). The general proportion taken is extremely uncertain (1830, L. 2,537); because no portion of the gross produce of the land can ever be taken as the standard for assessment, for various proportions of the gross produce go as rent, according to all the various qualities of the soil, some lands yielding no rent, others a fourth, others a third, and other portions of the soil of a still more valuable quality, yielding half or more than half of the gross produce as rent (1831, C. 3,886); that is, a surplus of the produce of the soil, after a full remuneration to the cultivator for his labour and stock (C. 3,884). instruction for many years sent from home, and impressed upon the Governments of India is, that in no case can more be taken than the rent of the land, without both injustice and permanent injury to the country-not only injury to the individual cultivators, but injury to the Government itself; and in all doubtful cases, the instruction has been to take special care to err on the side of lenity rather than on the side of severity; to take less than the rent rather than more (C. 3,162).

The consent of Government is not required for the cultivation of any new land; Government are happy that people should come and take up their abode; they make no enquiry, if there be no objection made by the neighbouring villagers; that is to say, that they do not occupy the land that others are in the possession of; the right of possession remaining, unless disturbed by other claimants, which rarely or never occurs (1830, L. 542 and 543).

The Zemindary or perpetual Settlement of Lord Cornwallis.— One of the most material points for consideration in respect to the land-tax, is the different modes of levying the assessment now in force (1832, C. R. P. 2). To begin with the Zemindary Settle-

is the facility of collection, as it is a much more simple thing to obtain the revenue of a large district from a certain moderate number of Zemindars or contributors, than it is to perform the collection in detail by the officers of Government themselves, and another advantage undoubtedly is, the greater degree of certainty in the result (1831, C. 3,339). The main difference in the mode of collecting the land revenue in different parts of British India, consisting chiefly in the different degrees of summariness, or detail adopted in the collection of the revenue, from the great mass of cultivators who hold land generally in small portions, and who have a right to the perpetual hereditary occupancy of the soil, so long as they continue to pay the revenue demanded by Government.

When the E. I. Company came into possession of the revenues of the Dewanny of Bengal, Bahar, and Orissa, they found the land revenue collected in the most summary method by the intervention of officers under the Mahommedan Government, who had charge of districts sometimes of more, sometimes of less extent, with various titles, such as Zemindars and Talookdars, and who paid the revenue into the treasury in one sum, for which they were rewarded by the Government, generally with a per centage on their collections; in fact, Zemindars were found managing considerable districts whose obligations consisted in paying a certain annual amount to the Government. Many of them held their districts or estates under this condition hereditarily. (1831, C. 3,114, 3,115, 3,215).

On the East India Company becoming possessed of the Bengal territory, great abuses were found to prevail, and to be practised by the different sorts of people employed in the collection of the revenue. The detail of the business was so great, that it frightened Lord Cornwallis and the Government of the day, and they conceived that no better method for the protection of the Ryots or small cultivators, could be invented, than to create a species of landlords, from whom they expected much benefit to arise; the ground upon which they principally went was this, that those Zemindars, having a permanent interest in the land assigned to them, would have an interest in the prosperity of the Ryots, in the same manner as a landlord in England feels an interest in the prosperity of his tenants. This was expected to produce two good effects, to create a landed aristocracy in the country, and above all to afford protection to the Ryots or small cultivators, from the kind of paternal feeling that was expected to pervade the Zemindars (1831, C. 3,136). With a view to the protection of the whole mass of the agricultural population, and with the best of motives, the Zemindars in 1793, whether cultivators or officers in actual charge of districts, hereditarily or by special appointment, were created landholders of the country by which a property in the soil was vested in them, in nearly as full a sense as it is to the holder of a fee-simple in England; the sum which a Zemindar had been in the habit of paying was ascertained by the observation of a few prior years, the assessment or tax was fixed for ever, and an engagement was made that this amount of land revenue should never be raised on him; such is the nature of the settlement known by the name of the Zemindary of Permanent Settlement' (1831, C. 3,115, 3,116, 3,136, 3,215; 1832, R. C. P. 21). The countries settled on the permanent Zemindary tenure include under the Bengal Presidency, an extent of 149,782 square miles, em-

ment, the most obvious feature of advantage in which | Orissa (Cuttack alone excepted), with a population exclusive of the Benares province of 35,518,645, assessed in 1829-30, at a permanent Jumma or revenue of 32,470,858 sicca rupees. Under the Madras Presidency, the Zemindary settlement includes nearly the whole of the five northern Circars, lying immediately adjacent to the Bengal frontier; rather more than one-third of the Salem, and about one-third of the Chingleput districts included under the head of Madura; and a small portion of the southern division of Arcot, consisting of some of the E. I. Company's ancient lands near Cuddalore; these countries include a territory of 49,607 square miles, with a population of 3,941,021, assessed in 1829-30, at 8,511,009 sicca rupees. The permanent, or Zemindary Settlement has never extended to any portion of the provinces under the Bombay Presidency, which contain 59,438 square miles, with a population estimated at 6,251,546; and 5,500 square miles in the northern Concan, of which the population is unknown; far the greater part of the Madras territories, to the extent of 92,316 square miles, with a population of 9,567,514, has also been exempted from it; as has also been the case in the province of Cuttack, under the Bengal Government, containing 9,040 square miles, and a population of 1,984,620; neither has the Permanent Settlement been extended to the Upper or Western Provinces under the Supreme Government, embracing 66,510 square miles, and a population of 32,206,806; nor to the districts ceded on the Nerbudda, and by the Rajah of Berar in 1826, containing 85,700 square miles, of which the population is unknown; thus of the British territorial possessions on the continent of Asia, including an area of 512,878 square miles, the Permanent or Zemindary Settlement extends over but 199,389 square miles (1832, R. C. P. 21). We may now proceed to the consideration of the VILLAGE SYSTEM.

Village Land Revenue System .- The landed property in Upper India may be said to belong to the community of a village, each village having head men, leaders, or principals, called Mocuddims, or Potails, who either by descent, or sometimes by their personal influence, obtain a superiority in the vil-lage, and the management of its affairs; they are selected by the villagers, and removable at their pleasure.

The lands are let out to men sometimes in the same village, sometimes in the neighbouring village, while certain portions, and certain rights are possessed by the different craftsmen or artizans of the village, such as the schoolmaster, the washerman, the barber, the carpenter, the blacksmith, the watchman, the village accountant, &c. who have each a right to a certain share in the produce of the soil, of which there is also a certain portion set aside for certain recognised expenses of the village, and for defraying its hospitality towards strangers (1830, L. 398, 399, 405, 406, 529). These village communities are little republics, having nearly everything that they want within themselves, and almost independent of any foreign relations. Dynasty after dynasty tumbles down; revolution succeeds to revolution; Hindoo, Patan, Megul, Mahratta, Seik, English, are all masters in turn, but the village communities remain the same. In times of trouble they arm and fortify themselves; an hostile army passes through the country; the village communities collect their cattle within their walls, and let the enemy pass unprovoked. If plunder and devastation be directed again themselves, and the force employed be irresistible, they flee to bracing the whole of Bengal, Bahar, Benares, and friendly villages at a distance, but when the storm as passed over, they return and resume their occupations. If a country remain for a series of years the cene of continued pillage and massacre, so that the rillage cannot be inhabited, the scattered villagers nevertheless return whenever the power of peaceable possession revives: a generation may pass away, but he succeeding generation will return: the sons will take the place of their fathers, the same site for the rillage, the same position for the houses, the same lands will be occupied by the descendants of those who were driven out when the village was depopulated, and it is not a trifling matter that will drive them out, for they will often maintain their post through times of disturbance and convulsion, and acquire strength sufficient to resist pillage and oppres-sion with success. This union of the village commurities each one forming a separate little state in itself, has contributed more than any other cause to the preservation of the people of India, through all the revolutions and changes which they have suffered. and is in a high degree conducive to their happiness, and to the enjoyment of a great proportion of freedom and independence. (1832, Commons' Rev. Committee, p. 29.)

It is difficult to state the proportion of the produce of the village paid to Government; the authorities know little of the precise property of any of the proprietors, it is not the interest or the wish of the village that the Government should scrutinize and know their possessions, therefore, if any one of the brotherhood fails to pay his proportion, that is a matter for the village at large to settle, they will often come forward to pay it for him, but those are all private arrangements kept to themselves; and the Mocuddim has no power from the Government to enforce the assessment, what each man in the village has to pay is an internal arrangement, which it is desirable for the Government not to interfere in, the villagers settling among themselves what each has to pay, the total assessment being calculated after enquiry into the state of prosperity in the village; what it has hitherto paid; what it is capable of paying; the state of the village lands, and what assessments they ought to bear with reference to the produce; and if the villagers are dissatisfied with their Mocuddim. or head man, they turn him out (1830, L. 401, 402, 404, 528, 583, 584.) Surveys of considerable expense have been made by Government; a minute account taken of the state of the land in each village, the fields examined in the presence of a surveying officer, with all the assistance he can procure, not only from his own servants, but from the village communities, the people themselves interested, and also the ryots and people of the neighbouring villages, who are invited to attend. The exact limits of the village are put down, and even the detail of land within the village, the productions, houses, fruit bearing trees, and so on: the assessment is grounded upon these particulars (1831, C. 3,492). The Upper or Western Provinces of Bengal, the greater part of the Bombay territories, the ceded territories on the Nerbudda and the Province of Tanjore are all assessed by villages. (1831, C. 3119, 3123, 3129, 3130.) The RYOTWAR SYSTEM.—The peculiar principle of the third sort of assessment, termed Ryotwar, is to fix a maximum of assessment upon all the lands of the country in perpetuity; (1831, C. 4565) the money rent of each individual cultivator for the fields in his occupation is defined with as much permanency as possible, the aggregate of such rents making the total assessment, which varies each year with the increase or decrease of cultivation. Another main principle 14,26,177.

of the Ryotwar system is to protect the rights of all ryots or cultivators, as they now exist in every village, from infringement; and to prevent all encroachment upon those rights (1831, C. 5156); thus, in the Ryotwar system, the details of the interest of the respective Ryots are known completely, and not at all in the Zemindary system; and the former effectually does what the latter professes to do, but never has done, and never can do, that is, fix an assessment upon all the lands in the country. Under the Ryotwar system, the assessment goes from detail to the aggregate; it respects property of every class, that of the largest landholder, and that of the smallest; it measures and assesses every portion of an estate, and thus facilitates the transfer of landed property, as the first question when taken into the market iswhat is the amount of public demand upon the land? (1831, C. 4565, 4567, 4568.) The Ryotwar system deals with the proprietor; if the Rajah be the complete proprietor, he is the person with whom the Government deals; it does not profess to interfere between him and his tenants, but in order to ascertain what the Rajah is to pay, his lands are first assessed in detail, and then in the aggregate (1831, C. 4570). The Ryotwar settlement is applicable, it is said, in every state of things; where there are proprietors it may be entered into with proprietors; where there are no proprietors it may be concluded with farmers or cultivators; it may be equally made for the largest or for the smallest quantity of land; for millions of acres, or for only a few. The owner of a single field may make his terms directly with the Government, and turn to his cultivation, knowing that he cannot be called on to pay more than a certain sum. The proprietor of the largest district may do the same: for, although the cess under this system varies according to the value of land, difference of soil, population, situation, and other localities; and although inferior land, paying the lower cess, becomes liable when sufficiently improved to pay the higher cess; there is, nevertheless, a maximum for the best land, beyond which all produce is for the benefit of the landholder: and there are remissions in cases of urgent distress (1832, C. R. P. No. 29.)

Another advantage which the Ryotwar system possesses over the Zemindary, is in the creation of a great body of independent proprietors, instead of a few who are proprietors only in name; and there is an advantage to the revenue, inasmuch as all the fruits of industry accumulate for the great mass of the people, but in the case of the Zemindary they accumulate for the benefit of the few, while the Ryotwar system tends also in a considerable degree to the accumulation of capital (1831, C. 4577, 4578, 4579).

The following statement shews the amount of land revenue in the N. W. provinces, where the permanent or zemindary settlement does not exist.

Revenue Western Districts. First Division: (Jumma of 1243.) Seharunpore, Rs. 9,25,994; Mozuffernugur, 6,11,404; Meerut, 16,12,942; Boolundshuhur, 8,76,522; Allyghur, 17,04,590.

Second Division: Agra, 16,65,692; Muttra, 16,05,644; Furruckabad, 17,64,394; Mynporee, 18,34,714.

Third Division: Bareilly, 14,07,346; Shajehanpore, 11,15,700; Pelibheet, 4,89,707; Mooradabad, S. D., 9,79,168; Mooradabad, N. D., 14,79,056; Suheswan, 10,14,048; Kumaoon, 2,16,780.

Fourth Division, Allahabad, 20,22,615; Futtehpore, 13,34,425; Cawnpore, 26,83,358; Belah, 6,80,001; Bandah, 18,58,428; Humeerpore, 14,26,177.

Fifth Division: Benares, 10,76,256; Mirzapore, 6,67,943; Jounpore, 11,52,106; Ghazeepore, 12,43,088; Goruckpore, 11,11,551; Azimgurh, Periodically 12,82,907.

Delhi Division: Five Districts, 37,15,812.

Saugor and Nerbudda Territories: Three Divisions, 22.28.181.

It will be seen from this statement, that the revenues of the Western Provinces exceed a little those of Bengal and Behar; that they are several lakhs above the revenues of Madras; and more than double the whole revenue of Bombay; as the following figures will show:

Jumma of Square Popula-1829-30. Miles. tion.

A Parliamentary document gives the amount of the land tax per head in Bengal, in 1827, at 22 peace yearly; in Madras 52 pence, and in Bombay 60 pence; and per square mile, Bengal 23 pence, Madras 17 pence, and Bombay 19 pence; the population per square mile in each Presidency being, for Bengal, 244; Madras, 77; and Bombay, 76; in Bengal land is valued at 67 years' purchass. Mr. Holt Mackensie gave into Parliament the following

By Lord Cornwallis' permanent settlement in Lower Bengal much good was effected, accompanied, however, with no small portion of evil; the fixing for ever the assessment of the land was admirable in principle and highly beneficial to the proprietors, but the Government lost the advantage of increased prosperity in the country in consequence of the tax being fixed at a money instead of a corn rent: had the latter been adopted, the tenant could not complain, and the resources of the state would not have suffered: the next evil arose from considering the Zemindars as landed proprietors instead of what they generally were, mere collectors or farmers of the revenue; the interests and rights of the Ryots or cultivating tenants of the soil were thus entirely lost sight of, and no measure has since been devised which would restore them without the allegation being raised of our infringing the solemn compact of the permanent or Zemindary settlement.

A permanent land settlement might under proper surveys be made with each village, as well as with a zemindar; this plan might also be extended to the

south of India, where the Ryotwar system is in force; its advantages would be, that a stimulus would be given to cultivation and improvement without the Government, like the tithe owner in England, stepping forth to reap the reward of skill and industry; the assessment being at a corn rent, the Government would not have a revenue fluctuating according to the rise or fall in the prices of gold or silver,—and the rights of individual cultivators as under the Madras Pesidency or of village communities, as under the Bombay territories would be preserved; while the necessity for annual scrutiny, and continual vexatious interference of the Government with the farmers would be liappily annulled. It is asserted that those periodical famines which desolate our provinces, occur only in those districts where there is no permanent land settlement. It would be well if the Hindoos were ensbled to purchase the lands and hold them in fee-simple, or to redeem the Government tax on the soil by a fixed sum of money, to be paid either at once or by instalments spread over a limited number of years.

• The ancient and modern posesssions are not stated separately after 1829-30.

Judicial revenue is raised on stamps requisite in [causes of different amount, in order to defray legal charges, and there are stamp duties at each Presidency as in England. In suits for sums not exceeding 16 rupees, the plaint or petition must be written on paper bearing a stamp of one rupee. If the suit exceed 16 rupees, and do not exceed 32 rupees, a stamp of two rupees is required. Above 32 rupees, and not exceeding 64, the stamp is 4 rupees. Above 64 rupees, and not exceeding 150, 8 rupees. Above 150 rupees, and not exceeding 300, 16 rupees. Above 300 rupees, and not exceeding 800, 32 rupees. Above 800 rupees, and not exceeding 1,600, 50 rupees. Above 1,600 rupees, and not exceeding 3,000, 100 rupees. Above 3,000 rupees, and not exceeding 5,000, 150 rupees. Above 5,000 rupees, and not exceeding 10,000, 250 rupces. Above 10,000 rupees, and not exceeding 15,000, 350 rupees. Above 15,000 rupees, and not exceeding 25,000, 500 rupees. Above 25,000 rupees, and not exceeding 50,000, 750 rupees. Above .50,000 rupees, and not exceeding 100,000, 1,000 rupees. Above 100,000 rupees, 2,000 rupees. The other stamp duties to which the parties are subject, besides the institution stamp, are—all exhibits filed in court are required to be accompanied with an application praying the admission of the same, and that application must be written on stamped paper; if in the Zillah Court, the stamp is one rupee; in the Provincial Court and the Sudder Dewanny Adawlut,

two rupees. So also no summons is issued for the attendance of any witnesses without an application in writing, praying the attendance of such person, which application must be written on stamped paper, similar to that prescribed in the case of filing exhibits. Further answers, replications, rejoinders, supplemental pleadings, and all agreements of compromise and petitions, are required to be written on stamps of one rupee in the Zillah Court, and four rupees in the Provincial Court in the Sudder Dewanny. Miscellaneous petitions and applications preferred to public authorities, either revenue or judicial, are required to be written on stamps of eight anas, if preferred to a Zillah judge or magistrate, or collector; of one rupee. if to a Court of Appeal or Circuit; and of two rupees, if to the Sudder Dewanny or Nizamut Adawlut, or to the Board of Revenue. The appointment of the vakeels to act in each case is made by an instrument bearing a similar stamp. Copies of decrees also are required to be stamped: in the Zillah Court the stamp is one rupee; in the Provincial Court, two rupees; in the Sudder, four rupees; and all proceedings of the Sudder prepared for transmission to the King in Council must be transcribed on paper bearing a stamp of two rupees. Copies of miscellaneous papers are required to be written on a stamp of eight anas, or half-rupce. (For costs of a suit in the different Courts, see Appendix.)

The judicial charges are exceedingly heavy, viz. in

Bengal, the Supreme Court, S. R. 4,32,337; justices of the peace and diet of the prisoners at Calcutta, 2,51,693; Court of Requests, 98,605; Sudder Dewanny and Nizamut Adawlut, 6,38,869; Provincial Courts of Appeal and Zillah Adawluts, 62,69,040; provincial police, 17,89,377; extra and contingent charges, 3,70,318; pensions, 38,445; total, S. R. 9,89,91,694, or sterling 1,147,436l. In Madras, Supreme Court, S. R. 3,08,700; police charges in town of Madras, 1,33,040; Court of Sudder and Fouzdary Adawlut, 2,53,557; Provincial Courts, 25,97,490; pensions, &c.7,342; total, S. R. 33,00,129, or 377,158l. In Bombay, Supreme Court, S. R. 3,68,400; police charges at Bombay Presidency, 1,27,540; Court of Sudder and Fouzdary Adawlut, 2,62,891; provincial Courts, 19,39,774; buildings, &c. 76,701; total, S. R. 27,75,306, or 312,222l. The grand total for the three Presidencies being 1,836,816l. sterling.

Salt .- The next main item of revenue in Bengal is derived from the manufacture and sale of salt by Government, the average annual produce of which is about 1,800,000% a year. It is in evidence before Parliament that the people are abundantly supplied with salt, and the tax is less than four furthings a month on each individual. Efforts have been made to authorize the Cheshire salt makers to furnish the Bengalese with salt; when the English Parliament remits or even lessens the duty levied on the Hindoos sugar being imported into Great Britain, then the Hindoos may receive English salt. Upper Bengal is supplied with salt partly from the Lower Province, and partly from salt mines in Western India. Madras exports salt to Bengal prepared by solar evaporation in exchange for rice and other provisions, and Bombay makes salt enough for its own use; the revenue in Bombay and Madras is trifling in amount compared with Bengal, being in the latter about 300,000l, and in the former not 20,000l. a year. Mr. St. George Tucker, lately Chairman of the E. I. Company, thus details the salt revenue for 1827, which he states to be a fair year for judging of the average revenue:

Population of Bengal, Behar, and Orissa, computed at 30,000,000; quantity of salt consumed by this population, supplied from our sales, 4,500,000 maunds; gross sale, at about 390 rupees per 100 maunds, 1,75,00,000 S. rupees; deduct cost and charges, which constitute no part of the tax, 50,00,000 S. rupees; net revenue or monopoly profit, 1,25,00,000 rupees, at 2s. per sicca rupee, 1,250,000. sterling. Medium consumption of each individual, per annum, 6 seers = 12lbs.; rate of contribution or poll-tax, yearly, 10d. The population is now upwards of 40,000,000, which would of course decrease the amount of the tax paid by each individual.

The charges on the salt revenue amounted in Bengal, in 1828 to S. R., 71,21,183, or 826,057l. viz. advances to manufacturers, S. R., 42,91,768; convention with the French government to prevent any interference with the E. I. Company's revenue. 4,00,000; ditto with the Danish government, 15,000; salaries, commission to agents on manufacture, rent, establishments and contingencies, 22,61,527; buildings, &c., 1,52,888. At Madras the charge on the salt revenue for the same year was 85,495l. or S. R. 7,52,321; of which the manufacturers' share was S. R. 2,50,542; the advances, 1,00,843; the compensations, 25,842; and Moyen Zabitah and other charges, 3,74,794.

The year 1836-37, in the following table, shews the proceeds derived from the salt sales in Bengal under the new system of selling at any time, and not periodically by auction.

Account of the Quantity of Sait sold, the Gross Proceeds, Net Profit, and Average of the Net Profit, from 1983-4, in the Territories under the Bengal Government subject to the Sait Monopoly.

Opium .- The revenue derived from opium, which is only second in importance to salt, is obtained in Bengal by Government receiving the prepared juice direct from the cultivators, and offering it for sale at public auction to the exporter (no opium is allowed to be grown in Bengal but by the cultivators, who are under engagements and advances with Government); and in Bombay a transit duty is charged on the shipment of the drug to China, the opium being grown and prepared in allied states, Malwa, for instance. Under the head of commerce, further particulars will be found; it is here sufficient to say that the incidence of this tax is difficult of ascertainment: at first view it appears to fall on the consumers in China, or other foreigners in the E. Archipelago; but on a second view of the question it is evident that if the British Government did not levy the tax, the Bengal producer of the opium would be at liberty to realize if possible the present price, and pocket himself the difference which now goes into the Indian treasury. The charge in Bengal on the opium revenue for 1827-28, the latest year laid before Parliament, was 658,2541., or S. R. 56,74,605; of which the manufacturers receive in advance, S. R. 38,79,974; and the salaries, agency establishments and contingencies were 7,26,024; and there was also a compensation to purchasers of inferior Bahar opium in 1824-25 of S. R. 10,68,608. It may here be observed that a chest or bale of the E. I. Company's opium is instantly purchased by a Chinese customer without any other examination than that of the Company's mark. The total number of chests of India opium imported into China (vide Commerce section) was in 1833, 23,692 chests, the value of which was Sp. dol. 15,352,429. An official document laid before the

Revenue Sub-committee of Parliament in June, 1822, gives the following detail to 1827; the subsequent years I have filled up at the India House, the form of

Quantity of Behar and Benares Opium sold in India from 1797 to 1827, prime cost, &c.

These average prices, of which the maximum was rupees 2s. 2d., were reported to the Bengal Government, in the year 1822, as having been given to the cultivators of opium at the respective periods. In 1823 the Government fixed the maximum of recompense to the cultivator at 3 rupees per seer.

§ This is the averaging price per chest. † Gross receipts. 1 Net receipts. [For further details relative to the Opium Trade see section on Commerce.]

Customs, whether derived by transit or other duties on land, or from goods exported or imported by sea, form the next item, and are yearly increasing. The collection of inland or turnpike-like duties is in course of final abolition (in Bombay totally abrogated); and the duties levied on sea goods are light in amount, and unaccompanied by vexatious restrictions.

Stamps are an increasing source of revenue since

their establishment in Bengal in 1797, and in Calcutta city in 1828. The instruments liable to the duty in Bengal are, contracts, deeds, conveyances, leases, powers of attorney, policies of insurance, promissory notes, receipts, bail bonds, and legal proceeding generally (bills of exchange under 25 rupees, and receipts under 50 rupees, are alone exempt). In Madras stamped paper was first introduced in 1808, chiefly on legal proceedings; and in 1816 the duties were Civil and Miltary Administration and Charges of Briextended to bonds, deeds, leases, mortgages, bills of exchange, and receipts. In Bombay the tax was first introduced in 1815. Delhi and some other territories are not yet subjected to this duty, from the operation of which the small dealer and poor farmer is exempt, while the large capitalist or inveterate litigist is made to pay a portion of the Government expenses, the most productive stamps in India being those on moneydealing and miscellaneous law-papers. The charge on stamps for 1827-8, was in Bengal, 71,431l., or S. R. 6,15,782, viz. fees to native commissioners in Mofussil courts, S. R. 2,27,370; purchase of paper, 48,704; commission, salary, establishment, and contingency, 3,39,708. For Madras the total charge was 9,4371.

The sayer and abkaree taxes include a variety of items, in some places being irregular collections by provincial officers; in others licenses on professions or on manufactures, such as the distillation of spirits, which latter is collected by a still-head duty, manufactured after the English fashion, at the rate of six anas, or six sixteenths of a rupee per gallon, London proof. There is a tobacco monopoly in some places, and extra cesses in others; but these and other unstatesman-like sources of revenue are all in course of abolition.

The Mint revenue is collected by a seignorage for coining of two per cent. on the produce, after allowing for the difference of standard and deducting the charges of refining when such are chargeable; that is, when the silver is below the dollar standard, which is five or six times worse than the present rupee. Copper coinage also yields to the Government a large profit, the copper money being issued at the rate of 64 (weighing 6,400 grains) for the rupee, which is about 100 per cent. above the value of the copper. The charges on the Mint revenue of Bengal was, in 1827. 43,8381., or S. R. 3,77,867, viz. salaries, establishments and contingencies, 2,01,080; loss of weight in melting the precious metals, 1,76,787; for Madras, 20,406l., and Bombay, 3,637l.

The Post-office tax is light in amount, and increasing as fast as can be expected from a post conveyed by runners on foot. The charges under this head of revenue were for Bengal, salaries and establishments. S. R. 1,25,594; Dawk establishment, 6,42,293; total, S. R. 7,67,887, or 89,0751. Madras, salaries and establishments, &c. S.R. 64,973; Tappal establishment, 1,91,744.; total, S.R. 2,56,717, or 29,3391. Bombay, 18,148*l*.

The charges for transmission of letters through the Government post-offices of British India are-

In Bengal, a letter is forwarded 1,000 miles for 12 anas, or 1s. 6d.; in Bombay, ditto 1,000 ditto for 15 ditto, or 1s. 10½d.; in Madras, ditto 1,000 ditto for 17 ditto, or 2s. 14d.

The Marine revenue arises from port and anchorage dues, &c., in order to keep up the useful establishments at Calcutta, Madras and Bombay, in particular at the former port.

The foregoing items are the principal, if not the sole, sources of the Government revenue of 18 to 20,000,000l. a-year.

The expenditure may, in the aggregate, be thus stated, under distinct heads.

tish India, exclusive of Home Establishments, or of Penang, Malacca, Singapore, &c.:-

Note.—From 1828-9, the conversion of the Indian money into sterling in the above account, has been made according to the bullion value of the rupee, which causes an apparent diminution in the military charges, as compared with the charges in the years preceding 1828-9, of 16 per cent. The Expenditure since 1833 has not undergone any material change.

The Annual Charge of the Army in 1830.

In the army estimates for 1835-36, the charge for, and numbers of four regiments of dragoons and 20 battalions of infantry is thus specified:— Cavalry, horses, number 2,804; officers, number 188; non-commissioned ditto and trumpeters, number 268; rank and file, 2,700; total of all ranks, 3,156; pay

and allowances of ditto, 115,233l.; allowances to field officers, &c. 4,836l.; agency, 1,409l.; clothing, 12,860l.; total for 365 days, 134,338l. Inf:intry, officers, No. 1,020; non-commissioned ditto and drummers, No. 1,200; rank and file, No. 14,780; of all ranks, 17,000; pay & allowance, 495,283l.; allowances to field officers, &c. 7,928l.; agency, 5,021l.; clothing, 46,499l.; total, for 365 days, 554,730l. Aggregate annual charges for cavalry and infantry (including 2,835l. for depots at Maidstone and Chatham), 691,904l. Of staff officers belonging to the British army, there are in India 24 colonels (charge 16,000l.); 48 lieutenant-colonels (16,248l.); and 48 majors (14,970l.)

In addition to the statements given under the section on Religion, the following data will demonstrate the extent of Ecclesiastical charges for the maintenance of Christian Establishments.

Return to an order of the honourable the House of Commons, dated 5th July 1836;—a return of the number of persons on the Ecclesiastical Establishment of the Church of England, and of the Presbyterian Church, and other religious denominations, in the Territories of the East India Company; stating the rank of each, where stationed, the expenses of fixed salary and allowances of each, and the total expenses of each Presidency and Dependency for such establishments, in rupees and in sterling money, for the last year the account can be made up, so as to exhibit the whole amount paid from the revenues of India for the support of religion of every denomination.

A return of the Ecclesiastical Establishment of the Church of England, and of the Presbyterian Church, also of allowances to Roman Catholic Priests, in the Territories of the East India Company, in the year 1834 (the latest accounts received); showing the station of each Minister, and the amount of his salary and allowances; together with the total expense of each Presidency, and the aggregate amount of the whole.

Salary and Allowances of the Lord Bishop and Clergy, and Allowances and Contingencies of the Subordinate Establishments of Bengal.

XII. The Bank of Bengal (the only chartered bank in our Eastern possessions), established in 1809, by a charter from the Governor-General in Council, under Act of Parliament, is partly a private, partly a Government bank, regulated as a bank of discount and deposit, on the principles of the Bank of England, and confined in its accounts and transactions to Calcutta. The shares were in value 1.000l. each, and in No. 500; the Government holding 100, with power to nominate three Directors, while the proprietors elected six; the President elected by the Directors, and the proprietors voting by proxy. Natives may become Directors if chosen by the proprietors. Lately the No. of shares and their value has been increased. The premium on bank stock is about 50 per cent., and the average amount of dividend of late years nine to ten per cent. The accounts are public, and regularly laid before government twice a year, and of a paid-up capital of 5,000,000 rupees, part is vested in government securities, and the remainder employed in the trade of banking. It issues notes which vary in amount from 10 rupees to 20,000 rupees, there being no maximum or minimum limitation. The largest proportion is in notes of 100 rupees upwards; the average amount of its paper in circulation is 800,000l. which is all payable on demand at sight. The notes circulate among the natives as far as Behar, or wherever they are received in the Government Treasuries in receipt for revenue, &c. There are two restrictions upon the issue of paper money, the first practical, namely a reservation of cash equivalent to a fourth of its engagements pavable on demand, and the second, that the circulation of notes shall not exceed 2,000,000/. but there has scarcely ever been a demand for notes to half that extent. The Bank of Bengal has no monopoly, it is however the only chartered bank, i. e. it is a corporation, can sue and be sued under its common seal, and individual proprietors are not liable beyond the amount of their subscription; its other exclusive advantages consist in Government receiving its notes solely. The following return shews the balance of the Bank of Bengal, 29th June, 1833 :-

year the whole amount of bank notes, including those of the three private banks then in existence, was not greater than the present joint circulation of the Bank of Bengal and the Union Bank. The bank has lost considerably by bad debts and by forgeries, at which latter the natives are extremely expert. There is an establishment termed the Union Bank at Calcutta. suggested and aided in its formation by the author of this work: it is supported by the principal merchants, and quite unconnected with government. Another establishment called the Bank of India is now being formed at Calcutta. Madras has no bank precisely similar to that of Bengal: a bank is now being formed at Bombay. There can now scarcely be said to be any gold coin in circulation in Bengal, and the highest silver denomination is rupees, viz. those of Calcutta and Furruckabad. The Furruckabad R. weighs 180.234 grs. troy: Calcutta rupee 191,916 grs. troy. For practical purposes the Calcutta rupee may be valued as weighing 192 grs. troy, with 176 of silver, and the Furruckabad 180 grs. with 165 of pure metal. The Madras rupee, as established in 1818, consists of 180 grs. and contains 165 grs. of pure silver, and 15 grs. of alloy. The gold coinage is of the same weight and fineness as the silver, but the ratio between gold and silver is liable to be varied from time to time by Government proclamation. Bengal, Madras, and Bombay have each a mint, at which are coined rupees agreeing in standard and weight with the Furruckabad rupees, and the rupces of the three Presidencies are issued to the army at a nominal value, termed a Sonaut rupee. The gold coins that issue from the mint can scarcely be reckoned among the currencies, because the market value of gold having risen considerably above the mint value it has ceased to circulate at the prescribed or at any fixed rate. The gold mohur of Bengal weighs 204.710 grs. of which the fine gold is 187.651 grs.; the Madras gold rupee is of the same weight and standard with the silver, viz. 180 grs.; and at both Presidencies the relative value of gold to silver is fifteen to one, the Bengal mohur being reckoned equal to 16 rupees. A copper coin, weighing 100 grs. is current through the Bengal territories at the rate of 64 to 7 rupees, but it is a legal tender only for the fractional parts of the rupee; cowries or sea shells still circulate, and to a considerable extent in some provinces, but they are disappearing with the prosperity of the country.

A large mint has been established at Bombay for an uniform coinage, as there are a great number of different rupees current in the Deckhan, coined in different years, and having a marketable value, according to their value. The rates of exchange vary not only between Bombay and Poonah, but between district and district. Gold is not current in the Deckhan; there is no paper circulation; but native ' Hoondees,' or small bills of exchange, are numerous. The circulating medium is silver and copper, the relative value altering in favour of the latter; all their gold has been exported to England years ago. It would be well I think to issue Government notes (payable on demand in specie, and receivable at the Revenue Collector's office for taxes &c.) from each of the public treasuries, varying in amount from 50 to 500 rupees. This would be a safe and useful circulating medium. Ordinary interest of money with the natives nine, and with the European mercantile houses, five per cent. The bullion importation via Calcutta, from 1813-14 to 1831-32, is valued at S. R.35,58,37,644; from which, deducting the exports of bullion for the same period, S.R.6,53,96,544, leave bullion disposed of in the country, S.R.

29,54,46,100. The coinage of the several mints for the above term of 18 years was, Calcutta, S.R. 20,36,15,962; Benares, S.R. 8,82,36,359; Ferruckabad, S.R. 4,72,52,843; Sagur, S.R. 43,24,779. bad, S.R. 4,72,52,843; Sagur, S.R. 43,24,779. Making a total of S.R. 34,35,22,940, being an excess of one-fifth above the imports, or S. R. 5,30,76,840. The coinage of the native mints is estimated at one half of our own, which will give a total of S.R. 3,02,93,578, or three crores per annum for the Bengal Presidency, being 150,000 per diem for 200 working days

The total coinage of copper pice since 1801, bears a value in silver of 501 lakhs of S. R, which in tale is 321 crores for 31 years, or one crore per annum; thus adding 50,000 pieces to the daily work as above mentioned.

By a financial regulation of the Bengal Government (13th May 1833) it is enacted, that-

"The weight and standard of the Calcutta Sicca Rupee and its subdivisions, and of the Furruckabad Rupce, shall be as follows:

	Weight Grains.	Fine Grains.	Alloy. Grains.
Calcutta Sicca Rupee	192	176	16
Ditto half	96	88	8
Ditto quarter	48	44	4
Furruckabad Rupee	180	165	15
And its fractions in pr	oportion b	eing 1-12th	alloy.

The use of the sicca weight of 179.666 grains hitherto employed for the receipt of bullion at the mint, being in fact the weight of the Moorshedabad rupee of the old standard, which was assumed as the sicca currency of the Honourable Company's Provinces of Bengal, Behar, and Orissa, shall be discontinued, and in its place the following unit, to be called the Tola, shall be introduced, which, from its immediate connexion with the rupee of the Upper Provinces, and of the Madras and Bombay, will easily and speedily become universal throughout the British territories.

The Tola or Sicca Weight to be equal to 180 grains troy, and the other denominations of weight to be derived from this unit, according to the following scale:

8 Ruttees-1 Musha-15 Troy grains.

12 Mushas—1 Tola—180 ditto. 80 Tolas (or Sicca Weight)—1 seer—2½ lbs. ditto. 40 Seers-1 Mun, or Bazar Maund-100 lbs. Troy. At Calcutta the monies of account are as follows:

4 cowries (Cowrie is a small shell, plentiful on Eastern shores, particularly those of Africa; they are, however, fast disappearing from commercial transactions at the Presidencies, = 1 gunda=16 anas=1 S. rupee (20 gundas-1 punn-4 punns-1 ana) 16 S.R.-1 gold mohur. The usual accounts are 4 punns or 12 pice=1 ana-16 anas=1 S.R.=1 gold mohur.

At Madras there is a considerable variety of coins in circulation; accounts are kept thus, 80 cash=1 fanam; 12 fanams=1 rupee, and 42 fanams=1 pagoda, star or current pagoda worth 7s. 54d., commonly valued at 8s. The gold rupee, new coinage, 11. 9s. 21d., according to the mint price of gold in Arcot rupee (silver) and new ditto, England. 1s. $11\frac{1}{4}d$, and 1s. $11\frac{1}{2}d$ Copper pieces coined in England of 20 cash, called pice, and of 10 and 5 cash, called dodees and half dodees, are also current.

Bombay rupee divided into 4 qrs., each qr. being 100 reas; there are 2 reas in an urdee, 4 in a doog any or single pice, 6 reas in a doreea, 8 reas in a fuddea or double pice, 50 pice or 16 anas in the rupee, 5 rupees in a paunchea, and 15 rupees in a gold mohur. anas and reas are imaginary coins; the double and single pice, the urdeea and the doreca, are copper coins, with a mixture of tin or lead; the others are the gold mohur and silver rupee, with their divisions. The following is the assay and sterling value of the principal gold and silver coinage of Calcutta and Bombay.

	Gross Weight. Pure Metal.		Sterling Value.		
Calcutta. { Gold Mohur Sicca Rupees Furruckahad Gold Mohur Silver Rupee Madras. Rupee	Grs. 204.710 191.916 180.234 179.0 179.0 180.0	Grs. 187.651 175.923 165.215 164.69 164.68 165.0	2 0 6.25 1 11 8.25 1 9 0		

By the latest accounts from India, it was proposed to establish a new bank at Agra, and saving's banks were about to be set on foot under the sanction and superintendence of Government.

For a long period the flow of the precious metals was towards India; the current has now, however, changed, and the exportations from India to Europe of gold and silver has been yearly augmenting.

Net Import or Export of Treasure into and from India in each year, from 1813-14 to 1837 inclusive.

Further details on importation and exportation of the precious metals will be given in the Appendix.

List of the several Treasuries in India.—Bengal (Political.)— General Treasury, Lucknow, Gwalior, Indore, Nipaul, Nagpore, Delhi, South Behar, Bhopal, M. E. Frontier, Bithoor, Amherst, &c. P. W. Island, Singapore, Malacca.

Bengal (Revenue) — Burdwan, Backergunge, Beerbhoom, Bullooah, Chittagong, Dacca, Dinagepore, Hooghly, Jessore, Jungle Mehals, Mymensing, Moorshedabad, Nuddeah, Purneah, Rajeshahye, Rungpore, Sylhet, Tipperah, 24 Pergunahs, Behar, Patna, Bhangulpore, Ramghur, Sarun, Shahabad, Tirhoot, Hidgelee, Midnapore, Cuttack, Pooree, Balasore, Rungpore (N. E. Frontier), Sherepore, Lower Assam. Upper Assam, Arracan, Sandowee, Ramree, Benares, Ghazeepore, Juanpore, Allahabad, Futtehpore, Bareilly, Cawnpore, Etawah, Furruckabad, Goruckpore, Moradabad (S. D.), Ditto (N. D.), Shajehanpore, Agra, Allyghur, Saheswar, Bolundshhahur, Saidabad, Calpee, Delhi, (Centre Division), Ditto (N. Ditto), Ditto (W. Ditto), Ditto (S. Ditto), Ditto (Rohtack Ditto), Seharunpore, Meerut, Kumaon, Sangor, Huttah, Jubbulpore, Nusingpore, Seoree, Hussingabad,

Baitool, Reply, Rajpootana, Banda, Pilibheet, Deyrah, Moozuffernugger, Jaggernauth.

Madras (Political).—General Treasury, Masulipatam General Treasury, Travancore, Mysore, Hydrabad, Tanjore, Vellore, Paymaster of Stipends.

Madras (Revenue).—Ganjam, Vizagapatam, Rajahmundry, Masulipatam, Guntoor, Nellore, Chingleput, Arcot (N. Division), Ditto (S. Ditto), Bellary, Cuddapah, Coimbatore, Salem, Tanjore, Trichinopoly, Canara, Madura, Tinnivelly, Malabar.

Bombay (Political).—General Treasury, Baroda, Bushire, Bussorah, Mocha, Cutch.

Bombay (Revenue).—Southern Concan, Northern Ditto, Surat, Broach, E. Zillah N. of the Myhee, Ahmedabad, Kattywar, Poonah, Ahmednugger, Carnatic Candeish.

The treasure held in the several treasuries of the Company, under the Bengal Presidency, amounts generally to 3,000,000l., and under the subordinate Presidencies of Madras and Bombay, the amount fluctuates from 2,000,000l. to 3,000,000l. sterling. Before the breaking out of the Burmese war, from 10,000,000l. to 12,000,000l. stg. was collected by the Marquis of Hastings, in Bengal, for the purpose of paying off the debt. The accumulations of such large balances in the hands of Government has justly been objected to, as causing sudden and excessive fluctuations in the currency of the country. The amount of remittances from India to England is very great; being, first, the sum requisite to pay territorial charges in England, 3,000,000l.; second, a demand for remittance of private savings and family expenses, estimated at 1,500,000l.; and third, a return for the outward trade, 3,000,000l.; total, 7,500,000l. The annual drain on India in remittances to England on account of Government, is thought by Mr. Mills, of Auditor-general's department, to average 3,000,000/. a year for the last 30 years, which at compound interest for that period at the Indian rate of interest (12 per cent.) amount to 723,997,9711. sterling. Returns are made through the commerce of India and China, or of bullion from both countries.

List of the several Establishments of the East India Company in England, and the Salaries and Allowances payable by the Court of Directors in respect thereof, on the 1st May, 1837 (3 & 4 William IV., c. 85, s. 116). [Parliamentary Return, House of Commons, 30th June, 1837.]

Secretary's office: consisting of a secretary, deputy secretary, four assistants in the respective branches of minuting and correspondence, accounts, pay, and audit; 37 clerks, 1 clerk in charge of proprietors' room, 1 superintendent of extra clerks, 20 extra clerks, 4 writers, 1 assistant elder, and 10 messengers. In all, 80; salaries, &c. 36,8171.

Examiner's office: consisting of an examiner of India correspondence, an assistant examiner, first assistant, 3 clerks in the correspondence branch, 3 senior clerks, 8 clerks, 1 superindent of extra clerks, 1 registrar of India books and records, 8 extra clerks, 8 writers, and 8 messengers. In all, 43; salaries, &c. 17,1091.

Office of the secretary in the military department: consisting of a secretary, an assistant, 7 clerks, 7 extra clerks, 2 writers, and 4 messengers. In all, 22; salaries, &c. 8,3621.

Library and museum: consisting of a librarian (who is also Oriental examiner at the military seminary and the East India College), a keeper of the museum, and 1 messenger In all, 3; salaries, &c. 1,105l.

Clerk of the works and one messenger. In all, 2; salaries, &c. 3351.

Storekeeper's department: consisting of an inspector of stores, 1 clerk, 1 sub-inspector, 2 examiners of cloth, 4 journeyman cloth-drawers, 6 examiners and 2 assistant examiners of military stores, 1 bookkeeper, 1 examiner of stationery, 1 extra clerk and 4 writers, and 2 messengers. In all, 26; salaries, &c. 4,7831.

Tea warehouses: consisting of an assistant warehouse-keeper and 3 clerks, 1 elder, 2 assistant elders and 2 deputy assistant elders, and 9 writers. In all, 18; salaries, &c. 4,6351.

Bengal warehouse: consisting of a warehousekeeper, 2 clerks, 3 assistant elders, and 1 writer. all, 7; salaries, &c. 3,0901.

Private trade department: consisting of a warehouse keeper, 2 clerks, 2 elders, 1 assistant elder, 1 deputy assistant elder, and 6 writers. In all, 13; salaries, &c. 3,8701.

Pepper and saltpetre warehouses: consisting of 1 chief clerk, 1 clerk, and a deputy assistant elder and 2 writers. In all, 5; salaries, &c. 1,580l.

Standing counsel, 1; salary, &c. 5001.

Solicitor, 1; salary, &c. 500l.

Examining physician, 1; salary, &c. 470l.

Examiner of veterinary instruments, 1; salary, &c.

Geographer, 1; salary, &c. 100%.

Chaplain to Poplar hospital, 1; salary, &c. 1001.

Door-keepers and court-room messengers, 6; salaries, &c. 1,4151.

Door-porters, messengers, and fire-lighters, 25; salaries, &c. 2,3801.

Fireman, 1; salary, &c. 1301.

Waterman, 1; salary, &c. 701.

Housekeeper and assistant, 2; salaries, &c. 180/.

Chairwomen, 8; salaries, &c. 2911.

Crier at sales, 1; salary, &c. including allowance to acting auctioneer, 2201.

East India College: consisting of 10 professors and 33 public servants. In all, 43; salaries, 6,8421.

Military seminary: consisting of a public examiner and inspector, a lieutenant-governor, 20 professors, assistant professors, masters and staff officers, and 35 non-commissioned staff and public servants. In all, 57; salaries, &c. 8,9351.

Military depôt at Chatham: consisting of 5 officers and 21 non-commissioned staff. In all, 26; salaries, &c. 3.620L

Recruiting districts: consisting of 4 officers and 15 non-commissioned staff. In all, 19; salaries, &c. 2,3661.

Total number of persons employed, 414. Total salaries, &c. 109,9251.

A brief view of the Indian debt will next be requisite. In the early period of British connexion with India, the territorial revenues of the country probably aided commerce, in the latter period commerce undoubtedly aided territory, and for 15 years the Presidencies of Madras and Bombay have had an India was at four different periods, thus-

annual deficit of the sum requisite to meet political charges. The Indian Government was, therefore, obliged to have recourse to borrow a sufficiency to meet the deficit which the commercial profits of the tea trade failed to supply; and the territorial debt of

 Principally composed of the loans and treasury notes. * Principally composed of the loans and treasury notes, it Not bearing interest, and consisting for the greater part of arrears of salaries and allowances due to civil odicers; of pay due to the military (who in Bengal are kept two months in arrear always), and of deposits.

Of the whole interest of the Indian debt. 927.0001... is subject to the option of having the interest payable in England, and in 1830 the sum of 450,000l. was actually demanded: the average rate of interest was

six per cent. in 1814, and five per cent. in 1828.

Of this Indian debt, that of Bengal is the principal, the fixed or registered debt of which, with the relative proportion held by Europeans and natives was, in 1830 and in 1833-

Of the first or six per cent. remittable loan, the principal, when repaid, was demandable in bills on England at the rate of 2s. 6d. the Sicca rupee, the interest being intermediately payable half-yearly, either in cash in India, or, if the proprietors resided in Europe, and demanded it in that form, by bills at the rate of 2s. 1d. This loan has been recently paid off. The other loans, both principal and interest, are demandable only in India; but to the holders of the second (five per cent. of 1823), an option was given of receiving their interest (which is payable half-yearly) in bills at the rate of 2s. 1d. (subsequently reduced to 1s. 11d.), during the pleasure of the home authorities. The third and fourth | the Indian debt in 1809 and in 1827 :-

loans have the interest thereon paid quarterly to all holders wheresoever resident, either in cash or in bills, at the rate of 2s., during the pleasure of the home authorities. The five per cent. loan of 1823 is repayable only by annual instalments of one and a half crore of rupees; the notes first entered in the register having the advantage of being least liable to discharge. The whole debt is now fully recognised by the Legislature, and the remittable loan paper bears a premium in the Indian market of from 30 to 40 per cent., and consists solely of the debt of 1822, viz. 7,47,38,700 rupees.

The following is a detailed comparative satement of

Debt, in Sicca Rupees, on the 30th of April, 1809.

				29,75,38,029	10,01,26,576	39,76,64,785

The debts of India in 1833 were as follows. Debts bearing interest: Bengal, about 32,000,000l.; Madras, 3,000,000l.; Bombay, 630,000l. Not bearing interest: Bengal, 8,000,000l.; Madras, 700,000l.; Bombay, 300,000l. The five per cent. loan is the principal debt: it amounts in Bengal to 18,000,000l.; and in Madras to 2,500,000l.; in Bombay, none. The Treasury notes issued by the Bengal Government amount to 700,000l.

The home bond debt of the E. I. Company, amounting to 3,400,000l., is composed of securities issued by the Company under their common seal, Parliament having authorised their borrowing money to a certain extent, and limiting its subsequent reduction to 3,000,000l. The rate of interest paid in 1831 on this debt was two and a half per cent.

An Account of the Public Debts, bearing Interest, outstanding at the several Presidencies in the East Indies, on the 30th April, 1835; also of the Rates and Annual Amount of Interest payable thereon. (Commons Parliamentary Paper, 19th December, 1837, No. 51.)

By the new E. I. Charter the Company's trade is placed in abeyance, and their whole assets, amounting to upwards of 21,000,000*l*. sterling, appropriated to the India territory, excepting 2,000,000*l*. to be invested as a sinking fund for the redemption of the capital stock of the E. I. C. proprietors (6,000,000*l*.) on the termination of 40 years, at the rate of 5*l*. 5s. for every 100*l*. stock; the remainder of the assets, as soon as realised, is to be appropriated, after payment of pensions and other charges arising out of the new arrangement, towards the liquidation of the six per cent. remittable loan, which amounts to about 9,000,000*l*. sterling.

The additional charges on the revenue of India by the new E. I. Charter (3 and 4 William IV. c. 85.) are thus stated in a Parliamentary return, No. 72, ordered to be printed 23d March, 1835.

Salaries of the Governor-General and Council, formerly S. rupees 537,000 now (by the late Act) S. R. 624,000; increase R. 87,000; new Government at Agra, the chief there of S. R. 120,000; other expenses, 300,000; total, R. 420,000. Increase of salaries of the other Governors and members of Council, on a scale which will cause a net increase, of R. 12,000. Total of Government increase, S. R. 519,000. Increased expense of Ecclesiastical establishment, R. 10,000; ditto on account of law commissioners, established at R. 800,000; grand total of estimated new and increased charges, S. R. 829,900.

Revenues and Indian Charges* (independent of the home expenses) of each Presidency.

1836 1837	Accounts n	ot made up f	or a later p	period than	1835–36.				1	

* In the above statement, from the year 1828, the allowances and assignments payable to Native Princes, and others under treaties, amounting to upwards of a million and a half per annum: and the charges of collecting the revenue, including the cost of the opium and salt, amounting to upwards of two millions and a half more, have been excluded in order to arrive at the real produce of the revenue.

In the tabular statement, down to the year 1827, the gross revenues are shewn; and the rate of converting the Indian money into sterling is 16 per cent. higher than the rate at present used.

These alterations in the system of drawing up the accounts of the Indian finances, were suggested by Mr. James Carme Makvill, the Carmen with the next at a respective under the New Charter Act, and agree

Cosmo Melvill, the Company's Financial Secretary, in the late arrangements under the New Charter Act, and sanctioned by the Court of Directors and the Commissioners for Indian Affairs.

† Deficit of 852,217/.

As considerable interest is felt in this country for | what is called the "Pilgrim Tax" on idolatrous worship in India. The following statement, derived from official sources, is given in the Gyannaneshum, published at Calcutta.

By Reg. XII. of 1835, Government bound itself to continue the established donation for the support of the temple of Juggurnauth, and with a view to the exclusion of European interference, and the better management of the internal affairs of the temple, the superintendence of that edifice is, by Reg. IV. of 1809, vested in the Rajah of Khoordah. In 1808. during Lord Minto's administration, this donation was, after a review of the expenses incurred by the preceding Government, fixed at about Sa. Rs. 55,000. and as the priests of the temple represented their inability to procure the woollen cloths necessary for the ruths, Government, in conformity with the practice of the soubadar of Orissa, engaged at the same time to furnish that also, which was accordingly done, up to the abolition of the Company's warehouses in 1830, when a sum of about Rs. 1,000, was agreed to be paid in lieu. The lands granted by preceding Governments for the support of the temple, yield about Rs. 21,000 per annum; the balance, therefore, of Rs. 36,000, has to be made good from other sources. For the first two years after our acquisition of the Cuttack district, no tax on pilgrims was levied at Pooree. Since that period, the expenses of the temple have been defrayed by a tax on the pilgrims resorting to that shrine; and as it is a matter of curiosity to compare the sums collected by Government

at three celebrated places where a tax on pilgrims is imposed, we here subjoin a statement up to 1830, of the gross collections, expenses, and receipts of the tax at Juzgurnauth. Gyah, and Allahabad.

^{*} The years 1835-36 are, so far as completed, derived from Mr. Porter's tables, which state the quantities retained for home consumption. The previous years are from the Custom House.—R. M. M.

⁺ Shellac only.

Imports into Great Britain from all Places Eastward of the Cape of Good Hope (except China)—continued.

Notwithstanding the great efforts made, since 1814, to procure extensive supplies from the Eastern hemisphere, and although several new islands and stations have been made marts of commerce by British merchants, we perceive a stationary or declining trade in almost every article of Eastern production; whereas the supplies from the territories of British India alone ought to have shewn an immense increase. Had it not been for the supplies received from Sincapore, Ceylon, Java, Australasia, and the whole Pacific and Indian Ocean, a vast decrease would have been seen in this table.

Total Value of the Imports into Great Britain from all Places Eastward of the Cape of Good Hope (except China), according to the Prices at the East India Company's Sales in the respective Years.

In the ensuing tables the interior trade of Bengal, Madras, and Bombay will be shewn. From 1812 to 1829, the returns were prepared for Parliament in 1832; the subsequent years were collated by myself and my assistant at the India House. Although the data are not as ample as could be wished, they present full scope for the reflecting mind of a philosophic or merely commercial statesman.

Quantity or Value of each Article of Indian Production or Manufacture at the Port of Calcutta, from the Interior of the Presidency of Bengal.

In few or none of the above articles do we perceive any indication of an augmenting supply of the staples of Indian produce. Cotton was larger in amount 20 years ago than at present. So also as regards indigo, lac, ghee, jagree, &c. If returns could be had for all articles a similar decline would be seen. The commerce of India was larger in amount and more valuable 40 years ago than it is at present.

HINDOSTAN.-INTERIOR COMMERCE OF BENGAL.

Quantity or Value of Articles of Indian Production or Manufacture received at Calcutta, from the Interior of the Presidency of Bengal—Continued.

		١				•	٠. '		'		. '		. '	1	

The statement given in this and in the preceding page is most important; it is an accurate list demonstrative of the stationary if not retrograding condition of the people of Bengal, during a period of a quarter of a century. The piece goods column deserves attention. The quantity of sugar received at Calcutta was larger 15 years ago than it is at present: so also with silk, saltpetre, tobacco, &c.

HINDOSTAN.-INTERIOR COMMERCE OF BENGAL.

The Quantity, or Value of each Article of Foreign Production or Manufacture (including the Productions and Manufactures of the United Kingdom), sent to the Interior of the Presidency of Bengal, from the Port of Calcutta, in each year.

Notwithstanding increased territory and population (since 1812) there has been a diminished and stationary export to the interior of Bengal, naturally corresponding with the preceding tables. Cottons whereby we have supplanted the native manufactures have alone augmented: broad cloth on which no duty is levied has diminished.

The Quantity or Value of each Article in India Production or Manufacture received at the Port of Madras, from the Interior of the Presidency of Fort St. George.

I have not been able to find any returns at the India House further back than 1824-25; a decrease in almost every article is observable in this brief period. Later as well as earlier returns would shew a more marked difference.

There were no returns at the India House (for 1836 and 1837) which would enable me to give the quantities of the Bombay Trade, as has been done under the heads of Calcutta and Madras. Neither does this return specify what portion of the above mentioned articles were received by sea and what portion from the interior; the piece goods and cotton twist were evidently from England, and in these alone is there an increase at the expense of the native manufacturer.

In a work of this nature, it would be impossible to enter more fully than I have already done into the detail of Indian commerce, but before closing so important a section, it will be necessary to shew the large trade carried on between Bengal, Madras and Bombay, and the Eastern Islands; the articles in

Trade between India and the Eastern Islands .- | traffic at present are British and India piece goods,

Commerce between Bengal, Madras, and Bombay, and the Eastern Islands.

1817-18	3692	80,43,197			

This table is from Mr. Phipps's book, with additions (in the number of seasons) from other sources. It may not be perfectly correct in all the details, but is, doubtless, very near to the truth. We have omitted to insert the fractions in the average cost of each year. The value of the sicca rupee varies; it is about 46-100ths of a dollar, or two shillings sterling.

Shipping between Canton, Calcutta, Madras and Bombay, &c.

On this and on the annexed page I have given a table prepared by my assistant, Mr. Frederick Medley, from the official documents at the East India House, which shows the whole trade,—imports and exports at the three Presidencies, and in the aggregate for 34 years. The work has been one of great labour, but it is also of much value.

Exports of Merchandize and Treasure from Calcutta, Madras, and Bombsy: and grand total Imports and Exports of Merchandize and Treasure from all British India.

With every possible accuracy that the books of each Presidency afford, I have caused the above table to be prepared: it shows an increased export, but a nearly stationary import trade for all India. The treasure imported and exported is worth examining.

British Shipping entering the Ports of Calcutta, Madras, and Bombay.

Statement of the Opium exported from Calcutta, to China, to the ports in the Indian Archipelago, and to Europe, from 1795 to 1835.

The eastern ports are intended to include all those between the capes (Cape of Good Hope and Cape Horn), and the western, those beyond them. This estimate does not show the exact quantity brought to China, the table being very incomplete.

Quantity of Malwa Opium exported from Bombay and Damaun to China, from 1821 to 1836.

Seasons.	Chests from Bombay.	Chests from Damaun.	Total amount of Chests.	Average Bombay Rupees.

It is now time to close this array of figures, which, however monotonous, is indispensable to shew the valuable commerce which British India carries on-a trade which, however vast at present, is not a tithe of what it may become by England adopting a just and generous system towards the intelligent and industrious myriads so mysteriously subjected to her sway; so long as the two countries are united their interests are identified, and a partial or temporary benefit snatched at by the one will be certainly succeeded by the punishment, which sooner or later overtakes injustice.

The produce of the United Kingdom is admitted into the ports of India at a very low rate of duty. The following are the rates of duty chargeable on goods the produce or manufacture of the United Kingdom, imported by sea into Calcutta:-

Rates of Duty on Commerce at Calcutta.

		Enu	mera	tion	of Go	ods.				Briti	sh B	oti	tom.		Foreign Bottom.

16=1 seer - 10=1 maund.

Two maunds in use; the factory maund, 74 lbs. 10 oz. 10.666 drs. avoirdupois; the bazar maund, 82 lbs. 2 oz. 2.133 drs.

Liquid Measure. - 5 siccas - 1 chittuck, 4=1 pouah or pice, 4=1 seer, 40=1 maund, or 5 seers=1 pussaree or measure, 8 measures=1 maund.

Grain Measure.- 4 khaouks=1 raik (or 9 lbs. avoirdupois), 4=1 paillie, 20=1 soallie, 16=1 kahoon (1 kahoon=40 B. maunds.)

Long Measure. - 3 jows (or barley corns) = 1 finger, 4=1 hand, 3=1 span, 2=1 cubit, 4=1 fathom, 1000 = 1 coss (1 coss=1 mile, 1 furlong, 3 poles and 3½ yards).

Square Measure. - 5 cubits or hauts=1 chittuck (45 English square feet), 16=1 cottah, 20=1 biggah (14,440 square feet), $3\frac{1}{2}=1$ English acre.

Gold and Silver.- 1 punkhos=1 dhan (a grain), 4 =1 rutty, $6\frac{1}{2}$ =1 anna, 16=1 tolah,=224.588 grs. troy; or 8 rutties=1 massa, 13.28=1 mohur.

MADRAS-Commercial.-Candy=20 maunds. The candy of Madras 500 lbs. avoirdupois. The maund divided into 8 vis, 320 pollams or 3200 pagodas (the vis being divided into 5 seers), each pagoda weighing 2 oz. 3 grs. The Commercial Dictionary, from which this statement is taken, observes: the garce=20 baruays or candies-the baruay=20 maunds-the maund=8 visay or vis, 320 pallams or 3200 varahuns, the varahun weighing 523 English grains; therefore, the vis is 3 lbs. 3 oz.; the maund, 24 lbs. 2 oz.; the baruay, 482 lbs.; and the garce, 9645 lbs. avoirdupois, or nearly 4 tons 6 cwt.

Measures of Capacity.-The garce corn measure contains-80 parahs=400 marcals,-the marcal=8 puddies=64 ollucks. The marcal=750 cubic inches =27 lbs. 2 oz. 2 drs. avoir. of fresh spring water; hence 43 marcals=15 Winchester bushels, and the garce nearly 17½ English quarter. Grain, when sold by weight, 9256 lbs.=1 garce=18 candies=12 4-5ths maunds.

Bombay-Commercial. -1 tank=2.488 drs., 72= 1 seer, 40=1 maund=28 lbs. avoirdupois.

Grain.-2 tipprees=1 seer, 4=1 pailie, 7=1 parah, 8=1 candy=156 lbs. 12 oz. 12 drs.

Salt.— $10\frac{1}{2}$ adowlies=1 parah, 100=1 anna, 16=1 rash=2,572,176 cubic inches (40 tons; the anna weighs 2½ tons).

Pearl Weight.-1 tucka=0.208 gr., 133=1 ruttec, -24=1 tank=72 grains.

Gold and Silver.-1 wall, 4.475 grs., 40=1 tolah =179 grains.

Long Measure.-16 tussoos=1 hath=18 English inches; 24 tussoos=1 guz=27 English inches.

Liquor Measure.—The seer weighs 60 Bombay rupees=1 lb. 8 oz. and 81 drs., and 50 seers=1 maund.

XIV. The products of Hindostan are as various as they are valuable. Mr. Forbes Royle, in his interesting and valuable botanical Indian work, justly observes, "In the peninsula of India and in the neighbouring island of Ceylon, we have a climate capable of producing cinnamon, cassia, pepper, and cardamoms. The coffee grown on the Malahar coast is of so superior a quality as to be taken to Arabia and re-exported as Mocha coffee. The Tinnivelly senna brings the highest price in the London market; and there is little doubt that many other valuable products of tropical countries may be acclimated, particularly as several are already in a flourishing condition in the botanic garden at Calcutta, such as the cocoa and nutmeg, as well as the camphor, pimento, cajeput,

XIII. Bzngal.—Weights.—5 siccas—1 chittuck— | and cashew nut trees. In the Neilgheries a favourite site might, without doubt, be found for the cinchona (Peruvian bark) as well as for the different kinds of ipecacuanha, and as the potatoc has been introduced into almost every part of India, equal success and considerable benefit would probably result from introducing the several kinds of arracacha so much prized for their roots as food by the natives of South America.

" Along the coast of the Bay of Bengal the cocoa and areca nut palms flourish and abound, and the continent every where produces indigo, cotton, tobacco, sugar, and opium. The first, hardly of any note as an Indian product 30 years ago, is now imported in the largest quantities into England. The cotton is indigenous to India; many provinces seem peculiarly adapted for its culture, particularly Malwa and those to the north-west. The tobacco brought home by Dr. Wallich from Martaban was pronounced by competent judges to be equal to the best from America: Patna opium is preferred in China, and that of Malwa bids fair to rival Turkey opium in the European market. The sugar cane is cultivated in every part of India, but very inferior sugar has hitherto been produced; lately, however, a manufactory has been established near Calna (Burdwan), a new mine opened in the Burdwan coal formation, and very superior specimens of sugar gent home. Here the occurrence of sugar at the surface of the soil, and coal only a few feet below it, in a country where labour is so cheap, ought to be attended with decidedly favourable results. If from these we turn our attention to other products, we shall still see that there are great capabilities every where; we should at least expect them, for though India is generally looked upon as a rice country, wheat is imported into and sold at a profit in England, from the northern provinces; and flour for making starch is now one of the annual exports from Calcutta. Of dyes, medicinal drugs, resins, gums, and oils, there are great varieties, and more might be successfully introduced.

"Timber of every kind is everywhere abundant, the coasts producing teak, ebony, and many others; the interior, saul, sissoo, bamboos, and rattans; while a great variety of plants yield excellent materials for cordage. The northern and hill provinces grow at one season European grains, and at another those which are peculiar to the tropics, and many perennials of both these climates succeed equally well in the north provinces. In the hill provinces the forests are formed of oaks and pines. The hill men make their strongest ropes for crossing rivers with hemp, which every where abounds, and is of the finest quality. Opium, rhubarb, and turpentine, form articles of commerce, as well as musk, Thibet wool, and borax, from the other kingdoms of nature. Somewhere in the vallies at the foot of these hills, or at moderate elevations, the more generally useful productions of European countries might be successfully introduced, as the olive and hop; the latter would be particularly beneficial, as a brewery has been established in the hills, where the climate is excellent. Here also there is considerable prospect of success in the cultivation of the tea plant."

"In the cold seasons," Mr. Royle continues, "there are cultivated (about Saharunpore) of gramina, wheat, barley, oats, and millet; of the legumina, peas, beans, vetch, tares, chick, and pigeon-peas; of crucifere, a species of sinapis (mustard) and allied genera cultivated for oil seeds, and of the umbelliferes, the carrot, coriander, cummin, a species of ptychotis and fami-

culum pannorium, as well as of other tribes, tobacco. flax, safflower, and succory. Almost all the esculent vegetables of Europe succeed remarkably well in the cold season in India. In the rainy season, a totally different set of plants engage the agriculturist's attention, as rice, cotton, indigo, maize; holcus sorghum, species of panicum, paspalum, and elusinæ, of legumina, species of phaseolus and dolichos; many of the cucurbitacea, as well as sesamum and the species of solanum for their esculent fruit." In another place, this scientific botanist observes, "As we have seen with perennials of other kinds, so is it with those yielding fruit of an edible nature. Many, both of tropical and temperate climes, succeed nearly equally well in the northern parts of India; so that taking Saharunpoor garden (lat. 30º N., long. 77.32, elevation above the sea 1,000 feet, and 1,000 miles N.W. of Calcutta) as an example, we have collected in one place and naturalized in the open air the various fruit trees of very different countries, as of India and China, Caubul, Europe, and America. Of those belonging to hot countries, we have the plaintain, custard apple, shaddock, orange, lemon, guava, mango, tamarind, and others, which are common to every part of India. Of Chinese fruits, the lechee, loquat, longaro, scampee, flat peach and digitated citron, are perfectly naturalized. Of fruit trees from more northern countries, as Caubul and Cashmere, and from the hills of Europe, there are the almond, peach, nectarine, and apricot, plum, pomegranate, grapevine, apple, pear, quince, mulberry, fig, and walnut. Of useful trees of cold countries which thrive in what any manufactured by Europeans.

is at some seasons so hot a climate, pines, oak, maple, dog-wood, service tree, holly, juniper, and box. American trees, besides those first enumerated, the logwood, mahogany, parkinsonia aculeata, and acer negundium, may be instanced as perfectly naturalized. (See large edition of the "History of the Colonies" for a minute description of the principal forest trees of India.)

Indigo, from time immemorial, has been cultivated and manufactured in Hindostan, and in 1665 it was one of the exports from India to England. The E. I. Company's servants turned their attention to it about 40 years ago, and its successful prosecution has been principally owing (after the circumstance of the destruction of St. Domingo, which, previous to its revolution, supplied nearly the whole world) to the small duty levied on its importation into England, the duty at first being little more than nominal: in 1812, $1\frac{1}{2}d$. per lb.; in 1814, $2\frac{1}{2}d$.; and in 1832, 3d. per lb. Its importance to India may be judged of from the fact, that in the Bengal Presidency the cultivation of indigo is carried on from Dacca to Delhi, occupying upwards of 1,000,000 statute acres, yielding an annual produce worth from 2,000,000l. to 3,000,0001. sterling, whereof one-half, or perhaps more, is expended in India for rent, stock, wages, interest on capital, &c. There are from 300 to 400 factories in Bengal, chiefly in Jessore, Kishnagur, and Tirhoot. The factories are principally held by Europeans; but many natives have factories of their own, and in several instances produce indigo equal to

Number of Indigo Factories in the several Districts under the Bengal Presidency; also, the Number of European Indigo Planters, Proprietors of Estates, and the Number of European Assistants resident in the several Districts under the Bengal Government.—1832.

The low price which indigo now brings in Europe is diminishing the quantity produced, the exportation some years being 9,000,000 lbs.; the recent failures in India will tend to bring the trade within more

profitable limits. The cultivation of Indigo in Madras is trifling. There is little or none prepared in the Bombay Presidency. The Indigo produced annually in the East Indies from 1811 was :-

1817	20500	1824	24100	1831	30000		ļ

The quantity of Indigo imported, in 1834, was 4,155,296 lbs.; re-exported, 3,928,226 lbs.; home use, 2,447,827 lbs. 1835, imported, 4,168,395 lbs.; re-exported, 4,074,598 lbs.; home use, 2,590,606 lbs. 1836, imported, 7,710,544 lbs.; re-exported, 3,691,951 lbs.; home use, 2,840,398 lbs.

The price of indigo per chest in London was, in 1824, 1111.; in 1825, 1401.; and in 1831 but 451.; the supply now exceeds the demand, at least in England; but the consumption of Bengal indigo is fast augmenting in France, Holland, Germany, &c.

Silk forms the next most important staple of India, and in conjunction with the former, its production in our own territories is of essential advantage to silk and tabbinet manufacturers in England. The total quantity of raw silk imported into England for 1834 was 3,693,512 lbs.; and the quantity furnished by British India alone to England in the same year was 1,203,658 lbs.

Three species of mulberry trees are cultivated in India, and two species of silk-worm (the country worm, and the annular Italian, or Chinese worm); the latter feeds also on the castor oil plant leaf. The silk is produced in cocoons by the ryots or small cultivators, to whom the E. I. Company's agents make advances; and the Company have 11 or 12 filatures or large factories for reeling it with machinery on the simple Italian principle. The Gonatea is the best, the Bauleah the worst. The price of silk has risen in India with the wages of labour, and some manufacturers say the quality has deteriorated; probably quantity has been more attended to than quality. The

silk districts of Bengal are, Radnagore, Hurripaul, Santipore, Cossimbuzar, Bauleah, Comercolly, Sardah, Jungypore, Mauldah, Rungpoor, Sunna-Meekhi, and Gonnatea, all between the parallels of lat. 22° and 26°, and long. 86° to 90°.

The superior quality of Italian silk does not demonstrate natural inferiority in that of India, for bales of E. I. to which attention has been paid have sold equally well with Italian silk. Efforts are now making in the Bombay Presidency to extend the production of raw silk, and the commencement promises success; we may therefore look forward to a period when we shall be totally independent of every other country for the raw staple of this essential and beautiful branch of our national manufactures.

Cotton, a staple of Indian Agriculture and of British manufactures, well deserves attention, were it only for the important circumstance that our chief branch of trade is almost totally dependent on a rival, (and with little provocation) perhaps a hostile state. The importation of American cotton into England is nearly 300,000,000 lbs. yearly, that of India not the one twentieth part of British consumption. If we can be made independent of France and America for indigo and silk, so can we become also of cotton, India producing in itself every variety; the justly celebrated sea island cotton is actually in cultivation in several parts of India, but owing to neglect it degenerates into an annual, whereas in America it is carefully cultivated as a triennial plant. The Dacca muslins, so celebrated all over the globe, (and of which the manufacture is now lost, owing to the inundation of Manchester goods), were made from India cotton, and if the late duty had been kept on American raw cotton, sufficient encouragement would have been given to the Hindoos to attend to its cultivation, as it is we have not only ruined the Indian manufacturer, but in return we have offered no encourage-ment to the raw producer. The cotton grower in India ought to be stimulated to greater efforts on examining the consumption of cotton wool in Eng-

As the surest means of inducing a more careful attention to India cotton, both in the cultivation, cleaning and packing, a removal of the entire duty on importation into England would be most effectual, coupled with an absence of all transit dues in the East.

That England has nothing to fear from admitting the cotton manufactures of the Hindoos to British markets, at a juster rate of reciprocity than is now practised—that is 30l. per cent. in England, against the Hindoo, and but $2\frac{1}{2}$ per cent. in India, against the Englishman is evident, from Mr. Kennedy's statement before the Parliamentary Committee, viz. that one spinner by machinery, in Britain, will produce yarn at one-fourth the price that it costs for the same quantity of workmanship in India, supposing the wages of the former to be 1s. 8d. and of the latter 2d. per day.

Mr. Kennedy's statement was thus corroborated by figures, which shew that, in addition to onerous duties in England on the Hindoo weaver, the latter was less liable to contend with the former, by reason of the rapid fall of English prices.

Comparison of the cost of labour in producing yarns in Britain and India, for one pound weight, from No. 40 to 250, and likewise of the value of the labour and material combined.

Sugar may be cultivated and manufactured to an extent in India sufficient to supply the whole world; its production at present is immense, as it forms an ingredient in almost every article of food or drink used by the Hindoos, and where the manufacture is attended to as at Benares, the grain is large and sparkling and pure as the best Mauritius or Demerara sugar. The soil and climate of Bengal, Madras, and Bombay are peculiarly suited to the production of this essential nourishment to man; every village has its patch of cane, and a rough manufacture named Jaghery is extracted from the Palmyra and cocoa-nut tree. It is in evidence before Parliament, that the sugar cane of Bengal is as good as any of the West Indies, and some of a superior quality has been produced. In the Appendix, page 2, will be found the quantities of sugar exported from the E. I. possessions since 1816.

Coffee next deserves consideration as an Indian staple, and which like the last article only requires just treatment in England to become one of the most valuable exports. In Malabar, Coimbatore, &c. the cultivation is extensive, and the berry of the finest flavour when attended to in the drying. Upper Bengal and the territories acquired from the Burmese, are peculiarly adapted for the growth of coffee.

The following returns shew the quantity of coffee imported from the East Indies into Great Britain,— re-exported and retained for home use for 15 years; the return includes Ceylon, avg. 2,824,998 lbs. Singapore, 3,611,456 lbs. Mauritius, 26,646 lbs. Sc. From Bengal, Madras and Bombay alone for 1831, 2,780,668 lbs.

East India Coffee (including Mauritius in 1835 and 1836) Imported into the United Kingdom.

* The quantity of opium shipped from Calcutta in 1795-6, was 1,070 chests, and in 1829-30, 7,443 chests. The total quantity of opium exported from Calcutta during the former year was 5,183 chests, and during the latter, 9,678 chests; the grand total exported during the whole 35 years was 162,273 chests, which, at the average rate at which it sold, 1,200 dollars a chest, would give a trade in this stimulating drug of nearly two hundred million Spanish dollars !

Malwa opium is considered by the Chinese as | having a higher touch, but not so mellow, nor so pleasant in flavour as the Patna opium. The smokeable extract which each quality of opium contains is thus intimated by the Chinese,—(who use opium as we do wine or spirits) Patna and Benares opium 45 to 50 touch; avg. 48; Malwa 70 to 75; avg. 72½; Turkey 53 to 57; avg. touch 55. The cultivation of opium in India, as explained under the chapter in revenue, is a monopoly as regards Patna and Benares in the hands of Government; and a revenue is derived from the Malwa opium by a system of passes on shipment from Bombay.

Estimate of Quantity and Total Value of Indian Opium consumed in China during the 6 Years ending in 1832-33.

Years.	Patna.	Benares	Malwa.	Total.				
	Chests.	Chests.	Chests.	Chests.	Amount.			
					8. Rs.

importations of 1815 and 1816, being 17,863,847 lbs., and in 1827 and 1828, but 14,045,868 lbs. being a decrease of nearly 4,000,000 lbs. weight

Saltpetre is yielded by the Indian soil in greater abundance than any other country, its importation into England by the East India Company in 1814, was 146,000 cwt., but the continuance of peace has much lessened both the price and consumption; both are now again on the rise, but the price is still so low that the saltpetre collected in the East is now being brought to fertilize the fields of Albion. The import of late years of saltpetre from Bengal has been about 100,000 bags, but the total quantity exported from Calcutta, has averaged 170,000 bags, while in the year 1795, it did not amount to more than 13,000 The total quantity exported from Calcutta during the thirty-five years ending 1829 30, was 2,202,465 bags, of which the United Kingdom received 1,523,655 bags; North America, 278,895 bags; France, 101,237 bags; and China, 1,333,615 bags.

The Tobacco of Masulipatam, made into snuff, is much prized in England; the quantity of tobacco grown in India is enormous; every class, high and low, use it, and if the duty were reduced in England, the variety of soils in India would afford an infinite variety of that fascinating weed for the British market. Very rich lands produce about 160 lbs. per acre of Pepper is another valuable ludia staple, but its green leaf; excellent Havannah tobacco is grown in import from the East has considerably fallen off, the Guzerat, Boglipoor, Bundlecund, &c., and some from

the Irrawaddy territories has been reported by the brokers in London as equal to the best American. The want of proper attention in the curing has been a great obstacle to its arriving in a marketable state in England after a long East Indian voyage. Tobacco, like hay, must undergo a heating to be fit for use, and the slightest particle of green vegetable matter left in the tobacco heats on the voyage, destroys the delicate flavour of the leaf, and even rots it. Experiments are now making at Bombay in the curing process. The duty on E. I. tobacco might, without loss to the revenue, be reduced from 2s. 9d. to 2s. at least.

Grain is one of the staples of Bengal; the total quantity of grain exported from Calcutta to countries beyond the three Presidencies, amounted during the thirty-five years, ending 1829-30, to 12,366,571 bags; for the latter years the export has been on the increase, averaging 600,000 bags a year, and of this quantity Mauritius has of late taken nearly one-half, for instance in 1828-29, 332,756 bags. Great Britain has received, during the whole thirty-five years, 1,730,998 bags; and the export to France is yearly increasing.

Tea of excellent quality, rated by the London brokers at 1s. 10d. per lb., which is equal to the Chinese Congo, is now being prepared in Assam, and will doubtless ere long be a large and valuable article of export.

Silkworms are found in Bengal, and towards the north of Poonah in the Dekhan (see Dr. Roxburgh's paper on the silkworms of Bengal, in the seventh volume of the Transactions of the Linnæan Society; and Colonel Sykes' account of the Kolisurra silkworms in the Dekhan, Transactions of the Royal Asiatic Society, vol, iii. p. 541, &c.)

Iron, copper, lead, antimony, plumbago, zinc, sulphur, silver and gold, together with inexhaustible supplies of coal, abound in various parts of the country. Boglipoor district is peculiarly rich in iron; and about Pointy and Siccary Gully, very large mines have been worked in former times: the ore is nodular, and yields from twenty to twenty-five per cent. iron. The Sylhet hills produce in the greatest abundance fine granular iron ore like sand. At a meeting of the Bengal Asiatic Society, 20th February 1833, specimens of copper ore from Nellore, were presented on the part of Mr. Kerr. The mines appear to lie to the northward of the Pennar river, 36 miles N. N. W. of Nellore, and thirty-seven west from the sea, near a village called Ganypenta in Arrowsmith's map. Coal (see Geology) is now raised in Burdwan in considerable quantities, and it is preferred for the steam vessels at Calcutta, to European or New South Wales coal, in consequence of its not so soon filling the flues, owing to the pureness of the bitumen and the superior quality of the gas.

A coal mine now working at Chirra Poonjee produces a mineral, which does not leave one-fourth as much ashes as the Burdwan coal; the strata are nearly horizontal, requiring no pumps or machinery for drainage; it is delivered at the Sanatarium at 400 lbs. weight for 1s. The coal now worked is of the slaty kind, specific gravity 1.447, containing volatile matter, 36; carbon, 41; and a copious white ash, 23=100; seams of a superior coal, from two to four feet thick, have been more recently discovered contiguous to abundance of excellent iron ore. Coal has been recently discovered at Fatephúr (Nerbudda) which showed near the surface; water separated on a sand heat, 3.5; volatile matter not inflammable, 10.5; charcoal fixed, 22; earthly

residue red, 64=100. Specific gravity of coal worked at the mines on the Kosya or Cossyah hills, 1.275; composition volatile matter or gas, 38.5; carbon or coke, 60.7; earthy impurities, 0.8=100 (the ash is exceedingly small). The coal found near Hurdwar in the Himalaya mountains, has a specific gravity of 1.968, composition volatile matter, 35.4; carbon, 50; ferruginous ash, 14.6=100; coal found in Arracan, specific gravity, 1.308; gives out bitumen and gas on ignition: composition, volatile matter, much 66.4; carbon, 33; ash, 0.6=100.

The iron ore found in the south of India is excel-Mr. Heath is now producing excellent iron near Madras. The Himalaya mines supply, chiefly, varieties of red iron ore, affording from thirty to sixty per cent of metal. Near Kalsi, on the Jumna, there is an extensive bed of specular iron ore; red hematite, associated with micaceous iron ore, occurs in a large bed in gneis at Dhaniakat. At Rhamghur, on the road from Bhamouri to Almorah, there are beds of the scaly red iron ore, also in gneis; compact red iron ore occurs in clay-slate, containing beds of limestone at Katsari, on the Rhamganga. In some places a brown ore of the hydadit species, containing manganese, and affording a superior steel, is found. Boglipoor district is peculiarly rich in iron, and about Pointy and Siccary Gully, very large iron mines have been worked in former times; the ore is nodular, and yields from twenty to twenty five per cent. iron. The Sylhet hills produce in the greatest abundance fine granular iron ore like sand. Copper mines are worked at Dhanpur, Dhobri, Gangoli, Sira, Pokri, Khari, and Shor Gurang. The ore found in the Dhanpur mine is gray copper ore, which affords from thirty to fifty per cent. of copper; it is associated with malachite, or green carbonate of copper. The ores are contained in a compact red-coloured dolomite; hence mining operations can be carried on without the expense of wooden frame-work or masonry, The Pokri mine or mines, are situated in talc slate of a loose texture, and hence the working is more difficult. The ores are vitreous and purple copper, both of them rich in copper. The waters flowing from the mine are impregnated with sulphate of copper or blue vitriol. The Sira and Gangoli mines are situated in beds of indurated talc, which are enclosed in dolo-Sometimes the one, sometimes the other rock, form the walls of the mine. The iron is yellow copper or copper pyrites, mixed with iron pyrites and smaller portions of gray copper ore. The Khari and Shor Gurang mines are similarly situated, the ores are gray copper, yellow copper, or copper pyrites, and carbonate of copper. Mines exist to the northward of the Pennar river, thirty-six miles N. N. W. of Nellore, and thirty-seven west from the sea, near a village called Ganypenta, in Arrowsmith's map. copper ore prevails over a considerable tract of country; it consists of malachite, and of black anhydrous oxide of copper, with red and yellow ochre imbedded in micaceous schist. The ore differs from the English coppers essentially, in being free from iron pyrites and other deteriorating ingredients, as lead, antimony, sulphur, &c, which make that ore difficult to purify, whereas the Nellore ore becomes quite pure by simple smelting. A specimen of reduced metal sent with the ores to the Asiatic Society is of a very fine colour and highly malleable. On analyzing the ore, it was found to contain carbonic acid, 16-8; black oxide copper, 60-75; red oxide iron, 19-4; silica and loss, 3-05=100. Four different varieties examined by the secretary, contained from

thirteen to forty-seven per cent. of red oxide of iron and silex. Leud.—The most productive of these mines are situated on the river Tonse, near Deyrah Doon; The ore (a fine granular galena) is found in clay-slate and clay-limestone. It would be tedious to particularize other productions; two have been recently discovered. A native sulphate of alumina obtained from the aluminous rocks of Nepal, used by the native doctors to cure green wounds or bruises, yielding, on analysis, sulphate of alumina, 95; peroxide of iron, 3; silex, 1; loss, 1-100; and a native sulphate of iron is procured from the hills of Behar, and used by the dyers of Patna, yielding sulphate of iron, 39; peroxide of iron, 36; magnesia, 23; loss, 2—100. These two minerals, the natural productions of Nepal and Behar, may be had in the largest quantities, and would be found extremely useful in the manufacture of Prussian blue, calico printing and dycing. Common salt (muriate of soda).—Carbonate of soda and nitrate of potash occur in many districts forming the salt, soda, and nitre soils. A salt lake, twenty miles long by one and a half broad, is situate near Samber at Rajpoot Town, in latitude 26.53, and longitude 74.57.; it supplies a great portion of the neighbouring country with salt on the drying up of the lake after the rains. In Berar there is a salt lake, called Loonar, lying in a sort of cauldron of rocks; it contains in the 100 parts, muriate of soda 20; muriate of lime, 10; muriate of magnesia, 6. Natron and soda lakes are said to occur in the Himalaya range. Towards the sources of the Indus salt lakes were observed by Mr. Gerard at 16,000 feet elevation above the sea, and there is an extensive salt mine in the Punjaub.

The valuable diamonds and other precious stones found in Golconda, in Orissa, in Bundlecund, &c., require no detailed notice. Silver ore, of a rich quality, is obtained in different places. Gold is found in the beds of most rivers, particularly in Neilgherries; but it exists in abundance in the state of ore in Malabar. This precious metal has been discovered not only in Coimbatore, but throughout that tract of the country lying west and south of the Nielgherry mountains and Koondanad. It is found also in large quantities in various parts of India.

In Bengal land is now worth 67 years' purchase of the revenue. The increase of wealth throughout Bengal has been most rapid; notwithstanding the disadvantages under which the agriculturists labour, by the English markets being shut against their raw and manufactured produce, and the great number of artizans thrown out of employment by the introduction of piece goods, &c. from England; land purchased in Calcutta 30 years ago for 15 rupees is now worth and would readily sell for 300. Ten years ago a labourer in Calcutta received two rupees per month, now he is not satisfied with less than four or five rupees per month, and there is even a scarcity of workmen; 12 field labourers were formerly to be had for less than one rupee a day, now half that number could not be had at that rate of wages. Mr. Colebrook says, in 1804, in his Husbandry of Bengal, that "a cultivator entertains a labourer for every plough, and pays him wages, on an average, one rupee per mensem, and in some districts not half a rupee per mensem." A cabinet maker was glad to obtain eight rupees a month, for the exercise of his and of moral happiness.

skill, now he readily obtains 16 or 20 rupees for the same period. All handicraftsmen or labourers have risen in a like proportion; and as to the price of food it is sufficient to state one article as a criterion-rice, the staff of life in Bengal, was wont to be sold at eight annas (half a rupee) per maund (82 lbs.), its price has increased four fold, being now averaged at two rupees per maund. The wages of a Hindoo carpenter at Calcutta may be estimated at 6d., of a Chinese at 2s., and of the lowest European 6s. per day. This increase in the value of property may be mainly ascribed to the fixed settlement of the land revenue—to the security given to all species of industry—and thus inducing the surplus wealth derived from commerce to be invested in the soil: hence the rise in wages, and in the value of all commodities.

Comparison of the Wages of Artificers and other Public Servants, under the Peishwa's and British Governments in the Dukhein, in 1828 and 1814. [Col. Sykes' Report.]

Artificers, &c.	British rule in 1828.	Peishwa's in 1814.

It would be extremely desirable to ascertain the rates of wages, the prices of provisions, and the rental of land in the various districts of British India, and in particular to compare the present with the past. Wherever political security has been established, property of all species will rise in value; but where social rights are secured—where the state has no longer the power of taxing at its will and pleasure every species of industry—and particularly that basis on which all social prosperity is based (the land);—there, indeed, with a fertile soil—a genial climate—an industrious and dense population—and great mineral and commercial resources—it would be difficult to fix the limit of social wealth, of political greatness, and of moral happiness.

CHAPTER II.—CEYLON.

SECTION I. Ceylon (Singhala, Lanka, Serendib, or Taprobane), situate between the parallels of 5.56 to 9.50 N. latitude, and from 80. to 82. E. longitude, is one of the most magnificent islands on the face of the globe; the extreme length is about 270 miles from north to south, with an extreme breadth of 145 miles (an average of 100), and a superficial area of about 24,664 square miles.

Favourably situate at the W. entrance of the Bay of Bengal, it is separated on the N. W. from the Coromandel coast, by the Gulf of Manaar, 150 miles distant from Cape Comorin; on the S. and E. its beautiful shores are laved by the Indian Ocean. interior of the island is formed of ranges of high mountains, in general not approaching nearer to the sea than 40 miles, with a belt of rich alluvial earth, nearly surrounding the island, and well watered by numerous rivers and streams. A picturesque table land occupies the southern centre, and thence, towards the coast is a continuous range of low hills, and elevated flat land extending nearly to the seashore. To the west, the country is flat, and on the northern shore broken into verdant rocky islets, and a peninsula named Jafnapatam. The lofty central division of the island varies in elevation above the level of the sea, from 1,000 to 4,000 feet, but the range of table land may be estimated at from 2,000 to 3,000 feet, extending in length 67 miles by 50 miles wide. From this elevated region arise some conical mountains from 2,000 to 3,000 feet higher above the sea. The mountains run in general in continuous chains with the most lovely vallies the sun ever shone on between them; the hills clothed to the very summits with gigantic forests, from which issue magnificent cascades and foaming cataracts, that form in the vallies placid rivers and babbling brooks fringed with turfy banks, and all the beautiful verdure of the tropics. [See "Colonial Library."

II. Of the early colonization of Ceylon, Selan, Singhala, Lanka or Tuprobane, we know little certain. The original Singhalese, or Ceyloneze, are probably descended from a colony of Singhs, or Rajpoots (to whom, in appearance, even at the present day, they bear a striking resemblance) 500 years B. C. But the Malabars, it is stated, several times succeeded in invading the island 200 years B.C. At an early era the island seems to have attracted the attention of the western world; thus Dionysius, the geographer, mentions Taprobane, its ancient and classic name, as famous for its elephants; Ovid speaks of it as a place so far distant that it could be no advantage to have his fame extended thither; Pliny thought it the com-mencement of another continent, and extolled it for the purity of its gold and the size of its pearls. In the reign of Claudius, a Roman, who farmed (says the Rev. Mr. Fellows) the customs in the Red Sea, was driven in his bark by a gale of wind from the coast of Arabia to Taprobane, where he received a most favour-

able reception, and so extolled the glory of the imperial city, that the sovereign of Taprobane sent to Rome an embassy of four persons via the Red Sea. We have existing evidence that, in remote ages, Ceylon was an extensively peopled and civilized country (it has now only 58 mouths to the square mile). Near Mantotte are the ruins of a very large city, constructed of brick and mortar, and an immense artificial tank or reservoir for water, the basin of which is 16 or 18 miles in extent; an embankment about nine miles from the tank is formed of huge stones, eight feet long, four feet broad, and three feet thick (these are cemented together by lime); the length of the dam is 600 feet, the breadth about 60, and the height from 8 to 12 feet. This gigantic work is said to have been executed by the Hindoos, who made Mantotte the capital of a kingdom which they established over the northern parts of the island. Of an antiquity, however, more remote than the foregoing, are various buildings and works towards the interior, constructed of vast stones, elegantly cut and dovetailed-like into each other. No mortar has been used in some of the edifices, which still exist (as if in defiance of the ravaging hand of time), with visible inscriptions on them, which no existing human being can understand. Among the works of this remote age is the Lake of Kandely, near Trincomalee, which is 15 miles in circumference, formed by the artificial junction of two hills, which, in one part in particular, exhibits a parapet formed of huge blocks of stone, 12 to 14 feet long, and broad and thick in proportion. This parapet is at the base 150 feet broad, and at the summit 30 feet. By means of this wonderful structure, the adjoining high lands are connected.

It is also singular that arches are to be found in the parapet, and over them conduits, similar to those used by the Romans in Italy, and termed conduttori.

Belonging also to this age is a gigantic pagoda, 40 miles S. of Batticaloa, the base of whose cone is a quarter of a mile in circumference, surrounded by an enclosure one mile in circumference, consisting of a broad wall of brick and mortar, with numerous cells in it, and an entering colonade of stone pillars 10 feet high.

Mr. Brooke, in tracing the course of the Maha Villagunga, in 1825, came on the ruined tracks of several very extensive canals, one of which he estimated to have been from 5 to 15 feet deep, and from 40 to 100 feet wide. The natives told him that this canal was cut by people whose stature was forty feet high! The largest recorded bridge was one in the southern part of the island, stated to be 280 cubits (630 feet) long; the next in size was 193 feet long, across the Kaloo-Ganga, on the road from Adam's Peak to Bentotte. The remains of a stone bridge exist near the fort of Kalawo Oya, the stones of which are from 8 to 14 feet long, jointed into one another and laid in regular lines, the upright pillars being grooved into the rocks below; this bridge was built

15,000 years ago, and Captain Forbes demonstrates that the Singalese, at that remote period, used the wedge and chisel for splitting and shaping those huge blocks of stone, after the manner which has only been introduced into Great Britain in the nineteenth century.

It is recorded in ancient manuscripts, that Anorajhapoora, the ancient Cingalese capital, was surrounded by a wall 16 miles square; and indeed a list of streets of the city is still in existence. To the N. of the ruins of this place are six pagodas of immense magnitude, the form being half a sphere with a spire built on it; the two largest are each 270 feet high, of solid brick-work, once entirely covered with chunam (lime polished like marble); the solid contents of one of the largest is about 456,071 cubic yards, and with the materials of which it is composed, a wall of brick might be constructed 12 feet high, two feet wide, and 97 miles long; the roofs are composed of curiously carved rafters of wood, and the expense and labour employed in the whole of the structures must have been immense.

In the ancient histories of Trincomalee, it is stated by Sir Alexander Johnston, that two kings of Solumandelum, Manumethy Candesolam, and his son Kalocarta Mahurasa, reigned over the greater part of Ceylon, and over the southern peninsula of India, about the 512th year of the Cali Yug, or 4400 years ago, who constructed the great buildings and tanks, the remains of which are yet extant.

But we must leave these remote ages, and come to some later period. In the sixth century Ceylon was the chief mart for eastern commerce. In the sixteenth year of the reign of Praakrama Bahoo the 1st (A. D. 1153), the Singalese monarch sent a fleet of 500 ships, with an army on board, and provisioned for 12 months, to avenge the insults offered to the Singalese ambassador and to Singalese merchants by the King of Cambodiae and Arramana. This vast fleet was equipped in six months. In the thirteenth century it was visited by Marco Polo, who pretty accurately narrated the particulars of the island, which he described as "the finest in the world." The central situation of Ceylon had led to its port being frequented by ships from China, India, Arabia, &c. by which means Galle and Colombo, from their favourable situation, became entrepôts for the general commerce of the East. When the Portuguese first visited the island, A.D. 1505, they found it had for a long period been declining, owing to intestine wars and invasions from Malabar and Arabia. The Cingalese King availed himself of the assistance of the Portuguese Admiral (Almeida) for the expulsion of the invaders, promising in return an annual tribute in cinnamon. In 1518, the Portuguese, under Alvarenga, began to fortify themselves in Colombo, Galle, &c., and soon after they obtained complete possession of the maritime provinces, and drove the King of Kandy to such extremities, that he was glad to retain even possession of the interior provinces.

For a century the Portuguese held their sway, when in 1603, the first Dutch fleet arrived at Trincomalee and Batticaloa, and offered to assist the King of Kandy against the Portuguese. In 1632, a strong Dutch armament, acting in conjunction with the King of Kandy's forces, commenced a series of contests with the Portuguese, and after a long and sanguinary struggle, which lasted until 1656-7, the latter were finally driven from an island, of the sea coast of which they had been masters for nearly 150 years.

The Cingalese, however, soon found that they had

exchanged masters to no advantage; for, from 1656 to 1796, when the British in their turn came to the aid of the Kandians, the Dutch were engaged in a series of perpetual hostilities with their mountain neighbours. Nor were we more fortunate than our predecessors; for, in 1798, on the elevation of a new king to the Kandian throne, we became involved in hostilities, which led to our capture of the Kandian capital in 1803.

We did not, however, long retain the capital, the Kandians attacked us with great violence, compelled our troops to a precipitate retreat, massacred 150 sick soldiers in the hospitals, and having surrounded the British force, required them to lay down their arms; the commanding officer, Major Davie, unfortunately did so, the Malay troops were picked aside, and the whole English force instantly massacred, except three European officers retained as prisoners, and one mutilated corporal, who made his escape to Colombo with the melancholy intelligence. Until 1815 we retained the maritime provinces, while the King of Kandy kept the interior, but in that year the monarch being deposed on account of his repeated acts of oppression and cruelty (one act was making the wife of his prime minister pound to death her own children in a rice mortar), General Brownrigg was invited by the Kandian chiefs to take possession of the interior, and excepting an expensive and troublesome insurrection, which lasted from 1817 to 1819. Cevlon has ever since had the British sway established over the whole island.

Captains-General and Governors of Ceylon, whilst in possession of the Portuguese.—Pedro Lopez de Souza, Jerome de Azevedo, Francois de Menezes, Manuel Mascarenhas Homen, Nanha Alvares Pereira, Constantine de Say Noranha, D. George d'Almeida, George d'Albuque, Diego de Melho, Antoine Mascarenhas, Philippe Mascarenhas, Manuel Mascarenhas, Homen, Francois de Mello Castro, Antoine de Sousa Coutinho, under whose administration Colombo was surrendered to the Dutch; A. D. Mezely Menezes, last Captain-General (in command of Jaffna and Manar.)

Governors, whilst in the possession of the Dutch.—At Galle: William Jacobszen Coster, Commander at the surrender of that place; administration commenced 13th March, 1640. Jan Thyaz, President and Governor, 1st August 1640. Joan Matsuyker, Ordinary Councillor and Governor, 24th May 1646. Jacob Van Kittenstein, Governor, 26 Feb. 1650. Adrian Van der Meyden, Governor, 11th Oct. 1653.

Colombo: Adrian Van der Meyden, Governor, 12th May 1656. Ryklof Van Goens, Governor, 12th May 1660. Jacob Hustaar, Extraordinary Councillor of India, and Governor, 27th Dec. 1663. Ryklof Van Goens, Governor, from 19th Nov. 1664. Lourens Van Peil, Commander, President, Governor, and Extraordinary Councillor of India, 3rd Dec. 1680. Thomas Van Rhec, Governor, 19th June 1693. Paulus de Rhoo, appointed Governor and Director of Ceylon, 29th Jan. 1695. Gerrit de Heer, Governor, 22d Feb. 1697. The members of the Council, 26th Nov. 1702. Mr. Cornelis Johannes Simonsz, Governor, May 1763. Hendric Becker, Governor, 22 Dec. 1707. Mr. Isaak Augistin Rumph, Governor and Extraordinary Councillor of India, 7th Dec. 1716. Arnold Moll, Commander at Galle, 11th June 1723. Johannes Hertenberg, Governor, 12th January 1724. Jan Paulus Schagen, Commander at Galle, 19th Oct. 1725. Petrus Vuyst, Governor, and Extraordinary Councillor of India, 16 Sept. 1726. Stephanus Vers-

luys, Governor, and Extraordinary Councillor of India. administration commenced 27th August 1729. Gualterus Woutersz. Commander of Jaffnapatam, 25th Aug. 1732. Jacob Christian Pielaat, Extraordinary Councillor of India, and Commissary 21st Dec. 1732. Diederick Van Domburg, Governor, 21st Jan. 1734. Jan Maccara, Commander of Galle, 1st June 1736. Gustaff Willem Baron Van Imhoff, Extraordinary Councillor of India, and Governor, 3d July 1736. Willem Maurits Bruininck, Governor, 12th March 1740. Daniel Overbeck, Governor, and Extraordinary Councillor of India, 3d Jan. 1742. Julius Valentin Stein Van Gollnesse, Extraordinary Councillor of India, 11th May 1743. Gerrard Van Vreeland, Extraordinary Councillor of India, and Governor, 6th March 1751. Jacob de Long, Commander of Jaffnapatam, administration commenced 26th Feb. 1751. Joan Gideon Loten, 30th Sept. 1752. Jan Schreuder, Councillor and Governor of India, 17th March 1757. Lubbert Jan Baron Van Eck, Governor (under whose administration Kandy was taken on the 19th Feb. 1763), 11th Nov. 1762. Anthony Mooyart, Commander of Jaffnapatam, 13th May 1765. Iman Willem Falck, Governor, &c. 9th August 1765. Willem Jacob Van de Graaf, Governor, &c. of India, 7th Feb. 1785. Joan Gerard Van Angelbeek, Governor, &c. under whose administration Colombo surrendered to the arms of his Britannic Majesty, on the 16th Feb. 1796.

English Governors.—The Hon. the Governor of Madras in Council; administration commenced 16th Feb. 1796. The Hon. Frederick North, 12th Oct. 1798. Lieut.Gen. Right Hon. Sir Thomas Maitland, G.C.B. 19th July 1805. Major-Gen. John Wilson, Lieut.-Gov., 19th March 1811. General Sir Robert Brownrigg, Bart. G.C.B. 11th March 1812. Major-Gen. Sir E. Barnes, K.C.B. Lieut.-Gov. 1st Feb. 1820. Lieut.-Gen. the Hon. Sir E. Paget, K.C.B. 2d Feb. 1823. Major-Gen. Sir J. Campbell, K.C.B. Lieut.-Gov. 6th Nov. 1822. Lieut.-Gen. Sir E. Barnes, G.C.B. 18th Jan. 1824. Major-Gen. Sir J. Wilson, K.S.S. Lieut.-Gov. 13th Oct. 1831. The Right Hon. Sir Robert Wilmot Horton, G.C.B. 23d Oct. 1831.

III. Colombo .- Ceylon may not inaptly be termed the Malta of the Indian Ocean. Its commercial capital, Colombo, is situate on the S.W. coast, lat. 6.57. N., long. 80.0. E., defended by a strong fort (built on a peninsula projecting into the ocean) measuring one mile and a quarter in circumference, having seven principal bastions of different sizes, connected by intervening curtains, and defended by three hundred pieces of cannon. The fortress is nearly insulated, two-thirds of the works being almost laved by the sea, and, with the exception of two very narrow and strongly guarded causeways, the remainder protected by a fresh-water lake and a broad and deep ditch with a fine glacis. Four strong bastions are scaward, and three face the lake, and command the narrow approach from the Pettah, or native town outside the walls. The sea itself is additional strength for the fortress, for on the extensive southern side the surf runs so high on a rocky shore, that any attempt at landing troops would be attended with certain destruction; and on the west side, where the sea is smoother, the approach is completely commanded by the batteries; and a projecting rock, on which two compact batteries are placed, entirely protect the roadstead.

TRINCOMALEE.—Trincomalee, the maritime capital of the island (Colombo is the seat of Government), is, in a political point of view, of the most importance, not merely as regards Cevlon, but from being,

as Nelson justly described it from personal know-ledge, "the finest harbour in the world." Trincomalee is on the E. of Ceylon, lat. 8.32 N., long. 81.17 E., 150 miles N.E. from Colombo (to which a fine road has been opened), 128 miles travelling distance from Kandy, and within two days' sail of Madras. physical aspect is that of a narrow neck of land or isthmus, connecting the peninsula on which the fort of Trincomalee is built (which juts out a considerable distance into the sea) to the main land. Towards the W. this isthmus gradually expands itself into a plain of considerable extent, which is bounded on the S. E. by a ridge of lofty mountains, on the N.W. by low wooded hills, and on the W. at the distance of about a mile from the fort, by the inner harbour. As far as the eye can reach from the fort, excepting in the immediate neighbourhood of the bazaar, the country is covered with wood.

The scenery of the spot has been compared to Loch Katrine on a gigantic scale (the vast harbour appearing land-locked), the grandeur of which cannot be surpassed. The fortifications sweep along the rocky coast, upwards of a mile in length, encompassing the base of a steep hill on the sides connected with the adjacent land. The town and fort are placed at the bottom of a rock, and joined to a narrow neck of land running out towards the sea, and separating the inner harbours from two outside bays, which lie on either shore of a three-sided or corned promontory.

"Dutch" and "Back" bays are entirely commanded by the artillery on the S. and N. side of the fortified rock, and the mouth of the harbour is protected by Fort Ostenburg, situate on a mount three miles W. of Trincomalee. No communication can take place with the promontory (the part that projects into the sea being protected by steep rocky cliffs) except through the well-covered gates of the fortress; and the best engineers have pronounced their opinion of its impregnability if it be well garrisoned.

Fort Frederick, where the European troops (consisting generally of four companies of a European regiment, a company of royal engineers and artillery, and detachments of the Ceylon rifles) are stationed. is a fortified neck of land projecting into the sea, separating Back Bay from Dutch Bay. The ground rises gradually from the glacis to the flag-staff, a height of about 300 feet, and then slopes towards the sea, till abruptly terminated by a perpendicular cliff. from which a plummet may be dropped to the water, a distance of 240 feet. The depth at the base is so great, that a line-of-battle ship may pass close to it. None but military reside within the works. prospect from the barracks towards the sea is only bounded by the horizon, whilst towards the land, the eye ranges over the splendid scenery of the inner harbour, fort Ostenberg, and a long extent of wooded country.

Fort Ostenberg is nearly three miles from Fort Frederick, and is built on the termination of a ridge of hills that partly form the boundary of the inner harrbour. The fort commands the entrance, and its base is washed by the sea on three sides; it also protects the dock-yard, which is immediately below it. A detachment of Royal Artillery are quartered there, and a company of Europeans.

The vicinity of Trincomalee is a wild uncultivated

The vicinity of Trincomalee is a wild uncultivated country, abounding with game of all kinds, from a snipe to an elephant. Quail, jungle fowl, moosedeer, and monkeys, are found on the Fort Ostenberg ridge. The Mahavilla Ganga, which runs past Kandy, empties itself into the sea not far from Trincomalee.

It has lately been surveyed by Mr. Brooks, the master attendant, who reports favourably of its capabilities. It is navigable for some distance; and he is of opinion, that with a little expense, it might be made so to within 40 miles of Kandy, and thereby open a water communication, by which the coffee, timber, and other produce of the interior could be brought to the sea-coast.

The harbour, beautifully diversified with islands covered with a luxuriant vegetation, is spacious enough for holding all the ships in the world, accessible at all seasons; and the depth of water within the bay of Trincomalee is so great, that in many places, not far from the shore, it is unfathomable, and vessels may lie close alongside the rocks in perfect safety.

Point De Galle is another strong fortress and excellent harbour, situate at the very southern extremity of the island, in lat. 6.1 N., long. 80.10 E., distant 78 miles along the sea shore, S. S. E. from Colombo. The fort is a mile and a quarter in circumference, on a low rocky promontory, commanding the narrow and intricate entrance leading to the inner harbour. The extensive and substantial works are, like those of Colombo, surrounded for the greater part by the ocean, and there is every convenience of water, &c. capable of enabling the fortress to stand an extended siege. The outer and inner harbours are spacious, and the inner secure at all seasons of the year.

But if the sea coast be well defended, not less so is the interior; every hill is a redoubt, and the passes in the mountains might be defended by a resolute enemy by rolling the stones off the summits of the heights. Kandy, the capital of the interior (85 miles from Colombo) is situate in an amphitheatre commanded by forts on the surrounding hills; the vale has but two accessible entrances well guarded, and the city within four miles is nearly surrounded by a broad and rapid river (the Maha-Villa Gunga) filled with alligators.

The roads in the maritime country are through groves of cocoa-nut trees along the sea coast. Carriage roads extend from Colombo as far as Chilaw to the northward, and from Colombo through Galle as far as Matura to the southward. The main road from Colombo to Kandy (the Simplon of the East, on which there is now a "mail coach and four !") is a work of stupendous magnitude; hills have been cut away, vallies filled up, and (near Kandy) a tunnel five hundred feet long cut through the mountain, while rapid and unfordable torrents and rivers have had elegant iron and wooden bridges thrown across them. A capital road has been opened between Trincomalee and Colombo, and, before a few more years have clapsed, every town in the island will be connected by roads passable at all seasons.

Paradeinia bridge, which has been thrown over the rapid and unfordable river Maha Villa Gunga, consists of a single arch with a span of 205 feet, principally composed of satin wood; its height above the river at low water-mark is 67 feet, and the roadway is 22 feet wide. The arch is composed of four treble ribs transversely, distant from each other five feet from centre to centre; the sum of the depths of these ribs is four feet, which, with two intervals of two feet each, makes the whole depth of the arch eight feet; the arch beams, with the exception of those next the abutments, are 16 to 17 feet long and 12 inches thick, abutting against each other with an unbroken section, secured at the joints by the notched pieces which support the road-way, the latter being held in their position by means of cross ties below and above the arch, and immediately under the road-way; these cross-ties, with the aid of diagonal braces, which

are also locked into them, serve to give stability and firmness to the whole structure, which has no other material but timber in its construction.

IV. The north division of the island is sandy and calcareous, resting upon madrepore, as it is little elevated above the level of the sea; the surface of the clevated lands of Saffragam and Lower Ouva is much stronger and well adapted for tillage; the granite soil of the interior produces the most luxuriant crops wherever there are a sufficiency of hands to call forth the gifts of industry. The soil of the southern plains is sandy, resting on a strong red marl termed "Cabook," the base of which is granite, and in the neighbourhood of Colombo, the lands are low and subject to inundations from the Mutwal river.

The foundations of the island are evidently calcareous, yet the greater proportion of its soil is siliceous, in many places (as in the cinnamon gardens near Colombo) the surface being as white as snow, and formed of pure quartz sand. The soils of Ceylon are stated to be in general derived from the decomposition of gneis, granite, or clay, ironstone, the principal ingredient being quartz in the form of sand or gravel, decomposed felspar in the state of clay, combined with different proportions of the oxide of iron, quartz in most instances being the predominating substance, and in many places, forming ninetenths of the whole, the natural soils seldom containing more than three per cent. vegetable matter. The most productive earths are a brown loam resulting from the decomposition of gneis or granite exceeding in felspar, or a reddish loam originating from the decomposition of clay ironstone: the worst soils are those where quartz predominates, proceeding from the disintegration of quartz rock, or of granite and gneis, containing a very large proportion of quarts. Regular granite is not of very common occurrence; well formed gneis is more abundant, but sienite is not common: pure hornblende, and primitive greenstone, are far from uncommon; and dolomite sometimes of a pure snow white, well adapted for the statuary occasionally constitutes low hills in the interior: limestone is principally confined to the northerly province of Jafnapatam, and the island appears to be surrounded by an interrupted chain or belt of sandstone, interspersed with coral.

The coral of the Pamban banks is not the zoophite of the Mediterranean and the South Seas, but a light, porous, crumbling substance, sometimes cut and shaped into bricks by the Dutch, and more frequently burnt into lime. Of this species of lime the late fort of Negapatam was built; and so great is the hardness which it acquires by long exposure to the weather, that when Major De Haviland, some years ago, requested a specimen of the masonry of the fort to be procured and sent up to him, the iron crows and other instruments used in detaching the blocks were blunted and bent in all directions by the solidity of the chunam, which is far more adhesive than that obtained from shells. A stone capable of being converted into so valuable a cement, would almost pay the expense of its excavation. The ridge called 'Adam's Bridge,' consists of a mass of loose sand, with no firm foundation of rock or clay to support it. The sand appears to be transported in great quantities from one side to the other of the ridge, according to the direction of the monsoon; for, in addition to the action of the surf, which washes it over to the lee side, where it is narrow,-in other parts, where it is broad, streams of it, in a dry state, are carried across by the wind itself, and deposited there. The channels through the strait are very shallow, and not more than sufficient for the small country boats to pass; but it is stated, in the records of the Dutch government at Ceylon, that a Dutch fleet once passed through the channels of Adam's Bridge to avoid a Danish fleet in chase of them. It has been justly observed, that if such really were the case, the channels must have been in a very different state, as some parts of the 'bridge' are now dry, and a few feet of water is the greatest depth any where on it.

The metallic riches of Ceylon are yet almost unknown. The island is principally composed of granite, with veins of quartz, hornblende and dolomite: rock and shell-limestone are found near Kandy and Jaffnapatam, iron and plumbago (the latter now forms an article of considerable export) are abundant, and gold (some say also quicksilver) and silver are found in the hill-streams; amethyst, topazes, cats-eyes, garnet, cinnamon stone, sapphires, rock crystals, shorl, zircon, rubies, and diamonds, &c. the island has long been famed for. The celebrated pearl fishery in the Gulph of Manaar my limits forbid me here dwelling on. Nitre caves are numerous; alum is plentiful, and the coast from Chilaw to Manaar and Jaffna on the western side, and from Tanzalle through the Mahagampatoo to the eastward, contains the most extensive and valuable salt formations which are to be met with in India. The Leways, or natural deposits, at Hambantotte, yield the largest supply of the finest salt.

The natural history of the pearl oyster is imperfectly known. The banks have been found suddenly to fail when a productive fishery had been anticipated. At certain seasons the young oysters are seen floating in masses, and are carried by the current round the coast; they afterwards settle and attach themselves by a fibre or beard to the coral rocks, and on sand they adhere together in clusters. When full grown, they are again separated, and become locomotive. The pearls enlarge during six years; and the oyster is supposed to die after seven years; they are fished at a depth of 36 to 40 feet in the calm season. The length of time which the divers remain under water is almost incredible by an European.

V. Ceylon is under the complete influence of the monsoons, the N.E. prevailing from November to February, and the S. W. from April to September; the intervening or equinoctial months having variable winds or calms. The eastern side of the island is hot and dry like the Coromandel coast, occasioned by the N. E. monsoon; the opposite division of the isle is temperate and humid like the southern Malabar shore under the influence of the S. W. monsoon; the climate, however, of the southern coast is more congenial to Europeans than perhaps any part of the continent of India. On the whole the N. and N. E. may be said to be dry, and the S. W. moist. The S. W. wind is more general all over the island, as both at Colombo and Trincomalee it blows for five months in succession, whereas the N. E. blows at Colombo only in the months of December and January, seldom beyond them. Among the mountains of the interior, the winds are modified by local circuinstances, according to their proximity to the E. or W. coast: and the highest and most central land have peculiarities of their own. Thus, at Badulla, in Upper Ouva (where there is an excellent hospital and military station), the wind for three-fourths of the year is from the N. E., and in June, July and August

Owing to its intertropical position, the quantity of rain that falls in Ceylon is very great, probably, about

three times that of England. Being less frequent the showers are much heavier while they last, a fall of two or three inches being not uncommon in 24 hours: the average of the alpine region is about 84 inches; on an average however, less rain falls on the east than on the west side of the island; a lofty mountainous ridge often acting as a line of demarcation, one side of which is drenched with rain, while the other is broiling under an unclouded sun: Colonel Colebrook in his valuable report on this lovely island, justly remarks, that the climate and seasons of the north and south districts are strikingly contrasted. On one side of the island, and even on one side of a mountain, the rain may fall in torrents, while on the other, the earth is parched and the herbage withered; the inhabitants may be securing themselves from inundations, while in another they are carefully husbanding the little water of a former season which may be retained in their wells and tanks. Thus throughout the southern division where the rains are copious (owing, probably, to its exposure to the southern ocean) canals are not less useful in draining the lowlands, than in the conveyance of produce; and embankments are much required to secure the crops from destruction during the rainy season; while in the north division of the island. tanks and water-courses are in the greatest request, to secure the inhabitants against the frequent droughts to which those districts are liable. At Colombo the annual quantity of rain is about 100 inches, of which, 80 fall in April, May, October and November.

Owing also to its insular position, no climate is more favoured than Ceylon, its temperature being moderate when compared with the scorching plains of India. Along the sea-coast the mean annual temperature may be taken at 80° Fahrenheit; the extreme range line from 680 to 900, and the medium from 750 to 850. The climate of the mountains is of course cooler, but its vicissitudes greater. At Kandy, which is 1,467 feet above the sea, the mean annual temperature is 78°; at the top of Namini Cooli Kandia, 5,548 feet high, Dr. Dany found the tempera-ture at eight A. M. 570. At Colombo (the capital) the mean daily variation of the temperature does not exceed 30, while the annual range of the thermometer is from 760 to 8610, Fah. At Galle, the mean daily variation is 40, and the annual range 710 to 870. Jaffnapatam, mean daily variation 5°, annual range 70° to 90°. Trincomalee, greatest daily variation 17°, annual range 74° to 91°. At Kandy, (the capital of the mountain or table land in the interior) mean daily variation 60, annual range 660 to 860. At Newera Ellia, a military convalescent station, mean daily variations as high as 11°, and annual variation from 350 to 800.

The climate of Ceylon, where the soil is not cleared, is undoubtedly subject to pernicious miasmata, arising from stagnant marshes, and dank and noisome jungles, and even when the jungles are cleared, it requires the sun to act on them for some time before the unhealthy miasmata are dissipated; at certain seasons, therefore, endemic fevers appear in situations favourable to their propagation, but the whole island is becoming more uniformly salubrious as it becomes cleared and cultivated. The environs of Trincomalce, which were formerly very unhealthy, have become much less so by clearing the jungles in the environs, and if the salt water lake ('Snake Island,' I think it is termed) to the northward of Colombo were cleared, the maritime capital of Cey-

level of 2.107 feet.

of the healthiest and pleasantest residences in India.

It is true, that our troops have suffered much in Cevlon, but it should be recollected, that as compared with the Indian army, their wear and tear of duty is in Ceylon, of making the troops commence marches much severer than the latter, and they have not the at night.

lon, though within 80 of the equator, would be one | facilities of water communication which the Ganges and its tributaries afford; the one country is in many parts quite unpeopled, and the other comparatively civilized; add to which, a pernicious system prevails

* The Rain Gauge, shewing a total of 84.3 inches, is for Kaudy (in 1819), in the interior, which shews the average of the mountain districts: on the sea shore, as at Colombo, the average annual fall of rain is from 75 to 80 inches.

+ Badulla is situate on a plain, surrounded by hills from 1 to 3,000 feet, in a mountainous country, in the south extremity of Ceylon, having the sea at 40 to 50 miles distant on the east, south and west sides; the elevation above the occan

Ellia, S. W. from Kandy, 50 miles, 14 from Fort M'Donald, 15 from Maturatte, and 122 from Colombo. The road between Newera Ellia and Kandy leads through a wild and mountainous country, the scenery always picturesque, sometimes magnificent in the extreme; at one time, a traveller is surrounded by steep and inaccessible mountains, whose sides are clothed with dense forests; rocks of an enormous size, deep and precipitate ravines, and cataracts rushing with foaming velocity from the heights, diversify the scene. The height of Newera Ellia plain (four miles long, and one and a half broad) is 6,000 feet above the sea, and is surrounded by steep mountains of irregular height (covered with wood to the very summit) one in particular, rising 2,000 feet above the level of the Newera Ellia river, which meanders through lovely banks across the plain. The climate is delicious, never approaching tropical heat in summer, and yielding ice in winter; the mean temperature by day and night for the entire year 550. The water is so pure as to form a transparent solution with nitrate of silver; several chalybeate springs have been met with. The daisy, buttercup, violet, ribwort, dandelion, barbery, briar, &c. flourish indigenously; the rose, pink, mignionette, and carnation, are as fragrant as in England; delicious strawberries are abundant, and potatoes, carrots, artichokes, peas, beans, salads, cabbages, turnips, parsnips, and in fact, every British culinary vegetable thrive luxuriantly. The soil is of a deep black mould, resting on a stratum of yellow clay and gravel, numerous varieties of beautiful quartz exist, and the frequenters of the climate within a few degrees of the equator, will learn with astonishment, that a fire is always enjoyed by night,

A delightful station has been formed at Newera and frequently in the day. Limestone has been found.

VI. That Ceylon was formerly extensively peopled is evident from the works and structures before alluded to, but it would appear the number of the inhabitants had been declining for the last four or five centuries. and it is doubtful even now (although an increase has commenced in the maritime provinces, which had in 1814,—mouths, 475,883; and in 1824, 595,105—increase in ten years, 119,222) whether on an area of 24,000 square miles, there are 1,000,000 mouths. Colonel Colebrooke states in his report, that the population in 1824 was, in the southern or Cingalese provinces, 399,408; in the northern or Malabar districts, 195,697; and in the interior or Kandyan provinces, 256,835, total, 852,940. The returns from the maritime provinces are doubtless correct, as the village registers of marriages, and births, and deaths are kept as punctually there as in England, but having myself traversed the Kandyan provinces more extensively perhaps than any European, I should think the estimate of their population is under rather than over the mark; it is to be feared, however, that the decreasing of the semi-barbarous inhabitants of this splendid region has scarcely reached its acme, perhaps, it may now be considered stationary, as the comforts of the people are on the increase.

The following in some respects complete view of the population is highly interesting; it shews how thinly the island is peopled, there not being in some districts more than four, five, or six mouths to the square mile! Comparing the births with the deaths it would appear at least in the maritime provinces that the population is on the increase.

Census taken in the year 1832 of the Population of Ceylon, and of the Births, Marriages, and Deaths.

Population of Ceylon, 1,009,008.

The following table demonstrates that in the Colombo district, at least, population is on the increase; and it will be observed that the augmentation (except in the fort and pettah) has been steady for the last five years.

The population of the island, although comprising a variety of different nations, may be divided into four distinct classes:—first, the Singalese or Ceylonese (descended, as some say, from the Sings or Rajpoots of Hindoostan, and by others from the Siamese) proper, who occupy Kandy, and the S. and S. W. coasts of the island from Hambantotte to Chilaw. Second, the Malabars or Hindoos, who invaded Ceylon from the opposite coast, and are in possession of the north and east coasts, and of the peninsula of Jaffnapatam. Third, the Moors or descendants of the Arabs, or perhaps, from Mahomedans of Upper India, who are dispersed all over the island (as the Moslems are over Hindoostan) and in Pultam district form the
